We are in the process of applying for trademark registration of our logo, which is pending as on the date of filing this Draft Red Herring Prospectus. Our application may not be allowed or third parties may challenge the validity or scope of this application or the trademark if the application is approved. If we fail to successfully obtain or enforce our trademark, we may need to change our logo. - 5. *Registration of our logo/tradename “Inventure Growth & Securities Limited” is pending before the Trademark Registry, Mumbai. If any of our applications for registration are not accepted or if any order against us is passed in the oppositions filed, we may lose the statutory protection available to us under the Trade Marks Act, 1999 for such trademarks.***

The application for registration of our logo “Inventure Growth & Securities Limited” is pending before the Trademark Registry, Mumbai. We believe that the broking business is based on trust and brand awareness. As such, we are dependant on our logo and its protection *via* copyright laws. We have applied for registration of our logo under classes 38 and 41. To eliminate any risk of opposition for the same, we have advertised the same in the newspapers. In the instance of non-acceptance of such right in our favour, or any order against us due to opposition filed against our trademark applications, may result in our losing the statutory protection available to us under the Trade Marks Act, 1999. For further details regarding the same, please refer chapter titled “Our Business” beginning on page 63 of this Draft Red Herring Prospectus.

- 6. *Our Directors have interest in certain companies, which are engaged in similar businesses, which may create a conflict of interest. Further we do not enjoy contractual protection by way of a non – compete or other agreement or arrangement with our Group Entities.***

Our Non-Executive Director, Mr. Pravin N. Gala, is the director on the board of Nipra Financial Services Private Limited which is engaged in the stock broking business. This may create a conflict of interest with regards to his decisions and interest in our Company. We have not entered into any non – compete or other agreement or arrangement with Nipra Financial Services Private Limited and Anupam Stock Broking Limited or Mr. Pravin N. Gala. For further details please refer to paragraphs titled “Interest of Directors” beginning on page no. [●] of this Draft Red Herring Prospectus.

- 7. *We have not made any alternate arrangements for meeting our working capital requirements. Any shortfall in raising / meeting the same could adversely affect our operations and financial performance.***

As on date, we have not made any alternate arrangements for meeting our working capital requirements. Our business involves significant working capital. We meet our working capital requirements through internal accruals and debt. Any shortfall in our internal accruals and our inability to raise debt would result in us being unable to meet our working capital requirements, which in turn will negatively affect our financial condition and results of operations.

- 8. *We have not identified any alternate source of financing the ‘Objects of the Issue’. If we fail to mobilize resources as per our plans, our growth plans may be affected.***

We have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds may delay the implementation schedule and could adversely affect our growth plans.

For further details please refer to the chapter titled “Objects of the Issue” beginning on page 39

of this Draft Red Herring Prospectus.

- 9. *Our Company has unsecured loans which are repayable on demand.***

As on September 30, 2009 our Company has unsecured loans amounting to Rs. 16,00,000/- from our Director, Mr. Virendra Singh, which is repayable on demand. Any demand from lenders for repayment of such unsecured loans, may adversely affect our business operations

- 10. *We intend to utilize the proceeds of this Issue towards investments in our unlisted subsidiary, by subscribing to the equity share capital and by providing an interest bearing loan, repayable within a period of 5 years. Hence, returns on such investments cannot be assured.***

We intend to utilise a significant part of the Proceeds to invest in one of our Subsidiaries, Inventure Finance Private Limited by way of subscribing to its share capital as well as by providing an interest bearing loan, repayable within a period of 5 years. We intend to utilize Rs. 3,000 lakhs in IFPL constituting [●]% of the Proceeds. IFPL is engaged in businesses which has contributed less than 25% to our revenues in the last three fiscal years. Further, these funds will be utilised at the discretion of the management of the Subsidiary. IFPL is an unlisted company and its activities and records are not subject to public scrutiny. Further, our Company is not assured of any dividends and/or interest payments pursuant to such investments. For further details, see the section titled “Objects of the Issue” beginning on page 39 of this Draft Red Herring Prospectus.

- 11. *We are substantially dependent on our securities brokerage and Arbitrage business.***

We are dependent on our securities brokerage business and trading business, which contributed 77.78% and 67.54% of our total consolidated revenues for the years 2007 - 08 and 2008 - 09 respectively. Although our strategy is to actively develop other lines of business, securities brokerage business and trading business will continue to constitute a significant portion of our revenues and operating profit and any decline in our securities brokerage business and trading business will have a material adverse affect on our financial condition and operating results.

- 12. *Material changes in the regulations that govern us could cause our business to suffer and the price of the Equity Shares to decline.***

The securities market and our business are subject to extensive regulation including by SEBI, RBI, FMC and other governmental regulatory authorities. Additionally, we are also regulated by industry self-regulatory organizations, including the Stock Exchanges, the Commodities Exchanges and the Depositories. The regulatory environment in which we operate is also subject to change and we may be adversely affected as a result of new or revised legislation or regulations imposed by SEBI, other governmental regulatory authorities or self-regulatory organizations. We may also be adversely affected by changes in the interpretation or enforcement of existing laws and rules by these governmental authorities and self-regulatory organisations. We are SEBI registered stockbrokers and are members of several exchanges such as the BSE, NSE, MCX-SX and the OTCEI. As such, brokers are subject to regulations which cover all aspects of the securities business, including sales methods and supervision; trading practices among broker - dealers and the conduct of directors, officers and employees of broker - dealers.

Compliance with many of the regulations applicable to us involves a number of risks, particularly in areas where applicable regulations may be subject to varying interpretation. The requirements imposed by securities regulators are designed to ensure the integrity of the financial markets and to protect customers and third parties who deal with us. Consequently, these regulations often serve to limit our activities, including through capital adequacy, credit concentration and market conduct requirements. If we are found to have violated an applicable regulation, administrative or judicial proceedings may be initiated against us that may result in trading bans, censures, fines, deregistration or suspension of our brokerage activities, the suspension or disqualification of our officers or employees, or other adverse consequences. The imposition of any of these or other penalties could have a material adverse effect on our business, reputation, financial condition and results of operations.

We also are subject generally to changes in Indian law, as well as to changes in regulations and accounting principles. There can be no assurance that the laws governing the Indian financial services sector will not change in the future or that such changes would not adversely affect our business and future financial performance.

- 13. *We require certain regulatory approvals and periodical renewals for conducting our business. Any failure to obtain or retain such approvals in a timely manner, or at all, may adversely affect our operations.***

We require certain approvals, licenses, registrations and permissions under various regulations, guidelines, circulars and statutes regulated by authorities such as SEBI, RBI, Stock Exchanges, commodities exchanges, Depositories, FMC and certain other regulatory and government authorities, for operating our business. In particular, we are required to obtain a certificate of registration for carrying on each of our business activities from SEBI and other such regulatory authorities that are subject to numerous conditions. If we fail to maintain such registrations and licenses or to comply with applicable conditions of such licenses, or a regulator claims we have not complied with such conditions, our certificate of registration for carrying on a particular activity may be suspended and/or cancelled and we will not then be able to carry on such activity. This will materially and adversely affect our business, financial condition and results of operations.

We cannot assure you that we will be able to obtain approvals in respect of any application made by us in the future, in a timely manner or at all. For further details, please see section entitled “Regulations and Policies in India” and “Government and Other Approvals” at page nos. 257.

14. *Increases in capital commitments in our trading and other businesses may increase the potential for significant losses.*

The trend in capital markets is toward larger and more frequent commitments of capital by financial brokerage house in many of their activities. We may be subject to increased risk as we commit greater amounts of capital to facilitate primarily client – driven business.

We may enter into large transactions in which we commit our own capital as part of our trading business. The number and size of these large transactions may materially affect our results of operations in a given period. We may also incur significant losses from our trading activities due to market fluctuations and volatility from quarter to quarter. We maintain trading positions in equity markets to facilitate client trading activities and at times these positions can be large and concentrated in a single issuer. To the extent that we own assets, *i.e.*, have long positions, a downturn in the value of those assets or in those markets could result in losses. Conversely, to the extent that we have sold assets we do not own, *i.e.*, have short positions, an upturn in those markets could expose us to potentially unlimited losses as we attempt to cover our short positions by acquiring assets in a rising market.

15. *The limited operating history of our subsidiaries makes it difficult to evaluate our Company’s financial statements.*

Two of our Subsidiaries IWL and IIBPL were formed in the year 2008 and have a limited operating history; similarly the other two Subsidiaries ie IFPL was acquired in November 2007 and ICL was acquired in August 2008, consequently, consolidated financial information is available only for the Financial Years 2008 and 2009 and six months period ended September 30, 2009. It is therefore not possible to compare the historical financial results for the Issuer and the subsidiaries period on period. To assist the reader to evaluate our results of operations and financial condition, the historical financial results and the cash flows of IGSL have been included in this Draft Red Herring Prospectus for the Financial Years 2005, 2006, 2007, 2008, 2009 and six months period ended September 30, 2009.

16. *Our growth will depend on our ability to develop our brand and failure to do so will have a negative impact on our ability to compete in this industry.*

We believe that continuing to build our brand, particularly in our new businesses, like insurance advisory services, commodities broking, wealth management and portfolio management will be critical to achieving widespread recognition of our services. Promoting and positioning our brand will depend largely on the success of our marketing efforts and our ability to provide high quality services. Brand promotion activities may not yield increased revenues, and even if they do, any increased revenues may not offset the expenses we incur in building our brand. If we fail to promote and maintain our brand, our financial conditions and results of operations could be adversely affected.

17. *Our risk management policies and procedures may leave us exposed to unidentified risks or unanticipated levels of risk.*

The policies and procedures we employ to identify, monitor and manage risks may not be fully effective. Some methods of risk management are based on the use of observed historical market behaviour. As a result, these methods may not predict future risk exposures, which could be significantly greater than the historical measures indicate. Other risk management methods depend on evaluation of information regarding markets, clients or other matters that are publicly available or otherwise accessible by us. This information may not be accurate, complete, up-to-date or properly evaluated. Management of operational, legal and regulatory risk requires, among other things, policies and procedures to properly record and verify a large number of transactions and events. We cannot assure you that our policies and procedures will effectively and accurately record and verify this information.

We seek to monitor and control our risk exposure through a variety of separate but complementary financial, credit, operational and legal reporting systems. Nonetheless, the effectiveness of our ability to manage risk exposure cannot be completely or accurately predicted or fully assured. For example, unexpectedly large or rapid movements or disruptions in one or more markets or other unforeseen developments could have a material adverse effect on our results of operations and financial condition. The consequences of these developments could include losses due to adverse changes in inventory values, decreases in the liquidity of trading positions, higher volatility in earnings, increases in our credit risk to customers as well as to third parties and increases in general systemic risk.

18. Our operations are significantly concentrated in the western region, and failure to expand our operations may restrict our growth and adversely affect our business.

As on the date of this Draft Red Herring Prospectus, our operations are mainly focused in the western India. As such, a substantial portion of our revenues are generated from operations in western India. We believe that future growth in business and revenues will be achieved through a pan-India footprint. Failure to expand our operations either through branches, business associates or otherwise may restrict our growth potential and adversely affect our results of operations. Further there is no guarantee that the capital which is deployed by our Company towards setting up these branches will deliver profitable results.

19. Our clients deal in securities and any default by a client could result in substantial losses.

We require clients to deposit a minimum initial margin and then to pay the balance settlement amount by the pay-in date for the transaction undertaken by us on their behalf. If a client is unable to pay this balance amount before the pay-in date, we may be required to make the payment on behalf of the defaulting client, which may affect our profitability. In case of high market volatility or adverse movements in share price, it is possible that clients may not honour their commitment, and any inability on our part to pay the margins to the Stock Exchanges may be detrimental to our business, reputation and profitability.

20. Our success largely depends on our key managerial personnel and our ability to attract and retain them. Any loss of our key managerial personnel could adversely affect our business, operations and financial condition.

We depend significantly on the expertise, experience and continued efforts of our key managerial personnel. If one or more members of our key managerial personnel are unable or unwilling to continue in his/her present position, it could be difficult to find a replacement. Our business could thereby be adversely affected. Opportunities for key managerial personnel in our industry are intense and it is possible that we may not be able to retain our existing key managerial personnel or may fail to attract/ retain new employees at equivalent positions in the future. As such, any loss of key managerial personnel could adversely affect our business, operations and financial condition. For further details on the key managerial personnel of our Company please refer to the chapter titled 'Our Management' beginning on page no. 113 of this Draft Red Herring Prospectus.

21. We could be exposed to risks arising from employee and Business Associate misconduct and trading errors.

Misconduct by employees could include their binding us to transactions that exceed authorized limits or present unacceptable risks to us; hiding unauthorized or unsuccessful trading activities from us; or the improper use of

confidential information. These types of misconduct could result in business risks or losses to us including regulatory sanctions and serious harm to our reputation. Furthermore, while our Business Associates work under our overall supervision and control and each of their clients is directly registered with us on a revenue sharing basis, our Business Associates are typically managed by independent entrepreneurs and not by our employees. We have significantly less control over the activities of our Business Associates than our employees. The precautions we take to prevent and detect these activities may not be effective. For example, some of our clients place orders over the telephone. If employee or Business Associate misconduct or trading errors occur, our business operations and reputation could be materially adversely affected.

