PRESENTATION OF FINANCIAL, INDUSTRY AND MARKET DATA

Land Reserves

In this Draft Red Herring Prospectus, land referred to as “our Land” or “our Land Reserves” are lands to which our Company/our Subsidiaries or other entities in which we have a stake have title or sole development right or joint development rights or other interest in the lands, and also include lands from which our Company can derive economic benefits through a documented framework or lands in relation to which our Company/our Subsidiaries or other entities in which we have a stake have executed a joint development agreement or an MoU to enter into a joint development agreement or an agreement to sell. It includes the total amount of Saleable Area to be developed through Ongoing and Forthcoming Projects. The Land Reserves figures herein may include land in respect of which we have already recognized revenue, due, in part, to the application of percentage completion accounting.

All land areas are stated in acres and all Developable, Saleable and Leaseable Areas are stated in sq. ft.

References to "our Completed Projects", "our Ongoing Projects", "our Projects Under Development" or "our Forthcoming Projects" include projects owned through associates of our Company. For a discussion of how we recognize income from projects owned by an associate, see "Management's Discussion and Analysis of Financial Condition and Results of Operations – Significant Accounting Policies – Principles of Consolidation" on page 323.

Financial Data

Unless stated otherwise, the financial data in this Draft Red Herring Prospectus is derived from our restated audited consolidated financial statements, prepared in accordance with Indian GAAP and the SEBI ICDR Regulations, which are included in this Draft Red Herring Prospectus, and set out in “Financial Statements” on page 198. Our financial year commences on April 1 and ends on March 31. Our unconsolidated as well as consolidated financial statements have been restated to reflect our adoption of the percentage of completion accounting method. In this Draft Red Herring Prospectus, any discrepancies in any table between the total and the sums of the amounts listed are due to rounding off. All decimals have been rounded off to two decimal points.

There are significant differences between Indian GAAP, US GAAP and IFRS. We have not attempted to explain those differences or quantify their impact on the financials data included herein and we urge you to consult your own advisors regarding such differences and their impact on our financial data. Accordingly, the degree to which the Indian GAAP financial statements included in this Draft Red Herring Prospectus will provide meaningful information is entirely dependent on the reader’s level of familiarity with Indian GAAP. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Red Herring Prospectus should accordingly be limited.

Currency and Units of Presentation

All references to “Rupees” or “Rs.” are to Indian Rupees, the official currency of the Republic of India. Except where specified, in this Draft Red Herring Prospectus, all figures have been expressed in “millions”.

SECTION II – RISK FACTORS

An investment in equity shares involves a high degree of risk. You should carefully consider all the information in this Draft Red Herring Prospectus, including the risks and uncertainties described below, before making an investment in our Shares.

If any of the following risks, or other risks that are not currently known or are now deemed immaterial, actually occur, our business, results of operations and financial condition could suffer, the price of our Equity Shares could decline, and all or part of your investment may be lost. Unless otherwise stated, we are not in a position to specify or quantify the financial or other risks mentioned herein. The numbering of the risk factors has been done to facilitate ease of reading and reference and does not, in any manner, indicate a ranking of risk factors or the importance of one risk factor over another.

This Draft Red Herring Prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Draft Red Herring Prospectus.

Risks Relating to our Company

1. ***Our business and profitability is significantly dependent on the performance of the real estate market generally in India, and in Bangalore in particular. Fluctuations in market conditions may affect our ability to sell our projects at expected prices, which could materially and adversely affect our revenues and earnings.***

Our business is significantly dependent on the performance of the real estate market generally in India, and particularly in Bangalore, where a majority of our projects are located, and could be adversely affected if market conditions deteriorate. The real estate business is in turn significantly affected by changes in government policies, economic and other conditions, such as economic slowdown, demographic trends, employment levels, availability of financing, rising interest rates or declining demand for real estate, or the public perception that any of these events may occur. These factors can adversely affect the demand for and pricing of our Completed Projects (which have not been either sold or leased), Ongoing Projects, Projects Under Development and Forthcoming Projects and, as a result, may materially and adversely affect our financial condition, results of operations, cash flows, our ability to service our debts and the trading price of our Equity Shares. For instance, in Fiscal 2009 demand for residential and commercial projects in India deteriorated significantly due to the global economic slowdown and its impact on the financial markets. Although this did not have a significant impact on our revenues, our management deferred the launch of new projects as a result of the economic environment. As a result of this deferral, our results of operations may be materially and adversely affected in future Fiscal Years if new projects do not meet the percentage completion required to recognize revenue.

Going forward, we believe that the success of our projects depends on the general economic growth and demographic conditions in India. In addition, the condition of the real estate sector in India, particularly market prices for developable land and finished units/projects, has a significant impact on our revenues and results of operations. We focus on real estate projects in the residential (including apartments, villas, mansions and integrated townships), commercial (including corporate office blocks, built-to-suit facilities, technology parks and campuses and Special Economic Zones ("SEZs")), hospitality (including hotels, resorts and serviced accommodation) and retail (including shopping malls) segments of the real estate industry.

The real estate market in Bangalore may perform differently from, and may be subject to market conditions and regulatory developments that are different from, real estate markets in other parts of India. We cannot assure you that the demand for our properties in Bangalore will grow, or will not decrease, in the future.

2. ***Our business is significantly dependent on the availability of real estate financing in India. Difficult conditions in the global financial markets and the economy generally have affected and may continue to materially and adversely affect our business and results of operations.***

Since the second half of 2007, the global credit markets have experienced, and may continue to experience, significant dislocations and liquidity disruptions which have originated from the liquidity disruptions in the United States and the European Union credit and sub-prime residential mortgage markets. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. These and other related events, such as the recent collapse of a number of financial institutions, have had and continue to have a significant adverse impact on the availability of credit and the confidence of the financial markets, globally as well as in India. In 2008, Indian financial markets had also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in the Sensex, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares; for instance, as a result of the economic environment, our management deferred the launch of new projects during Fiscal 2009. We cannot assure you that global economic conditions will not deteriorate further and, accordingly, that our financial condition and results of operations will not be further adversely affected. As a result of the prevailing conditions of the global and Indian credit markets, buyers of property may remain cautious, rentals of commercial properties may continue to face downward pressure and consumer sentiment and market spending may turn more cautious in the near-term.

Changes in interest rates have also had a significant impact on the real estate financing and the demand for residential real estate projects. Rising interest rates affect a prospective customer's ability to obtain affordable financing for purchase of our properties, particularly the purchase of completed residential developments by individuals and sale or lease of commercial projects. Availability of credit to such customers, affects the affordability of, and hence the market demand for, our real estate developments. Interest rates in India had remained high. The prime lending rate (PLR) for public sector banks was between 13.75% and 14.75% as of September 30, 2008 (Source: Reserve Bank of India, Macroeconomic and Monetary Developments in 2008-2009, issued with Annual Policy Statement 2009-2010). These factors have had, a series of effects on our business such as decreases in the sales of, or market rates for, the development projects; delays in the release of finances for certain of the projects in order to take advantage of future periods of more robust real estate demand; decreases in rental or occupancy rates for the commercial or retail properties; insolvency of key contractors resulting in construction delays; insolvency of key tenants in the commercial and retail properties; inability of customers to obtain credit to finance purchase of our properties. In any of these circumstances, our results of operations and business prospects may be materially and adversely affected.

3. ***We face intense competition in our business from domestic and foreign companies, based on the availability and cost of land. We may not be able to compete effectively, particularly in certain regional markets.***

We operate in highly competitive markets, and competition in these markets is based primarily on the availability and cost of land. We also face competition from both domestic and foreign companies in bidding for new property development projects.

Although, our operations have historically focused on projects in and around Bangalore, we plan to expand in other cities across south India. As we intend to diversify our regional focus, we face the risk that some of our competitors, who are also engaged in real estate development, may be better known in other regional markets, enjoy better relationships with landowners and joint venture partners, gain early access to information regarding attractive parcels of land and may be better placed to acquire such land. Some of our competitors have greater land reserves or financial resources than we do. They may also benefit from greater economies of scale and operating efficiencies. Competitors may, whether through consolidation or growth, present more attractive and/or lower cost solutions than we do, causing us to lose market share to our competitors. There can be no assurance that we can continue to compete effectively with our competitors in the future, and failure to compete effectively may have a material adverse effect on our business, financial condition and results of operations.

We compete with other retail real estate developers seeking suitable retail tenants. Similarly, we also compete with an increasing number of commercial real estate developers. Increasing competition could result in price and supply volatility which could materially and adversely affect our results of operations and cause our business to suffer.

4. ***Our Company's indebtedness, inability to make payments or refinance our debt and the conditions and restrictions imposed by the financing arrangements could adversely affect our ability to conduct our business and operations.***

As of October 31, 2009, our Company's outstanding indebtedness was Rs. 9,758.49 million, out of which Rs. 610.51 million was unsecured and Rs. 9,147.98 million was secured. Our Company may incur additional indebtedness in the future. Our Company's indebtedness could have several consequences, including but not limited to the following:

- a portion of our cash flow will be used towards repayment of our existing debt, which will reduce the availability of cash to fund working capital needs, capital expenditures, acquisitions and other general corporate requirements;
- our ability to obtain additional financing in the future at reasonable terms may be restricted; and;
- fluctuations and increase in prevailing interest rates may affect the cost of our borrowings, with respect to existing floating rate obligations and new loans.

Our Company has entered into agreements with certain banks and financial institution for term loans and working capital loans, which contain restrictive covenants, including, but not limited to, requirements that we obtain consent from the lenders prior to altering the capital structure, further issuing any shares, effecting any scheme of amalgamation or reconstitution, declaring dividends, creating any charge or lien on the security, changing the core management team of our Company or appointing nominee director on our Board. Many of our Company's lenders retain the right to reschedule the payment of the loan amount, and in some cases this could be done without notice to us.

In addition, some of the loan agreements contain financial covenants that require us to maintain, among other things, specified debt equity ratios.

There can be no assurance that we will be able to comply with these financial or other covenants or that we will be able to obtain consents necessary to take the actions that we believe is required to operate and grow our business. Furthermore, a default, including our inability to service our debt, on some of our loans may also trigger cross-defaults under some of the other loan agreements, whereby our failure to honour the payment due under one particular facility will be deemed to be a default under all of our other facilities, and all moneys owed by us to such lenders may be accelerated or declared immediately due and payable. Many of our loan agreements allow our lenders to call upon additional security in relation to existing loans.

Furthermore, our Company's ability to make payments on and refinance our indebtedness will depend on our ability to generate cash from our future operations. We may not be able to generate enough cash flow from operations or obtain enough capital to service our debt. In addition, we may need to refinance some or all of our indebtedness on or before maturity and we cannot assure you that we shall be able to do so at commercially reasonable terms, or at all. This may require us to take actions such as selling assets, seeking additional equity financing or reducing or delaying capital expenditures, including development of our Ongoing Projects, Projects Under Development and Forthcoming Projects. We may not be able to take these actions, if necessary, on commercially reasonable terms or at all. In addition, lenders under our credit facility could foreclose on and sell our assets if we default under our credit facilities.

As of October 31, 2009 our Company had unsecured loans amounting to Rs. 610.51 million and repayment of these loans may be called by lenders at any time. In such event, we may have to raise large amounts of money to refinance these obligations. This requirement to refinance loans at short notice may have a material and adverse effect on our business operations and financial condition. Furthermore, we have long-term Rupee-denominated debts of Rs. 7,747.50 million which bear interest at floating rates linked to the prime lending rates of our lenders, as determined from time to time. Upward fluctuations in interest rates could therefore increase the cost of both existing and new debt, which may have a material and adverse effect on our business operations and financial conditions.

5. ***We have not entered into any definitive agreements to utilize the net proceeds of the Issue, and the deployment of funds from the issue is entirely at the discretion of our Board.***

We have not entered into any definitive agreements to utilize the net proceeds of the Issue. The deployment of funds as stated in "Objects of the Issue" on page 34 is entirely at the discretion of our Board. All the figures included under "Objects of the Issue" are based on our own estimates. Pending utilization of the proceeds of this Issue for the purposes described in this Draft Red Herring Prospectus, we intend to invest the proceeds of the Issue in interest-bearing liquid instruments, including money market mutual funds and deposits with banks, or apply the proceeds of this Issue towards reducing our overdrafts. Such investments would be made in accordance with investment policies or investment limits approved of by our Board of Directors from time to time.

