Unless specified or quantified in the relevant risk factors set forth below, our Company is not in a position to ascertain the financial and other implication of any of the other risks mentioned herein.

Materiality

The Risk factors have been determined and disclosed on the basis of their materiality. The following factors have been considered for determining the materiality:

1. Some events may have material impact quantitatively;
2. Some events may have material impact qualitatively instead of quantitatively;
3. Some events may not be material individually but may be found material collectively;
4. Some events may not be material at present but may be having material impact in future.

Internal Risk Factors

1. ***We do not own the trademark “Omkar” and logo of “Omkar” and unauthorized parties may infringe upon or misappropriate our intellectual property. This could have a material adverse effect on our business which in turn adversely affect results of operations.***

The trademark “Omkar” and logo of “Omkar” has not been registered by our Company. We have made an application for registration of our logo under class 1 to the Registrar of Trade Marks, Mumbai by an application dated June 16, 2010. However, we have not made any application for the registration of our trademark. There is no assurance that the application for the registration of our logo will be approved by the Trade Marks Registry, Mumbai. In addition, our application may be opposed by third parties. If we are unable to obtain registration of our logo we may not be able to successfully enforce or protect our intellectual property rights and obtain statutory protections available under the Trade Mark Act, 1999, as otherwise available for registered marks. This could have a material adverse effect on our business, which in turn adversely affect our results of operations.

2. ***Our revenues are significantly dependent on sale of some of our products. Any factor adversely affecting these products will negatively impact our profitability.***

We manufacture a range of organic, inorganic and organo inorganic intermediates. The inorganic intermediates include Molybdenum derivatives, Selenium derivatives, Iodine derivatives, Cobalt derivatives, Bismuth & Tungsten derivatives and the organic intermediates include Tartaric acid derivatives and other intermediates. Iodine & Selenium derivatives are our key category of products contributing 88.23% to our gross sales for the year 2009-10. In case we are not able to launch new products, our dependence on these products will increase. Any decline in revenues from these products on account of reasons beyond our control or any other factor that negatively affects these products will adversely affect our business, financial performance and results of operations.

3. *We may not be able to manage our growth effectively which could have an adverse effect on our business and results of operations.*

A principal component of our strategy is to continue to grow by expanding the size and geographical scope of our existing businesses and other projects. This growth strategy will place significant demands on our management, financial and other resources. It will require us to continuously develop and improve our operational, financial and internal controls. Continuous expansion increases the challenges involved in financial management, recruitment, training and retaining high quality human resources, and developing and improving our internal administrative infrastructure.

Further, our total income has increased from Rs. 4329.21 lakhs during FY 2007-08 to Rs. 5064.64 lakhs during FY 2008-09 showing an increase of 16.99% and from Rs. 5064.64 lakhs during FY 2008-09 to Rs. 6891.92 lakhs during FY 2009-10 showing an increase of 36.08%. Similarly, profit after tax showed an increase of 21.19% and 64.02% during FY 2008-09 and FY 2009-10 respectively. We may not be able to sustain such growth in revenues and profits or maintain a similar rate of growth in the future. Any inability to manage our growth efficiently may have an adverse effect on our business and results of operations.

4. *Our Company has not entered into any supply agreement for the major raw materials required for manufacturing of our products and are exposed to risks relating to fluctuation in global commodity prices and shortage of raw material.*

The major raw materials used in manufacturing of our products are Crude Iodine, Selenium Metal Powder, Molyore, Tetra Hydro Furon, Toluene, Caustic Soda Flakes, Methanol etc. We do not have any long-term supply contracts with respect to raw material used in the manufacture of our products. A significant proportion of the raw materials we consume are imported. During the period ended March 31, 2010 and March 31, 2009, raw material imported by us was Rs. 2140.07 lakhs and Rs. 2173.60 lakhs constituting 41.78% and 57.96% respectively of the total raw material costs. While we are not significantly dependent on any single manufacturer of such raw material, raw material costs are dependent on global commodity prices, which are subject to fluctuation. In the event the prices of such raw materials were to rise substantially or if imports were to be restricted in any manner, we may find it difficult to find alternative suppliers for our raw materials, on terms acceptable to us, and our business, results of operations and financial condition could be adversely affected.

Our suppliers may not be able to supply to us our raw materials without interruption, or may not comply with their obligations to us under our purchase agreements, if any. We may not have adequate remedies for any breach and their failure to supply us could result in a shortage of raw materials. If one of our suppliers fails or refuses to supply us for any reason, it would take a significant amount of time and expense to identify a new supplier or manufacturer. We may not be able to obtain raw material from new suppliers on acceptable terms and at reasonable prices, or at all.

5. *We have historically dependent on a relatively small number of customers for a significant portion of our sales, and there is no assurance that we will be able to broaden our customer base in any future periods.*

While we are constantly striving to increase our customer base and reduce dependence on any particular customer, there is no assurance that we will be able to broaden our customer base in any future periods, or that our business or results of operations will not be adversely affected by a reduction in demand or cessation of our relationship with any of our major customers. The percentage of sales derived from top customers in recent periods are given below:

Sr. No.	Particulars	2009-10	2008-09	2007-08
1	Sales to top customer	21.26%	16.89%	31.45%
2	Sales to top 10 customers	57.51%	61.51%	64.76%

6. *Any delay or non-receipt of certain regulatory licenses or approvals could adversely affect the implementation schedule which may adversely affect our growth plans.*

Our Company has applied for factory license for our manufacturing unit located at Plot no. F-24 (Unit 2), vide our application dated February 17, 2009, which is pending as on date. Also, for our proposed expansion project, necessary application for various licenses/approvals would be made to the respective authorities at various stages of project implementation. There can be no assurance that we will receive the approvals on a timely basis, or at all. If we do not receive the requisite approvals for our proposed expansion or if such approvals are delayed, our proposed expansion plans may be adversely affected.

For status of all licenses/approvals, please refer to section titled “Government Approvals and licensing arrangements” beginning from page no. 145 of the Draft Red Herring Prospectus.

7. *We have not yet placed orders for 100% of our plant and machinery, equipment etc. for our proposed project as specified in the Objects of the Issue. Any delay in procurement of plant & machinery, equipment etc. may delay the implementation schedule which may also lead to increase in prices of these equipments, further affecting our cost, revenue and profitability.*

The details of the net proceeds of the Issue proposed to fund the planned expansion are explained in the section titled ‘Objects of the Issue’ beginning on page no. 25 of this Draft Red Herring Prospectus. We are yet to enter into definitive agreements or are yet to place orders for all machinery and equipment required for our proposed expansion. The total cost of plant and machinery and other equipments proposed to be installed is estimated at Rs. 3203.35 lakhs. We

are subject to risks on account of inflation in the price of the machinery and other equipments that we require for the proposed expansion. Further, we have not entered into any agreement/memorandum of understanding for purchase of additional land for Unit 1 & 2, which has been estimated at a cost of Rs. 140 lakhs. Any delay in placing the orders or procurement of plant & machinery, equipment, etc. may delay the implementation schedule. Such delays may also lead to increase in prices of these equipments, further affecting our cost, revenue and profitability.

8. *We have not entered into any long-term contracts with any of our customers and typically operate on the basis of purchase orders, which could adversely impact our revenues and profitability.*

We do not have any long-term contracts with our customers and any change in the buying pattern of the customers could adversely affect the business of our Company. Although we believe that we have satisfactory business relations with our customers and have received continued business from them in the past, there is no certainty that the same will continue in the years to come and may affect our profitability.

9. *We have not appointed any independent agency for appraisal of our proposed expansion project. The cost of project is based on our own estimates and various quotations received by us from different suppliers, which may vary depending upon factors like increase in prices due to which the cost of project may be adversely affected, in turn affecting our financial operations.*

Our funding requirements and the deployment of the proceeds of the Issue are based on management estimates and various quotations received by us from different suppliers and have not been appraised by any bank or financial institution. The deployment of funds is entirely at the discretion of our Board of Directors within the parameters as mentioned in the section titled “Objects of the Issue” beginning on page no. 25 of this Draft Red Herring Prospectus and is not subject to any monitoring by any independent agency. All the figures included under the section titled “Objects of the Issue” beginning on page no. 25 of this Draft Red Herring Prospectus are based on our own estimates and the quotations received from various suppliers, which may vary depending upon factors like increase in prices due to which the cost of project may be adversely affected. We cannot assure that we will be in a position to set up our proposed expansion project in the stated means of finance. We may have to revise our management estimates from time to time and consequently, our funding requirement may also be changed. In case of any increase in cost of project, our financial position may be adversely affected.