22. *We are exposed to risks attributable to derivatives trading by clients.*

We offer our clients the facility to trade in derivative instruments in the commodities, securities and currency markets, as currently permitted in India. Since these derivative instruments involve taking leveraged positions on the underlying assets, these are riskier to deal with compared to other financial instruments. We are exposed to greater risk in dealing with derivative instruments since we deal with such instruments on behalf of our clients. We may face financial losses if we fail to manage risks associated with our clients' dealings in derivative instruments, particularly due to price and market volatility.

23. *Commodity futures trading may be illiquid. In addition, suspensions or disruptions of market trading in the commodities markets and related futures markets may adversely affect our commodities brokerage business.*

The commodity futures markets are subject to temporary distortions or other disruptions due to various factors, including the lack of liquidity, congestion, disorderly markets, limitations on deliverable supplies, strikes by transporters, the participation of speculators, government regulation and intervention, technical and operational or system failures, nuclear accident, riots and natural catastrophes. In addition, commodity exchanges, including the MCX, NCDEX and NMCE have regulations that limit the amount of fluctuation in futures contract prices that may occur during a single business day. Limit prices may have the effect of precluding trading in a particular contract or forcing the liquidation of contracts at disadvantageous times or prices, consequently affecting the value of the commodities traded and the results and operations of our Company.

24. *Downturns or disruptions in the securities markets could reduce transaction volumes, causing a decline in our business and impacting our profitability.*

Our business is materially affected by conditions in the financial markets and economic conditions generally, both in India and elsewhere around the world. Many factors or events could lead to a downturn in the financial markets including war, political instability, natural catastrophes and sudden changes in economic and financial policies. Any such events could affect confidence in the financial markets and impair their ability to function effectively. A significant portion of our revenues in recent years has been derived from capital markets, and although we continue to diversify our revenue sources, we expect this business to continue to account for a significant portion of our revenues in the foreseeable future. Capital markets are exposed to additional risks, including liquidity, interest rate and foreign exchange related risks. Any downturn or disruption in the securities markets and the capital markets specifically would have a material adverse effect on our results of operations. Even in the absence of a market downturn, we are exposed to substantial risk of loss due to market volatility. For example, BSE Sensex had seen a fall of approximately 60% within a span of 9 months quoting 7767.21 at one point in October 2008 as compared to 21078 in January 2008. Any such future volatility may have an adverse effect on market-sentiment, and hence could adversely impact our business, prospects, financial condition and results of operations.

25. *Our business is dependent on systems and operations availability and any interruptions in our transaction systems could lead to decline in our sales and profits.*

We are dependent on our technology systems to perform the critical function of gathering, processing and communicating information efficiently, securely and without interruptions. We face risks arising from failures in our systems control processes or technology systems on which our ability to manage our business depends. Additionally, rapid increases in client demand may strain our ability to enhance our technology and expand our operating capacity. At the core of our on-line trading system is an application based on very small aperture

terminals (“VSAT”), which has a direct connection with the Exchanges and allows investors to trade securities on-line. The VSAT-based network allows us to provide investors with real-time market data such as streaming quotes from each market due to better connectivity. A breakdown or interruption in the Indian domestic satellite system could have a material adverse effect on our business and client base. Our operations are highly dependent on the integrity of our technology systems and our success depends, in part, on our ability to make timely enhancements and additions to our technology in anticipation of client demands. To the extent we experience system interruptions, errors or downtime (which could result from a variety of causes, including changes in client use patterns, technological failure, changes to systems, linkages with third-party systems, and equipment and power failures), our business and operations could be significantly impacted. While we maintain back up of all records at our office in Mumbai, any unforeseen events or circumstances beyond our control at this office could result in loss of data and records and adversely affect our results of operations.

26. *Security breaches could adversely impact our business.*

We seek to protect our computer systems and network infrastructure from physical break-ins as well as security breaches and other disruptive problems caused by our increased internet connectivity. We employ security systems, including firewalls and password encryption, designed to minimize the risk of security breaches but there can be no assurance that these security measures will be successful. Breaches of our security measures could affect the security of information stored in and transmitted through these computer systems and network infrastructure. A failure in security measures could have a material adverse effect on our business and our future financial performance.

27. *We face intense competition in our businesses, which may limit our growth and prospects.*

Our Company faces significant competition in the businesses that we are involved in. In particular, we compete with other brokerage houses, both in India and abroad; and public and private sector commercial banks operating in the markets in which we are present. In recent years, large international banks have also entered these markets. For further details, please refer to the paragraph titled “*Competition*”, as contained in the chapter titled “*our Business*”, beginning on page no. 63 of this Draft Red Herring Prospectus. We compete on the basis of a number of factors, including execution, depth of product and service offerings, innovation, reputation and price. Our competitors may have advantages over us, including, but not limited to:

- Substantially greater financial resources;
- Longer operating history than in certain of our businesses;
- Greater brand recognition among consumers;
- Larger customer bases in and outside India; or
- More diversified operations which allow profits from certain operations to support others with lower profitability.

In addition, it is possible that certain Indian commercial banks may decide to begin offering services that we currently provide, such as broking, thereby further intensifying the competition. These competitive pressures may affect our business, and our growth will largely depend on our ability to respond in an effective and timely manner to these competitive pressures.

28. *We are subject to restrictive covenants under our credit facilities that could limit our flexibility in managing our business.*

There are restrictive covenants in the agreements we have entered into with our lenders. These restrictive covenants require us to maintain certain financial ratios and seek the prior permission of these banks/financial institutions for various activities, including, amongst others, selling, leasing, transferring or otherwise disposing of any part of our business or revenues, effecting any scheme of amalgamation or reconstitution, implementing a new scheme of expansion or taking up an allied line of business. Such restrictive covenants in our loan documents may restrict our operations or ability to expand and may adversely affect our business. Though we have received necessary approvals from our lenders for this Issue, these restrictive covenants may also affect some of the rights of our shareholders, including the payment of the dividends.

29. *Some of the premises used by our Company are not owned by our Company.*

Some premises used by our Company are taken on a short-term leave and license basis from third parties. There can be no assurance that these leave and license agreements will be renewed upon expiry or on terms and conditions acceptable to us. Any failure to renew these said agreements or procure new premises will increase our costs or force us to look out for alternative premises which may not be available or which may be available at more expensive prices. Any or all of these factors may have a material adverse effect upon our business, results of operations and financial condition.

For further details please refer to the chapters titled ‘*Business Overview*’, ‘*Our Management*’ and ‘*Related Party Transactions*’ beginning on page nos.63, 113 and Annexure XVIII on page no 117 of this Draft Red Herring Prospectus respectively.

30. *Our Promoters and Directors may have interest in our Company, other than reimbursement of expenses incurred or remuneration.*

Our Promoters and Directors may be deemed to be interested to the extent of the Equity Shares held by them, or their relatives or our Group Entities, and benefits deriving from their directorship in our Company. Our Promoters are interested in the transactions entered into between our Company and themselves as well as between our Company and our Group Entities. For further details, please refer to the chapters titled ‘*Business Overview*’ and ‘*Our Promoters*’, beginning on page nos. 63 and 128, respectively and the section titled ‘*Related Party Transactions*’ beginning on page no. 177 of this Draft Red Herring Prospectus.

31. *Our inability to effectively implement our growth strategies or manage our growth could have an adverse effect on our business, results of operations and financial condition.*

Although we plan to continue to expand our scale of operations through inorganic growth and investments in other entities, there could be a possibility that we may not grow at a rate comparable to our growth rate in the past, either in terms of income or profit. Further, such growth strategy will place significant demands on our management, financial and other resources. It will require us to continuously develop and improve our operational, financial and internal controls and more importantly adhering to quality and high standards that meet customer expectations. Any inability on our part to manage such growth could disrupt our business prospects, impact our financial condition and adversely affect our results of operations.

32. *Our insurance policies do not cover all risks, specifically risks like loss of profits. In the event of the occurrence of such events, our insurance coverage may not adequately protect us against possible risk of loss.*

In compliance with requirements of the Indian stock exchanges, we maintain stock brokers’ indemnity policies that provide coverage against incomplete transactions and computer crimes. In addition, we maintain voluntary insurance coverage against risks including loss of money, loss of electronic equipment, burglary, general fire, damage and flood. There can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time. To the extent that we suffer any loss or damage that is not covered by insurance or exceeds our insurance coverage, our results of operations and cash flow could be adversely affected. Further, we are exposed to potential liability risks that are inherent in the provision of financial services. Such liabilities may exceed our available insurance coverage or arise from claims outside the scope of our insurance coverage. If our arrangements for insurance or indemnification are not adequate to cover claims, including in the case of claims exceeding policy aggregate limitations or exceeding the resources of the indemnifying party, we may be required to make substantial payments and our financial condition and results of operations may be adversely affected. For details of our insurance cover, see the section titled “*Our Business*” on page no 63 of this Draft Red Herring Prospectus.

33. *The fund requirement and deployment have not been appraised by any bank or financial institution.*

The deployment of funds as described in the chapter titled ‘*Objects of this Issue*’ beginning on page no. 39 of this Draft Red Herring Prospectus is at the discretion of our Company’s Board of Directors. The fund requirement and

deployment is based on internal management estimates and has not been appraised by any bank or financial institution. Accordingly, within the parameters as mentioned in the chapter titled ‘*Objects of this Issue*’ beginning on page no. 39 of this Draft Red Herring Prospectus, management will have significant flexibility in applying the proceeds received by our Company from this Issue.

34. *Our future funds requirements, in the form of fresh issue of capital or securities and or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

35. *We have in the last 12 months issued Equity Shares at a price which may be lower than the Issue Price.*

We have also issued 70,00,000 fully paid up Equity Shares of the face value of Rs.10/- each as bonus in the ratio of 1 fully paid up equity share for every 1 fully paid up equity share held on EGM Dated on 21st december 2009 and board has allotted on 24th December, 2009. Besides this, we have in the last 12 months, not issued Equity Shares at a price that could be lower than the Issue Price. For details, please refer to the chapter titled “*Capital Structure*” beginning on page 28 of this Draft Red Herring Prospectus.

36. *Any future issuance of Equity Shares by our Company or sale of the Equity Shares by any of its significant shareholders may adversely affect the trading price of the Equity Shares.*

Any future issuance of our Equity Shares could dilute your shareholding. Any such future issuance of our Equity Shares or sales of our Equity Shares by any of our significant shareholders may also adversely affect the trading price of our Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares.

37. *Post this Issue, Our Promoter and Promoter Group will continue to hold majority shares in our Company.*

Post this Issue, Our Promoter and Promoter Group will collectively own 53.31% of our Equity Share capital. Accordingly, Our Promoter and Promoter Group will continue to have control over our business including matters relating to any sale of all or substantially all of our assets, the timing and distribution of dividends and the election, termination or appointment of our officers and directors. This control could delay, defer, or prevent a change in control in our Company, impede a merger, consolidation, takeover or other business combination involving our Company, or discourage potential acquirers from making an offer or otherwise attempting to obtain control over our Company even if it is in its best interest. Our Promoter and Promoter Group may also influence our material policies in a manner that could conflict with the interests of our other shareholders.

38. *Our business has negative Operating cash flows for the period ended September 30, 2009 and Fiscals 2009, 2008, 2007.*

The table below sets forth cash flow statement of our Company for period ended September 30, 2009 and fiscals 2009, 2008, 2007

39. We face risks associated with potential acquisitions, investments, strategic partnerships or other ventures that could adversely affect our results of operations.

We may acquire or make investments in complementary businesses, technology, services or products or enter into strategic partnerships with parties who can provide access to those assets, if appropriate opportunities arise. The general trend towards consolidation in the financial services industry increases the importance of our ability to successfully complete such acquisitions and investments. We may not identify suitable acquisition, investment or strategic partnership, candidates, or if we do identify suitable candidates, we may not complete those transactions on commercially acceptable terms or at all. If we acquire another company, we could have difficulty in assimilating that company’s personnel, operations, technology and software. In addition, the key personnel of the acquired company may decide not to work for us. If we make other types of acquisitions, we could have difficulty in integrating the acquired products, services or technologies into our operations. These difficulties could disrupt our ongoing business, distract our management and employees and increase our expenses.

40. We have in the past entered into related party transactions and may continue to do so in the future.

We have, in the course of our business entered into transactions with related parties that include entities forming part of our Subsidiaries and Promoter Group. The cumulative figure of related party transactions for the last five years is as follows.

While we believe that all such transactions have been conducted on an arms-length basis and contain commercial terms, there can be no assurance that we could not have achieved more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that we will continue to enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations.

For further details please refer to Annexure XVIII forming part of the chapter titled “*Financial Statements*” beginning on page 140 of this Draft Red Herring Prospectus.

41. *Our ability to pay dividends will depend upon future earnings, financial condition, cash flows, working capital requirements, capital expenditure, lender's approvals and other factors.*

The amount of our future dividend payments, if any, will depend upon our future earnings, financial conditions, cash flows, working capital requirements, capital expenditures, lender's approvals and other factors. There can be no assurance that we shall have distributable funds or that we will declare dividends.