6. ***The requirement of funds in relation to the objects of the Issue has not been appraised, and are based on current conditions which are subject to change.***

We intend to use the net proceeds of the Issue for the purposes described in "Objects of the Issue" on page 34. The objects of the Issue have not been appraised by any bank or financial institution. These are based on current conditions and are subject to changes in external circumstances or costs, or in other financial condition, business or strategy, as discussed further below. Based on the competitive

nature of the industry, we may have to revise our management estimates from time to time and consequently our funding requirements may also change. Our management estimates for the projects may exceed fair market value or the value that would have been determined by third party appraisals, which may require us to reschedule or reallocate our project expenditure, which may have a material adverse effect on our business, financial condition and results of operations.

7. ***Our Promoters have given personal guarantees in relation to certain debt facilities provided to us, our Group Entities and our Subsidiaries, which if revoked may require alternative guarantees, repayment of amounts due or termination of the facilities.***

Our Promoters have given personal guarantees in relation to certain debt facilities provided to us, our Subsidiaries and Group Entities aggregating Rs. 11,660.81 million as of October 31, 2009. In the event that any of the guarantees are revoked, the lenders for such facilities may require alternate guarantees, repayment of amounts outstanding under such facilities, or even terminate such facilities. We may not be successful in procuring guarantees satisfactory to the lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows.

8. ***We have given corporate guarantees in relation to certain debt facilities provided to our Subsidiaries and certain Group Entities, which if claimed on, may require our Company to pay the guaranteed amounts.***

We have given corporate guarantees in relation to certain debt facilities provided to our Subsidiaries and other Group Entities aggregating Rs. 4,447.61 million as of October 31, 2009. For more details see "Financial Indebtedness" on page 345. In the event that these guarantees are claimed on, we would be required to pay up the guaranteed amounts.

9. ***Certain of our land acquisition transactions may not be completed on account of sellers' inability to satisfy pre-conditions to the sale.***

As part of our land acquisition process, we enter into purchase agreements or MoUs with third parties prior to the transfer of interest or conveyance of title of the land to us. Such third parties may own the lands themselves or have contracts to purchase such lands from the current owners. We enter into these agreements after making certain advance payments in order to ensure that such third parties can satisfy certain pre-conditions within the time frames stipulated under these agreements. There can be no assurance that these third parties will be able to satisfy their conditions within the time frames stipulated or at all. In addition, such third parties may at any time decide not sell us the land identified. In the event that we are not able to acquire this land, we may not be able to recover all or part of the advance monies paid by us to these third parties, which amounted to approximately Rs. 1,010.63 million as of October 31, 2009 and a further sum of Rs. 509.47 million is required to be paid to these land owners under these agreements. Further, in the event that these agreements are either invalid or have expired, we may lose the right to acquire these lands and also may not be able to recover the advances made in relation to the land. Also, any failure on our part to perform our obligations, or any delay in performing our obligations under these agreements, may lead to us being unable to acquire these lands as the agreements may also expire. Any failure to complete the purchases of land, renew these agreements on terms acceptable to us or recover the advance monies from the relevant counterparties could adversely affect our business, financial condition and results of operations.

10. ***As we also implement our projects through project-specific Subsidiaries and other entities, we are substantially dependent on the performance of such Subsidiaries and other entities.***

We have equity interests in our Subsidiaries and in other entities, each of which develop specific projects. Some of our Subsidiaries and other entities not only undertake the development but also continue to own and/or operate such developments subsequent to their completion. As a result, our financial condition and results of operations also depend on the performance of our Subsidiaries and such other entities and the returns and other distributions we receive from them. As a result, in the event of non-performance by our Subsidiaries and such other entities, losses incurred or lack of dividends or other distributions made by our Subsidiaries and such other entities, our results of operations and financial condition may be adversely affected.

11. ***The land which is owned by our Company and registered in the name of our Company is 18.44 acres and accounts for less than 25% of our total Land Reserves. The remainder of our aggregate Land Reserves are held in the names of our Subsidiaries or other entities.***

We own or have an interest in a total of 18.44 acres of land and which aggregates to 2.21% of our total Land Reserves. The remaining properties forming part of our Land Reserves are held in the names of our Subsidiaries and other entities which will develop our projects. As a result, these project-specific entities will have control over the Land Reserves and thereby limit our flexibility to make decisions relating to such Land Reserves. For details about the lands held in our name, see "Our Business – Our Land Reserves" on page 122.

12. ***Our title and development rights or other interests over land may be subject to legal uncertainties and defects. In addition, title insurance guaranteeing title or land development rights is not readily available in India.***

There may be various legal defects and irregularities to the title to the lands that we own or on which we have development rights or other interests in, directly or indirectly, and which we may not be able to fully identify, resolve or assess. Prior to any agreement for purchase and/or development of land with respect to any land or any right therein, we usually verify the history and title of the land based on available documents and information by undertaking a due diligence process. However, there can be no assurance that such documents and information is accurate, authentic or complete. Additionally, property records in India have not been fully computerised and are generally maintained manually with physical records of all land related documents, which are also manually updated. This updating process can take a significant amount of time and can result in inaccuracies or errors and increase the difficulty of obtaining property records and/or materially impact our ability to rely on them. As a result, the title of the real property in which we may invest may not be clear or may be in doubt.

Our rights in respect of these lands may be compromised by improperly executed, unregistered or insufficiently stamped conveyance instruments in the property's chain of title, unregistered encumbrance in favor of third parties, the absence of conveyance by all right holders, rights of adverse possessors, ownership claims of family members of prior owners, or other defects that we may not be aware of. Thus, we may not be able to assess or identify all the relevant risks and liabilities associated with defects or irregularities of title. Any acquisition made by us in reliance on our assessment of such information, or the assessment of such information by a third party, is subject to risks and potential liabilities arising from the inaccuracy or incompleteness of such information. If such information later proves to be inaccurate, any defects or irregularities of title may result in our loss of title or rights over land, and the cancellation of our development plans in respect of such land. Any inability to identify defects or irregularities of title, and any inability to correct any such defects or irregularities of title, on

lands that we plan to develop may have a material and adverse effect on our business, financial condition and results of operations.

Further, legal disputes in respect of land title can take several years and can entail considerable expense to resolve if they become the subject of court proceedings and their outcome can be uncertain. If we or the owners of the land, which is the subject of our agreements, are unable to resolve such disputes with these claimants, we may either lose our interest in such land or may be rendered unable to commence or continue development thereon. The failure to obtain good title to a particular plot of land may materially prejudice the success of any development for which that plot is a critical part and may require us to write- off expenditure in respect of the development.

We face various practical difficulties in verifying the title of a prospective seller or lessor of property, or a joint development partner. Multiple property registries exist, and verification of title is difficult. Indian law recognizes the ability of persons to effectuate a valid mortgage by the physical delivery of original title documents to a lender, without the requirement of registration. Adverse possession under Indian law also arises upon 12 years of unconcealed, continuous and uninterrupted occupation over specific property to the knowledge and against all rights of parties, including government entities (in which case the aforementioned 12 year period is replaced by a 30 year period) that are landowners, without the specific requirement of registration of ownership rights by the adverse possessor. In addition, Indian law recognizes the concept of a Hindu undivided family, whereby all family members jointly own land and must consent to its transfer, including minor children, in the absence of whose consent a land transfer may be challenged by such non-consenting family member.

Some of our projects are executed through joint ventures in collaboration with third parties or by entering into joint development agreements where the title to land remains with the land owner during the term of the project. In some of these projects, the title to the land may be owned by one or more such third parties. In such instances, there can be no assurance that the persons with whom we have entered into joint ventures, collaboration agreements or joint development agreements, as the case may be, have clear title to such land and that there are no encumbrances on such land.

A lack of title insurance, coupled with difficulties in verifying title to land, may increase our exposure to third parties claiming title to the property. This could result in a delay in our selling the property or even a loss of title to the property, affect valuations of the property, or otherwise materially prejudice the development of the property which could in turn have a material and adverse effect on our business, financial condition or results of operations.

13. ***Our inability to procure contiguous parcels of land, on terms that are acceptable to us or at all, may affect our future development activities.***

We acquire parcels of land at various locations, over a period of time, for future development. These parcels of land are subsequently consolidated to form a contiguous landmass, upon which we undertake development. However, we may not be able to acquire such parcels of land, at all or on terms that are acceptable to us, which may affect our ability to consolidate parcels of land into a contiguous mass. Failure to acquire such parcels of land may cause delays or force us to abandon or modify the planned development of the land, which in turn may result in a failure by us to realise the value of our investment in acquiring such parcels of land. Accordingly, our inability to acquire contiguous parcels of land may adversely affect our business, financial condition and results of operations. In the event we are not successful in acquiring these lands, this could cause us to change, delay or abandon entire projects, which in turn could cause our business to suffer.

14. ***Compliance with, and changes in, environmental, health and safety and labour laws and regulations may materially and adversely affect the development of our projects and our financial condition and results of operations.***

We are subject to environmental, health and safety regulations in the ordinary course of our business, including governmental inspections, licenses and approvals of our project plans and projects prior to and during construction.

We are required to conduct an environmental assessment for most of our projects before receiving regulatory approval. If environmental problems arise during or after the commencement of construction of a project or if the government authorities amend and impose more stringent regulations, we will have to be in full compliance with applicable regulatory requirements at all times. We may need to incur additional expenses to comply with such new regulations or undertake remedial measures which may increase the cost of the development of the property. Further, we are subject to various labour laws and regulations governing our relationship with our employees and other contractors, including in relation to minimum wages, working hours, overtime, working conditions, hiring and terminating employees, contract labour and work permits.

We cannot assure you that we will be in compliance with current and future environmental, health and safety, and labour laws and regulations at all times, and any potential liabilities arising from any failure to comply therewith will materially and adversely affect our business, financial condition and results of operations.

15. ***Our revenues are dependent on various factors and are therefore difficult to predict and can vary significantly from period to period, which could cause the price of the Equity Shares to fluctuate.***

Under our existing business model, revenues in our real estate development business are derived primarily from the sale of commercial and residential developments, the leasing of commercial developments, retail developments and hospitality developments. While rental income can be relatively stable, revenues from sale of properties are dependent on various factors such as the size of our developments, the price at which such developments are sold, the extent to which they qualify for percentage of completion treatment under our revenue recognition policies, rights of lessors or third parties that could impair our ability to sell properties and general market conditions including those caused by the current global financial crisis.

The completion dates for our projects are estimates based on current expectations, market demands and management estimates and could change. Any changes in the construction schedule could affect revenue recognition in our financial statements. These factors may result in significant variations in our revenues and profits. Therefore, we believe that period-to-period comparisons of our results of operations are not necessarily meaningful and should not be relied upon as indicative of its future performance.

16. ***We enter into MoUs, agreements to sell and similar agreements with land owners to acquire land, interests in land (including acquisitions of land and interests in land through investment in entities) or to enter into joint development agreements, which entail certain risks.***

We enter into MoUs, agreements to sell and similar agreements with land owners to acquire lands or interest in the lands (including acquisitions of land and interests in land through investment in entities) or to enter into a joint development agreements in the future. We also make partial payments to such land owners or entities and upon the successful completion of due diligence investigations we pay the remaining amount. We proposed to acquire 208.44 acres for our Ongoing Projects, Projects Under

Development, Forthcoming Projects and Land Bank, which constitutes approximately 25.07% of our Land Reserves. Pursuant to these agreements, we had paid approximately Rs. 1,768.12 million and are required to pay a further sum of Rs. 1,672.98 million under such agreements. For further details, see "Our Business - Our Land Reserves" on page 122. Our inability to acquire such land or land development rights, or our failure to recover any payments made by us with respect to such land, may adversely affect our business, financial condition and results of operation.