10. *Delay in raising funds from the IPO could adversely impact the implementation schedule.*

Our Company’s proposed project is to be funded from the proceeds of this IPO and internal accruals. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute the proposed project within the given time frame, or within the costs as originally estimated by us. Any time overrun or cost overrun may adversely affect our growth plans and profitability.

11. We have planned capital expenditure, which may not yield the benefits intended.

We are embarking upon an expansion of our existing units and setting up of a new unit. We propose to incur capital expenditure of Rs. 4671.65 lakhs, as detailed in the section titled “Objects of the Issue” beginning on page no. 25 of this Draft Red Herring Prospectus. In the past, we have not undertaken capital expenditure of such size and our inability to manage capital expenditure may adversely affect our operations. We cannot assure that we will be able to get the benefits of the generally growing demand in this sector and accordingly the benefits accruing to us from the proposed project may be less than what is anticipated.

12. Our Company has not tied-up part of the additional working capital requirements needed for the Objects of the Issue and any of our inability to arrange for additional working capital requirement on terms favorable to us, could adversely affect our operations and profitability.

Our projected level of working capital borrowings for the fiscal year 2012 are of Rs. 5302.22 lakhs, out of which we propose to meet Rs. 1500.00 lakhs from bank borrowings and the balance from issue proceeds and internal accruals. As on date we have not tied up this additional borrowing from the banks. Our inability to arrange for this additional working capital requirement from banks on terms favorable to us, could adversely affect our operations and profitability.

13. We had negative cash flows only from investing and financing activities in some years. Any negative cash flow from operations in future could affect our operations and financial conditions.

We had negative cash flow from financing and investing activities, but positive from operating activities, details of which are as under:

(Rs. in lakhs)			
Particulars	2009-10	2008-09	2007-08
Net Cash flow from operating activities	627.87	16.08	372.72
Net Cash flow from investing activities	(300.60)	(871.37)	(468.32)
Net Cash flow from financing activities	(306.04)	842.16	89.38
Total Net Cash flow	21.23	(13.13)	(6.22)

The net cash flow of a company is a key indicator to show the extent of total cash generated from all activities of the company including operations, investment and financing for a particular year. In the past, we had generated positive cash flows from operating activities, but on account of investing and financing activities, we had generated net negative cash flows, in some years. If we are not able to generate sufficient net cash flows, it may adversely affect our business and financial operations.

14. We have certain contingent liabilities not provided for that may affect our financial condition.

As per our audited accounts for the period ended March 31, 2010, we have following outstanding contingent liabilities:

(Rs. in lakhs)	
Particulars	March 31, 2010
Letter of Credit	125.52
Estimated amount of contracts remaining to be executed on capital account	492.08
Total	617.60

In the event that any of these contingent liabilities materialize, our financial condition may be adversely affected.

15. *We have entered into certain related party transactions and may continue to do so.*

We have entered into transactions with several related parties, including our Promoters and Directors aggregating to Rs. 231.48 lakhs for the year ended March 31, 2010. While we believe that all such transactions have been conducted on the arm's length basis, there can be no assurance that we could not have been achieved more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that we will enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation. For details, please refer to section titled "Related Party Transactions" at page no. 129 of this Draft Red Herring Prospectus.

16. *There are restrictive covenants under our loan agreements, which could influence our ability to expand, in turn affecting our business and results of operations.*

We have entered into agreements for term loans and financial facilities with our banker and these covenants in borrowing from bank, among other things require us to seek the prior consent of the bank for various activities, including amongst others, effect/ permit withdrawals of deposits or withdrawals by family members, friends or directors, declare dividend, payment of any consideration in whatever form by the Company to the guaranteeing directors either directly or indirectly for guaranteeing of credit limits sanctioned by the bank, undertake new project/ any further expansion, invest in shares and debentures of other companies, extend finance to associate concerns, acquire or sell any fixed assets, etc. These covenants may have an adverse effect on the functioning of our Company.

Furthermore, our Company has created a charge in favour of our lender against the fixed assets of our Company. In case of default by our Company in repayment of the loans, our banker may exercise their rights over the security, which may be detrimental to the interest of our Company. For details of restrictive covenants, please refer to paragraph "Restrictive covenants of lenders" appearing on page no. 24 of this Draft red Herring Prospectus under the section titled "Capital Structure".

17. *The operations of our Company are subject to manufacturing risk and may be disrupted by failure in the facilities.*

Due to the nature of its business and despite compliance with requisite safety requirements and standards, the operations of our Company are subject to operating risks associated with chemical manufacturing. Operating risks may result in personal injury and property damage

and in the imposition of civil and criminal penalties. The occurrence of any of these events could have a material adverse effect on the productivity and profitability of our Company.

Also, our manufacturing facilities are subject to operating risks, such as breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, obsolescence, earthquakes and other natural disasters and industrial accidents. Our manufacturing facilities are also subject to operating risk arising from compliance with the directives of relevant government authorities. The occurrence of any of these events could adversely affect our operating results.

18. All our present and proposed manufacturing facilities are geographically located in one area and therefore, any localized social unrest, natural disaster or breakdown of services or any other natural disaster in and around Maharashtra could have material adverse effect on our business and financial condition.

All of our present and proposed manufacturing facilities are based at Badlapur, Thane, Maharashtra. As a result, any localized social unrest, natural disaster, adverse weather conditions, earthquakes, fires, explosives, power loss, or breakdown of services and utilities in and around Maharashtra could have material adverse effect on our business, financial position and results of operations. Further, any failure of our systems or any shutdown of any part of our manufacturing units, networks, operations because of operational disruptions, natural disaster or other factors, could disrupt our services and adversely affect our result of operations and financial condition.

19. The completion of the projects is dependent on performance of external agencies. Any shortfall in the performance of these external agencies may adversely affect our expansion plans.

The completion of the projects is dependent on performance of external agencies, which are responsible for construction of buildings, installation and commissioning of plant and machinery and supply and testing of equipment. We cannot assure you that the performance of external agencies will meet the required specifications or performance parameters. If the performance of these agencies is inadequate in terms of the requirements, this may result in incremental cost and time overruns, which in turn may adversely affect our expansion plans.

20. Anti dumping duty may be applicable to us, which may adversely impact our financial condition.

The countries, to which we export our goods, may impose anti dumping duties on such goods exported by us. We may be required to pay additional duty on the goods exported by us, or we may not be able to export such products in future to the concerned countries. In that scenario, our financial condition could be adversely affected.

21. We are yet to initiate the process of recruiting the manpower required for the proposed projects and any delay in recruiting the suitable personnel or the required number of people to operate the plants may result in time and cost overruns.

We estimate that we require a total 124 personnel for undertaking and executing our operations relating to the proposed project. We propose to hire the required personnel from the surrounding villages and townships in and around Maharashtra. In the event we are unable to recruit the suitable personnel or the required number of people to operate the units effectively, we may face time and cost overruns, which may have an adverse effect on our business and results of operations.

22. Our success depends largely on our senior management and our ability to attract and retain our key personnel.

Our success depends on the continued services and performance of the members of our management team and other key employees. If one or more members of our senior management team were unable or unwilling to continue in their present positions, our business could be adversely affected. Attracting and retaining scarce top quality managerial talent has become a serious challenge for companies. Competition for senior management in the industry in which we operate is intense, and we may not be able to retain our existing senior management or attract and retain new senior management in the future. As such, any loss of our existing senior management personnel or key employees could adversely affect our business, results of operations and financial condition.

23. Our Company is subject to high working capital requirements and our inability to fund these requirements in a timely manner may adversely impact our financial performance.

Our business requires a substantial amount of working capital. We require working capital to finance the purchase of raw materials and execution of orders before payment is received from our customers. Our working capital requirements may increase if, in certain orders, payment terms include reduced or advance payments. There can be no assurance that the payments will be remitted by our customers to us on a timely basis.

Continued increase in working capital requirements and insufficient cash flows from our operations to meet any of the above requirements may have an adverse effect on our financial condition and result of operations.

24. One of our key managerial personnel is related to our Promoter Director which may influence our key decisions relating to our business which may not be in the interest of our Company and therefore, could adversely affect our operations.