EXTERNAL RISK FACTORS

1. *Political instability or changes in the government could delay the liberalization of the Indian economy and adversely affect economic conditions in India generally, which could impact our financial results and prospects.*

Since 1991, successive Indian governments have pursued policies of economic liberalization, including significantly relaxing restrictions on the private sector. Nevertheless, the role of the Indian central and state governments in the Indian economy as producers, consumers and regulators has remained significant.

Although the Central government has announced policies and taken initiatives that support the economic liberalization policies that have been pursued by previous governments, the rate of economic liberalization could change, and specific laws and policies affecting foreign investment and other matters affecting investment in our securities could change as well.

2. *The market price of our Equity Shares may fluctuate due to the volatility of the Indian securities market.*

There may not be an active or liquid market for our Equity Shares, which may cause the price of the Equity Shares to fall and may limit your ability to sell the Equity Shares. The Issue Price of the Equity Shares in this Issue will be determined by our Company in consultation with the BRLM, and it may not necessarily be indicative of the market price of the Equity Shares after this Issue is complete. You may be unable to resell your Equity Shares at or above the Issue Price and, as a result, you may lose all or part of your investment. The price at which the Equity Shares will trade after this Issue will be determined by the marketplace and may be influenced by many factors, including:

- our financial results and the financial results of the companies in the businesses we operate in;
- the history of, and the prospects for, our business and the sectors and industries in which we compete;
- an assessment of our management, our past and present operations, and the prospects for, and timing of, our future revenues and cost structures;
- the present state of our development; and
- the valuation of publicly traded companies that are engaged in business activities similar to ours.

In addition, the Indian stock market has from time to time experienced significant price and volume fluctuations that have affected the market prices for the securities of Indian companies. As a result, investors in the Equity Shares may experience a decrease in the value of the Equity Shares regardless of our operating performance or prospects. The market price of our Equity Shares may fluctuate due to the volatility of the Indian securities market and may be more volatile than the securities markets in other countries. The stock exchanges in India have experienced problems, including broker defaults and settlement delays, which, if were to continue or recur, could affect the market price and liquidity of the securities of Indian companies, including our Equity Shares. In addition, the governing bodies of the various Indian stock exchanges have from time to time imposed restrictions on trading in certain securities, limitations on price movements and margin requirements. Furthermore, from time to time disputes have occurred between listed companies and stock exchanges and other regulatory bodies, which in some cases may have had a negative effect on market sentiment.

3. *Conditions in the Indian securities market may affect the price or liquidity of the Equity Shares.*

Indian stock exchanges have in the past experienced substantial fluctuations in the prices of listed securities. These exchanges have also experienced problems that have affected the market price and liquidity of the securities

of Indian companies, such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading, limited price movements and restricted margin requirements. Further, disputes have occurred on occasion between listed companies and the Indian stock exchanges and other regulatory bodies that, in some cases, have had a negative effect on market sentiment. If similar problems occur in the future, the market price and liquidity of our Equity Shares could be adversely affected.

- 4. *There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.***

Subsequent to listing, we will be subject to a daily circuit breaker imposed on listed companies by all stock exchanges in India which does not allow transactions beyond certain volatility in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on the circuit breaker is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges are not required to inform us of the percentage limit of the circuit breaker from time to time, and may change it without our knowledge. This circuit breaker would effectively limit the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, there can be no assurance regarding the ability of shareholders to sell the Equity Shares or the price at which shareholders may be able to sell their Equity Shares.

- 5. *You will not be able to immediately sell any of our Equity Shares of purchased through this Issue on an Indian stock exchange.***

Our Equity Shares will be listed on the BSE and the NSE. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. Investors' "demat" accounts with depository participants in India are expected to be credited within two working days of the date on which the basis of allotment is approved by the Designated Stock Exchange. Thereafter, upon receipt of trading approval from the Stock Exchanges, trading in the Equity Shares is expected to commence within seven working days of the date on which the basis of allotment is approved. Until such time, as trading approvals are received from the BSE and the NSE you will not be able to sell any of our Equity Shares issued through the Issue.

- 6. *There has been no public market for our Equity Shares of prior to this Issue so the Issue Price may not be indicative of the value of the Equity Shares.***

Prior to this Issue, there has been no public market for our Equity Shares in India or elsewhere. The Issue Price as determined by our Company in consultation with the BRLM could differ significantly from the price at which the Equity Shares will trade subsequent to completion of this Issue. We cannot assure you that even after the Equity Shares have been approved for listing on the Stock Exchanges, any active trading market for the Equity Shares will develop or be sustained after this Issue, or that the offering price will correspond to the price at which the Equity Shares will trade in the Indian public market subsequent to this Issue.

- 7. *Any downgrading of India's credit rating by an international rating agency could have an unfavorable impact on our business.***

Any adverse revisions to India's credit rating for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could have a material adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

- 8. *India is vulnerable to natural disasters that could severely disrupt our normal operations of business and adversely affect our earnings.***

India is susceptible to tsunamis and earthquakes. On December 26, 2004, Southeast Asia, including the Eastern coast of India, experienced a tsunami that caused significant loss of life and property damage. On January 26,

2001, the Kutch region in the State of Gujarat suffered a major earthquake causing significant loss of life and property. Substantially all of our facilities and employees are located in Mumbai. Mumbai is a flood, tsunami and earthquake prone area. If our facilities are damaged by an earthquake, tsunami or other natural disaster, its capability could be interrupted or delayed. As a result, a natural disaster in these areas could have a material adverse effect on our financial condition and results of operations.

SECTION III – INTRODUCTION

SUMMARY OF INDUSTRY

Indian Financial Sector

The financial sector in India is characterized by liberal and progressive policies, vibrant equity and debt markets and prudent banking norms. India's financial sector has been one of the fastest growing sectors in the economy. India has a financial system that is regulated by independent regulators in the sectors of banking, insurance, capital markets etc. Public Sector (Government owned) banks account for 75% of the banking assets; however, Indian private banks and foreign banks are growing at a rapid pace. Most of the global players in banking and financial services have presence in India. The Indian financial sector attributes its growth to technology upgradation, consolidation of large broking houses, evolution of e-broking business, growth in retail segment, regulatory reforms, diversified asset instruments and foreign investment participation. There is huge growth potential in the Indian financial sector. This is evident from the fact that less than 1% of population trades in the market as compared to 25% in the developed economy. The opportunities in the sector are huge as financial intermediaries have not restricted themselves to equity broking business. They have de-risked their business by diversifying into emerging opportunities in the last couple of years. They have ventured into commodity broking business which emerged from a small contribution towards revenue to major growth engine for many companies. Companies have also forayed into wealth management, investment banking, mutual funds and insurance business. They are also looking into areas like forex trading which would further de-risk their business model. The business areas covered under the Indian Financial Sector is displayed in the chart below:

- Investment Advisory
- PMS
- Private Equity
- Fixed Deposit

- Equities and Derivatives
- Commodities
- Currency
- Depository Services
- Research
- Insurance and Mutual Fund

Capital Market

India has a transparent; highly technology enabled and well regulated stock / capital market. A vibrant, well-developed capital market facilitates investment and economic growth. Capital market achieves one of the most important functions of channeling idle resources to productive resources or from less productive resources to more productive resources. The capital market transactions today involve lots of checks and balances with efficient electronic trading and settlement systems. Today the stock markets are buoyant and have a range of players including mutual funds, FIIs, hedge funds, corporates and other institutions. Domestic savings and capital inflows

are channelized in the capital markets. The flow of resources in the securities market depends on the depth and efficiency of the markets, robust risk management system, attractiveness of securities and the ability of the users of capital to attract resources.

Securities and Exchange Board of India (SEBI) regulates the Indian capital markets. There are 24 exchanges (including active and non active exchanges) in the country, which offer screen based trading system. The trading system is connected using the VSAT technology. BSE is one of the oldest exchanges in Asia. National Stock Exchange (NSE) is third largest exchange in the world in terms of number of trades. These exchanges constitute an organized market for securities issued by the Central and State Governments, public sector companies and public limited companies. The stock exchanges provide an efficient and transparent market for trading in equity, debt instruments and derivatives. The stock exchanges are demutualised, and have been converted into companies now, in which brokers only hold minority share holding. In addition to the SEBI Act, the Securities Contracts (Regulation) Act, 1956 regulates the stock markets.

Some of the fundamental changes that fuelled rapid pace of market growth was the introduction of electronic trading (secondary markets), allowing foreign ownership (FII's) of shares, permitting Indian companies to raise capital from abroad (ADRs/GDRs), expansion in the product range (equities, commodity, currency, derivatives and debt), book building process and transparency in IPO issuance, T+2 settlement cycle, dematerialization of shares and internet trading (e-broking). These changes resulted in dramatic growth of the stock markets in India as well as the equity broking firms. The broking industry is emerging as a rapidly growing segment in Indian finance, in terms of business growth, distribution and network and enterprise value.

Our markets went through a period of unusual liquidity squeeze with its attendant impact on interest rates, foreign exchange rates, and mutual funds. Broking companies, whose fortunes are closely linked to the markets, had a tough time till early 2009. This was due to the fear of loss of business given the drop in trading volumes as well as participation by investors and traders. However, things have improved as liquidity was restored through aggressive steps (stimulus package) by the RBI and the Central Government; and the markets as well as trading turnover have more than doubled.

Capital market comprises of two segments- primary market (new issues, offer for sale) and secondary market (trading of stocks). There are two major types of issuers who issue securities. The corporate entities issue mainly debt and equity instruments (shares, debentures, etc.), while the governments (central and state governments) issue debt securities (dated securities, treasury bills).

Integrated financial services provider

We offer a wide range of financial products and services to our investors which include equity brokerage, commodities brokerage with memberships in BSE, NSE MCX, NCDEX and depository participant of CDSL. We have expanded our operations beyond broking to distribution of third party financial products like IPO's, mutual funds, insurance, margin funding, Internet Trading and wealth management. We also offer an array of advisory services ranging from investing, trading, research, financial planning to institutional clients, high net worth individuals and retail investors. Most of these services are customised to meet the needs of our clients in line with their investment objective.

Strong risk management system

We have deployed resources in terms of technology, people and processes to manage our risk management function. We have established general risk management procedures for trading activities, including instruments and strategies, position and trading limits for trading desks, business units and/or individual traders, periodic stress testing and cash flow and "Value at Risk" analysis. We periodically review and modify such procedures, as necessary or appropriate. These procedures cover our internal control system, customer margin requirement and risk management of relationship members. This is evident from the fact that during the last fiscal when the global economy was facing a downturn we have managed to sustain our financial performance. For the year 2008-09 and for the period ended September 30, 2009 we have not written off any of the provisions created for doubtful debts.

Centralized Infrastructure

Our Company along with all its subsidiaries has their corporate office located at Andheri, Mumbai. The office spreads across an area admeasuring 4,444 sq. mtrs. Our Company including the subsidiaries operates in the same

premises thereby facilitating ease in functionality, supervision and guidance thus enabling quick decision making in different business verticals.

Strong relationship with our clients

Our Company believes in maintaining long term relationships with our clients in terms of increased sales. Our dedicated focus on client coverage and our ability to provide timely solutions that enables us to resolve customer complaints, if any. This has helped us to establish long-term relationships with institutional and high net worth individual clients. This key strength has helped us to receive repeat business from our clients. We also believe that because of our timely trade execution, competitive pricing and customer service, we enjoy goodwill amongst our customers.

Diversified client base

We have served 31,197 clients and are not dependent on small set of high networth individuals but have a small exposure to a well diversified client base ranging from retail investors to HNI to Institutional. We are also empanelled with Indian banks, mutual funds, and insurance companies. We revamped our risk management system in order to avoid any margin shortfall on broking clients or on funding clients. We have deployed adequate policy based monitoring and squaring off not only for mass retail but also for high networth clients. These have helped us in protecting our capital during adverse market movements and also sustain our financial performance during the last fiscal.

Business Strategy

We strive for complete transparency and satisfaction of our clients with an unwavering thrust and focus on professional excellence and integrity. In keeping with this philosophy, we will focus on increasing our customer base in all our products, give them a platform of choice to transact and support them with quality research as well as on capturing the significant growth opportunities across the Indian financial services spectrum. Our key strategic initiatives are described below:

Working Capital

The working capital requirement of the company arises on account of the gap in realization of cheques from clients and amount to be paid to the exchanges towards pay in on the settlement dates. With growing business this gap is widening creating large requirement for working capital. In tandem with the growth in the financial markets, we expect our Company's trading volumes to increase further. It is proposed to complement our working capital requirement which is currently met out of bank limits and internal accruals. To cater to these increasing needs of stock exchanges we plan to deploy Rs. 2,000 lakhs. For further details on this investment refer to chapter titled "Objects of the issue" on page no 39 of this Draft Red Herring Prospectus.

Concentration on NBFC activities

This business segment has two revenue verticals, which are interest income and also generates brokerage from trading of shares. The brokerage income is earned by our Company and interest income is credited in IFPL. There has been a growth in our NBFC activities in terms of clients as well as revenues. To augment this growth we are striving to strengthen our NBFC team. We also foresee a major growth in the NBFC in the coming years. We propose to increase our presence in this vertical, both in terms of team strength and geographic reach. To cater to the increasing needs of our clients we plan to invest Rs. 3,000 lakhs in our subsidiary IFPL. For further details on this investment refer to chapter titled "Objects of the issue" on page no 39 of this Draft Red Herring Prospectus.