17. ***Property litigation is common in India and time consuming, and some of the properties on which we are developing projects are the subject matter of litigation to which we are not a party.***

Property litigation particularly litigation with respect to land ownership is common in India (including public interest litigation) and is generally time consuming and involves considerable costs. If any property in which we have invested is subject to any litigation or is subjected to any litigation in future, it could delay a development project and/or have an adverse impact, financial or otherwise, on us. Some of our Completed Projects and certain parcels forming part of our Land Reserves are subject to litigation. For details, see "Outstanding Litigations and Defaults" on page 355.

It has come to our notice that some of the properties on which we are developing projects, such as, *Hilton, Forum Thomsun Mall, Prestige Silver Oak, Prestige Dynasty, Forum Vijaya Mall and Prestige Polygon* are the subject matter of litigation to which we are not a party. We may not be able to predict the impact of such litigation on us or our projects.

18. ***Our operations and our work force are exposed to various hazards and we are exposed to risks arising from construction related activities that could result in material liabilities, increased expenses and diminished revenues.***

There are certain unanticipated or unforeseen risks that may arise in the course of property development due to adverse weather and geological conditions such as storm, hurricane, lightning, flood, landslide and earthquake. Additionally, our operations are subject to hazards inherent in providing architectural and construction services, such as risk of equipment failure, impact from falling objects, collision, work accidents, fire or explosion, including hazards that may cause injury and loss of life, severe damage to and destruction of property and equipment, and environmental damage. Any such risk could result in exposing us to material liabilities, increase our expenses, adversely effect our reputation and may result in a decline in our revenues. We cannot assure that we may be able to prevent any such incidents in the future.

19. ***Our growth may require additional capital, which may not be available on terms acceptable to us.***

We expect to finance our growth through equity issuances, including through the Net Proceeds of this Issue, as well as through debt financings. We may not be successful in obtaining additional funds in a timely manner, on favourable terms or at all. In addition, the availability of borrowed funds for our business may be greatly reduced, and the lenders may require us to invest increased amounts of equity in a project in connection with both new loans and the extension of facilities under existing loans. If we do not have access to additional capital, we may be required to delay, scale back or abandon some or all of our acquisition plans or growth strategies or reduce capital expenditures and the size of our operations.

20. ***If we are unable to manage our growth strategy effectively, our business and financial results may be adversely affected.***

Our business strategy includes the development of commercial, residential, hospitality and retail real estate developments in and around Bangalore and in select new geographic markets across India; pursuant to this strategy, we currently have 33 Ongoing Projects, 12 Projects Under Development and six Forthcoming Projects. As we grow and diversify, we may not be able to execute our projects efficiently on such increased scale, which could result in delays, increased costs and diminished quality, each adversely affecting our reputation. This future growth may strain our managerial, operational, financial and other resources. If we are unable to manage our growth strategy effectively, our business, financial condition and results of operations may be adversely affected. As the development of each real estate project presents unique challenges and risks to implementation, we cannot provide you any assurance that by operating nationally, and by undertaking more diverse projects, that our future real estate developments will not encounter delays or be unsuccessful. We similarly cannot assure you that we will be able, in carrying out our growth strategy, to complete our current and future development projects successfully or on time, acquire additional suitable land for development, or develop new projects on such land in the future.

21. ***HDFC, one of our lenders, has a ‘step in’ right in relation to Prestige Golfshire, one of our Ongoing Projects, which would entitle such lender to take over and complete the project and assign the sale proceeds of the project towards the loan amount.***

We have taken a term loan of Rs. 1,500.00 million from HDFC, one of our lenders for the development of *Prestige Golfshire*, one of our Ongoing Projects. As per the terms of the loan agreement with the lender, on the occurrence of an event of default, the lender has the right to appoint its nominee to take over the project, complete the project and assign the income of its sale towards the loan amount. An ‘event of default’ is defined as including our failure to pay the amounts falling due thereunder, our failure to perform the covenants undertaken, depreciation in the value of the security of the loan coupled with a failure to provide additional security to make good the difference and sale of the security during the subsistence of the loan. The operation of this provision in the loan agreement could adversely affect our reputation, financial condition and cash flows.

22. ***One of our lenders HDFC has a right to enter upon and take possession of our assets on the occurrence of an event of default as defined under the loan agreement executed by us with that lender.***

We have availed of a term loan of Rs. 1,000.00 million from HDFC one of our lenders for the purpose of creating fit out assets which yield rental income to the Company. As per the terms of the loan agreement, upon the occurrence of an event of default the lender obtains a right to enter upon and take possession of our assets. An ‘event of default’ is defined under the aforementioned agreement as including our failure to pay the amounts falling due thereunder, our failure to perform the covenants undertaken, depreciation in the value of the security of the loan coupled with a failure to provide additional security to make good the difference and sale of the security during the subsistence of the loan. The operation of this provision in the loan agreement could adversely affect our reputation, financial condition and cash flows.

23. ***Delays in the completion of our Ongoing Projects, Projects Under Development and Forthcoming Projects or complying with our construction contract schedules could adversely affect our financial condition and results of operations.***

Property developments typically require substantial capital outlay during the construction period which may take an extended period of time to complete, before a potential return can be generated. The time and costs required to complete a property development may be subject to substantial increases due to many factors, including shortages of, or price increases with respect to, construction materials (which may prove defective), equipment, technical skills and labour, acquisition of land, construction delays,

unanticipated cost increases, changes in the regulatory environment, adverse weather conditions, third party performance risks, environmental risks, changes in market conditions, delays in obtaining the requisite approvals and permits from the relevant authorities and other unforeseeable problems and circumstances. Any of these factors may lead to delays in, or prevent the completion of, a project and result in costs substantially exceeding those originally budgeted for. The cost overruns may not be adequately compensated by contractual indemnities, which may affect our financial condition and results of operations. There are no insurance policies available in India that cover cost overrun risk. In addition, any delays in completing our projects as scheduled could result in dissatisfaction among our customers, resulting in negative publicity and lack of confidence among future buyers for our projects. Additionally, we may not achieve the economic benefits expected of such projects and failure to obtain expected economic benefits could adversely affect our business, financial condition and results of operations. In the event there are any delays in the completion of such projects, our relevant approvals and leases may be terminated, which may have a material adverse effect on our business and results of operations.

Furthermore, there is a lag between the time we acquire land and/or development rights and the time that we can construct and develop such project and sell our inventories. The actual timing of the completion of a project may be different from its forecasted schedule. Given that the real estate market both for land and developed properties is relatively illiquid, there may be high transaction costs as well as little or insufficient demand for land or developed properties at the expected rental or sale price, as the case may be, which may limit our ability to respond promptly to market events, such as changes in the prices of the raw materials we utilise in our projects. Further, our profitability could be materially and adversely affected if we purchase land at high prices and we have to sell or lease our developed projects during weaker economic periods at prices lower than those estimated originally. The risk of owning undeveloped land and unsold inventories can be substantial and the market value of the same can fluctuate significantly as a result of changing economic and market conditions.

24. ***The success of our residential, commercial, hospitality and retail real estate development businesses is dependent on our ability to anticipate and respond to consumer requirements, in light of the growing disposable incomes and changes in lifestyle of India's middle and upper income classes.***

The growth of the Indian economy has led to changes in the way businesses operate in India and the growing disposable income of India's middle and upper income classes has led to a change in lifestyle, resulting in a substantial change in the nature of their demands. Therefore, the changing lifestyle and growing disposable income has resulted in a substantial change in the nature of demands in this sector. Increasingly, consumers are seeking better housing and better amenities in new residential developments. Our role as the developer of residential projects requires us to satisfy different consumer expectations such as parking, gardens, playgrounds, swimming pools, fitness centres, tennis courts and golf courses. The growth and success of our commercial business depends on the provision of high quality office space to attract and retain clients who are willing and able to pay rent or purchase prices at suitable levels, and on our ability to anticipate the future needs and expansion plans of these clients. In our retail business, the increase in disposable incomes, demographic changes, the change in perception of branded products and the entry of international players has led to a greater demand for access to luxury brands. The growth and success of our retail business therefore depends on being able to achieve the right mix of tenants in our malls to attract more customers to the outlets which lease retail space from us. The increase of disposable income and change in lifestyle has also led to an increased proportion of income being spent on tourism and travel. The growth and success of our hospitality business is therefore dependant on our ability to identify suitable hospitality projects in high-tourism locations, partner with the right operator for the management of that hotel and ensure that, in conjunction with the operator, we deliver acceptable standards of hospitality and service.

Given the current global economic crisis, we face an increasing pressure to service our customers commensurate to their expectations at attractive prices, which may not be profitable to us. Accordingly, our inability to meet our customers' preferences or our failure to anticipate and respond to customer needs accordingly could materially and adversely affect our business and results of operations. If we fail to anticipate and respond to consumer requirements, we could lose potential clients to competitors, which in turn could materially and adversely affect our business and prospects.

25. ***Our business and financial condition will suffer if we are unable to renew our commercial, retail and hospitality leases on favourable terms.***

We receive rental income from the lease of commercial, retail and hospitality projects. We expect this rental income to become increasingly significant. When our leases expire, our tenants may not renew or may renew on terms less favourable to us than the terms of their original leases. In some cases, we also enter into long term agreements with anchor tenants for periods up to 15 years. Our ability to enter into such arrangements is largely dependent on pricing policy. If a tenant vacates a property, we can expect to experience a vacancy for some period of time, as well as incur higher leasing costs, than if a tenant renews in a timely manner. We have in certain cases also entered into agreements to commit tenants to the lease of commercial space in certain of our Ongoing Projects and Projects Under Development prior to the completion of these developments. Our financial performance could be adversely affected if such prospective tenants fail to take up space and execute formal lease agreements. Any inability on our part to attract potential customers for our commercial and retail projects could adversely affect our business and reputations.

26. ***Increased raw material costs may adversely affect our results of operations.***

Our business is affected by the availability, cost and quality of the raw materials. Our principal raw materials include steel and cement. The prices and supply of these and other raw materials depend on factors not under our control, including general economic conditions, competition, production levels, transportation costs and import duties. While there has been a significant decrease in the cost of raw materials in the last few months, this trend may not continue and we cannot assure you that we shall be able to procure quality raw material at competitive prices or at all which may adversely affect our business.

27. ***We are dependent on our suppliers for adequate and timely supply of key raw materials at competitive rates and have not entered into any long term supply contracts with our suppliers.***

In our business, timely procurement of raw materials such as steel and cement, the quality of the material and the price at which it is procured, plays an important role in the successful execution of any project. We typically execute purchase orders on a spot basis with our suppliers for each project and have not entered into any long-term supply contracts with our suppliers. Accordingly, we cannot assure you that we would be able to procure raw materials in a timely manner and at competitive prices or that we will not be affected in the event of any short fall of supply since we do not have any definitive arrangements with our suppliers, which may adversely affect to our business. If, for any reason, our primary suppliers of raw materials curtail or discontinue their delivery of such materials to us in the quantities we need and at prices that are competitive, our reputation and ability to meet our material requirements for our projects could be impaired, our construction schedules could be disrupted and our business could suffer.

28. ***We depend on various sub-contractors or specialist agencies to construct and develop our projects.***

We primarily rely on third parties for the implementation of our projects and generally enter into several arrangements with third parties. Accordingly, the timing and quality of construction of our properties depends on the availability and skill of those sub-contractors. During the construction phase of one of our projects an accident occurred damaging the building and causing three casualties among the contract workers. Part of the building under construction by one of our contractors had to be rebuilt after the accident. Although we believe that our relationships with third party subcontractors are cordial, we cannot assure you that skilled subcontractors will continue to be available at reasonable rates and in the areas in which we conduct our operations.

29. ***Our business is subject to extensive regulation by the Government of India, state governments and local authorities with which we may not comply with, and which may require more time and cost to comply with.***

The real estate industry in India is heavily regulated by the Government of India, state governments and local authorities. Property developers need to comply with a number of requirements mandated by Indian laws and regulations, including policies and procedures established by local authorities such as requirement of transaction documents, payment of stamp duty, registration of property documents, purchase of property for benefits of others. There are also various land ceiling legislations that regulate the amount of land that can be held under single ownership. We may have to revise our strategies and plans to be able to adapt to new laws, regulations or policies that may come into effect from time to time with respect to the real estate sector. Although we believe that our projects are in compliance with applicable laws and regulations, there could be instances of non-compliance, which may subject us to regulatory action in the future, including penalties, seizure of land and other legal proceedings. Further, due to the possibility of unanticipated regulatory developments, the amount and timing of future expenditure to comply with these regulatory requirements may vary substantially from those currently in effect.