One of our key managerial personnel viz. Mr. Dattatraya Deshpande is related to Promoter Director in terms of Schedule IA of the Companies Act, 1956 viz. Mr. Pravin Herlekar. Mr. Dattatraya Deshpande is designated as Head (Commercial & Regulatory Affairs) and is looking after all the commercial and regulatory matters of our Company. Since Mr. Dattatraya Deshpande is holding key position in our Company, he alongwith Promoters may influence any key decisions relating to our business or financial operations which may not be in the interest of our Company and therefore, could adversely affect our operations.

25. We utilize all our properties on leasehold and any termination of these leases and/or non renewal could adversely affect our operations.

Our Company does not own the premises at which our Registered Office is located. Also, our Company does not own the premises at which all our manufacturing facilities are located. All these premises are on leasehold. Any termination of these lease agreements whether due to any breach or otherwise, or non – renewal thereof, could adversely affect the business operations. For details about property and its ownership, please refer to section “Our Property” appearing on page no. 82 of this Draft Red Herring Prospectus.

26. Our Subsidiary viz. Rishichem Research Limited is in the same line of business and may create potential conflict of interest.

Our subsidiary viz. Rishichem Research Limited is also engaged in the manufacturing of speciality chemicals and pharma intermediates which may create a potential conflict of interest and which, in turn, may have an implication on our operations and profitability.

27. Our Company’s revenue and profits are difficult to predict and can vary significantly from quarter to quarter. This could cause our share price to fluctuate.

Our operating results have varied in the past and may continue to vary significantly from quarter to quarter due to various reasons, including:

- Synchronizing availability of raw material and the competitive pricing of raw material;
- Unanticipated changes in regulatory policies in the jurisdictions in which we operate;
- Delays in receipt of payment from customers or level of bad debts;
- Our customer’s requirements, and their future plans;
- Unanticipated cancellations or deferrals of orders; and
- Changes in pricing policies of our competitors

Therefore, we believe that period-to-period comparisons of the results of our operations may not necessarily be meaningful and should not be relied upon as an indication of our future performance. It is possible that in future some of our quarterly results of operations may be below the expectations of market analysts and our investors, which could lead to a corresponding decline in the price of our Equity Shares.

28. We face competition in our business from both domestic and international competitors. Such competition would have an adverse impact on our business and development.

We operate in a highly competitive environment. Players in this market generally compete with each other on key attributes such as technical competence, quality of products and services, pricing and track record. Besides international producers, there are competitors in India having similar products as our Company. We compete against our competitors on quality, technical competence, distribution channels, logistics facilities, and customer relationships. There is no assurance that we will continue to compete successfully in future.

Some of our competitors may be able to price their products more attractively or may be able to distribute their products more effectively through establishing better distribution networks, or may have greater access to capital, superior manufacturing techniques, research and development, marketing and other resources. Our inability to remain sufficiently competitive

will adversely and materially affect our business and operating results. In addition, we expect global competition to increase. Should there be any significant increase in global competition or if we are unable to meet the requirements of the changing market conditions, our business and operating results could be adversely affected. Further, we cannot assure you that our competitors will not develop or gain access to the information relating to our manufacturing processes and/or technical know-how. The occurrence of any of those events could have a material adverse effect on our ability to compete against our competitors, which would have an adverse impact on our business and financial performance.

29. Our inability to fulfill export obligations under advance license could result in potential custom duty liability, which in turn could affect our financial operations to that extent

Our Company has 4 outstanding advance licenses aggregating an outstanding export obligation of Rs. 157.10 lakhs as on July 31, 2010. Any failure to fulfill the future outstanding export obligations in time could result in potential custom duty liability or penalty which could adversely affect our financial operations. For details of our export obligations, please refer to section “Export Obligation” on page no. 79 of this Draft Red Herring Prospectus.

30. Any inability on our part to maintain quality standards or keep pace with the technological development could adversely impact our business, results of operations and financial conditions.

Quality control is vital element for our sector. We are supplying our products to pharmaceutical industry, chemical industry, glass industry, cosmetics, ceramic pigments and cattle & poultry feeds and each sector has different product specifications. Any rapid change in our customers’ expectation on account of changes in technology or introduction of new products for any other reason and failure on our part to meet their expectation could adversely affect our business, result of operations and financial condition.

We believe that we have always expanded our capacities and/or introduced new products based on latest technology to cater to the growing demand of our customers. We also believe that to meet our clients’ needs, we must regularly update our existing technology and acquire or develop new technology and develop new products on a continuous basis. Our failure to anticipate or to respond adequately to changing technical, market demands and/or client requirements could adversely affect our business and financial results.

31. We are subject to product liability claims in relation to the quality and use of our products. This may harm our reputation and/or have an adverse impact on our operations, revenue and profitability.

We are exposed to claims in relation to the quality and use of our products. Owing to the nature of our business, there is no assurance that product liability claims will not arise and due to uncertain nature of claims, adequate insurance cover cannot be availed. For defending any product liability claim, we may have to incur substantial legal costs and may also have to divert our management's attention away from business operations. Further, any judgment/award or findings, against us in such claim, may harm our reputation, and may have an adverse impact on our revenue and profitability.

32. *Our insurance cover may be inadequate to fully protect us from all losses.*

We have various insurance policies covering stocks, buildings, furniture, plant & machinery, etc. for total insured amount of Rs. 4044.30 lakhs, details of which are disclosed on page number 83 of this Draft Red Herring Prospectus. However, our insurance policies may not provide adequate coverage in certain circumstances and are subject to certain deductibles, exclusions and limits on coverages. We cannot assure you that the terms of our insurance policies will be adequate to cover any damage or loss suffered by us or that such coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. Further, we are not covered by business interruption policy. Interruption of our business operations for any reasons including on account of fire, flood, any natural calamities etc. may have a material and adverse impact on our business operations and profitability.

We may be exposed to public liability claims as we deal with products, which are made from raw materials, which are hazardous and poisonous and/or chemicals, which are combustible and flammable. Our Company is not covered under any Public Liability Insurance. Therefore, in the event of any accident, we may have to incur substantial costs or pay damages for, inter-alia, personal injuries or loss or damage to property etc. suffered by the public or any third party which may have an adverse impact on the financial performance of our Company.

33. *We are exposed to the risk associated with the use of hazardous, poisonous and/or highly flammable chemicals in the production and/or transportation of our products and raw materials.*

Some of our raw materials such as Methanol and Toluene are highly flammable. We are susceptible to the risk of fire and/ or other accidents while dealing with/storing the aforesaid. Each of our units is insured against fire and other risks. However, the occurrence of a major accident could damage our inventories and operating premises and may disrupt our operations and in turn would adversely affect our financial performance.

34. *We are dependent on our research and development activities and the failure to develop new and improved products could adversely affect our business.*

Our Company carries out research & development activities at Badlapur, Maharashtra. The research is carried out for improving the quality of existing products and development of new processes for the existing products. With a view to strengthen our research and development, our Company has taken 99.82% stake in Rishichem Research Limited whereby it becomes our wholly owned subsidiary. We propose to concentrate our specialized research and development activities in Rishichem Research Limited. However, there can be no assurance that a new product will be commercially successful. In addition, research undertaken by competitors may lead to the launch of competing or improved products that may affect the sales of our products. If our R&D efforts do not result in a pipeline of products that can be commercially exploited, our business, results of operations and financial condition may be adversely affected.

35. *Unsecured loans taken by our Company may be recalled by our lenders at any time affecting our immediate cash flows.*

Our Company has taken unsecured loans amounting to Rs. 157.55 lakhs as on March 31, 2010, which have no specific terms with regard to the repayment of these loans as they are also not secured by a charge on any of the assets of our Company. Due to the absence of any specific terms regarding their repayment, the said loans can be recalled by their respective lenders at any given point of time and our Company will be forced to make arrangements for their repayment, which in turn could adversely affect our immediate cash flows.

36. *Our Company faces exchange rate fluctuation risk.*

During financial year 2009-10 and 2008-09, our imported raw material was to the extent of 41.78% and 57.96% respectively of our total raw material cost. After the expansion, the quantum of imported raw material may change. The fluctuations in foreign exchange rates might have an impact on the financial performance of the Company. We also export our products to different countries. If the Indian rupee value moves in unfavorable direction it will make an adverse impact on our import cost and reduce our export considerations. Our inability to hedge this foreign exchange exposure may result in an adverse impact on our financial condition.