Investment in our Subsidiary, ICL

We intended to deploy Rs. 300 lakhs to our subsidiary Inventure Commodities Limited to fund our working capital requirement which mainly comprises margins to be placed with the commodity exchanges and to meet additional margin requirement of the exchanges which varies on daily basis depending upon the volatility. Our

Company believes that such investment in ICL is in line with its strategy of expanding its core business. This capital infusion in ICL will be in the form of subscription to their equity shares and through interest bearing unsecured loan or any combination thereof.

Achieve operational efficiencies

We intend to achieve operational efficiencies and maximize revenues through efficient use of technology, focused marketing and optimization of our resources. This would depend on our ability to maintain adequate capital and liquidity to absorb any adversities on broking and lending business, stabilizing the earning profile, improving upon the profitability and adherence to stringent risk management systems.

Strengthen relationship with our clients

We seek to build on existing relationships and also focus on increasing our client base. We plan to expand our business primarily by increasing the number of client relationships, as we believe that increased client relationships will add stability to our business. We also seek to offer our clients, diversified products and services to increase our per capita revenues by selling different products to the same client.

Increasing geographical reach

We are focused on increasing our concentration in the existing cities as well as expand into smaller cities and towns that we believe have the potential to grow. Currently, we have a presence in the major cities of India. Foreseeing the growth potential in the northern and eastern regions we plan to expand our reach in these regions. We propose to expand by increasing the network of our branches and are open to growth through the inorganic route including acquisitions. We believe that this network expansion, complemented by client-focused relationship management, will allow us to add new clients and help us grow our market share.

The SEBI (ICDR) Regulations, have permitted an issue of securities to the public through the 100% Book Building Process, wherein not more than 50% of the Issue shall be allocated on a proportionate basis to Qualified Institutional Buyers (QIBs) including upto 5% of the QIB portion that shall be available for Allocation on a proportionate basis to Mutual Funds only and the remainder of the QIB portion shall be available for Allocation on a proportionate basis to all QIB bidders, including Mutual Funds. Further, not less than 15% of the Issue shall be available for Allocation on a proportionate basis to Non Institutional Bidders and not less than 35% of the Issue shall be available for Allocation on a proportionate basis to Retail Individual Bidders, subject to valid Bids being received at or above the Issue Price.

Our Company will comply with the SEBI (ICDR) Regulations for this Issue. In this regard, our Company has appointed the BRLM to manage and procure subscriptions to the Issue.

Pursuant to a press release bearing reference no. 386/2009 dated December 10, 2009, SEBI has decided to extend the facility of ASBA to all categories of investors, except QIBs. QIBs are not allowed to withdraw their Bid after the Bid / Issue Closing Date and are required to pay at least 10% Margin Amount upon submission of their Bid. This phase of extension of applicability of the ASBA process has been referred to as the 'ASBA Phase II'. The restrictions applicable to Retail Individual Bidders applying under the ASBA process currently in force, namely bidding at the Cut-Off Price, not submitting more than one Bid, and non-revision of Bids by ASBA Bidders, is eliminated. ASBA Phase II is applicable to all public issues opening on or after January 1, 2010.

For details, please refer chapter titled "*Issue Procedure*" beginning on page no. 285 of the Draft Red Herring Prospectus.

Steps to be taken by the Bidders for bidding:

- Check eligibility for making a bid (for further details, please refer to the paragraph on '*Who can Bid*' beginning on page no. 285 of this Draft Red Herring Prospectus);
- Bidders necessarily need to have a DEMAT account and ensure that the DEMAT account details are correctly mentioned in the Bid Cum Application Form;
- Ensure that the Bid Cum Application Form is duly completed as per instructions given in the Draft Red Herring Prospectus and in the Bid Cum Application Form;
- Bids by QIBs will only have to be submitted to the BRLM
- Ensure that you have mentioned your PAN in the Bid Cum Application Form (including ASBA form), unless exempted from mentioning the PAN. For further details, please refer to the chapter titled '*Issue Procedure*' beginning on page no.285 of the Draft Red Herring Prospectus. Bidders are specifically requested not to submit their GIR number instead of the PAN as the Bid is liable to be rejected on this ground.
- The Bidder should ensure the correctness of his or her Demographic Details (as defined under the paragraph titled "Bidder's Depository Account Details", in chapter titled "*Issue Procedure*" beginning on page 285 of the Draft Red Herring Prospectus) given in the Bid cum Application Form vis-à-vis those with his or her Depository Participant so as to ensure receipt of allotment advice/refund orders with correct details at his/her present address.

Illustration of Book Building and Price Discovery Process

(Investors should note that the following is solely for the purpose of illustration and is not specific to this Issue)

Bidders can bid at any price within the price band. For instance, assuming a price band of Rs. 200/- to Rs. 240/- per share, issue size of 3,000 equity shares and receipt of five bids from bidders details of which are shown in the table below. A graphical representation of the consolidated demand and price would be made available at the website of the BSE (www.bseindia.com) and NSE (www.nseindia.com) during the bidding period. The illustrative book as shown below shows the demand for the shares at various prices and is collated from bids from various investors.

Number of Equity Shares Bid for	Bid Price (Rs.)	Cumulative Equity Shares Bid for	Subscription
500	240	500	16.67%
1000	230	1500	50.00%
1500	220	3000	100.00%
2000	210	5000	166.67%
2500	200	7500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the issuer is able to issue the desired quantum of shares is the price at which the book cuts off *i.e.*, Rs. 220 in the above example. The Issuer, in consultation with the BRLM will finalize the issue price at or below such cut off price *i.e.* at or below Rs. 220. All bids at or above this issue price and cut off bids are valid bids and are considered for Allocation in respective category.

In the event of withdrawal of the Issue anytime after the Bid/Issue Opening Date, our Company will forthwith repay, without interest, all monies received from the applicants in pursuance of the Red Herring Prospectus. If such money is not repaid within 8 days after our Company become liable to repay it, i.e. from the date of withdrawal, then our Company, and every Director of our Company who is an officer in default shall, on and from such expiry of 8 days, be liable to repay the money, with interest at the rate of 15% per annum on application money.

In terms of the SEBI (ICDR) Regulations, QIB Bidders shall not be allowed to withdraw their Bid after the Bid/Issue Closing Date.

If the issuer withdraws the issue after closure of bidding, the issuer shall be required to file a fresh Draft Red Herring Prospectus with SEBI.

Underwriting

After the determination of the Issue Price but prior to filing of the Prospectus with RoC, we will enter into an Underwriting Agreement with the Underwriters for the Equity Shares proposed to be issued through this Issue. The underwriting shall be to the extent of the bids uploaded by the Underwriter including through its syndicates/sub-syndicates. Pursuant to the terms of the Underwriting Agreement the obligations of the Underwriters are several and are subject to certain conditions, as specified therein.

The Underwriters have indicated their intention to underwrite the following number of Equity Shares:

Our Company undertakes its lending business through our subsidiary, IFPL. IFPL is presently registered with the RBI as an NBFC not accepting public deposits. IFPL's lending business includes providing loans secured by shares held by customers of IFPL. Our Company is mainly engaged in the broking business, and IFPL helps our customers to leverage their equity market positions to take increased exposure. Thus, IFPL's lending business is complementary to our Company's broking business and it helps improve customer retention and source additional one. IFPL has the appropriate risk management systems in place to monitor the financing provided. For this purpose, the IFPL performs a credit worthiness assessment of each of its clients before extending financing to them. The customer financing is provided against a margin of approximately 25-50% and is available only for purchase of shares which form part of our "Approved List of securities". This list is decided by the management and reviewed from time to time.

The additional requirement for funds for this activity is largely driven by the growth in the number of customers availing financing. Based on the management estimates, our Company intends to deploy Rs. 3,000 lakhs which in turn will be used by IFPL to finance its onward lending business. This capital infusion in IFPL will be in the form of subscription to their equity shares and through interest bearing unsecured loan or any combination thereof. We believe that it will also help us to strengthen our respective balance sheets. However, no dividend is assured to the Company as a consequence of such capital infusion in these subsidiaries. Our Company believes that such investment in IFPL is in line with its strategy of expanding its core businesses.

B. Augmenting Long Term Working Capital Requirement

Part of the Issue Proceeds will be used towards long term working capital in the form of maintaining adequate levels of margin with the stock exchanges by the company. The margin requirements with the stock exchanges are determined by the stock exchanges on the basis of trading volumes, market volatility and to extent of open interests in respect of equity index/ stock futures. Such margin requirements comprise of "initial margin" representing initial margin paid and "margin deposits", representing additional margin over and above the initial margin, intra-day margin etc. for entering into contracts for equity index/ stock futures, which are released on final settlement and/or squaring up of underlying contracts. Further, equity index/ stock futures are marked-to-market on a daily basis, in which case, "mark-to-market margin" is required to be provided, representing the net amount paid or received on the basis of movement in the prices of index/ stock futures till the balance sheet date.

While the initial margin and the margin deposits with the stock exchanges/ professional clearing members can be created by way of deposit of either stock or bank guarantees or fixed deposits with banks or cash, however, the marked-to-market margin is typically created by way of deposit of cash. Provided below are the details of the levels of initial margin, margin deposits and marked-to-market margin maintained by our Company since April, 2007:

(Rs. in lakhs)

Particulars	As At 30.09.2009	As At 31.03.2009	As At 31.03.2008
Counter guarantees in respect of guarantees given by banks to the Stock Exchanges towards base capital, margin deposits etc.	5,150.00	3,550.00	3,500.00
Pledged of fixed deposits with the bank against the above bank guarantees.	2,575.00	1,775.00	1,750.00

As above, we have witnessed an increased requirement to maintain margins with the stock exchanges. Consequently, we propose to deploy Rs. 2000 lakhs in out of the proceed in a Fiscal 2011 year towards enhancing the margins with the exchanges through either bank guarantees or fixed deposits with banks or cash. Such Margin infusion will enable us to undertake more business in equities and derivatives markets. Indian Economy

In the past year, the Indian as well as the global economy has witnessed a very high degree of uncertainty and volatility due to the subprime crisis that emerged in the USA and snowballed into Global Recession. Despite sound fundamentals and no direct exposure to the sub-prime assets, India was affected by global financial crisis reflecting increasing globalisation of the Indian economy. However, there is some inherent strength within the Indian economy, which has spawned the idea of recovery from the global economic crises. The presence of a large domestic population, along with the increase in its per capita income on the back of sustained economic growth over the past few years has provided enough of a demand stimulus to ensure continued economic growth for India. Further, a strong saving and investment rate contributed towards shortening the length and severity of the current slowdown, and also towards a faster revival. The policy response by the Government has been swift. While fiscal stimulus cushioned the deficiency in demand, monetary policy augmented both domestic and foreign exchange liquidity. The expansionary policy stance of the Reserve Bank was manifested in significant reduction in Cash Reserve Ratio (CRR) as well as the policy rates. The liquidity injection efforts of the Reserve Bank could be achieved without compromising either on the eligible counterparties or on the asset quality in the Reserve Bank's balance sheet. Moreover, the Reserve Bank's balance sheet did not show any unusual increase, unlike that of several other central banks. These factors played a mitigating role in the face of the spreading contagion and the economy grew 6.7% in 2008-2009 with the help of an economic stimulus package. The table below indicates India's real GDP growth (%):

Sector	Financial Year		Quarterly Growth Rates (y-o-y)		
	2007-08	2008-09	2008-09		2009-10
			Q1	Q4	Q1
Agriculture	4.9	1.6	3.0	2.7	2.4
Industry	7.4	2.6	5.1	(-)0.5	4.2
Services	10.8	9.4	10.0	8.4	7.7
Overall GDP	9.0	6.7	7.8	5.8	6.1

At present, the focus around the world and also in India has shifted from managing the crisis to managing the recovery. The key challenge relates to the exit strategy that needs to be designed, considering that the recovery is as yet fragile but there is an uptick in inflation, though largely from the supply side, which could engender inflationary expectations. Some of the key measures taken by the Government to accelerate recovery are:-

- The Reserve Bank has initiated the first phase of exit in its October 2009 Review of monetary policy in a calibrated manner mainly by withdrawal of unconventional measures taken during the crisis.
- The Cabinet Committee on Economic Affairs (CCEA) decided that the government will bring down its stake in all listed Public Sector Enterprises (PSEs) to at least 90%. The CCEA also approved listing of companies with three-year track record of net profit and positive net worth. Out of the 242 PSEs, 46 are listed and another 42 meet the criterion.