30. ***Our hospitality business is subject to a number of risks and therefore we may not be successful in our hotel business.***

We, are currently in the process of developing four hotels and two serviced apartment blocks, which we will own but will be operated and managed by national and international hotel operators. We do not yet have definitive arrangements in place for one serviced apartment development. We do not have extensive experience in this business and rely on the operators to manage our hospitality projects. We may not be able to compete effectively with established and new competitors in this business. Our success in the development of hotels, resorts and serviced accommodation will depend on our ability to forecast and respond to demand in an industry in which we have limited experience and we therefore depend on our operators. In addition, the performance of the hotel industry is also closely linked with the performance of the general economy and any economic downturn would affect our business.

The success of the hospitality business is also subject to our ability to successfully partner with management companies to operate the hotels, resorts and serviced accommodation profitably and obtaining all requisite statutory approvals. We have currently entered into agreements with Marriott, Hilton International Co., Starwood Asia Pacific Hotels and Resorts Pte Ltd., India Branch, Oakwood Management Services India Private Limited and Banyan Tree Hotels and Resorts Private Limited (collectively the “**Operators**”) to operate and manage our hotels. Under these arrangements, we are required to develop the hospitality properties while our Operators operate and manage the hotels, resorts and serviced apartments, in return for a stipulated management fee.

The success of this business depends on our ability to develop hotels at appropriate locations and to successfully operate these hotels, resorts or serviced apartments. In addition, the role of our Operators

is critical to the uninterrupted operations of these hospitality projects. If our hospitality partners fail to meet their obligations, experience financial or other difficulties or suffer a decline in reputation, the projects may suffer and as a result our business and results of operations may be materially and adversely affected. In addition, in the event that these arrangements with our Operators are not successful, our reputation as a hospitality partner for future projects may be materially and adversely affected.

In the event that we are able to and do replace any of our hotel operators, we may experience significant disruptions at the affected hotels, which may adversely affect our business, results of operations and financial condition.

31. ***We are required to obtain, renew and maintain statutory and regulatory permits, licenses and approvals for execution of our projects and our operations from time to time. Any delay or inability to obtain such approvals may have an adverse impact on our business.***

We require certain statutory and regulatory permits, licenses and approvals (including approvals related to the conversion of agricultural land to non-agricultural land in certain cases) to execute our projects and operate our business. Further, applications need to be made at appropriate stages for such approvals. Additionally, we require completion certificates to be delivered to us upon completion of a project or a phase of the project. While, we have applied for a few of these approvals and permits, we cannot assure you that we will receive these approvals on time or at all in relation to execution of our projects. Further, in the future we will be required to apply for fresh approvals and permits for our projects. While we believe we will be able to obtain such approvals or permits at such times as may be required, there can be no assurance that the relevant authorities will issue any of such permits or approvals in the time frames anticipated by us or at all.

Further, in relation to our Ongoing Projects and Projects under Development, we make applications for renewals in relation to certain approvals or licenses that have expired but have not yet received these approvals or licenses. If we fail to obtain the necessary approvals and permits or if there is any delay in obtaining these approvals and permits, it may disrupt the schedule of development and sale or letting of our projects, impede the execution of our business plans and may materially and adversely affect our business and financial condition.

32. ***We have entered into certain contracts with certain of our Subsidiaries, Group Entities, Associates and other entities in which our directors are interested for which we do not have prior approval from the Central Government as required***

We have entered into certain contracts with certain of our Subsidiaries, Group Entities, Associates and other entities in which our directors are interested for which we do not have prior approval from the Central Government as required. In this regard we have submitted appropriate applications before the Company Law Board, Chennai, to compound the offences in relation hereto. In the interim, we have ceased all activity in relation to these transactions. The process will entail the payment of compounding fees/penalties. Rejection of our application will have an adverse impact on our continuing relationships with such entities and may expose us to legal liability.

Further, we have also made applications to the Company Law Board seeking prior approval for certain transactions with entities in which our directors are interested. We cannot assure you that we will obtain such consent on suitable terms or at all. Failure to obtain this consent may have a material adverse effect on our transactions and our business.

33. ***We hold an insignificant stake or no stake in certain of our Other Development Entities which are engaged in the development of certain projects, because of which the control and operations in respect of such projects may be adversely affected.***

We currently hold 0.002% stake in Thomsun Realtors Private Limited which is engaged in developing our retail and hospitality project at Cochin, India. While we have the right to an increased stake in Thomsun Realtors Private Limited upon fulfillment of certain capital commitments specified in the Cochin Agreement, we cannot assure you that the capital infusion will be made in time as envisaged under the agreement, or at all. This may have a material adverse impact on our ability to hold a significant stake in Thomsun Realtors Private Limited as envisaged, which will further impact our control and operations in relation to the project being undertaken by it.

Currently, we do not hold any stake in Vijaya Productions Private Limited which is engaged in the development of our retail mall in Chennai. Our right to be allotted shares in Vijaya Productions Private Limited is subject to us meeting our remaining capital commitment of 517.50 million under the shareholders agreement. In the event that we do not meet our capital commitment we may not be allotted shares in the said entity. Our inability to exercise control over Vijaya Productions Private Limited which hold the land on which our projects is being constructed may adversely affect our ability to operate and control the project. For further details see “Other Development Entities” on page 168.

34. ***We are dependent on our Directors and senior management team and the loss of key members or failure to attract skilled personnel may adversely affect our business.***

We believe we have a team of professionals to effectively oversee the operations and growth of our business. Our success is substantially dependent on the expertise and services of our Directors, and led by our Chairman and Managing Director, Irfan Razack, as well as our other Joint-Managing Director, Rezwan Razack, and our senior management team. These Directors provide expertise which enables us to make well informed decisions in relation to our business and our future prospects. We cannot assure you that we will be able to retain any or all of the key members of our management. The loss of the services of such key members of our management team could have a material adverse effect on our business and the results of our operations.

Further, our ability to maintain our leadership position in the real estate development sector depends on our ability to attract, train, motivate, and retain highly skilled personnel. In the event we are unable to do so, it could have an adverse effect on our business and results of operations.

35. ***We conduct due diligence and assessment exercises prior to undertaking a project, but may not be able to assess or identify certain risks and liabilities.***

Prior to undertaking a project, we conduct due diligence and assessment exercises in relation to land, and assess the financial viability of the project. Due to the nature of industry in which we operate, certain potential risks and liabilities may not come to our notice while conducting such exercises, such as title defects and suitability of the land for the proposed development. In addition, we may not correctly estimate the cost of the project when budgeting for the project. Consequently, we may face unexpected liabilities and such unexpected liabilities may materially and adversely affect our financial condition and results of operations.

36. ***Work stoppages and other labour problems could adversely affect our business.***

We operate in a labour-intensive industry and our contractors hire casual labour in relation to specific projects. If we are unable to negotiate with the workmen or the contractors, it could result in work

stoppages or increased operating costs as a result of higher than anticipated wages or benefits. In addition, we may not be able to procure required casual labour for our existing or future projects. These factors could adversely affect our business, financial position, results of operations and cash flows.

37. ***Any decrease in our developer rating could adversely affect our business.***

We currently hold a DA2 developer rating issued to us by CRISIL, and have previously held a DA1 rating during the years 2003 to 2008 in recognition of the quality of our projects and our ability to deliver Completed Projects to our customers in a timely manner. Any decrease in our developer rating in the future may adversely affect our reputation and our business.

38. ***Our ability to pay dividends in the future may be effected by any material adverse effect on our future earnings, financial condition or cash flows.***

Our ability to pay dividends in future will depend on the earnings, financial condition and capital requirements and that of our Subsidiaries and the dividends they distribute to us. Our business is capital intensive and we may make additional capital expenditure to complete various real estate projects. Our ability to pay dividends is also restricted under certain financing arrangements. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our projects, financial condition and results of operations.

39. ***Land is subject to compulsory acquisition by the government and compensation in lieu of such acquisition may be inadequate.***

The right to own property in India is subject to restrictions that may be imposed by the government. In particular, the government under the provisions of the Land Acquisition Act, 1894 has the right to compulsorily acquire any land if such acquisition is for a "public purpose", after making payment of compensation to the owner. However, the compensation paid pursuant to such acquisition may not be adequate to compensate the owner for the loss of such property. The likelihood of such actions may increase as the central and state governments seek to acquire land for the development of infrastructure projects such as roads, railways, airports and townships. Any such action in respect of any of the projects in which we are investing or may invest in the future may adversely affect our business, financial condition or results of operations.

40. ***Investment in the real estate sector in India is subject to government regulations, which may impact our ability to receive foreign investment.***

FDI Regulations impose certain conditions on investment in real estate sector in India. Government policy in respect of FDI in the real estate sector in India is regulated by Press Note 2 of 2005 ("**Press Note 2**") issued by the Government of India, Ministry of Commerce and Industry, which permits foreign direct investment of up to 100% subject to the project fulfilling certain specified conditions. The FDI Regulations and Press Note 2, however, are subject to differing interpretations. For example, the FDI Regulations and Press Note 2 stipulate that funds have to be brought in within six months of "commencement of business of our Company", the term "commencement of business of our Company" has not been defined or explained and may also be subject to differing interpretations. Further, the Government of India has issued Press Notes 2, 3 and 4 (2009 Series) in February 2009 which amongst other guidelines, prescribe guidelines in relation to the calculation of total foreign investment in Indian companies. The Press Notes of 2009 Series are subject to different interpretations. There can be no assurance as to the position the Government of India will take in interpreting the Press Notes (2009 Series) as mentioned above and the FDI Regulations.

41. *The statements contained in this Draft Red Herring Prospectus with regard to our Ongoing Projects, Projects Under Development and Forthcoming Projects and the area expressed to be covered by our projects are based on management estimates and may be subject to change. In addition, industry statistical and financial data contained in this Draft Red Herring Prospectus may be incomplete or unreliable.*

The measurements data presented herein with regard to Ongoing Projects, Projects Under Development and Forthcoming Projects, the Developable Area, Saleable Area and Leaseable Area and general composition of our land are based on management estimates. The square footage that we may develop in the future with regards to a particular property may differ from what is presented herein based on various factors such as prevailing market conditions, title defects, an inability to obtain the required regulatory approvals, and a change in the development norms (such as FSI or zoning) or our understanding of what such development norms are. Moreover, title defects may prevent us from having valid rights enforceable against all third parties to lands over which we believe we hold interests or development rights, rendering our management's estimates of the area and make-up of our land incorrect and subject to uncertainty.

We have also not independently verified data from government and industry publications and other sources contained herein and therefore cannot assure you that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled with regards to other countries. Therefore, discussions of matters relating to India, its economy or our industry are subject to the statistical and other data upon which such discussions are based, and may not being verified by us and may be incomplete or unreliable.

42. *Our contingent liabilities which have not been provided for in our financial statements could adversely affect our financial condition.*

We have substantial contingent liabilities, which could adversely affect our business. Our contingent liabilities that had not been provided for in our consolidated financial statements aggregated to Rs. 3,434.58 million as at August 31, 2009. The contingent liabilities consist principally of corporate guarantees given on behalf of companies under the same management. If these entities are unable to pay or otherwise default on their obligations, their lenders may require us, pursuant to the relevant guarantee, to cover the full or remaining balance of their obligations. In the event that any of these contingent liabilities materialize, our results of operation and financial condition may be adversely affected. For further information, please see "Management's Discussion and Analysis of Condition and Results of Operations" on page 323.