37. *We may be unable to cope with the changes in the regulatory developments in the industry including environmental regulations which may affect our operations.*

We are subject to environmental laws and regulations, which impose restrictions on the volume of effluents, discharged into air, water and environment and establish standards for the treatment, storage and disposal of hazardous wastes. Our Company has obtained membership of Badlapur Common Effluent Treatment Plant Association and Mumbai Waste Management Limited for safe and secure disposal of Hazardous Waste for all our units. Compliance with these regulations entails significant expenditures. Non-compliances or any further imposition of restrictions by the concerned authorities would result in additional costs which may affect the financial operations of our Company.

38. *Our ability to pay dividends in future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditure*

The amount of our future dividend payments, if any, will depend upon our future earnings, financial condition, cash flows, working capital requirements and capital expenditure. There can be no assurance that we will be able to pay dividends. Additionally, we may be restricted in our ability to make dividend payments by the terms of any debt financing we may obtain in the future.

39. *Our Promoters and Promoter Group will continue to retain majority control in our Company after the Issue, which will enable them to influence the outcome of matters submitted to shareholders for approval.*

After completion of the Issue, the Promoters and Promoter Group will continue to hold approximately 58.73% of post-issue paid up share capital. So long as the Promoters and Promoter Group holds a majority of our Company's Equity Shares, they will be able to control most matters affecting our Company, including the appointment and removal of our Directors; our business strategy and policies; any determinations with respect to mergers, business

combinations and acquisitions; our dividend payout and financing. Further, the extent of Promoters and Promoter Group shareholding may result in delay or prevention of a change of management or control of our Company, even if such a transaction may be beneficial to our other shareholders.

40. The market price of our Equity Shares may adversely affect due to additional issuances of Equity Shares or sale of Equity Shares by members of our Promoter Group.

There is a risk that we may be required to finance our growth or strengthen our balance sheet through additional equity offerings. Any future issuance of Equity Shares, whether through the exercise of options or otherwise, will dilute the position of existing shareholders and could adversely affect the market price of the Equity Shares.

41. There is no existing market for the Equity Shares, and we do not know if one will develop. Our stock price may be highly volatile after the Issue, and as a result, you could lose a significant portion or all of your investment.

Prior to the Issue, there has not been a public market for the Equity Shares. We cannot predict the extent to which investor interest will lead to the development of an active trading market on the Stock Exchanges or how liquid that market will become. If an active market does not develop, you may experience difficulty in selling the Equity Shares that you purchased. The IPO price is not indicative of prices that will prevail in the open market following the Issue. Consequently, you may not be able to sell your Equity Shares at prices equal to or greater than the price you paid in the Issue.

External Risk Factors

42. Our business could be adversely affected by any economic, political and social developments in India and particularly in the regional markets where we operate.

Our performance and growth are dependent on the health of the Indian economy and other economies directly or indirectly. Industry Overview

The chemical industry in India is one of the most diversified and matured of all industrial sectors with thousands of commercial products. It contributes significantly towards industrial and economic growth of the nation, contributing approximately 3% to the GDP. The industry primarily consists of basic chemicals and its products, petrochemicals, agrochemicals, speciality chemicals, pharmaceuticals & biotech, paints & varnishes, dyestuff & inks, alco-chemicals, etc.

Speciality Chemicals Industry

Speciality chemicals is generally described as a group of relatively high value, low volume chemicals known for their end use applications and catalysing properties. In India, the industry is recording a rapid growth of approximate 15% y-o-y which includes fine chemicals, organic chemicals and pharmaceutical intermediates. The usage of speciality chemicals is found in multitude of industries like textiles, paints, inks, plastics, adhesives, flavours/fragrances and also in paper industry. Extensive applications are also found in construction, automotive, electronics and water treatments whereas Active Pharmaceutical Ingredients (API) constitutes the largest segment of the speciality chemical industry. The industry size is about US\$15 bn and this growth momentum is backed by cost efficiency and a large pool of engineers & scientists whose emphasis and expertise on R&D is leading to new discoveries. Major drivers for speciality chemicals are favourable macroeconomic factors in India and growing export market with scope for import substitution. Moreover, there is a great potential of chemical demand in India as per capita chemical consumption is relatively low compared to global and Asian countries.

Indian Pharmaceutical Industry

The Indian Pharmaceutical Industry (IPI) is one of the largest in the world and has grown to a US\$20 bn (~ Rs 95,000 crore) industry backed by robust growth in terms of infrastructure development, technology base and a wide range of products. It is now the 3rd largest in the world in terms of volume and 14th largest in terms of value thereby accounting for around 10% of world's production by volume and 2% by value due to lower prices. The industry now produces about 400 bulk drugs (APIs) and almost entire range of formulations belonging to all major therapeutic groups requiring complex manufacturing technologies.

Pharmaceutical Intermediates Market

A pharmaceutical intermediate is defined as a substance produced during the steps in the synthesis of an API which undergoes further molecular change(s) or purification before it becomes an API. Every reaction step may give rise to one or more intermediates, which may or may not be isolated at that stage. Pharmaceutical intermediates include both basic intermediates (building block chemicals for the pharma industry) and advanced intermediates (those that are 2 to 3 steps away from the bulk drug). Pharmaceutical speciality chemicals typically constitute both API's and intermediates. Some of the key drivers for the increase in demand of pharma intermediates are:

- Growth in outsourcing of pharma intermediates production to India
- Large number of patent expiries leading to advent of generic drugs
- Higher spending on R&D leading to new demand
- Several new drug development in pipeline in different therapeutic areas
- Constant demand for innovative therapies and manufacturing technologies

Book Building Process

Book Building refers to the process of collection of Bids from investors, on the basis of the Red Herring Prospectus within the Price Band. The Issue Price is fixed after the Bid/Issue Closing Date.

The principal parties involved in the Book Building Process are:

- our Company;
- the Book Running Lead Manager;
- the Syndicate Members who are intermediaries registered with SEBI or registered as brokers with BSE/NSE and are eligible to act as Underwriters. The Syndicate Members are appointed by the BRLM;
- the Escrow Collection Bank(s);
- the Self Certified Syndicate Bank(s); and
- the Registrar to the Issue.

This Issue is being made through a 100% Book Building Process wherein not more than 50% of the Issue to Public shall be available for allocation on a proportionate basis to Qualified Institutional Buyers (“QIBs”). 5% of the QIB Portion shall be available for allocation on a proportionate basis to Mutual Funds only and the remainder shall be available for allotment on a proportionate basis to QIBs and Mutual Funds, subject to valid bids being received from them at or above the Issue Price. Further, not less than 15% of the Issue to Public shall be available for allocation on a proportionate basis to Non Institutional Bidders and not less than 35% of the Issue to Public shall be available for allocation on a proportionate basis to Retail Individual Bidders, subject to valid bids being received at or above the Issue Price.

Though the process of Book Building under the SEBI (ICDR) Regulations is not new, investors are advised to make their own judgment about investment through this process prior to making a Bid or Application in the Issue.

Our Company shall comply with (ICDR) Regulations issued by SEBI for this Issue. In this regard, our Company has appointed Book Running Lead Manager to manage the Issue and to procure subscription to the Issue.

The process of bidding through the ASBA process by ASBA Investors under the SEBI Circular dated December 30, 2009 may be subject to change from time to time which may either be of a clarificatory nature or otherwise and ASBA Investors are advised to make their own judgment about investment through this process prior to submitting a Bid cum ASBA Form to SCSB.

QIBs are not allowed to withdraw their Bids after the Bid/Issue Closing Date. In addition, allocation to QIBs will be on a proportionate basis. Please refer to the section titled “Issue Procedure” beginning on page no. 168 of this Draft Red Herring Prospectus for more details.