Indian Financial Sector

The financial sector in India is characterized by liberal and progressive policies, vibrant equity and debt markets and prudent banking norms. India's financial sector has been one of the fastest growing sectors in the economy. India has a financial system that is regulated by independent regulators in the sectors of banking, insurance, capital markets etc. Public Sector (Government owned) banks account for 75% of the banking assets; however, Indian private banks and foreign banks are growing at a rapid pace. Most of the global players in banking & financial services have presence in India. The Indian financial sector attributes its growth to technology upgradation, consolidation of large broking houses, evolution of e-broking business, growth in retail segment, regulatory reforms, diversified asset instruments and foreign investment participation. There is huge growth potential in the Indian financial sector. This is evident from the fact that less than 1% of population trades in the market as compared to 25% in the developed economy. The opportunities in the sector are huge as financial intermediaries have not restricted themselves to equity broking business. They have de-risked their business by diversifying into emerging opportunities in the last couple of years. They have ventured into commodity broking business which emerged from a small contribution towards revenue to major growth engine for many companies. Companies have also forayed into wealth management, investment banking, mutual funds and insurance business. They are also looking into areas like forex trading which would further de-risk their business model. The business areas covered under the Indian Financial Sector is displayed in the chart below:

- Investment Advisory
- PMS
- Private Equity
- Fixed Deposit

- Equities and Derivatives
- Commodities
- Currency
- Depository Services

Capital Market

India has a transparent; highly technology enabled and well regulated stock / capital market. A vibrant, well-developed capital market facilitates investment and economic growth. Capital market achieves one of the most important functions of channeling idle resources to productive resources or from less productive resources to more productive resources. The capital market transactions today involve lots of checks and balances with efficient electronic trading and settlement systems. Today the stock markets are buoyant and have a range of players including mutual funds, FIIs, hedge funds, corporate and other institutions. Domestic savings and capital inflows are channelized in the capital markets. The flow of resources in the securities market depends on the depth and efficiency of the markets, robust risk management system, attractiveness of securities and the ability of the users of capital to attract resources.

Securities and Exchange Board of India (SEBI) regulates the Indian capital markets. There are 24 exchanges (including active and non active exchanges) in the country, which offer screen based trading system. The trading system is connected using the VSAT technology. BSE is one of the oldest exchanges in Asia. National Stock Exchange (NSE) is third largest exchange in the world in terms of number of trades. These exchanges constitute an organized market for securities issued by the Central and State Governments, public sector companies and public limited companies. The stock exchanges provide an efficient and transparent market for trading in equity, debt instruments and derivatives. The stock exchanges are demutualised, and have been converted into companies now, in which brokers only hold minority share holding. In addition to the SEBI Act, the Securities Contracts (Regulation) Act, 1956 regulates the stock markets.

Some of the fundamental changes that fuelled rapid pace of market growth was the introduction of electronic trading (secondary markets), allowing foreign ownership (FII's) of shares, permitting Indian companies to raise capital from abroad (ADRs/GDRs), expansion in the product range (equities, commodity, currency, derivatives and debt), book building process and transparency in IPO issuance, T+2 settlement cycle, dematerialization of shares and internet trading (e-broking). These changes resulted in dramatic growth of the stock markets in India as well as the equity broking firms. The broking industry is emerging as a rapidly growing segment in Indian finance, in terms of business growth, distribution & network and enterprise value.

Our markets went through a period of unusual liquidity squeeze with its attendant impact on interest rates, foreign exchange rates, and mutual funds. Broking companies, whose fortunes are closely linked to the markets, had a tough time till early 2009. This was due to the fear of loss of business given the drop in trading volumes as well as participation by investors and traders. However, things have improved as liquidity was restored through aggressive steps (stimulus package) by the Central Bank and Government; and the markets as well as trading turnover have more than doubled.

Capital market comprises of two segments- primary market (new issues, offer for sale) and secondary market (trading of stocks). There are two major types of issuers who issue securities. The corporate entities issue mainly debt and equity instruments (shares, debentures, etc.), while the governments (central and state governments) issue debt securities (dated securities, treasury bills).

Primary Market

Primary markets create a flow of new securities to the securities market. This is achieved through public offerings of debt or equity or a composite structure of debt and equity to the investors. Here the issuer of securities raises the funds to meet its fund requirements.

Primary market offerings could either be in the form of public offerings or private placements. The issuers here could include corporates, Government, municipal corporations and in some cases existing shareholders and institutional investors offering their securities for sale.

The product offerings by intermediaries in the primary markets include management of IPOs of issuers, mobilization of resources from retail and institutional investors, private placement of issues, debt syndications etc.

Intermediaries in the primary market include merchant bankers, registrars and brokers.

During the year 2008-09, the resources raised through Public Issues, Rights Issues, QIP and Preferential Allotments are summarized in the table below:

Particulars	No. of Issues	Amount Mobilised

Secondary Market

Secondary markets provide a medium of exchange and enable investors to trade in the securities. An efficient securities market distinguishes financial investments from various forms of other illiquid investments. Stock Exchanges provide the platform and the mechanism for effecting transactions between different market participants. Secondary market comprises of trading in equities, bonds and derivatives. The depth of the market is determined by number of factors such as liquidity of the instruments traded, number of market participants, types of instruments traded, settlement practices etc.

According to data released by the market regulator Securities and Exchange Board of India (SEBI), FIIs transferred a record US\$ 17.46 billion in domestic equities during the calendar year 2009. This FII investment in 2009 proved to be the highest ever inflow in the country in rupee terms in a single year, breaking the previous high of US\$ 14.96 billion parked by foreign fund houses in domestic equities in 2007. FIIs infused a net US\$ 1.05 billion in debt instruments during the said period.

As on December 2009 the number of companies listed at NSE is 1453. The trading volumes on NSE have been witnessing phenomenal growth over the past decade. The trading volume, which peaked 2007-08, fell substantially in 2008-09. However, the total trading volumes on the exchange saw a turnaround in the present year and the trading volume doubled. Equity Broking

As the Indian capital markets continue to evolve, they are undergoing rapid consolidation driven by increased trading volumes, increased regulation, customer sophistication, availability of better technology and increased back-office requirements. As a result, significant changes have been introduced to strengthen risk management systems. Changes in the regulatory framework and settlement mechanics have resulted in smaller operating players losing market share, leading to consolidation in the industry.

Market consolidation is even more pronounced in the on-line trading category where the top five brokers control a very significant share in the market. The rapid growth in on-line trading volumes can be attributed to the growing sophistication of retail investors, availability of reliable internet connectivity and the sophistication of the internet trading products.

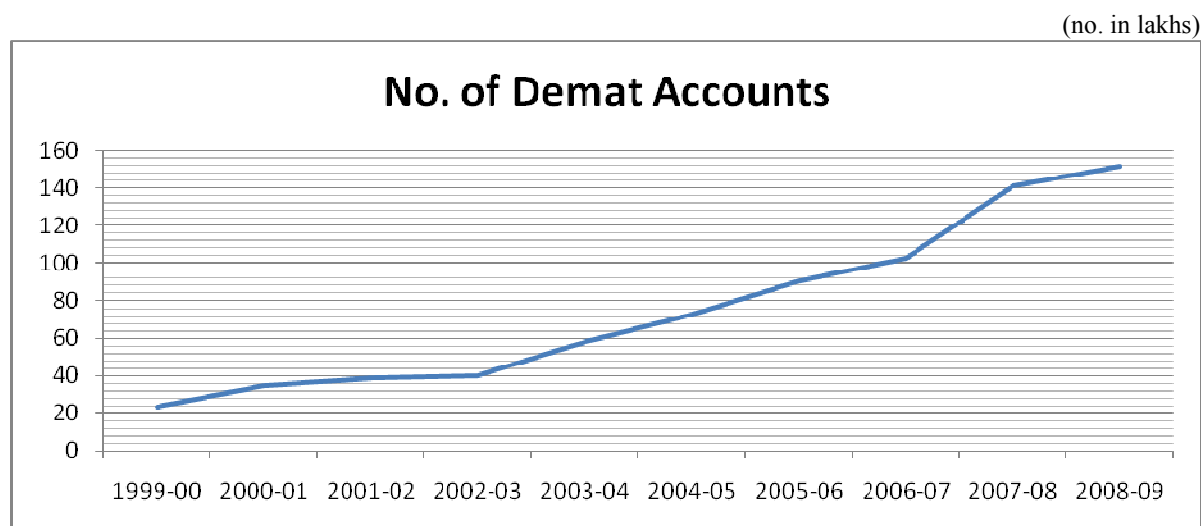

At the end of March 2009, a total number of 349 members were permitted to allow investor's web based access to NSE's trading system. The members of the exchange in turn had registered 5,627,789 clients for web based access as on March 31, 2009. During the year 2008-09 10.58 % of the trading value in the Capital Market segment (Rs. 582,070 - US \$ 114,243 million) was routed and executed through the internet. The table below shows the growth of internet trading from the fiscal years 2007-08 and 2008-09:

Insurance Sector

The Insurance sector in India has been traditionally dominated by state owned Life Insurance Corporation and General Insurance Corporation and its four subsidiaries. Government of India has now allowed FDI in insurance sector up to 26%, which has seen a number of new joint venture private companies entering the life and general

insurance sectors, and their market share is rising at a rapid pace. IRDA is the regulatory authority in the insurance sector developed under the provisions of the Insurance Regulatory and Development and Authority Act, 1999.

Mutual Funds

The Indian mutual fund industry is one of the fastest growing sectors in the Indian capital and financial markets. The mutual fund industry in India has seen dramatic improvements in quantity as well as quality of product and service offerings in recent years.

Almost all varieties of schemes are offered today. The Mutual fund industry operates in a strict regulatory environment and conforms to the best international standards. Association of Mutual Funds in India (AMFI) is a trade body of all the mutual funds in India. It is a non-profit organisation set-up to promote and protect the interests of mutual funds and their unit holders. SEBI is the regulator of the mutual fund industry in India.

Mutual Funds also played a big role in surmounting the financial crises that rocked the world economy in the previous fiscal. As more and more investors are looking for alternative instruments the industry grew in size. The total assets under management (AUM) stood at Rs 6,37,180.48 crores in September 2009. In FY 2009 till October 2009, the mutual funds invested a total of Rs. 81,847.90 crores, of which Rs. 4,994.70 crores was invested in equity and Rs. 81,487.90 was invested in debt. The AUM for the month ended July 2009 improved by 65.33% to Rs. 689,946.10 cr as compared to Rs. 417, 00 cr reported for the financial year ended FY 2009.

Non Banking Finance Companies

Non Banking Finance Companies (NBFCs) have played a crucial role in broadening the access to financial services, enhancing competition and in the diversification of the financial sector. NBFCs are increasingly being recognized complementary to the banking system, capable of spreading risks at times of financial distress. NBFCs are recognized as an integral part of the financial system with an impetus to improve the credibility of the entire sector. Today, NBFCs are present in the competing fields of vehicle financing, hire purchase, lease, personal loans, working capital loans, consumer loans, housing loans, loans against shares, investments, distribution of financial products, etc. The total numbers of NBFCs registered with the RBI in India in 2009 were more than 12,800.

Impact on the Financial Markets

Post-Lehman, the impact of the global financial crisis unfolded in the Indian financial markets, through reversal of capital inflows and significant correction in the domestic stock markets on the back of sell-off in the equity market by the Foreign Institutional Investors (FIIs). The withdrawal of funds from the Indian equity markets and reduced access of the Indian entities to raise funds from the international markets put significant pressure on the dollar liquidity in the domestic foreign exchange market. These developments created adverse expectations on the balance of payments (BoP) outlook leading to downward pressures on the Indian rupee and increased volatility in the foreign exchange market.

We have deployed resources in terms of technology, people and processes to manage our risk management function. We have established general risk management procedures for trading activities, including instruments and strategies, position and trading limits for trading desks, business units and/or individual traders, periodic stress testing and cash flow and "Value at Risk" analysis. We periodically review and modify such procedures, as necessary or appropriate. These procedures cover our internal control system, customer margin requirement and risk management of relationship members. This is evident from the fact that during the last fiscal when the global economy was facing a downturn we have managed to sustain our financial performance. For the year 2008-09 and for the period ended September 30, 2009 we have not written off any of the provisions created for doubtful debts.

Centralized Infrastructure

Our Company along with all its subsidiaries has their corporate office located at Andheri, Mumbai. The office spreads across an area admeasuring 4,444 sq. mtrs. Our Company including the subsidiaries operates in the same premises thereby facilitating ease in functionality, supervision and guidance thus enabling quick decision making in different business verticals.

We are also empanelled with Indian banks, mutual funds, and insurance companies. We revamped our risk management system in order to avoid any margin shortfall on broking clients or on funding clients. We have deployed adequate policy based monitoring and squaring off not only for mass retail but also for high networth clients. These have helped us in protecting our capital during adverse market movements and also sustain our financial performance during the last fiscal.

Business Strategy

We strive for complete transparency and satisfaction of our clients with an unwavering thrust and focus on professional excellence and integrity. In keeping with this philosophy, we will focus on increasing our customer base in all our products, give them a platform of choice to transact and support them with quality research as well as on capturing the significant growth opportunities across the Indian financial services spectrum. Our key strategic initiatives are described below:

Working Capital

The working capital requirement of the company arises on account of the gap in realization of cheques from clients and amount to be paid to the exchanges towards pay in on the settlement dates. With growing business this gap is widening creating large requirement for working capital. In tandem with the growth in the financial markets, we expect our Company's trading volumes to increase further. It is proposed to complement our working capital requirement which is currently met out of bank limits and internal accruals. To cater to these increasing needs of stock exchanges we plan to deploy Rs. 2000 lakhs. For further details on this investment refer to chapter titled "Objects of the issue" on page no 39 of this Draft Red Herring Prospectus.