As of August 31, 2009, we had contingent liabilities not provided for, as disclosed in the notes to our restated consolidated financial statements:

Contingent liabilities of our Subsidiaries, Associate Companies and Other Group Entities as at March 31, 2009:

(Rs. In million)		
S. No.	Name of the entity	Contingent liability
1.	Valdel Xtent Outsourcing Solutions Private Limited	32.63
2.	Prestige Leisure Resorts Private Limited	3,904.00
3.	Babji Realtors Private limited	0.96
4.	Cessna Garden Developers Private Limited	6,139.07
5.	Prestige Fashions Private Limited	2.42

In the event that any of the above contingent liabilities fructify, then the same could adversely affect the financial condition of our Subsidiaries, Associate Companies and Other Development Entities.

43. ***India has stringent labour legislation that protects the interests of workers, and if our employees unionize, we may be subject to industrial unrest, slowdowns and increased wage costs.***

India has stringent labour legislation that protects the interests of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. Although our employees are not currently unionized, there can be no assurance that they will not unionize in the future. If our employees unionize, it may become difficult for us to maintain flexible labour policies, and our business may be adversely affected.

44. ***Some of the agreements with landowners and with our customers require us to pay a penalty in the event of delays in completion and handover of projects to them.***

We enter into agreements with landowners whereby we undertake to develop lands owned by them, as well as with our customers, which require us to complete the development of the project by a certain date stipulated in such agreements. Some of these agreements include penalty clauses in terms of which we are liable to pay penalties to the owners/customers as the case may be, for any delay in the completion of the undertaken property development. We cannot assure you that we will always complete the construction or development of our properties in accordance with the timelines specified in such agreements, and as a result we may be liable for penalties in terms of such agreements. We have experienced delays in the completion and handover of developments in the past. Continued delays in the completion of the construction of our projects will adversely affect our reputation. Further, such penalties payable by us will have an adverse effect on our financial condition and results of operations.

45. ***We may not be successful in identifying suitable parcels of lands for our development activities, build or develop saleable properties or anticipate and respond to customer demand in a timely manner.***

Our ability to identify suitable parcels of land is fundamental to our business and involves certain risks such as identifying and acquiring appropriate land parcels in appropriate locations, and meeting the demands and expectations of our customers. Our decision to acquire land and undertake a project involves an assessment of the size and location of the land, the preferences of potential customers, the economic potential of the region, the proximity of the land to civic amenities and urban infrastructure, the willingness of landowners to sell the land to us on terms which are commercially acceptable to us, the ability to enter into an agreement to buy land from multiple owners, the availability and cost of financing such acquisitions, the existence of encumbrances, government directives on land use, and the ability to obtain permits and approvals for land acquisition and development.

Any failure to identify suitable projects, build or develop saleable properties or anticipate and respond to customer demand in a timely manner, or any failure to acquire suitable land may cause us to change, delay or abandon entire projects, which in turn could materially and adversely affect our competitive position, business, financial condition and results of operation. We also cannot assure you that we will undertake the development of projects on all properties which we have acquired or in which we have acquired an interest.

46. ***We may not be able to obtain the requisite approvals and consents in relation to our Ongoing Projects, Projects Under Development and Forthcoming Projects in time or at all.***

We have various projects which are in various stages of development and we are in the process of making the applications to regulatory authorities in connection with the development of these projects. The proposed use and development plans for these properties may be subject to further changes, as we may determine are necessary in light of various factors such as prevailing economic conditions, preferences of our customers and laws and regulations applicable to us from time to time.

There can be no assurance that the consents or other approvals required from third parties, which include central, state and local governmental bodies, in connection with the construction and development of these projects will be issued or granted to us in a timely manner or at all. It is possible that some projects will be located in areas that will require significant infrastructure support, including roads, electrical power, telecommunications, water and waste treatment. We may be dependent on third parties, including local authorities, to provide such services. Any delay or failure by any third party to provide such additional services or a failure to obtain any required consents and approvals on acceptable terms or in a timely manner may affect our ability to execute or complete existing and/or new development projects.

47. ***We may not be successful in expanding our real estate business into new geographical areas and markets in which we do not have significant experience.***

We continue to expand our business, outside of our traditional geographic focus, to new areas such as Mangalore, Mysore, Hyderabad, Chennai, Goa and Cochin. We face risks with projects in geographic areas in which we do not possess the same level of familiarity with the development, ownership and management of properties, including adjusting our construction methods to different geographies; establishing good relations with the local landowners and joint venture partners; obtaining the necessary construction and raw materials and labour in sufficient amounts and on acceptable terms; obtaining necessary governmental approvals and the building permits under unfamiliar regulatory regimes; understanding the requirements of the local laws and market practice; attracting potential customers in a market in which we do not have significant experience; hiring new employees and acquiring infrastructure at reasonable cost; and competing with established local players familiar with these geographies. We may not be able to successfully manage the risks of such an expansion, which could have a material adverse effect on our revenues, earnings and financial condition.

48. ***Leasing our completed developments instead of selling them, and the securitization of our future rental receipts, could affect our cash flows and results of operations.***

In addition to the sale of completed residential and commercial developments, we generate revenue in our real estate development business by leasing completed developments of our commercial business, retail business and hospitality business. Leasing, as opposed to selling, completed developments reduces cash flows in the short term and increases the period over which cash is recovered from such projects. Further, our strategy of leasing certain properties is also subject to the prevailing rates applicable to rentals, risks arising from the fall of rental rates, recoverability of rent, market price of land and such other factors which may affect our operations.

In addition, we enter into arrangements with banks to securitize the revenue generated from the lease of our completed commercial, hospitality and retail developments, in terms of which the banks pay us a lump sum, in the form of a loan, at the time we lease the property, with all subsequent rentals from our tenants paid directly to the bank. If our tenants fail to make any rental payments, we are obligated to

make the payment owed to the bank which could materially and adversely affect our cash flows and results of operations.

49. ***Certain lands developed in our commercial real estate business are on a leasehold basis for a certain period.***

In some cases in our commercial real estate business, we conduct development activities on land by entering into long term lease agreements with the owners of the land. After expiration of the lease period, we are required to return the land to the owners. We may not be able to recover the rent paid to the landowners or the costs incurred for the construction on the land during the lease period. As of October 31, 2009, our Company holds leasehold rights in 33.44 acres or approximately 4.02 % of our Land Reserves, and have paid approximately Rs. 738.03 million under such agreements and are further required to pay Rs. 1,608.26 million. Further, certain of these lease agreements have a clause whereby the lease may be extended with the consent of both parties. In the event that the owners do not wish to renew the lease agreements, our business, financial condition and results of operations could be materially and adversely affected.

50. ***We are required to make certain payments when we enter into joint development agreements, which may not be recoverable and pursuant to which we may be required to pay penalties in terms of such joint development agreements.***

We enter into joint development agreements with third party land owners in relation to some of our properties. Under these agreements, we are required to provide the owners of the land with either a refundable deposit, which is refundable upon the completion of the project, or a non-refundable deposit. Under these joint development agreements, in the event of any delay in the completion of the project within the time frame specified, we are required to indemnify such parties with whom we have entered into joint development agreements and pay certain penalties as specified in these agreements. If we are required to pay penalties pursuant to such agreements and we decline to do so, we may not be able to recover the deposits made by us to the owners of the land. As of October 31, 2009, we had entered into joint development agreements in relation to 171.68 acres or approximately 20.66 % of our Land Reserves and pursuant to these agreements we had paid approximately Rs. 2,022.89 million as deposits and are required to pay a further sum of Rs. 504.97 million under such agreements. This could have an adverse effect on our business, financial condition and results of operations. For further details please see "Our Business - Our Land Reserves" on page 122.

51. ***We may be subject to certain State land ceiling laws which restrict our ability to purchase land for development.***

Certain States in south India have imposed certain statutory restrictions on the maximum land area that may be held by any one legal entity in the said State. In the event that we decide to expand our business operations into such states where these laws are applicable, we will have to comply with these laws. Further, if a court of competent jurisdiction adjudicates that we are in violation of applicable land ceiling laws, our property rights, including those held through our various Subsidiaries and other entities may be compulsorily acquired by the concerned state government, which may have a material adverse effect on our business, financial condition and future plans.

52. ***Our insurance policies provide limited coverage and we may not be insured against some business risks, potentially leaving us uninsured against some business risks.***

We maintain insurance on property and equipment in amounts believed to be consistent with industry practices and our insurance policies cover physical loss or damage to our property and equipment

arising from a number of specified risks including burglary, fire, landslides and other perils. Notwithstanding the insurance coverage that we carry, we may not be fully insured against some business risks and the occurrence of an accident that causes losses in excess of limits specified under the relevant policy, or losses arising from events not covered by insurance policies, could materially and adversely affect our financial condition and results of operations.

Further, we have insurance for damage to our Ongoing Projects caused by fire and natural disasters, such as earthquakes. Although we believe we have industry standard insurance for Ongoing Projects, if a fire or natural disaster substantially damages or destroys some or all of our Ongoing Projects, the proceeds of any insurance claim may be insufficient to cover rebuilding costs as a result of inflation, changes in building regulations or environmental issues as well as other factors.

53. ***We undertake some of our projects as joint ventures, which entail certain risks.***

At present some of our projects are undertaken by way of joint ventures, such as our joint venture with CRIDF for the development of malls in our retail real estate development business. See the "Our Business – Our Joint Venture with CRIDF" on page 77. In addition, we plan to undertake projects with or through joint ventures with third parties in the future.

Our joint venture partners may have business interests or goals that are inconsistent with our business interests or goals. Such investments also may have the potential risk of impasses on certain key decisions. Any disputes that may arise between us and our joint venture partners may cause delay in completion, suspension or complete abandonment of the project. In addition, we may in certain circumstances be liable for the actions of our joint venture partners. Further, the success of these joint ventures depends, to a certain extent, on the satisfactory performance by the joint venture partners and the fulfilment of their obligations. Additionally, under certain joint venture agreements we along with our partners are required to provide additional funding into the joint venture entities. We cannot assure you that the capital contributions will be made as envisaged under the agreements, or at all. In addition, though our joint ventures confer rights on us to construct, develop, market and sell the developed properties, our joint venture partners have certain decision-making rights which may limit our flexibility to make decisions relating to such projects, and may cause delays or losses.

Certain of our joint ventures involve the participation of foreign investors. These joint venture agreements provide the investors with options to exit the joint venture, such as tag along rights, drag along rights, put option and call options. In the event that the investors exercise these rights, the completion of the project may be adversely affected. Further, joint venture agreements require investor consent before any restructuring, reorganization, change in capital structure, amendment to MoA/AoA and/or transfer of assets. Under certain joint ventures agreements, the investors are entitled to preferential dividends.

While we believe that such restrictions are market standard, they may inhibit our growth potential, limit our flexibility to make decisions relating to the corresponding projects, cause delays and may materially and adversely affect our results of operations.

54. ***Certain of our rights as shareholders in Babji Realtors Private Limited, one of our Associates, may be difficult to enforce as against such Associate, owing to the fact that such rights have not been incorporated in the articles of association of Babji Realtors Private Limited***

Under the terms of our joint venture agreement with CapitaRetail Hyderabad Mall (Mauritius) Ltd, for investment in Babji Realtors Private Limited, one of our Associates, we are entitled to various shareholder and management rights. Such rights have not yet been incorporated in the articles of

association of Babji Realtors Private Limited. Consequently, if any of our rights arising out of the joint venture are frustrated or disputed, our ability to efficaciously enforce our rights may be adversely affected.

55. ***The joint development agreement that we have entered into in relation to the development of Prestige Alecto, one of our Completed Projects, is not with the owner of the land.***

We have executed a joint development agreement for the development of *Prestige Alecto*, one of our Completed Projects, only with the leaseholder of the underlying land and not with the owner. In the event that the lessee commits a default under the lease agreement, or for any other reason the leasehold right of the leaseholder is terminated, we will be unable to acquire an interest in or derive benefits from the project.

56. ***Our Promoters, members of the Promoter Group and other individuals/entities, together have a controlling interest in certain Associates and Group Entities because of which the control and operations in respect of such Associates or Group Entities may be adversely affected.***

Our Promoters, members of the Promoter Group and other individuals/entities, together have a controlling interest in our Associates namely Prestige Garden Constructions Private Limited, Babji Realtors Private Limited and Prestige Projects Private Limited, and in certain Group Entities namely Prestige Garden Resorts Private Limited and Cessna Garden Developers Private Limited. These Associates and Group Entities own lands, on some of which certain of our projects are being developed. We cannot assure you that our Promoters and members of our Promoter Group will act in our interest while exercising their rights in the said entities. Our inability to exercise control over entities which hold the lands on which certain of our projects are being constructed may result in delays or losses in relation to the construction of the said Projects which may in turn materially and adversely affect our business and results of operations.