Steps to be taken by the Bidder for bidding:

- Check eligibility for making a bid, see the section titled “Issue Procedure-Who Can Bid?” beginning on page no. 169 of this Draft Red Herring Prospectus;
- Ensure that you have an active demat account and the demat account details are correctly mentioned in the Bid cum Application Form;
- Ensure that the Bid cum Application Form or Bid cum ASBA Form is duly completed as per instructions given in this Draft Red Herring Prospectus and in the Bid cum Application Form or Bid cum ASBA Form;
- Ensure that the Bid cum Application Form or Bid cum ASBA Form is accompanied by the Permanent Account Number. For details please refer to the section titled “Issue Procedure” beginning on page no. 168 of this Draft Red Herring Prospectus. Bidders are specifically requested not to submit their General Index Register number instead of Permanent Account Number as the Bid is liable to be rejected on those grounds. In accordance with the SEBI Regulations, the PAN would be the sole identification number for participants transacting in the securities market, irrespective of the amount of transaction;
- Bids by ASBA Bidders (physical ASBA) will only have to be submitted to the Designated Branches of the SCSBs. ASBA Bidders should ensure that their bank accounts have adequate credit balance at the time of submission to the SCSB to ensure that their Bid cum ASBA Form is not rejected and

- Bids by QIBs shall be submitted only to the BRLM, other than bids by QIBs who Bid through the ASBA process, who shall submit the Bids to the Designated Branch of the SCSBs.

Illustration of Book Building and Price Discovery Process

(Investors should note that this example is solely for illustrative purposes and is not specific to this Issue)

Bidders can bid at any price within the price band. For instance, assume a price band of Rs 30 to Rs. 34 per equity share, issue size of 3,000 equity shares and receipt of five bids from Bidders, details of which are shown in the table below. A graphical representation of the consolidated demand and price would be made available at the bidding centers during the bidding period. The illustrative book as shown below shows the demand for the shares of the company at various prices and is collated from bids from various investors.

Bid Quantity	Bid Price (Rs.)	Cumulative Quantity	Subscription
500	34	500	16.67%
1000	33	1500	50.00%
1500	32	3000	100.00%
2000	31	5000	166.67%
2500	30	7500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the issuer is able to issue the desired number of shares is the price at which the book cuts off, i.e., Rs. 32 in the above example. The issuer, in consultation with the Book Running Lead Manager, will finalize the issue price at or below such cut off price, i.e., at or below Rs. 32. All bids at or above this issue price and cut-off bids are valid bids and are considered for allocation in the respective categories.

Consequently, capital gains arising on sale of these assets held for more than 12 months are considered as “long term capital gains” Capital gains arising on sale of these assets held for 12 months or less are considered as “short term capital gains”.

Section 48 of the Act contains provisions in relation to computation of capital gains on transfer of shares of an Indian Company by a non-resident. Computation of capital gains arising on transfer of shares in case of non-residents has to be done in the original foreign currency which has to be acquired to acquire the shares. The capital gain (i.e., sale proceeds less cost of acquisition/improvement) computed in the original foreign currency is then converted into Indian Rupees at the prevailing rate of exchange.

According to the provisions of section 112 of the Act, long term gain as computed above that are not exempt under section 10 (38) of the Act would be subject to tax at a rate of 20 percent (plus applicable surcharge and education cess). In case investment is made in Indian Rupees, the long-term capital gain is to be computed after indexing the cost.

However, as per the proviso to section 112 (1) (c), if the tax on long term gains resulting on transfer of listed securities or units or zero coupon bond, calculated at the rate of 20 percent with indexation benefit exceeds the tax on long term gains computed at the rate of 10 percent without indexation benefit, then such gains are chargeable to tax at a concessional rate of 10 percent (plus applicable education cess and secondary higher education cess).

Gains arising on transfer of short term capital assets are currently chargeable to tax as calculated under normal provisions of Income Tax Act, 1961, (plus applicable education cess and secondary higher education cess). However, as per the provisions of section 111A of the Act, short term capital gains of Equity Shares where the transaction of sale is chargeable to STT shall be subject to tax at a rate of 15 percent (plus applicable education cess and secondary higher education cess).

Further the tax benefits related to capital gains are subjected to the CBDT Circular No. 4/2007 dated June 15, 2007, and on fulfillment of criteria laid down in the circular, the individual will be able to enjoy the concessional benefits of taxation on capital gains.

As per section 74 Short term capital loss suffered during the year is allowed to be set-off against short-term as well as long term capital gain of the said year. Balance loss, if any, could be carried forward for eight years for claiming set- short-term as well as long-term capital gains. Long term capital loss suffered during the year is allowed to be set-off against long term capital gains. Balance loss, if any, could be carried forward for eight years for claiming set-

- **Exemption of capital gain from income tax**

Under section 10(38) of the Act, long term capital gains arising out of sale of equity Shares or units of equity oriented fund will be exempt from tax provided that the transaction of sale of such Equity Shares or units is chargeable to STT.

Accordingly to the provisions of section 54EC of the Act and subject to the conditions specified therein, capital gains not exempt under section 10(38) shall not be chargeable to tax to the extent

such capital gains are invested in certain notified bonds within six months from the date of transfer. If only part of the capital gain is so reinvested, the exemption shall be allowed proportionately. Provided that investments made on or after April 1, 2007, in the said bonds should not exceed Rupees fifty lacs (in one financial year) in such a case, the cost of such long term specified asset will not qualify for deduction under section 80C of the Act.

However, if the assessee transfers or converts the notified bonds into money within a period of three years from the date of their acquisition, the amount of capital gains exempt earlier would become chargeable to tax as long term capital gains in the year in which the bonds are transferred or converted into money.

According to the provisions of section 54F of the Act and subject to the conditions specified therein, in the case of an individual or a HUF, gains arising on transfer of a long term capital asset (not being a residential house) are not chargeable to tax if the entire net consideration received on such transfer is invested within the prescribed period in a residential house. If only a part of such net consideration is invested within the prescribed period in a residential house, the exemption shall be allowed proportionately. For this purpose, net consideration means full value of the consideration received or accrued as a result of the transfer of the capital asset as reduced by any expenditure incurred wholly and exclusively in connection with such transfer. Further, if the residential house in which the investment has been made is transferred within a period of three years from the date of its purchase or construction, the amount of capital gains tax exempted earlier would become chargeable to tax as long term capital gains in the year in which such residential house is transferred. Further thereto, if the individual purchases within a period of two years or constructs within a period of three years after the date of transfer of the original long term capital asset, any other residential house, other than the residential house referred to above, the amount of capital gains tax exempted earlier would become chargeable to tax as long term capital gains in the year in which such residential house is purchased or constructed.

Deduction in respect of Securities Transaction Tax (STT)

Under Section 36 (1) (xv) of the Act, the amount of Securities Transaction Tax paid by an assessee in respect of taxable securities transactions entered into the course of its business, if income arising from such taxable securities transactions, is offered to tax as deduction against such Business Income.

Provisions of the Act vis-a-vis provisions of the tax treaty

SECTION IV – ABOUT THE COMPANY

Industry Overview

Overview of Indian Chemicals Industry

The chemical industry in India is one of the most diversified and matured of all industrial sectors with thousands of commercial products. It contributes significantly towards industrial and economic growth of the nation, contributing approximately 3% to the GDP. The industry primarily consists of basic chemicals and its products, petrochemicals, agrochemicals, speciality chemicals, pharmaceuticals & biotech, paints & varnishes, dyestuff & inks, alco-chemicals, etc.

From January 2005, Research & Development (R&D) was given increased thrust when product patent regime came into enforcement and was backed by a large pool of trained engineers and scientists. Moreover, with increased globalization and domestic competition, Indian chemical players have to be more innovative by developing newer molecules by setting up cutting-edge R&D units. Based on inherent advantages like low cost labour and abundance of basic raw materials, Indian chemical players produce a large number of fine and speciality chemicals which have specific applications and find wide usage as food additives, pharmaceutical intermediates, toiletries, derivative products and anti-oxidants which can have multiple applications.

The overall chemical exports market from India grew at a CAGR of 21% from FY2004 to FY2009 while the overall chemical import market grew at a CAGR of 24.3% during the same period. The export growth over the period was quite impressive on the backdrop of global economic slowdown and depreciation of the Indian Rupee vis-à-vis the USD.

Going forward, growth in international chemical industry and speciality chemicals in particular is expected to be driven by growth in Asian region. Consequently, based on new geographic location of its customer, global production of chemicals is expected to move to Asia, with growth in speciality chemicals expected to be faster than overall chemicals globally.

Overview of Speciality Chemicals Industry

Speciality chemicals is generally described as a group of relatively high value, low volume chemicals known for their end use applications and catalysing properties. In India, the industry is recording a rapid growth of approximate 15% y-o-y which includes fine chemicals, organic chemicals and pharmaceutical intermediates. The usage of speciality chemicals is found in multitude of industries like textiles, paints, inks, plastics, adhesives, flavours/fragrances and also in paper industry. Extensive applications are also found in construction, automotive, electronics and water treatments whereas Active Pharmaceutical Ingredients (API) constitutes the largest segment of the speciality chemical industry. The industry size is about US\$15 bn and this growth momentum is backed by cost efficiency and a large pool of engineers & scientists whose emphasis and expertise on R&D is leading to new discoveries. Major drivers for speciality chemicals are favourable macroeconomic factors in India and growing export market

with scope for import substitution. Moreover, there is a great potential of chemical demand in India as per capita chemical consumption is relatively low compared to global and Asian countries.