Concentration on NBFC activities

This business segment has two revenue verticals, which are interest income and also generates brokerage from trading of shares. The brokerage income is earned by our Company and interest income is credited in IFPL. There has been a growth in our NBFC activities in terms of clients as well as revenues. To augment this growth we are striving to strengthen our NBFC team. We also foresee a major growth in the NBFC in the coming years. We propose to increase our presence in this vertical, both in terms of team strength and geographic reach. To cater to the increasing needs of our clients we plan to invest Rs. 3000 lakhs in our subsidiary IFPL. For further details on this investment refer to chapter titled "Objects of the issue" on page no 39 of this Draft Red Herring Prospectus.

Investment in our Subsidiary, ICL

We intended to deploy Rs. 300 lakhs to our subsidiary Inventure Commodities Limited to fund our working capital requirement which mainly comprises margins to be placed with the commodity exchanges and to meet additional margin requirement of the exchanges which varies on daily basis depending upon the volatility. Our Company believes that such investment in ICL is in line with its strategy of expanding its core business. This capital infusion in ICL will be in the form of subscription to their equity shares and through interest bearing unsecured loan or any combination thereof.

Achieve operational efficiencies

We intend to achieve operational efficiencies and maximize revenues through efficient use of technology, focused marketing and optimization of our resources. This would depend on our ability to maintain adequate capital and liquidity to absorb any adversities on broking and lending business, stabilizing the earning profile, improving upon the profitability and adherence to stringent risk management systems.

Strengthen relationship with our clients

We seek to build on existing relationships and also focus on increasing our client base. We plan to expand our business primarily by increasing the number of client relationships, as we believe that increased client relationships will add stability to our business. We also seek to offer our clients, diversified products and services to increase our per capita revenues by selling different products to the same client.

Increasing geographical reach

We are focused on increasing our concentration in the existing cities as well as expand into smaller cities and towns that we believe have the potential to grow. Currently, we have a presence in the major cities of India. Foreseeing the growth potential in the northern and eastern regions we plan to expand our reach in these regions. We propose to expand by increasing the network of our branches and are open to growth through the inorganic route including acquisitions. We believe that this network expansion, complemented by client-focused relationship management, will allow us to add new clients and help us grow our market share.

Non Banking Financial Services

IFPL is RBI registered NBFC and is in the business of advancing loans to clients for acquisition of shares/ stock/ bonds/ debentures/ securities issued by government or local authority or other securities of like marketable nature. This facility provides the clients with the opportunity to buy shares listed on the stock exchanges on credit. Holders of a portfolio are able to buy new shares utilising the liquidity provided to them by us. In order to secure the amount of credit extended, we use part of the client's share portfolio as collateral, which goes to make up a "Margin Portfolio", including all the shares purchased with credit. For this purpose, the IFPL performs a credit worthiness assessment of each of its clients before extending financing to them. The customer financing is provided against a margin of approximately 25-50% and is available only for purchase of shares which form part of our "Approved List of securities". This list is decided by the management and reviewed from time to time. The liquidity provision is a pre-decided sanctioned limit awarded to a client. Upon the signing of the contract, the client designates the shares that will make up the collateral portfolio and is ready to buy on margin. The extra liquidity made available by us may be used whenever the client considers that market conditions make this worthwhile. By using this facility the client leverages his investment. This means that a possible rise in the price of shares will lead to higher returns. This activity is central for the growth of our business as well as client retention as it is complementary to our broking business.

Wealth Management

IWML the advisory arm of our Company, that caters to retail and HNI clients to provide advisory services in almost all the sectors related with financial market which include areas like finance, equities, mutual funds, life insurance, general insurance and tax planning. We have a dedicated team of employees including specialist advisors who understand each client needs individually and offer customised services to them. Our advisors first analyze the risk appetite and identify individual's goals and objectives. They diversify the investment strategy by combining asset classes, securities from different sectors to maximize performance, minimize losses and increase the likelihood of returns. As the number of individual securities in the investment increases, unsystematic risk (the risk that pertains to a single company) decreases. They then create a basket of stock, bonds and mutual funds to fit into the personal investment goals and objectives. Hence, we provide different types of investment strategies. Since an investment strategy is a collection of individual securities, the amount each single security contributes to the total depends both on its individual return and its share of the initial market value of the investment. Our advisors also accept our clients existing securities, bonds and mutual fund holdings along with cash which can be then be revamped according to their goal and preferences. The aim of diversification is to reduce risk without sacrificing returns.

Insurance advisory services

Since its incorporation IIBPL has been dealing as a corporate agent for major insurance companies. As an agent we have acquired a number of clients and have been successful in generating repeat business from them. We have a dedicated team of dedicated employees including relationship managers who understand each client specific needs and offer personalised solutions for alleviation of business as well as personal risks. As a broker, we plan to distribute major insurance companies' products in life as well as non-life segments to our clients and provide consultancy and guidance to them. To grow our existing relationship with our clients and further facilitate their need we have applied for IRDA registration on November 24, 2009 for direct insurance broker's license.

Wholesale Debt market segment

The Debt Market is the market where fixed income securities of various types and features are issued and traded. Debt Markets are therefore, markets for fixed income securities issued by Central and State Governments, Municipal Corporations, Government bodies and commercial entities like financial institutions, banks, public sector units, public limited companies and also structured finance instruments. The Commercial Banks and the Financial Institutions are the most prominent participants in the Wholesale Debt Market in India. As government securities enjoys the greatest amount of security and have Zero Default Risk they offer one of the best reasons for investments to investors. In tandem with this we are expecting a rise in this business segment. We are a member of Wholesale Debt market segment of BSE and undertake transactions in debt instruments namely government securities and other fixed income instruments. On April 9, 2009 we have applied for trading member of NSE, Wholesale Debt Market segment for carrying on activities of dealing in wholesale debt market.

We update our investors about forthcoming IPO and news articles in relation to IPO. We also offer a host of mutual fund scheme of major funds in the country as per the requirement of each client. The relationship managers study the investment needs of each individual separately and hence offer a scheme to them as per their risk appetite and investment objective.

Risk Management

The global financial crisis has highlighted the need to manage risks regarding new financial instruments such as derivatives, currency futures etc. Our Company is dealing in financial services and hence risk management is of utmost importance. We have deployed resources in terms of technology, people and processes to manage our risk management function. We monitor and control our risk exposure through financial, credit, operational, compliance and legal reporting systems based on mandatory regulatory requirements and as per our business

needs. We have risk management procedures for evaluating and managing the market, credit and other risks to which we are exposed, as well as protecting our reputation in the market.

Internal Controls

We have established general risk management procedures for trading activities, including instruments and strategies, position and trading limits for trading desks, business units and/or individual traders, periodic stress testing and cash flow and "value at risk" analyses. We periodically review and modify these procedures, as necessary or appropriate. This regular stress testing analysis helps us in maintain adequate financial resources to withstand any default or delay in payment by clients.

Under our KYC policy, prior to establishing a relationship with a customer, we assess the risks of doing business with that customer. We also regularly monitor these risks throughout the term of the relationship with the customer. In general, our consideration focuses on the following areas:

- the nature of the customer (e.g., institutional or retail) and its corresponding level of experience and sophistication;
- the creditworthiness of the customer, as measured by established credit policies and procedures as mentioned for compliance and risk management; and
- the authority (including apparent authority) of the customer to conduct its proposed trading activities, including the customer's legal authority and the capacity of the individuals responsible for the trading.

To further mitigate our risk we have imposed separations with regards to business activities between:

- back office personnel responsible for trade reconciliation, margin, position limits, preparation and maintenance of books and records and other similar matters as well as compliance personnel, risk management personnel and treasury or funding personnel; and
- personnel responsible for customer relationships or proprietary trading.

Customer Margin Requirement

Customer margin requirements and position limits are established at levels that are adequate to protect us against reasonably foreseeable risks arising from the customer's trading activities. Customers' significant market exposures are reviewed on a weekly basis and whenever necessary we call for additional collateral or modify margin requirements or position limits to reduce the size of existing positions.

We have enforced policies and procedures regarding the prompt collection of customer margin (other than in the case where there are appropriate credit arrangements in place) and the liquidation of customer accounts (or other appropriate action) where necessary.

Technology

To maintain our risk management system and reduce operational errors we need to be well equipped with regards to latest software and hardware available in the market. Our investment in technology will help us to achieve economies of scale as we expand our product and service offerings.

To ensure operational efficiency and mitigate our risk, we have set up a dedicated data centre at our registered office and have invested in high-performance trading software.

We have entered into the following agreements for a tie up as our technology partners for establishing our network and for providing servers and desktops.

I. Dealing in Securities

Securities regulation in India takes place under the provisions of the SCRA, SEBI Act, the Depositories Act, 1996 and the rules and regulations promulgated thereunder.

SCRA

The SCRA seeks to prevent undesirable transactions in securities by regulating the business of dealing in securities and other related matters. The SCRA provides for grant of recognition for stock exchanges by the Central Government. Every recognized stock exchange is required to have in place a set of rules relating to its constitution and bye-laws for the regulation and control of contracts.

The bye-laws normally provide *inter alia* for:

- (i) the opening and closing of markets and the regulation of the hours of trade;
- (ii) the fixing, altering or postponing of days for settlements;
- (iii) the determination and declaration of market rates, including the opening, closing highest and lowest rates for securities;
- (iv) the terms, conditions and incidents of contracts, including the prescription of margin requirements, if any, and conditions relating thereto, and the forms of contracts in writing;
- (v) the regulation of the entering into, making, performance, recession and termination of contracts, including contracts between members or between a member and his constituent.

SEBI Act

Pursuant to Section 12 of the SEBI Act, and the rules, regulations and guidelines issued by SEBI, a stockbroker, sub-broker and depository participant or any other intermediary associated with the securities market, may buy, sell or deal in securities only after obtaining a valid certificate of registration from SEBI in accordance with the applicable regulations.

Stock Broker Regulations

The Securities and Exchange Board of India (Stock Brokers and Sub-Brokers) Regulations, 1992, as amended from time to time ("**Stock Broker Regulations**") provides that no person shall carry on activity as a stock broker unless he holds a certificate granted by SEBI under the Stock Broker Regulations.

Further, the Stock Broker Regulations provides the eligibility criteria and conditions required to be satisfied in order to obtain the certificate of registration. They further provide the procedure for obtaining the certificate of

registration to carry on business as a stock broker and/or a sub-broker who is required to be affiliated to a stock broker registered under the aforesaid regulations. On registration, the stockbroker and sub-broker are required to adhere to a code of conduct prescribed under the Stock Broker Regulations. In addition, a stock broker and/or a subbroker is required to abide by the rules, regulations and bye-laws of the stock exchange or stock exchanges of which it is a member. Further, in case of any change in its status or constitution, the stock broker and/or the sub-broker are required to obtain the prior permission of SEBI in order to continue to buy, sell or deal in securities in any stock exchange.

II. Depository Regulation

The Depositories Act

The Depositories Act, 1996 (as amended from time to time) provides for regulation of depositories in securities and other related matters. Every person subscribing to securities offered by an issuer has the option either to receive the security certificates or hold securities with a depository. All securities held by a depository are required to be dematerialised and in a fungible form. A depository after obtaining a certificate of commencement of business from SEBI can enter into an agreement with one or more participants as its agent. Any person, through a participant, may enter into an agreement with any depository for availing its services.

Depository Regulations

The Securities and Exchange Board of India (Depositories and Participants) Regulations, 1996, as amended from time to time ("**Depository Regulations**") provide *inter alia* the eligibility criteria and the procedure for obtaining the certificate of registration to carry on business as a depository participant. They also provide the various rights and obligations of the depository participants. On registration, the depository participant is required to adhere to a code of conduct prescribed under the Depository Regulations.

The depository is deemed to be the registered owner for the purposes of effecting transfer of ownership of security on behalf of a beneficial owner. The depository does not have any voting rights or any other rights in respect of securities held by it. The beneficial owner of the securities is entitled to all the rights and benefits and is subjected to all the liabilities in respect of his securities held by a depository.

III. NBFC Regulations

The Reserve Bank of India Act

The RBI is entrusted with the responsibility of regulating and supervising activities of NBFCs by virtue of the power vested in it under Chapter III B of the Reserve Bank of India Act of 1934 (“**RBI Act**”). The RBI Act defines an NBFC under Section 45-I (f) as:

- (i) *a financial institution which is a company;*
- (ii) *a non-banking institution which is a company and which has as its principal business the receiving of deposits, under any scheme or arrangement or in any other manner, or lending in any manner;*
- (iii) *such other non-banking institution or class of such institutions as the RBI may, with the previous approval of the Central Government and by notification in the Official Gazette, specify.”*

A “financial institution” and a “non-banking institution” have been defined under sections 45-I(c) and 45-I(e) of the RBI Act, respectively.