57. ***Registered trademark over the name and logo “Prestige Group” in relation to certain goods in the nature of paper and printed material is held by our Promoter and members of our Promoter Group.***

We hold the registered trademark for the name and logo ‘Prestige Group’ for various classes of goods and services. However, the registered trademark for name and logo ‘Prestige Group’ in relation to certain goods in the nature of paper and printed materials is held by our Promoter and members of our Promoter Group. The use of the trademark in relation to these classes of goods has been licensed to us by our Promoter and members of our Promoter Group in terms of the licensing agreement dated December 30, 2005. In the event that the licensing agreement is terminated, we may have to discontinue the use of the name and logo ‘Prestige Group’.

58. ***We have entered into, and will continue to enter into, related party transactions.***

We have entered into transactions with several related parties, including our Promoters, Directors and Promoter Group entities. The transactions we have entered into and any future transactions with our related parties have involved or could potentially involve conflicts of interest. For more information regarding our related party transactions, see “Related Party Transactions” on page 242.

59. ***Conflicts of interest may arising out of common business objects shared by our Company and certain of our Promoter Group entities***

Our Promoters have interests in other companies and entities that may compete with us, including other entities in our Promoter Group that conduct businesses with operations that are similar to ours within

the real estate development industry. There is no requirement or undertaking made by the Promoters or other entities in our Promoter Group not to compete with our business. In addition, there is no requirement or undertaking for our Promoters, Promoter Group or such similar entities to conduct or direct any opportunities in the real estate industry only to or through us. As a result, conflicts of interest may arise in allocating or addressing business opportunities and strategies amongst our Company, our Promoters and other entities in our Promoter Group in circumstances where our interests differ from theirs. There can be no assurance that our Promoters or other entities in our Promoter Group will not compete with our existing business or any future business that we may undertake, nor that their interests will not conflict with ours.

60. ***Some of our agreements may have certain irregularities and some of our land may be affected by such irregularities, as a result of which our operations may be impaired.***

Some of the agreements and some of the land for our projects, which are either owned by us or taken on lease or over which we have development rights, may have one or more irregularities such as non-execution of conveyance deeds for transfer of property, inadequate stamping and/or non registration of deeds and agreements, non-execution of lease deeds and non-renewal of lease agreements. In the event of any such irregularity, we may not be able to enforce our right over such properties in case of a dispute.

61. ***Our business may suffer if we are unable to sustain the quality of our property management services.***

As part of our business, we provide property management services to our completed residential, commercial and retail developments. These services include, among others, security management, building maintenance and the operation of leisure facilities such as swimming pools and fitness centres. We believe that our property management services are an integral part of our business and are important to the successful marketing and promotion of our property developments. If owners of the projects that we have developed elect to discontinue the services provided by our property management subsidiary, our property management business would be adversely impacted, which in turn could adversely affect the attractiveness of our developments.

62. ***Any failure in our IT systems could adversely impact our business.***

Any delay in implementation or disruption of the functioning of our IT systems could disrupt our ability to track, record and analyze work in progress or causing loss of data and disruption to our operations, including an inability to assess the progress of our projects, process financial information or manage creditors/debtors or engage in normal business activities. This could have a material adverse effect on our business.

63. ***Certain of our Subsidiaries and Group Entities have incurred losses in the past.***

70. ***We will be controlled by our Promoters so long as they control a majority of our Equity Shares.***

After the completion of the Issue, our Promoters will control, directly or indirectly, in excess of [●]% of our outstanding Equity Shares. As a result, our Promoters will continue to exercise significant control over us, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other shareholders will be unable to affect the outcome of such voting. As a result, our Promoters may take or block actions with respect to our business, which may conflict with our interests or the interests of our minority shareholders, such as actions with respect to future capital raising or acquisitions. We cannot assure you that our Promoters will act to resolve any conflicts of interest in our favour.

71. ***We are subject to certain restrictions in relation to the land allotted to us by the Karnataka Industrial Areas Development Board.***

Two of our Subsidiaries have been allotted lands by the KIADB, pursuant to various allotment letters dated April 11, 2008, November 28, 2007, August 22, 2006 and January 4, 2007 and lease cum sale agreements dated January 2, 2008, March 14, 2007, June 4, 2009 and January 7, 2007, for an aggregate of approximately 30.06 acres of land in the Sarjapur-Marathalli area of Bangalore for the exclusive development of knowledge parks or business process outsource units. In terms of the said agreements we are prohibited from transferring 49% of the interest in the land. Further, in the event that we are not able to carry out such development for which purpose the allotments were made, the lease may be withdrawn. Upon completion of the initial period of the lease (ranging between six to eleven years) and upon the satisfaction of the terms of allotment letters and lease cum sale agreements, we may purchase such land. As of October 31, 2009, we had paid a total of Rs. 556.76 million towards these lands and are not required to pay any additional amounts towards these lands.

In addition, the lease agreement and the allotment letter relating to the land allotted by KIADB contains certain revocation clauses. In the event that we are not able to pursue developments on such land, the lease and the allotment of land to us may be withdrawn. Moreover, the KIADB has the right to re-enter and take the possession of these lands in the event that such land is not used for purpose for which it has been leased or allotted.

72. ***We receive certain tax benefits under the provisions of the Income Tax Act, which if withdrawn, may adversely affect our financial condition and results of operations***

Our business enjoys various tax benefits under the Income Tax Act, and is also expected to benefit from SEZ related tax benefits. Section 80-IB of the I.T. Act provides for deduction for income tax purposes of 100% of the profits from residential projects approved before the March 31, 2007 provided the area of each dwelling unit is not more than 1,000 sq. ft. in Delhi and Mumbai or within 25 kilometers of the municipal limits of these cities and 1,500 sq. ft. in rest of India. Our projects are customized, wherever feasible, to take advantage of the benefits provided by the said provisions of the I.T. Act.

The total amount of benefit derived by us under Section 80-IB of the I.T. Act was Rs 286.10 million, Rs. 94.00 million, Rs. 215.00 million and Rs. 35.88 million for the five months ended August 31, 2009, Fiscal 2009, Fiscal 2008 and Fiscal 2007, respectively, which constituted 33.47%, 9.12%, 27.20% and 5.91% of our profit before tax and extraordinary items. Section 80IAB of the I.T. Act provides for deductions in respect of profits and gains by an undertaking or enterprise engaged in development of SEZs provided that the project is notified under the Special Economic Zones Act, 2005, after April 1, 2005. A deduction of 100% of the profits and gains derived from the notified projects for a period of 10 consecutive years. The total amount of deductions claimed by us under Section 80IAB from our project

Cessna Business Park was Rs. 1.72 million in Fiscal 2008. In the event that similar benefits are no longer available to us due to any change in law or a change in the nature of our property developments, the effective tax rates payable by us will increase and consequently our financial condition may be adversely affected. For details, see the “Statement of Tax Benefits” on page 49.

73. ***We have experienced negative cash flows in five month period ended August 31, 2009 and in Fiscal 2007. Any negative cash flows in the future would adversely affect our results of operations and financial condition.***

We experienced a net decrease in cash and cash equivalents of Rs. 793.49 million for the five month period ended August 31, 2009 and 107.37 million in Fiscal 2007. Any negative cash flows in the future could adversely affect our results of operations and financial condition.

External Risks

1. ***The market value of an investor's investment may fluctuate due to the volatility of the Indian securities markets.***

Stock exchanges in India have in the past experienced substantial fluctuations in the prices of listed securities. The Sensex, BSE's benchmark index, reduced by more than 50%, representing approximately 10,700 points, in the calendar year 2008. The stock exchanges in India, in line with global developments, have witnessed substantial volatility in 2008 and continue to be volatile in 2009. The year-to-date percentage increase in Sensex as of September 30, 2009 stood at 53.26%, as compared to 2.86% decrease for Dow Jones Industrial Average, 28.78% increase for Hang Seng Index, and 31.54% for Strait Times Index (Singapore). However, as of June 29, 2009 100 day volatility of the Sensex as per Bloomberg data stood at a comparable figure of 42.91 relative to 31.55 for Dow Jones Industrial Average, 39.46 for the Hang Seng Index and 33.51 for Strait Times Index (Singapore).

The Indian Stock Exchanges have experienced temporary exchange closures, broker defaults, settlement delays and strikes by brokerage firm employees. In addition, the governing bodies of the Indian stock exchanges have from time to time imposed restrictions on trading in certain securities, limitations on price movements and margin requirements. Furthermore, from time to time, disputes have occurred between listed companies and stock exchanges and other regulatory bodies, which in some cases may have had a negative effect on market sentiment.

2. ***The extent and reliability of Indian infrastructure could adversely affect our results of operations and financial condition.***

India's physical infrastructure is less developed than that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our business operations, which could have an adverse effect on our results of operations and financial condition.

3. ***There may be less information available about the companies listed on the Indian securities markets compared with information that would be available if we were listed on securities markets in developed countries.***

There may be differences between the level of regulation and monitoring of the Indian securities markets and the activities of investors, brokers and other participants and that of the markets in the

United States and other more developed countries. SEBI is responsible for approving and improving disclosure and other regulatory standards for the Indian securities markets. SEBI has issued regulations and guidelines on disclosure requirements, insider trading and other matters. There may, however, be less publicly available information about companies listed on an Indian stock exchange compared with information that would be available if that company was listed on a securities market in a developed country

4. ***Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.***

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of its Equity Shares may be affected by interest rates, changes in government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The Government of India has in recent years sought to implement economic reforms and the current government has implemented policies and undertaken initiatives that continue the economic liberalization policies pursued by previous governments. There can be no assurance that liberalization policies will continue in the future. The rate of economic liberalization could change, and specific laws and policies affecting power or real estate sector, foreign investment and other matters affecting investment in our securities could change as well. The newly elected government may announce new policies or withdraw existing benefits, which may be applicable to our sector. Any significant change in such policies could adversely affect business and economic conditions in India, generally, and our results of operations and financial condition, in particular.

5. ***Natural calamities could have a negative impact on the Indian economy which may have an adverse affect on our business and results of operations.***

India has experienced floods, earthquakes, tsunamis, cyclones and droughts in recent years. Such natural catastrophes could disrupt our operations, production capabilities, distribution chains or damage its manufacturing facility. For example in December 2004, Southeast Asia, including the eastern coast of India, experienced a tsunami and in October 2005, the State of Jammu and Kashmir experienced an earthquake, both of which caused significant loss of life and property damage. We cannot assure the prospective investors that such events will not occur in the future or that our results of operations and financial condition will not be adversely affected.

6. ***Terrorist attacks, civil disturbances, regional conflicts and other acts of violence in India and abroad may disrupt or otherwise adversely affect our business and its profitability.***

Certain events that are beyond our control, such as terrorist attacks and other acts of violence or war, including those involving India, the United Kingdom, the United States or other countries, may adversely affect worldwide financial markets and could potentially lead to a severe economic recession, which could adversely affect our business, results of operations, financial condition and cash flows, and more generally, any of these events could lower confidence in India's economy. Southern Asia has, from time to time, experienced instances of civil unrest and political tensions and hostilities among neighbouring countries, including India, Pakistan and China. India recently witnessed a major terrorist attack in Mumbai on November 26, 2008, which led to an escalation of political tensions between India and Pakistan. Political tensions could create a perception that there is a risk of disruption of services provided by India-based companies, which could have an adverse effect on our business, future financial performance and price of the Shares. Furthermore, if India were to become engaged in armed hostilities, particularly hostilities that are protracted or involve the threat or use of nuclear weapons, our operations might be significantly affected.

India has from time to time experienced social and civil unrest and hostilities, including riots, regional conflicts and other acts of violence. Events of this nature in the future could have a material adverse effect on our ability to develop its business. As a result, our business, results of operations and financial condition may be adversely affected.