API's are the key ingredients for making drugs and India's emergence as a hub for manufacturing of pharmaceuticals (APIs) has been the key driver for the growth in the speciality chemicals market. Approximately 90% of the total APIs produced in India is exported to Europe, the US and Japan. With the increase in outsourcing to India by MNCs, the exports market is expected to be the key growth driver of the Indian API market. In FY2007, the Indian API market was worth US\$4.1 bn and had recorded a CAGR growth of 21% from FY2002-07 and is expected to grow to approximately US\$12.75 bn by FY2012.

In the past, markets like Western Europe, North America and Japan constituted a majority of global speciality chemicals but this status is expected to change in the near future. Emerging countries such as China and India are expected to grow at significantly higher rates than developed countries.

Key Characteristics

Speciality chemicals are primarily a group of high value and low volume chemicals that have a specific end use application and/ or catalyzing properties. The key characteristics are:

- High levels of customization of products are required due to very specific applications.
- Speciality chemicals industry is highly knowledge driven and continuous efforts are required to enhance product, process and application development to stay ahead in the industry.
- There needs to be flexibility and adaptability in manufacturing process as quick turnaround maybe required depending on different product orders or cost considerations.
- Price sensitivity in speciality chemicals industry is limited since it constitutes only a small portion of the customers total costs compared to the performance delivered.

Indian Pharmaceutical Industry

The Indian Pharmaceutical Industry (IPI) is one of the largest in the world and has grown to a US\$20 bn (~ Rs 95,000 crore) industry backed by robust growth in terms of infrastructure development, technology base and a wide range of products. It is now the 3rd largest in the world in terms of volume and 14th largest in terms of value thereby accounting for around 10% of world's production by volume and 2% by value due to lower prices. The industry now produces about 400 bulk drugs (APIs) and almost entire range of formulations belonging to all major therapeutic groups requiring complex manufacturing technologies.

The industry has been growing at a healthy rate of 11-12% y-o-y over the last few years with growth in exports outstripping steady growth in the domestic market. Export market which constitutes 41% of the total IPI/ API sales in FY2009 has shown a robust growth rate of nearly 22% y-o-y over the five year period ending FY2009. Approximately 55% of the total exports constitute of formulations and the other 45% comprises of bulk drugs. Indian exports are destined to more than 200 countries around the globe including highly regulated markets of US (21% export share), Europe (24% export share), Japan and Australia.

Pharmaceutical Intermediates Market

A pharmaceutical intermediate is defined as a substance produced during the steps in the synthesis of an API which undergoes further molecular change(s) or purification before it becomes an API. Every reaction step may give rise to one or more intermediates, which may or may not be isolated at that stage. Pharmaceutical intermediates include both basic intermediates (building block chemicals for the pharma industry) and advanced intermediates (those that are 2 to 3 steps away from the bulk drug). Pharmaceutical speciality chemicals typically constitute both API's and intermediates. Some of the key drivers for the increase in demand of pharma intermediates are:

- Growth in outsourcing of pharma intermediates production to India
- Large number of patent expiries leading to advent of generic drugs
- Higher spending on R&D leading to new demand
- Several new drug development in pipeline in different therapeutic areas
- Constant demand for innovative therapies and manufacturing technologies

Iodine and Iodine Derivatives

Some of the crucial pharma intermediates that are typically used in the pharma industry are Iodine derivatives, Selenium derivatives, Bismuth derivatives and Tungsten derivatives apart from many others. Iodine is essential to many forms of life and is found in the thyroid gland in humans. Lack of iodine leads to enlargement of the thyroid gland and in order to assure an adequate amount of iodine in the diet, table salt is routinely iodized. Due to its high reactivity, iodine forms numerous compounds which have a variety of medical and industrial uses. Some

of the pharmaceuticals and crop protecting agents have iodine as the substituent.

Forecasted Worldwide Demand for Iodine Market (2010)

(Source: CARE's research report on Indian Speciality Chemical Industry, July 2010)

Iodine is currently produced in 9 countries including Chile, US, Japan. Chilean companies control more than half of world's nominal capacity and around 66% of global production while Japan produces around 29% and the US produces the remaining 5%. The supply of iodine has been and continues to be extremely limited. The global Iodine derivatives market is US\$2.5-3.0 bn annually. The current world market is approximately 30,300 tonne per annum and is growing 6% y-o-y given strong demand in emerging markets and continual demand of new uses.

Export-Import Statistics of IPI

The Indian Pharmaceutical sector is one of the major export revenue earners of Indian economy. For the five year period ending FY2009 the Indian Pharma exports have grown at a CAGR of 20.36% in rupee terms. India currently exports drug intermediates, APIs, Finished Dosage Formulations (FDFs), bio-Pharmaceuticals, Clinical Services to various parts of the world. The top 5 destinations of Indian pharmaceutical products during the year 2007-08 are USA, Germany, Russia, UK and China.

Government initiatives, regulatory framework and concessions

The government has introduced several development programmes to improve access and quality of healthcare services in the country. The National Rural Health Mission (NRHM) introduced by the government to provide basic healthcare amenities in rural areas is expected to increase access to essential drugs. Other initiatives introduced by the GoI are as follows:

- For the pharmaceuticals sector 100% FDI is allowed under the automatic route in the drugs including those involving use of recombinant technology.
- Planned reduction in interest rates under Duty Entitlement Passbook Scheme (DEPB)
- Tax and other incentives to companies set up in Biotech Parks (BTPs) and push to increase the number of BTPs in the country.
- Fiscal incentives to R&D units in pharmaceutical sector: Units are eligible for weighted tax deduction at 150% for R&D expenditure incurred under the I.T. Act.
- Steps have been taken to streamline procedures covering development of new drug molecules, clinical research, etc.
- Launch of two new schemes—New Millennium Indian Technology Leadership Initiative (NMITLI) and the Drugs and Pharmaceuticals Research Programme (DPRP) - especially targeted at drugs and pharmaceutical research.
- Reduction in customs duty from 10% to 5% on select life-saving drugs.

In order to further strengthen India's position in the pharmaceutical manufacturing outsourcing market, the GoI has taken or planning to take several initiatives such as:

- Streamlining and reducing time frame for approvals involving manufacturer and export licenses from 8-12 weeks to 2 weeks.
- Providing infrastructure support such as building pharma zones, a separate dedicated temperature and atmosphere controlled area to maintain the safety, efficacy and quality of imported and export drugs/pharmaceutical products at international airports at Delhi, Hyderabad and Mumbai.
- Building capabilities through collaboration with developed countries, such as the MoU with the USFDA, WHO, Health Canada, South Africa and the European Medicines Agency.

Outlook

The Indian pharmaceuticals sector has come a long way post liberalization to attain the current size of ~US\$20 billion. India is now not only self-sufficient in terms of pharmaceutical products, but has also achieved global recognition as a manufacturer and supplier of cost-effective, high-quality bulk drugs and formulations by exporting to over 200 countries. With India having the largest number of United States Food & Drug Administration (USFDA) approved manufacturing facilities outside the US; the number of drug master filings (DMF) by Indian companies is increasing year-on-year and is expected to remain way ahead of China in the near to midterm.

Pharmaceutical intermediates will account for over 2/3rd of the speciality chemicals market by the year 2012 (CARE Research). Indian speciality chemical manufacturers have the technical expertise and R&D capabilities to produce niche, complex and high-quality intermediates belonging to the pharma sector. Going forward, Indian pharma-associated companies can demonstrate considerable potential for collaborative and outsourced R&D projects in new drug development, biotechnology and chemicals.

Competencies of domestic companies in terms of their product-mix, distribution and turnaround time will determine their performance in a post product-patent scenario. Indian companies will have to look at strategic alliances, be proactive about M&A or divestitures of either their divisions or products in order to improvise on their product offering, intensify R&D or improve their distribution to fortify their market share.