The RBI has clarified through a press release (Ref. No. 1998-99/1269) dated April 8, 1999, that in order to identify a particular company as an NBFC, it will consider both the assets and the income pattern as evidenced from the last audited balance sheet of the company to decide its principal business. The company will be treated as an NBFC (a) if its financial assets are more than 50 per cent of its total assets (netted off by intangible assets); and (b) income from financial assets should be more than 50 per cent of the gross income. Both these tests are required to be satisfied as the determinant factor for principal business of a company.

The RBI Act mandates that no NBFC shall commence or carry on the business of a non-banking financial institution without obtaining a certificate of registration (“**CoR**”). In case an NBFC does not accept deposits from the public (“**NBFC-ND**”), it shall obtain a CoR without authorisation to accept public deposits. The NBFC must also have a net owned fund of Rs. 20 million.

The RBI has the power to exempt certain NBFCs from the requirement of obtaining the CoR. In the past, the RBI has granted exemption to certain NBFCs, upon satisfaction of *inter alia*, the following conditions:

- a) the said NBFC is having not less than 90% of its total assets in investments in shares for purpose of holding stake in the investee companies;
- b) the said NBFC is not trading in these shares except for block sale (to dilute or divest holding);
- c) the said NBFC is not carrying on any other financial activities; and
- d) the said NBFC is not holding public deposits.

Under Section 45 – IC of the RBI Act, every NBFC must create a reserve fund and transfer thereto a sum not less than 20 per cent of its net profit every year, as disclosed in the profit and loss account and before any dividend is declared. Such a fund is to be created by every NBFC irrespective of whether it is an NBFC-ND. Further, no appropriation can be made from the fund for any purpose without prior written approval of the RBI.

Public Deposit Regulations

As per the Non-Banking Financial Companies Acceptance of Public Deposits (Reserve Bank) Directions, 1998 (Notification No.DFC.118/DG(SPT)-98) dated January 31, 1998 (as amended from time to time and last amended on July 01, 2006) (“Public Deposit Regulations”), an NBFC-ND is entitled to certain exemptions from the norms and conditions stipulated on NBFCs taking deposits. In order to benefit from these exemptions, the board of directors of the NBFC-ND must pass a resolution for non-acceptance of public deposits and such NBFC-ND should not have accepted any public deposits during the relevant period/ year.

Certain financial companies, including *inter alia* insurance companies, companies doing business as a stock broker or sub-broker, merchant banking companies, housing finance companies, venture capital fund companies, are exempt from the requirement of obtaining a CoR or complying with the Public Deposit Regulations.

Prudential Norms

As per the Non Banking Financial Companies Prudential Norms (Reserve Bank) Directions, 1998 (Notification No. DFC. 119 /DG(SPT)-98) dated January 31, 1998 (as amended from time to time and last amended on February 22, 2007) ("**Prudential Norms**"), the RBI has issued detailed directions on prudential norms, which *inter alia*, prescribe guidelines on income recognition, asset classification and provisioning requirements applicable to NBFCs, exposure norms, constitution of audit committee, disclosures in the balance sheet, requirement of capital adequacy, restrictions on investments in land and building and unquoted shares. The Prudential Norms are not applicable to NBFCs-ND holding investments in the securities of its group/holding/subsidiary companies where the book value of such holding is not less than 90 per cent of its total assets and where such NBFC-ND is not trading in such securities and is not a systemically important NBFC-ND.

Systemically Important NBFCs-ND

All NBFCs – ND with an asset size of Rs. 1,000 million or more as per the last audited balance sheet will be considered as a systemically important NBFC – ND ("**NBFC-ND-SI**"). All NBFCs-ND-SI are required to maintain a minimum Capital to Risk-weighted Assets Ratio ("**CRAR**") of 10%. An NBFC-ND-SI is not allowed to:

- a) lend to
 - i) any single borrower exceeding 15% of its owned fund; and
 - ii) any single group of borrowers exceeding 25% of its owned fund;
- b) invest in
 - i) the shares of another company exceeding 15% of its owned fund; and
 - ii) the shares of a single group of companies exceeding 25% of its owned fund;
- c) lend and invest (loans/investments taken together) exceeding
 - i) 25% of its owned fund to a single party; and
 - ii) 40% of its owned fund to a single group of parties.

KYC Guidelines

The RBI has extended the Know Your Customer ("**KYC**") guidelines to NBFCs and advised all NBFCs to adopt the same with suitable modifications depending upon the activity undertaken by them and ensure that a proper policy framework of anti-money laundering measures is put in place. The KYC policies are required to have certain key elements, including *inter alia* customer acceptance policy, customer identification procedures, monitoring of transactions and risk management, adherence to KYC guidelines and the exercise of due diligence by persons authorized by the NBFC, including its brokers and agents.

Corporate Governance Guidelines

Pursuant to an RBI Circular dated May 8, 2007, all NBFC-ND-SIs are required to adhere to certain corporate governance norms including constitution of an audit committee, a nomination committee, a risk management committee and certain other norms in connection with disclosure and transparency and connected lending.

Norms for excessive interest rates

In addition, the RBI has recently introduced (RBI/2006-07/414 dated May 24, 2007) whereby the RBI has requested all NBFCs to put in place appropriate internal principles and procedures in determining interest rates and processing and other charges.

IV. Mutual Funds

Mutual Funds Regulations

The Securities and Exchange Board of India (Mutual Funds) Regulations, 1996 govern the law pertaining to the business of mutual funds in India. The SEBI, with a view to improving professional standards, has made it mandatory for all mutual funds to appoint agents/distributors who have obtained certification from the AMFI. In case of firms/companies, the requirement of certification is made applicable to the persons engaged in sales and marketing.

The AMFI has issued guidelines in consonance with the various circulars issued by SEBI in this regard. The primary objective of these guidelines is to ensure that mutual funds do not use unethical means to sell, market or induce any Investor to buy units of their scheme(s) and mobilize funds on the strength of professional fund management and practice as well as sound risk management policies. These guidelines are mandatory. Mutual funds are required to ensure compliance with these guidelines both by intermediaries distributing their products and through them, sub-brokers acting on behalf of such intermediaries.

Mutual Fund distribution by NBFCs

NBFCs can market and distribute mutual fund products as agents of mutual funds, with prior approval of the RBI as provided for under RBI Circular (DNBS (PD) CC No. 84/03.10.27/2006-07), dated December 4, 2006, for an initial period of two years and a review thereafter. NBFCs must however, comply with certain minimum requirements, such as a minimum net owned fund of Rs.1000 million and net profit as per last two years audited balance sheet.

Further, the NBFC should comply with the SEBI guidelines/regulations, including their code of conduct, for distribution of mutual fund products. In this regard, the NBFCs should not adopt any restrictive practice forcing its customers to opt for a particular mutual fund product sponsored by it and the customers should be allowed to exercise their own choice. In addition, the participation by a company's customer in mutual fund products should be purely on a voluntary basis and this information should be stated in all publicity material distributed by the company in a prominent way.

There are other aspects of mutual fund distribution which must be complied with, such as adherence to KYC guidelines and the provisions of the Prevention of Money Laundering Act, 2000. Moreover, the company must comply with Public Deposit Regulations and the Prudential Norms and any other instructions/ provisions of the RBI Act, to the extent applicable.

V. Insurance advisory services

A trading-cum-clearing member or an institutional clearing member of such an exchange is a person who has the right to clear transactions in contracts that are executed in the trading system of the exchange. A trading-cum-clearing member is therefore subject to the rules and bye-laws framed by the exchanges in order to govern the trade in commodities. In case of difference between the provisions of any rules, the regulations or bye-laws of the exchange and the provisions of FCRA or FCRR, the provisions of the FCRA or FCRR shall prevail, except where the FCRA or FCRR allows the application or enforcement of the rules, articles, bye-laws or regulations of the exchange.

Significant Accounting Policies

Our significant accounting policies are those that are both (i) relevant to the presentation of our financial condition and results of operations; and (ii) require our management's most difficult, subjective or complex judgments, often as a result of the need to make estimates and assumptions about the effect of various matters. By their nature, assumptions, estimates and judgments that our management is required to make are inherently subject to a degree of uncertainty. These judgments are based on our historical experience, our evaluation of accounting

practices that would be appropriate in respect of our business, our observation of trends in the financial service sector, information with respect to our customers, and information available from independent sources, as appropriate.

While we believe that these judgments have been exercised by our management in good faith and with due consideration to all material effects on our financial statements, there can be no assurance that our management's judgment will prove correct or that actual results reported in future periods will not differ from our expectations reflected in the accounting treatment of certain items. While we believe that all aspects of our financial statements should be reviewed when assessing our current and expected financial condition and results of operations, we believe that the following critical accounting policies warrant particular attention.

- **System of Accounting**

The financial statements have been prepared on a going concern and on accrual basis, under the historical cost convention and in accordance with the generally accepted accounting principles, the accounting standards prescribed in the Companies (Accounting Standards) Rules, 2006 issued by the Central Government and relevant provisions of the Companies Act 1956, to the extent applicable.

- **Use of Estimates**

The preparation of the financial statements in conformity with the generally accepted accounting principles requires the management to make estimates and assumption that affect the reported amount of assets, liabilities, revenues and expenses and discloser of contingent assets and liabilities. The estimates and assumptions used in the accompanying financial statements are based upon management's evaluation of the relevant facts and circumstances as of the date of the Financial Statements. Actual results may differ from the estimates and assumptions used in preparing the accompanying Financial Statements. Any differences of actual results to such estimates are recognised in the period in which the results are known / materialised.

- **Revenue recognition**

- a. Income from brokerage activities is recognized as income on the trade date of the transaction.
- b. Income from arbitrage operations is stated net of commission expenses, if any, incurred against it and without deduction of Securities Transaction Tax.
- c. Profit / Loss on sale of investments is recognized on the trade date of the transaction and is stated net of Securities Transaction Tax incurred.

- **Fixed Assets**

Fixed assets are stated at cost less depreciation/amortization. The cost of fixed assets comprises purchase price and any attributable cost of bringing the asset to its working condition for its intended use.

- **Depreciation / Amortization**

Tangible fixed assets are depreciated on straight line basis in accordance with the rates prescribed under Schedule XIV of the Companies Act, 1956.

Intangible assets are amortized on a straight line basis over a period having regard to their useful economic life and estimated residual value in accordance with Accounting Standard (AS) 26 "Intangible Assets".

Computer Softwares are amortized over a period of 4 years.

Bombay Stock Exchange Membership is amortized over a period of 15 years, having regard to the nature and long term economic life of the asset.

- **Stock - in - trade**

Shares and Securities acquired for sale in the ordinary course of business are considered as stock - in - trade, and are valued at lower of cost or market value as at the year/period end.

- **Investments**

Investments of long term nature are valued at cost. Provision is made to recognize a decline, other than temporary, in the value of such investments. Current Investments are valued at cost or market value, whichever is lower.

- **Securities Transaction Tax**

- b) Securities Transaction Tax related to transactions other than investments (to the extent available for rebate against income tax liability) is treated as tax payment upto the financial year 2007-2008.

- **Borrowing costs**

Borrowing costs relating to acquisition of fixed assets which takes substantial period of time to get ready for its intended use are included to the extent they relate to the period till such assets are ready to be put to use. All other borrowing costs are charged to revenue.

- **Keyman Insurance**

Keyman Insurance premium paid during the financial year is written off as expenditure in the profit and loss account.

- **Employees Retirement Benefits**

- a) **Provident Fund**

The Company contributes to a recognized provident fund which is a defined contribution scheme. The contributions are accounted for on an accrual basis and recognized in the profit and loss account.

- b) **Gratuity**

The employees of the Company are eligible for Gratuity in accordance with the Payment of Gratuity Act, and is a Defined Employee Benefit. The above benefit is not funded but provision is made in the accounts.

The Company's net obligation in respect of the gratuity benefit is calculated by estimating the amount of future benefit that the employees have earned in return for their service in the current and prior periods, that benefit is discounted to determine its present value.

The present value of the obligation under such benefit plans is determined based on actuarial valuation using the Projected Unit Credit Method which recognizes each period of service that give rise to additional unit of employee benefit entitlement and measures each unit separately to built up the final obligation.

The obligation is measured at present values of estimated future cash flows. The discounted rates used for determining the present value are based on the market yields on Government Securities as at the balance sheet date.

Actuarial gains and losses are recognized immediately in the profit and loss account

- c) **Compensated Leave**

Unutilized leave of staff lapses as at the year end and is not encashable. Accordingly, no provision is made for compensated absences.

- **Equity Index/Stock – Futures**

Equity Index/Stock Futures are marked-to-market on a daily basis. Debit or credit balance disclosed under Loans and advances or Current liabilities, respectively, in the "Mark-to-Market Margin – Equity Index/Stock Futures Account", represents the net amount paid or received on the basis of movement in the prices of Index/Stock Futures till the balance sheet date.

As on the Balance Sheet date, the profit/ loss on open position in Index/Stock futures are accounted for as follows:

- a. Credit balance in the “Mark-to-Market Margin-Equity Index/Stock Futures Account”, being anticipated profit, is ignored and no credit is taken in the profit and loss account.
- b. Debit balance in the “Mark-to-Market Margin-Equity Index/Stock Futures Account”, being anticipated loss, is recognized in the profit and loss account.