7. ***Significant differences exist between Indian GAAP and other accounting principles, such as US GAAP and IFRS, which may be material to investors' assessments of our Company's financial condition. Our failure to successfully adopt IFRS required effective April 2011 could have a material adverse effect on our stock price.***

Our financial statements, including the financial statements provided in this Draft Red Herring Prospectus, are prepared in accordance with Indian GAAP. We have not attempted to quantify the impact of IFRS or U.S. GAAP on the financial data included in this Draft Red Herring Prospectus, nor do we provide a reconciliation of our financial statements to those of U.S. GAAP or IFRS. U.S. GAAP and IFRS differ in significant respects from Indian GAAP. For details, see "Presentation of Financial Industry and Market Data". Accordingly, the degree to which the Indian GAAP financial statements included in this Draft Red Herring Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Red Herring Prospectus should accordingly be limited.

The Institute of Chartered Accountants of India, the accounting body that regulates the accounting firms in India, has announced a road map for the adoption of, and convergence with, the International Financial Reporting Standards, or IFRS, pursuant to which all public companies in India, such as our Company, will be required to prepare their annual and interim financial statements under IFRS beginning with Fiscal period commencing April 1, 2011. Because there is significant lack of clarity on the adoption of and convergence with IFRS and there is not yet a significant body of established practice on which to draw in forming judgments regarding its implementation and application, we have not determined with any degree of certainty the impact that such adoption will have on our financial reporting. There can be no assurance that our financial condition, results of operations, cash flows or changes in shareholders' equity will not appear materially worse under IFRS than under Indian GAAP. As we transition to IFRS reporting, we may encounter difficulties in the ongoing process of implementing and enhancing our management information systems. Moreover, there is increasing competition for the small number of IFRS-experienced accounting personnel available as more Indian companies begin to prepare IFRS financial statements. There can be no assurance that our adoption of IFRS will not adversely affect our reported results of operations or financial condition and any failure to successfully adopt IFRS by April 2011 could have a material adverse effect on our stock price.

8. ***Rights of shareholders under Indian law may be more limited than under the laws of other jurisdictions.***

Our articles of association, regulations of our board of Directors and Indian law govern our corporate affairs. Legal principles related to these matters and the validity of corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

9. ***Investors may not be able to enforce a judgment of a foreign court against us.***

We are a limited liability company incorporated under the laws of India. Substantially all of the directors and executive officers named herein are residents of India and a substantial portion of its assets and such persons are located in India. As a result, it may not be possible for investors to effect service of process upon us or such persons outside India or enforce judgments obtained against such parties outside India.

Recognition and enforcement of foreign judgment is provided for under Section 13 and Section 44A of the Civil Procedure Code on a statutory basis. Section 13 of the Civil Code provides that foreign judgments shall be conclusive regarding any matter directly adjudicated upon except: (i) where the judgment has not been pronounced by a court of competent jurisdiction; (ii) where the judgment has not been given on the merits of the case; (iii) where it appears on the face of the proceedings that the judgment is founded on an incorrect view of international law or refusal to recognise the law of India in cases to which such law is applicable; (iv) where the proceedings in which the judgment was obtained were opposed to natural justice; (v) where the judgment has been obtained by fraud; or (vi) where the judgment sustains a claim founded on a breach of any law then in force in India. Under the Civil Procedure Code, a court in India shall, upon the production of any document purporting to be a certified copy of a foreign judgment, presume that the judgment was pronounced by a court of competent jurisdiction, unless the contrary appears on record.

Section 44A of the Civil Code provides that where a foreign judgment has been rendered by a superior court, within the meaning of that Section, in any country or territory outside India which the Government has by notification declared to be in reciprocating territory, it may be enforced in India by proceedings in execution as if the judgment had been rendered by the relevant court in India. However, Section 44A of the Civil Code is applicable only to monetary decrees not being in the same nature of amounts payable in respect of taxes, other charges of a like nature or in respect of a fine or other penalties.

The United Kingdom, Singapore and Hong Kong have been declared by the Government to be a reciprocating territory for the purposes of Section 44A of the Civil Procedure Code. A judgment of a court of a country which is not a reciprocating territory may be enforced in India only by a suit upon the judgment under Section 13 of the Civil Procedure Code, and not by proceedings in execution. The suit must be brought in India within 3 years from the date of judgment in the same manner as any other suit filed to enforce a civil liability in India. It is unlikely that a court in India would award damages on the same basis as a foreign court if an action is brought in India. Furthermore, it is unlikely that an Indian Court would enforce foreign judgment if it viewed the amount of damages awarded as excessive or inconsistent with public policy. A party seeking to enforce a foreign judgment in India is required to obtain approval from the RBI to repatriate outside India any amount recovered and any such amount may be subject to income tax in accordance with applicable laws.

10. ***Any downgrading of India's debt rating by an international rating agency could have a negative impact on our business.***

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, its ability to obtain financing for capital expenditures and the trading price of the Equity Shares.

Risks Associated with the Equity Shares

1. ***The price of the Equity Shares may be highly volatile after the Issue.***

The price of the Equity Shares on the Indian stock exchanges may fluctuate after this Issue as a result of several factors, including: volatility in the Indian and global securities market; our operations and performance; performance of our competitors and the perception in the market about investments in the real estate industry; adverse media reports on us or the Indian real estate industry; changes in the estimates of our performance or recommendations by financial analysts; significant developments in India's economic liberalization and deregulation policies; and significant developments in India's fiscal and environmental regulations. There can be no assurance that the prices at which the Equity Shares are initially traded will correspond to the prices at which the Equity Shares will trade in the market subsequently.

2. ***Fluctuation in the exchange rate between the Rupee and the United States dollar could have a material adverse effect on the value of Equity Shares, independent of our operating results.***

The Equity Shares are quoted in Rupees on the BSE and the NSE. Any dividends in respect of the Equity Shares will be paid in Rupees and subsequently converted into US dollars for repatriation. Any adverse movement in exchange rates during the time it takes to undertake such conversion may reduce the net dividend to investors. In addition, any adverse movement in exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the net proceeds received by shareholders.

The exchange rate between the Rupee and the U.S. dollar has changed substantially in the last two decades and could fluctuate substantially in the future, which may have a material adverse effect on the value of the Equity Shares and returns from the Equity Shares, independent of our operating results.

3. ***You will not be able to immediately sell any of the Equity Shares you purchase in the Issue on an Indian Stock Exchange.***

The Equity Shares will be listed on the NSE and the BSE. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. Investors' book entry, or "demat", accounts with depository participants in India are expected to be credited within two working days of the date on which the basis of allotment is approved by NSE and BSE. Thereafter, upon receipt of final approval from the NSE and the BSE, trading in the Equity Shares is expected to commence within seven working days of the date on which the basis of allotment is approved by the Designated Stock Exchange. We cannot assure you that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time periods specified above.

4. ***Conditions in the Indian securities market may affect the price or liquidity of the Equity Shares.***

The Indian securities markets are smaller than securities markets in more developed economies. Indian stock exchanges have in the past experienced substantial fluctuations in the prices of listed securities. These exchanges have also experienced problems that have affected the market price and liquidity of the securities of Indian companies, such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading, limited price movements and restricted margin

requirements. Further, disputes have occurred on occasion between listed companies and the Indian stock exchanges and other regulatory bodies that, in some cases, have had a negative effect on market sentiment. If similar problems occur in the future, the market price and liquidity of the Equity Shares could be adversely affected.

5. ***Future issuances or sales of the Equity Shares could significantly affect the trading price of the Equity Shares.***

The future issuances of Equity Shares by us or the disposal of Equity Shares by any of the major shareholders or the perception that such issuance or sales may occur may significantly affect the trading price of the Equity Shares. There can be no assurance that we will not issue further Equity Shares or that the shareholders will not dispose of, pledge or otherwise encumber their Equity Shares.

6. ***There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the BSE and the NSE in a timely manner or at all and any trading closures at the BSE and the NSE may adversely affect the trading price of your Company's Equity Shares.***

In accordance with Indian law and practice, permission for listing of the Equity Shares will not be granted until after those Equity Shares have been issued and allotted. Approval requires all other relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the BSE and the NSE. Any failure or delay in obtaining the approval would restrict investors' ability to dispose of their Equity Shares.

The regulation and monitoring of Indian securities markets and the activities of investors, brokers and other participants differ, in some cases significantly, from those in Europe and the U.S. The BSE and the NSE have in the past experienced problems, including temporary exchange closures, broker defaults, settlements delays and strikes by brokerage firm employees, which, if continuing or recurring, could affect the market price and liquidity of the securities of Indian companies, including the Equity Shares, in both domestic and international markets. A closure of, or trading stoppage on, either of the BSE and the NSE could adversely affect the trading price of the Equity Shares.

7. ***There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.***

Subsequent to listing, our Company will be subject to a daily circuit breaker imposed on listed companies by all stock exchanges in India which does not allow transactions beyond certain volatility in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on our Company's circuit breaker is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges are not required to inform our Company of the percentage limit of the circuit breaker from time to time, and may change it without its knowledge. This circuit breaker would effectively limit the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, there can be no assurance regarding the ability of shareholders to sell the Equity Shares or the price at which shareholders may be able to sell their Equity Shares.

8. ***You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.***

Sale of Equity Shares by any holder may give rise to tax liability in India, as discussed in the "Taxation" in this Draft Red Herring Prospectus.

The Real Estate Sector in India

The real estate business involves the purchase, development and sale of land, including both residential and non-residential buildings. Real estate sector activities also encompass activities in the housing and construction sectors.

Historically, the real estate sector in India was unorganised and characterized by various factors that impeded organised dealing, such as the absence of a centralised title registry providing title guarantee, a lack of uniformity in local laws and their application, the non-availability of bank financing, high interest rates and transfer taxes and the lack of transparency in transaction values. In recent years however, the real estate sector in India has exhibited a trend towards greater organisation and transparency through various regulatory reforms.

The above trend has contributed to the development of reliable indicators of value and organised investment in the real estate sector by domestic and international financial institutions and has resulted in a greater availability of financing for real estate developers.

These trends have been reinforced by the substantial growth in the Indian economy, which stimulated demand for land and developed real estate. Demand for residential, commercial and retail real estate increased throughout India until the first half of 2008, accompanied by increased demand for hotel accommodation and improved infrastructure. Additionally, the tax and other benefits applicable to Special Economic Zones ("SEZs") are expected to result in a new source of demand.

Almost 80% of real estate developed in India is residential space. The remainder comprise offices, shopping malls, hotels and hospitals. According to the Tenth Five Year Plan of India, there is a shortage of 22.4 million dwelling units. (Source: India Brand Equity Foundation, www.ibef.org)

The real estate market in India had witnessed significant growth over the past few years, with average residential capital values more than doubling between 2005 and the first half of 2008. However, demand for

houses plummeted during the second half of 2008, as the global economic deceleration compelled investors to pull out of the market due to wealth erosion as well as the rising risk of negative returns. Home buyers also have had to put their purchasing plans on hold due to a fall in affordability levels and job-related uncertainties. Tightening of lending standards by banks and the slowing business environment also led to a liquidity crunch among real estate developers, who have been forced to offer discounts in order to attract buyers. Average residential capital values declined by 18-20% in March 2009 from the highs witnessed during the first half of 2008. (Source: *CRISIL Research: City Real(i)ty, 2009*) CRISIL Research expects investors to maintain a cautionary approach until capital values potentially stabilize in 2010.

Our Ongoing Projects include our flagship real estate development, *Prestige Shantiniketan*, a mixed-use township located in Whitefield, Bangalore. *Prestige Shantiniketan* is comprised of 14.62 million sq. ft. of Developable Area, across the residential (including 6.07 million sq. ft. of Saleable Area), commercial (including 4.42 million sq. ft. of Saleable Area) and retail (including 0.67 million sq. ft. of Leasable Area) real estate segments (the retail component of the project is classified as a Project Under Development, below).