The raw materials are received as per the purchase order and a Goods Receipt Note (GRN) is prepared, the raw materials are then weighed and pasted with “under test” labels and sent to the quarantine area. The quality control department samples the raw material for analysis and testing. The approved and rejected materials are sent to raw material store/rejection areas. The approved materials in the raw material store are labeled as “approved” and issued to production as and when they require the material.

After product is manufactured, the quality control department samples the product and carries out detailed analysis of the product. If it is approved, the product is delivered to stores along with suitable labels and Certificate of Analysis (COA).

The finished products are generally packed in HMHDPE containers. Solid Powdered products are packed in wide mouth containers of 25 kgs. or 50 kgs. capacity. The powder is packed in LDPE Liners and placed in the container. The liquid products are packed in 35 ltrs. or 50 ltrs. HDPE jerry cans.

While packing the material for exports, we have to ensure the classification of material i.e. whether Hazardous or Non-Hazardous category. Hazardous materials are required to be packed in UN Approved containers. This certification for UN Approved is normally obtained from Indian Institute of Packaging (IIP).

The materials and products are handled as per the safety norms and adequate precautions are taken for safety measures. Material Safety Data Sheet (MSDS) is prepared for each item. Safety appliances like hand-gloves, goggles, boots, helmets, etc. are used while handling the

materials/ goods. Fire fighting systems like fire extinguishers are in place wherever necessary. All manufacturing and storage areas are fitted with flameproof electrical fittings and precautions are taken to ensure that no sparking occurs. Eye-wash and showers are also provided at specific locations.

Infrastructural facilities and Utilities

Raw materials

The major raw materials used in manufacturing of our products are Crude Iodine, Selenium Metal Powder, Molyore, Tetra Hydro Furon, Tolune, Caustic Soda Flakes, Methanol etc. These raw materials are procured as per the production planning and are easily available in indigenous and overseas markets. We procure Crude Iodine, Selenium Metal Powder, P Toluic acid, L Tartaric acid, D Tartaric acid from overseas markets and Methanol, Tetra Hydro Furon, Tolune etc. from indigenous sources. The ratio of imported and indigenous raw materials consumed in value terms was 41.78% and 58.22% respectively for the FY 2009-10.

The raw materials are being sourced from our suppliers on a regular basis. We do not envisage any difficulty in getting timely and adequate supply of raw materials.

Utilities

Power

The sanctioned load of our Company is 751 KW, break up of which is as under:

Unit	Existing sanctioned load
Unit 1	73 KW (LT)
Unit 2	377 KW (HT)
Unit 3	286 KW (HT)
Unit 4	15 KW (LT)
Total	751 KW

We also have 2 DG sets of capacities 50 KVA and 500 KVA at Unit 1 and Unit 2 respectively as standby arrangement for our power requirement.

Water

Our current water consumption is about 2014 m³/month which is sourced from MIDC. It is used for our manufacturing processes, for cooling arrangements, for steam generation and other general purposes.

Steam & cooling arrangement

Utilities like boilers, chilling plants and cooling towers are required to maintain the designed process conditions during the reactions. We currently have three steam boilers for heating at our units at Badlapur, one of 600 kgs of capacity in Unit 1 and two of 800 kgs of capacity each in Unit 2.

At present, we have four cooling towers at our two units at Badlapur, one at Unit 1 of capacity 40 TR and three at Unit 2 of capacity 75 TR each.

Fuel

We use Light Diesel Oil (LDO) for furnaces and steam boilers at our Units. We have not faced any problem in procurement of this fuel as it is easily available. Apart from this High Speed Diesel (HSD) is required for the DG sets at Unit 1 and Unit 2.

Manpower

As on July 31, 2010, our Company has 73 employees. The details of our employees are as under:

Sr. No.	Category	Unit 1	Unit 2	Unit 3	Unit 4	Total
1	Managerial	3	3	5	-	11
2	Officers	3	1	9	-	13
3	Production	9	19	-	-	28
4	Technical	3	6	-	-	9
5	Clerical	2	1	8	1	12
	Total	20	30	22	1	73

In addition to the above, we have contractual manpower required for executing various activities. They are hired as per our production planning. As on July 31, 2010, we have 44 unskilled workers in production division and 4 unskilled workers in technical division.

Till date we have not experienced any strike, lockout or go-slow at any of our units.

Effluent Treatment

The manufacture of intermediates involves generation of residues and discharges which may lead to pollution of air, water or soil if not treated and disposed in an appropriate manner. We have in place management controls and systems, which control and prevent processes, residues and discharges from polluting the air, ground or water.

The primary treatment of the liquid wastes is carried out in-house. The secondary and tertiary treatment is carried out at the local Common Effluent Treatment Plant (CETP). All of our manufacturing units are registered with CETP, Badlapur. The liquid waste is the water from the processes, boiler blow-down, cooling tower blow-down etc. This water has impurities like suspended solids, oil & grease etc. This water is treated prior to discharge out of the factory and the primary treatment involves neutralization, flocculation etc. The neutralized effluent is drained into underground pipelines laid by CETP and this effluent gets collected in the Common Effluent Sump at CETP.

Airborne emissions are scrubbed in scrubbers and are discharged after removal of hazardous soluble gases and insoluble particles like dust.

All of our manufacturing units are registered with Mumbai Waste Management Limited at Taloja. The Solid wastes generated at each Unit is collected periodically and treated before further disposal. The processes are optimized to focus on minimizing the generation of waste and thereby preventing pollution at source.

Quality control and assurance

Quality control has two aspects: one is maintaining the quality of raw materials, which we procure for captive consumption and another is maintaining the quality of the products we

manufacture. Keeping in mind this objective, we have quality control departments at our Unit 1 and Unit 2 each, the activities of which comprise of collection and preparation of samples, testing of raw materials and other process inputs inspection, testing and quality certification of finished products, preparation of technical information sheet and issue of certificate of analysis.

Our Unit 2 has been granted ISO 9001:2008 for its quality management systems. Our quality control laboratory is equipped with various equipments such as High Performance Liquid Chromatographs (HPLC), Gas Chromatographs (GCs), vacuum dryer, sonicator, Atomic Absorption Spectroscopy (AAS), spectrophotometer, etc.

The following discussions are based on our restated financial statements for the five financial years ended March 31, 2010 which has been prepared in accordance with Indian GAAP, the Companies Act and the SEBI (Issue of Capital and Disclosure Requirements) Regulations, 2009 and on information available from other sources. Industry Overview

Our Company operates in two industry segments viz. speciality chemicals industry and pharmaceutical industry. The overview of these is as under:

Speciality Chemical Industry

Speciality chemicals is generally described as a group of relatively high value, low volume chemicals known for their end use applications and catalysing properties. In India, the industry is recording a rapid growth of approximate 15% y-o-y which includes fine chemicals, organic chemicals and pharmaceutical intermediates. The usage of speciality chemicals is found in multitude of industries like textiles, paints, inks, plastics, adhesives, flavours/fragrances and also in paper industry. Extensive applications are also found in construction, automotive, electronics and water treatments whereas Active Pharmaceutical Ingredients (API) constitutes the largest segment of the speciality chemical industry. The industry size is about US\$15 bn and this growth momentum is backed by cost efficiency and a large pool of engineers & scientists whose emphasis and expertise on R&D is leading to new discoveries. Major drivers for speciality chemicals are favourable macroeconomic factors in India and growing export market with scope for import substitution. Moreover, there is a great potential of chemical demand in India as per capita chemical consumption is relatively low compared to global and Asian countries.

API's are the key ingredients for making drugs and India's emergence as a hub for manufacturing of pharmaceuticals (APIs) has been the key driver for the growth in the speciality chemicals market. Approximately 90% of the total APIs produced in India is exported to Europe, the US and Japan. With the increase in outsourcing to India by MNCs, the exports market is expected to be the key growth driver of the Indian API market. In FY2007, the Indian

API market was worth US\$4.1 bn and had recorded a CAGR growth of 21% from FY2002-07 and is expected to grow to approximately US\$12.75 bn by FY2012.

Indian Pharmaceutical Industry

The Indian Pharmaceutical Industry (IPI) is one of the largest in the world and has grown to a US\$20 bn (~ Rs 95,000 crore) industry backed by robust growth in terms of infrastructure development, technology base and a wide range of products. It is now the 3rd largest in the world in terms of volume and 14th largest in terms of value thereby accounting for around 10% of world's production by volume and 2% by value due to lower prices. The industry now produces about 400 bulk drugs (APIs) and almost entire range of formulations belonging to all major therapeutic groups requiring complex manufacturing technologies. This is possible as it is supported by strong scientific and technical manpower and pioneering work done in process development. However, the industry is highly fragmented with around 20,000 odd players of which approximately 250 medium to large corporations controlling about 70% of the total domestic market.