On final settlement or squaring up of contracts for equity index/stock futures, the profit or loss is calculated as difference between settlement/squaring up price and contract price. Accordingly, debit or credit balance pertaining to the settlement/squared up contract in “Mark-to-Market Margin Equity Index/Stock Futures Account” is recognized in the profit and loss account upon expiry of the contracts.

“Initial Margin – Equity Index/Stock Futures Account”, representing initial margin paid, for entering into contracts for Equity Index/Stock Futures, which are released on final settlement/squaring-up of underlying contracts, is disclosed as under Loans and advances.

- **Equity Index/Stock – Options**

“Equity Index/Stock Option Premium Account” represents premium paid or received for buying or selling the options, respectively.

- **Taxation**

Income-tax expense comprises current tax (i.e. amount of tax for the period determined in accordance with the income-tax law), deferred tax charge or credit (reflecting the tax effect of timing differences between accounting income and taxable income for the period) and fringe benefit tax.

- a. **Deferred taxation**

The deferred tax charge or credit and the corresponding deferred tax liabilities and assets are recognized using the tax rates that have been enacted or substantially enacted at the balance sheet date. Deferred tax assets are recognised only to the extent there is reasonable certainty that the asset can be realised in future; however, where there is unabsorbed depreciation or carried forward loss under taxation laws, deferred tax assets are recognised only if there is a virtual certainty of realisation of the assets. Deferred tax assets are reviewed as at each balance sheet date and written down or written-up to reflect the amount that is reasonable/virtually certain (as the case may be) to be realised.

- b. **Fringe benefit tax**

Provision for Fringe Benefit Tax (FBT) is made on the basis of applicable FBT on the taxable value of chargeable expenditure of the Company as prescribed under the Income Tax Act, 1961.

- **Impairment of Assets**

The Company assesses at each balance sheet date whether there is any indication that an asset may be impaired based on internal/external factors. If any such indication exists, the Company estimates the recoverable amount of the asset. If such recoverable amount of the asset or the recoverable amount of the cash generated unit to which the asset belongs, is less than its carrying amount, the carrying amount is reduced to its recoverable amount.

- **Provisions, contingent Liabilities and Contingent Assets**

Contingent liabilities, if material, are disclosed by way of notes, contingent assets are not recognized or disclosed in the financial statements. A provision is recognized when an enterprise has a present obligation as a result of past event(s) and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation(s), in respect of which a reliable estimate can be made for the amount of obligation.

Result of Operations

The current subsidiaries of the Company, IFPL and ICL were acquired on December 7, 2007 and August 19, 2008 respectively; similarly IIBPL and IWML were formed on January 8, 2008 and June 12, 2008 respectively. As a result, the first set of Consolidated Results were required to be made for the first time in the financial year 2007-08 and hence the results of operations for the year ended March 31, 2007 given for our Company on a stand-alone basis are not comparable to the year ended March 31, 2008 (Consolidated). The following table sets forth select financial data from our standalone restated profit and loss accounts for the period ended September 30, 2009 and fiscal 2009, 2008 and 2007 the components of which are also expressed as a percentage of total income for such periods. Our restated stand-alone profit and loss account provided under the head "Financial Information" give details about our sources of revenue for each company separately and consolidated as well.

Revenue

Our total income comprises income from operations and other income. Income from operations comprise primarily of brokerage and commission income, trading and arbitrage income and depository income.

- Income from brokerage is through our execution of third party trades for equities and derivatives on the exchanges and distribution of mutual funds. The income from brokerage services is driven principally by the number of active clients and the volume of business done by them. Client growth has been a significant driver of revenue growth in our broking business. Commission income comprises of the commission earned by sale of third party insurance products and mutual funds to our clients. Mutual Fund and Insurance Broking is a

hand on role requiring a combination of technical knowledge, business, communication, people and practical skills and is driven by acting in the best interests of the customer and providing sound practical advice which is independent of any insurance company and/or mutual fund house's influence. Growth in total client numbers has been driven primarily by our increased geographical presence, and enhanced skilled and competent trade and execution teams aided by well structured research team.

- Trading and arbitrage income represents income earned from our internal treasury operations. Arbitrage opportunity arises because of temporary mismatch between two exchanges/ segments based on various factors such as time, liquidity and price.
- We are a depository participant with CDSL and offer depository services to our retail broking clients as a value-added service. Depository income consists of annual maintenance fees in addition to transaction-based charges for transactions undertaken by depository clients.
- Other income consists primarily of dividends, interest earned and profit on sale of investment.

Expenditure

Our Company's expenditure comprises of personnel expenses, operating and establishment expenses, interest and other financial charges

- Personnel expenses include salaries, bonus and allowances, contribution to provident funds, employee benefit (gratuity) expenses and staff welfare expenses. Personnel expenses are associated with compensating existing staff, as well as the recruitment and retention of staff during the period.
- Operating and establishment expenses include brokerage sharing with intermediaries, transaction charges, stamp duty and miscellaneous and depository charges. These expenses pertain to the number and size of transactions carried out by us on behalf of our broking customers.
- Interest and other financial charges principally include interest and other fees charged by banks. Interest is charged on our long term loan and overdraft facilities. Bank charges consist of comission charged by bank pertaining to bank guarantees obtained to meet our margin requirements with stoack exchanges.

Depreciation

It includes depreciation on office premises, office equipments, air conditioners, furniture and fixtures, computers and motor cars.

Taxation

It includes both current taxes, comprising of income tax, and fringe benefit tax and deferred taxes. Provision for current tax is made after taking into consideration benefits admissible under the provisions of the Income Tax Act, 1961. Deferred tax resulting from "timing difference" between book and taxable profit is accounted for using the tax rates and laws that have been enacted or substantively enacted as on the Balance Sheet date. The deferred tax assets are recognised if there is a reasonable certainty that the assets will be realized in future.

Adjustments

1) Due To Changes in Accounting Policy

Membership of Bombay Stock Exchange included in intangible asset was amortized over a period of ten years on straight line basis up to the year ended March 31, 2005. However, from the subsequent year i.e. from the year ended March 31, 2006, upon review of the useful economic life of the asset; the accounting policy was changed to amortize the asset over a period of fifteen years on straight line basis. The restated financial statements for the year ended 31st March 2006, 2005 and balance of profit and loss account as on March 31, 2004 have been appropriately adjusted.

B) Adjustments having no impact on Profit

- Upto the year ended 31st March 2005, Securities Transaction Tax payments (whether related to investment transactions or otherwise) were debited to profit and loss account as expenses. The aforesaid change in the policy had no impact on the net profit for the year end/or position of the assets/ liabilities of the Company for the year ended 31 st March 2006. Appropriate adjustments have been carried out in the restated financial statements for the year ended 31 st March 2005 to reflect the revised accounting policy.

- Appropriate adjustments have been made in the Restated Statements of Assets and Liabilities, Profits and Losses and Cash Flows, wherever required, by reclassification of the corresponding items of income, expenses, assets and liabilities, in order to bring them in line with the groupings as per the audited financials of the Company for the period ended September 30, 2009 and the requirements of the Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations 2009.

accounts of the prior years. Appropriate adjustments have been made in the restated statement of Profit and Loss account to present them on gross basis.

- ii) In the Audited Financial Statements, “Interest on Fixed Deposits” and “Bank Interest on Overdraft” secured against the above fixed deposits have been shown separately as income and expenses respectively. Since, the interest expense is compensatory against the said income with direct nexus, for the appropriate presentation of the financial data, the interest income has been stated net of the corresponding expenses.

SEBI forwarded a copy of the enquiry report dated February 5, 2009 in the matter of enquiry conducted against our Company, in relation to its alleged dealings, in the scrip of G G Automotive Gears Limited.

SEBI called upon our Company to show cause in terms of regulation 13(1) of the SEBI (Procedure for Holding Enquiry by Enquiry Officer and Imposing Penalty) Regulations, 2002 read with regulations 28(1) and 38(2) of SEBI (Intermediaries) Regulations, 2008 as to why the appropriate penalty including penalty as recommended by the Enquiry Officer should not be imposed within 21 days.

Our Company as a broker was under an obligation to execute the orders for purchased or sale placed by IGSL's clients. Our Company therefore states that there exist no violations of the provisions of Regulation 4(a), (b), (c), and (d) of SEBI (Prohibition of Fraudulent and Unfair Trade Practice relating to Securities Market) Regulations, 1995 and Clauses A(1), (2), (3), (4) and (5) of Schedule II to Regulation 7 of SEBI (Stock broker & Sub-Broker) Regulation, 1992.

SEBI *vide* its letter dated January 6, 2010, bearing reference number Ref: IVD/ID1/MS/BS/190175/2010, informed our Company that SEBI is investigating in the matter of dealing in the scrip of Godawari Power and Ispat Ltd (GPIL) for the period from August 1, 2006 to August 31, 2006 and has called upon our Company to furnish following details: (i) A copy of the know your customer of IGSL's client having code no DD131. (i) our Company does arbitrage business in securities based on multiple paramaters like liquidity, volatility, spread and market debt and so does its client; (ii) The Securities of GPIL qualified on the above paramaters, hence adequate volume of trades, based in the opportunity at that time was carried out. However the volume on any day was not as significant to induce any movement of price of the security; (iii) In case of lack of opportunity, extremely negligible volumes were carried out in the securities of GPIL by our Company. Had there been any intention to influence the price the trades would have been carried out daily and that too with large volumes that impact the price of the security; (iv) Since there are multiple arbitragers in IGSL there are chances that the orders from the same broker are matched internally due to large number of terminal operations; (v) A negligible part of the volume and value of total transactions in the shares of GPIL were carried out in our Companys proprietary account and in the account of Mr. Deepak B. Desai; (vi) Orders are placed based on the available counter party quotes which may be higher or lower than the last traded price and requested SEBI to identify the number of orders placed below the last traded price so that the comparison and analysis of the same can also be carried out; and lastly (vii) our Company is not connected with GPIL, its promoters or directors

Replies to the Notice:

1. The Respondents replied to the Notice vide letter dated November 28, 2008

The Respondents *vide* his letter dated November 28, 2008 addressed to R. S. Champawat, advocate of the Complainants, narrated the terms of a family settlement between the various members of Rita Family to which the Complainants were also a party ("Arrangement").

The Respondents state that, (i) according to the said Arrangement the family properties and ventures of the Rita Family were divided amongst brothers by way of mutual settlement. The accounts were settled with mutual satisfaction of all the brothers and no amount remained outstanding. As per the Arrangement, all the shares of our Company which were standing in the name of any of the family members of the Rita family were allotted to Mr. Nagji K. Rita alone. ("disputed shares")

(ii) the disputed shares of the / Complainants were transferred to the name of Mr. Nagji K. Rita only in the year 2006 as our Company, being a stock broking company, was awaiting approval from SEBI for the said transfer amongst the promoter group holding. All the statutory formalities required for transfer of shares were complied and the value of those shares at cost were debited / credited in the financial accounts of the Rita family members in the financial year 2006-07.

(iii) the transfer of disputed shares was with the free consent of the Complainants which is evidenced by their signature in the transfer form, their passing entries in their books of accounts etc. Further Mr. Premji Rita was a director in our Company upto June 2007 and shares were transferred in his presence. Hence, the allegations levied by the Complainants with regards to their unawareness about transfer of shares from their name to the name of Mr. Nagji K. Rita, is baseless.

Multiple Bids

In case of a mutual fund, a separate Bid can be made in respect of each scheme of the mutual fund registered with SEBI and such Bids in respect of more than one scheme of the mutual fund will not be treated as multiple Bids provided that the Bids clearly indicate the scheme concerned for which the Bid has been made. Bids by QIBs will not be considered as multiple Bids.

The Company reserves the right to reject, in its absolute discretion, all or any multiple Bids in any or all categories. In this regard, the procedures which would be followed by the Registrar to the Issue to detect multiple applications are given below:

1. All applications with the same name and age will be accumulated and taken to a separate process file which would serve as a multiple master.
2. In this master, a check will be carried out for the same PAN. In cases where the PAN is different, the same will be deleted from this master.
3. The Registrar to the Issue will obtain, from the depositories, details of the applicant's address based on the DP ID and Beneficiary Account Number provided in the Bid cum Application Form and create an address master.
4. The addresses of all the applications in the multiple master will be strung from the address master. This involves putting the addresses in a single line after deleting non-alpha and non-numeric characters i.e. commas, full stops, hash etc. Sometimes, the name, the first line of address and pin code will be converted into a string for each application received and a photo match will be carried out amongst all the applications processed. A print-out of the addresses will be taken to check for common names. The applications with same name and same address will be treated as multiple applications.
5. The applications will be scrutinised for DP ID and Beneficiary Account Numbers. In case applications bear the same DP ID and Beneficiary Account Numbers, these will be treated as multiple applications.
6. Subsequent to the aforesaid procedures, a print out of the multiple master will be taken and the applications physically verified to tally signatures as also father's/ husband's names. On completion of this, the applications will be identified as multiple applications.

In case of a Mutual Fund, a separate Bid can be made in respect of each scheme of the Mutual Fund and such Bids in respect of more than one scheme of the Mutual Fund will not be treated as multiple Bids provided that the Bids clearly indicate the scheme concerned for which the Bid has been made.