The industry has been growing at a healthy rate of 11-12% y-o-y over the last few years with growth in exports outstripping steady growth in the domestic market. Export market which constitutes 41% of the total IPI/ API sales in FY2009 has shown a robust growth rate of nearly 22% y-o-y over the five year period ending FY2009. Approximately 55% of the total exports constitute of formulations and the other 45% comprises of bulk drugs. Indian exports are destined to more than 200 countries around the globe including highly regulated markets of US (21% export share), Europe (24% export share), Japan and Australia. This can be attributed to increasing genericization of drugs in the regulated markets and growing trend in outsourcing of pharmaceutical production by global pharma companies to low cost destinations like India.

2. The Price Band has been fixed at Rs. [•] to Rs. [•] per Equity Share. The Bidders can bid at any price within the Price Band, in multiples of Rs. 1 (One). Each Bid-cum-Application Form will give the Bidder the choice to bid for up to three optional prices (for details refer to the paragraph titled "Bids at Different Price Levels" on page no. 178 of this Draft Red Herring Prospectus) within the Price Band and specify the demand (i.e. the number of Equity Shares bid for) in each option. After determination of the Issue Price, the maximum number of Equity Shares bid for by a Bidder at or above the Issue Price will be considered for allocation and the rest of the Bid(s), irrespective of the Bid price, will become automatically invalid.
3. The Bidder cannot bid on another Bid-cum-Application Form or ASBA Form after Bids on one Bid-cum-Application Form or ASBA Form have been submitted to any member of the Syndicate or SCSB as the case may be. Therefore, a Bidder can receive up to three TRSs for each Bid-cum-Application Form or ASBA Form.
5. During the Bidding Period, the Bidders may approach the Syndicate to submit their Bid. Every member of the Syndicate shall accept Bids from all clients/investors who place orders through them and shall have the right to vet the Bids.

8. The Bid Amount shall remain blocked in the ASBA Account until finalization of the 'Basis of Allocation' or withdrawal/failure of the Issue or withdrawal/rejection of the ASBA Bid, as the case may be. OTHER INSTRUCTIONS

Joint Bids in the case of Individuals

Individuals may make bid in single or joint names (not more than three). In the case of joint Bids, all refunds will be made out in favour of the Bidder whose name appears first in the Bid-cum-Application Form or Revision Form ("First Bidder"). All communications will be addressed to the First Bidder and will be dispatched to his or her address as per the Demographic Details received from the Depository.

Further, ASBA Bids may be made in single or joint names (not more than three). In case of joint Bids by ASBA Bidders, all communications will be addressed to the first Bidder and will be dispatched to his/her address.

Multiple Bids

A Bidder should submit only one Bid (and not more than one) for the total number of Equity Shares required. Two or more Bids will be deemed to be multiple Bids if the sole or first bidder is one and the same.

In this regard, illustrations of certain procedures, which may be followed by the Registrar to the Issue to detect multiple applications, are provided below:

1. All applications with the same name and age will be accumulated and taken to a separate process file, which would serve as a multiple master.
2. In this master, a check will be carried out for the same PAN. In cases where the PAN numbers are different, the same will be deleted from this master.
3. The Registrar will obtain, from depositories, details of the applicants' address based on the DP ID and Beneficiary Account Number provided in the Bid-cum-Application Form and create an address master.
4. The addresses of all the applicants in the multiple master will be strung from the address master. This involves putting the addresses in a single line after deleting non-alpha and non-numeric characters i.e. commas, full stops, hash etc. Sometimes, the name, the first line of addresses and pin code will be converted into a string for each application received and a photo match will be carried out amongst all the application processed. A print-out of the addresses will be taken to check for common names. The application with same name and same address will be treated as multiple applications.
5. The applications will be scrutinised for their DP ID and Beneficiary Account Numbers. In case applications bear the same DP ID and Beneficiary Account Numbers, these will be

treated as multiple applications.

6. Subsequent to the aforesaid procedures, a print out of multiple master will be taken and applications physically verified to tally signatures as also father's/husband's names. On completion of this, the applications will be identified as multiple applications.

In case of a mutual fund, a separate Bid can be made in respect of each scheme of the mutual fund registered with SEBI and such Bids in respect of more than one scheme of the mutual fund will not be treated as multiple bids provided that the Bids clearly indicate the scheme concerned for which the Bid has been made.

The Company reserves the right to reject, in their absolute discretion, all or any multiple Bids in any or all categories. A check will be carried out for the same PAN. In cases where the PAN is same, such bids will be treated as multiple applications.

An ASBA Bidder should submit only one Bid. Two or more Bids will be deemed to be multiple bids if the sole or first Bidder is the same.

Permanent Account Number (PAN)

Except for the Bids on behalf of Central and State Government and officials appointed by Court, the Bidders or in the case of Bids made in joint names, each of the Bidder, should mention his or her Permanent Account Number (PAN) allotted under the I.T. Act. SEBI has issued a Circular No. MRD/DoP/Cir-05/2007 dated April 27, 2007 requiring that with effect from July 2, 2007 the PAN would be the sole identification number for the participants transacting in the securities market, irrespective of the amount of transaction. **Applications without this information will be considered incomplete and are liable to be rejected. It is to be specifically noted that Bidders should not submit the GIR number instead of the PAN, as the Bid is liable to be rejected on this ground.**

IMPERSONATION

Attention of the applicants is specifically drawn to the provisions of sub-section (1) of Section 68A of the Companies Act, which is reproduced below:

“Any person who:

- (i) Number of shares to be allotted against each valid ASBA

- (iii) The date by which the funds referred to in sub-para (ii) above, shall be transferred to the ASBA Public Issue account
- (iv) The details of rejected ASBAs, if any, along with reasons for rejection and details of withdrawn/ unsuccessful ASBAs, if any, to enable SCSBs to unblock the respective bank accounts. SCSB shall thereafter unblock the amounts blocked in the account of the ASBA Investor.

Method of Proportionate Basis of Allocation

In the event of the issue being over-subscribed, our Company shall finalise the basis of allotment to Retail Individual Bidders and Non-Institutional Bidders in consultation with the Designated Stock Exchange. The Executive Director or Managing Director (or any other senior official nominated by them) of the Designated Stock Exchange along with the BRLM and the Registrars to the issue shall be responsible for ensuring that the basis of allotment is finalized in a fair and proper manner.

Bidders will be categorized according to the number of Equity Shares applied for by them and the allotment shall be made on a proportionate basis as explained below:-

- (a) The total number of Equity Shares to be allotted to each category as a whole shall be arrived at on a proportionate basis, which is the total number of Equity Shares applied for in that category (number of Bidders in the category multiplied by the number of Equity Shares applied for) multiplied by the inverse of the over-subscription ratio.
- (b) Number of Equity Shares to be allotted to the successful Bidders will be arrived at on a proportionate basis, which is the total number of Equity Shares applied for by each Bidder in that category multiplied by the inverse of the over-subscription ratio.
- (c) If the proportionate allotment to a Bidder is a number that is more than [•] but is not a multiple of one (which is the market lot), the decimal would be rounded off to the higher whole number if that decimal is 0.5 or higher. If that number is lower than 0.5, it would be rounded off to the lower whole number. Allotment to all Bidders in such categories would be arrived at after such rounding off.
- (d) In all Bids where the proportionate allotment is less than [•] Equity Shares per Bidder, the allotment shall be made as follows:
 - Each successful Bidder shall be Allotted a minimum of [•] Equity Shares; and
 - The successful Bidders out of the total Bidders for a category shall be determined by draw of lots in a manner such that the total number of Equity Shares allotted in that category is equal to the number of Equity Shares calculated in accordance with (b) above; and
- (e) **If the Equity Shares allocated on a proportionate basis to any category are more than the Equity Shares allotted to the Bidders in that category, the remaining Equity Shares available for allotment shall be first adjusted against any other category, where the allotted Equity Shares are not sufficient for proportionate allotment to the successful Bidders in that category. The balance Equity Shares, if any, remaining after such adjustment will be added to the category comprising Bidders applying for minimum number of Equity Shares.**