We currently have twelve Projects Under Development, which comprise six residential projects with a Developable Area of 7.94 million sq. ft. (of which the Saleable Area is 6.01 million sq. ft.), two commercial projects with a Developable Area of 1.99 million sq. ft. (of which the Leasable Area is 1.12 million sq. ft.), two hospitality projects with a Developable Area of 1.13 million sq. ft. (which is equivalent to approximately 507

keys, and of which the Leasable Area is 1.13 million sq. ft.) and two retail projects with a Developable Area of 1.97 million sq. ft. (of which the Leasable Area is 0.90 million sq. ft.).

We currently have six Forthcoming Projects, which comprise two residential projects with a Developable Area of 0.74 million sq. ft. (of which the Saleable Area is 0.70 million sq. ft.), two commercial projects with a Developable Area of 2.35 million sq. ft. (of which the Saleable Area is 0.42 million sq. ft. and the Leasable Area is 0.51 million sq. ft.) and two retail projects with a Developable Area of 1.20 million sq. ft. (of which the Leasable Area is 0.61 million sq. ft.). At present we have no Forthcoming Projects for our hospitality business.

As part of our business model, we have access to a land bank, which consists of lands upon which there is no present development. As of October 31, 2009, our Land Bank aggregated approximately 250.61 acres. We believe that continuing to build our Land Bank is critical to our growth strategy and we intend to continue acquiring land in strategic locations across Bangalore and south India in order to maximise opportunities for projects in the future.

In our retail business, we have entered into a joint venture with CRIDF, an associate of CapitaMalls Asia. CapitaMalls Asia is one of the largest listed “pure-play” shopping mall owners, developers and managers in Asia by total property value of assets and by geographic reach, in terms of number of malls and cities. The joint venture is aimed at developing six retail projects (principally mall developments) with a total Developable Area of 5.61 million sq. ft. (of which the Leasable Area is 1.83 million sq. ft.) in south India, and pursuant to a framework agreement between our Company and CRIDF for the joint development of these projects. We have also entered into a joint venture with CapitaMalls Asia for the purpose of managing the retail malls developed by the joint venture with CRIDF.

While our real estate development business continues to be our primary focus, we also offer a variety of services through our real estate services business. This includes the provision of property management services for our commercial and residential developments, sub-leasing and fit-out services, project and construction management services, interior solutions services, mall management services (which includes the retail real estate projects that we complete pursuant to our joint ventures with CRIDF) and the operation of our hospitality projects.

Our consolidated total income for the five months ended August 31, 2009, Fiscal 2009, 2008 and 2007 was Rs. 4,378.49 million, Rs. 9,161.51 million, Rs. 9,892.65 million and Rs. 4,271.42 million, respectively.

The following map illustrates our geographic presence in cities across south India:

Our Competitive Strengths

A strong execution track record and capability

We have a proven execution track record across a diversified portfolio of real estate projects. As of September 30, 2009, we completed construction of 27.09 million sq. ft. of Developable Area across the residential, commercial, hospitality and retail segments of the real estate market in Bangalore. We believe that we have developed some of the most identifiable landmarks in Bangalore, including *Prestige Shantiniketan*, one of the largest integrated township development in Bangalore; *UB City*, one of the largest mixed-use development in Bangalore's Central Business District; *The Forum Mall* in Bangalore, which was named as *Most Admired Shopping Centre Of The Year: Retailer's Choice*, at the 2008 *India Retail Forum Awards*; *Cessna Business Park*, a dedicated IT / ITes SEZ development; and *Angsana Spa & Resort*, an exclusive 79-room resort in Bangalore. Our operations span different aspects of real estate development, including the identification of potential projects and the acquisition of land, project planning, design, construction management and project management. We have approximately 180 technically qualified personnel who oversee and execute many of the key aspects of real estate development, such as architecture, engineering, procurement and contracts and project management. We also leverage the expertise of external professionals such as architects, construction contractors, interior designers, landscape experts, building services consultants and advertising agencies. We place emphasis on cost management and rigorously monitor our projects to ensure that costs remain within the

budgeted amounts. To mitigate the risks related to cost and time overruns, we typically award different aspects of the construction of our projects to different contractors. In recognition of our process for the development of our projects, we received an ISO 9001:2000 certification for management processes in 2003, and were awarded the CRISIL DA1 rating in the years from 2003 to 2008, in recognition of the quality of our projects and for delivering Completed Projects to our customers on time. We currently have a DA2 rating.

A diversified portfolio of real estate projects

Our portfolio of Ongoing Projects, Projects Under Development and Forthcoming Projects is widely spread across the Bangalore area, and targets diverse categories (within the residential, commercial, hospitality and retail segments) and customer groups. We are also expanding our operations to include various cities across south India. We believe that the range of locations and product offerings that comprise our portfolio of Ongoing Projects, Projects Under Development and Forthcoming Projects will help provide us with stable cash flows over the near to medium term. Our projects are carefully planned and we conduct comprehensive market research and analysis of proposed projects to analyse absorption trends, competitive factors, market prices and product gaps. As a result, we are able to customize our product offerings to cater to customer and market demand in the particular location of the project.

The following table sets out our Ongoing Projects, Projects Under Development and Forthcoming Projects as a proportion of total Developable Area under Ongoing Projects, total Developable Area under Projects under Development and the total Developable Area under Forthcoming Projects, respectively, and total Saleable Area across our various real estate businesses as at September 30, 2009:

Strong brand name

We believe that we have established a reputable brand name in the real estate market in south India due to the distinctive design, planning, high quality execution and prompt delivery of our projects, in conjunction with a customer-focused sales and marketing capability. We believe that our strong and recognizable brand increases customer confidence in our projects and influences our customers' buying decisions.

Our attention to quality and commitment to timely delivery of our projects has resulted in us receiving various awards, which have served to enhance our brand and reputation. In addition to our CRISIL DA2 rating, we were awarded the *Best Real Estate Developer in India* award in 2005 by Euromoney, and our real estate projects have also won numerous awards and prizes (See: "Our Operations – Our Real Estate Development Business", below).

We believe that our strong brand name and reputation is evidenced by the fact that several of our residential projects have been pre-sold prior to the commencement of construction, such as *Prestige St. John's Wood*, *Prestige Ozone*, *Prestige Palms* and *Prestige Shantiniketan*.

Our partnership with CRIDF

In our retail business, we have entered into a joint venture with CRIDF, an associate of CapitaMalls Asia. CapitaMalls Asia is one of the largest listed "pure-play" shopping mall owners, developers and managers in Asia by total property value of assets and by geographic reach, in terms of number of malls and cities. Our joint ventures with CRIDF are aimed at developing retail projects in south India in cities such as Bangalore, Mysore, Mangalore, Hyderabad and Cochin. We estimate that the total Developable Area and Leasable Area under these joint venture projects will be approximately 5.61 sq. ft. and 1.83 million sq. ft., respectively. We have also entered into a joint venture with CapitaMalls Asia for the purpose of managing the retail malls developed by the joint venture with CRIDF.

We believe that these arrangements will blend CRIDF's and CapitaMalls Asia's expertise and experience in developing leading retail developments with our local knowledge and expertise. For more information on these joint venture agreements, see "History and Corporate Structure" on page 147.

Experienced management team

Our management team has three decades of experience in the Bangalore and south Indian real estate development market. Our staff of professionals cover a variety of disciplines, including finance, engineering, project management, architecture, accounting, marketing and sales. Our key management personnel have been employed by our Company for an average of 10 years. Our management has experience in identifying market trends, identifying strategic locations for land acquisition and new markets and potential sites for development and acquiring land and development rights, as well as in the design, engineering, construction management, supervision and marketing of projects. We believe that these strengths make us a preferred partner for joint ventures and joint developments in the real estate market in south India, and with leading international developers and investors such as CRIDF.

Strong client base

We have been able to successfully establish and nurture relationships with reputable commercial clients, for whom we have undertaken numerous developments. These include Cisco Systems (seven developments between 2000 and 2009, with a total Leasable Area of 1.85 million sq. ft.) and Reliance Industries (two developments between 2003 and 2007 with a total Leasable Area of 0.19 million sq. ft.). In addition, in the IT/ITeS market segment, we have completed projects for a leading technology company (five developments

between 2001 and 2005 with a total Leasable Area of 0.72 million sq. ft.), and a leading enterprise software company (five developments between 2002 and 2007 with a total Leasable Area of 0.87 million sq. ft.) We believe that our strong relationships with our clients provides with opportunities to undertake additional developments for those clients. In addition, we believe our significant client base minimises our dependence on any one client or group of clients.

Our Strategy

The key elements of our business strategy are:

Continue to expand and develop our Land Reserves

We believe that continuing to expand and develop our Land Reserves is critical to increasing our market penetration across the various market segments in which we operate. The time it takes to develop a project varies depending on a variety of factors, including the size of a project, and we aim to develop and sell our Land Reserves within a development time of 12 to 48 months from the time the acquisition of land is complete. Increasing our market share in the residential, commercial, hospitality and retail segments is central to our growth strategy and we intend to continue acquiring land at strategic locations in Bangalore and across south India. We believe that we have enhanced our Land Reserves by acquiring large and contiguous parcels of land at competitive costs, thereby allowing us to undertake large scale residential, commercial, hospitality and retail projects. We focus on geographic areas where we see capital appreciation opportunities by developing such projects for sale or lease in our market segments.

Diversify our revenue streams

We intend to diversify our revenues in two ways: first, we intend to develop a wide price range of apartments, corporate office space, integrated townships and mixed-use developments, hotels, malls, multiplexes and shopping complexes. We believe that by diversifying our project portfolio in this manner, we will be able to diversify the revenue sources from our real estate development business through both the sale of projects (primarily for residential and commercial developments) and the lease of projects (primarily for commercial and retail developments). Secondly, we intend to expand and grow the service offerings of our real estate services business by offering property management services, sub-leasing and fit-out services, project and construction management services, interior design services and mall management and facilities management services. Through diversifying our revenue sources, we intend to capitalize on the development opportunities generated by various sectors of the Indian economy. For instance, we believe that our joint ventures with CRIDF for the development of six malls across south India will not only enhance our revenue from Leasable Area in those mall developments, but will also increase the revenue from our mall management and facilities management services.

Expand our geographical presence in south India

Our real estate development activities have been focused in Bangalore, where we believe we are a leading real estate developer. We are in the process of geographically diversifying and expanding our real estate development business into the south Indian cities of Chennai, Cochin, Hyderabad, Mangalore and Mysore. Whilst we have Ongoing Projects, Projects Under Development, Forthcoming Projects and / or Land Bank in these cities, we intend to further develop apartments, corporate office space, townships, and malls and also undertake plotted developments.

Pursue our integration strategy

We intend to integrate our business and operations by further developing our in-house construction management, property management and interior design capabilities. We have recently acquired 75% of the share

capital of Team United, a construction company in south India, with the aim of developing an in-house capability to construct our own projects. Team United has already been integrated into our Company, and provides construction management services for our developments. Prestige Property Management and Services, our in-house property management division was established in 1996, and presently has approximately 1,400 employees which deal with all aspects of property management for our projects, including safety and security, cleaning, maintenance, landscaping and general facilities management. We believe that having a dedicated in-house property management team differentiates us from our competitors, who traditionally outsource the property management function, in that we are able to maintain stronger control over the quality and maintenance of our projects. Our in-house interior design division provides both customized and standardised interior design and construction services for our residential and commercial projects, and liaises with our clients, architects, consultants and suppliers to ensure that the interior design and fit-out of premises is in accordance with our clients' specifications, and remains within budget and timelines for those projects. Through this integration, we hope to set more efficient budgets and better control the timing of completion and quality standards of our various projects.

The price discovery is a function of demand at various prices. The highest price at which the issuer is able to issue the desired number of shares is the price at which the book cuts off, i.e., Rs. 22 in the above example. The Issuer, in consultation with the BRLMs, will finalise the issue price at or below such cut-off price, i.e., at or below Rs. 22. All bids at or above this issue price and cut-off bids are valid bids and are considered for allocation in the respective categories.

Steps to be taken by the Bidders for Bidding

1. Check eligibility for making a Bid (For further details see “Issue Procedure - Who Can Bid”) on page 424.
2. Ensure that you have a demat account and the demat account details are correctly mentioned in the Bid cum Application Form and the ASBA Bid cum Application Form.
3. Except for Bids on behalf of the Central or State Government and the officials appointed by the courts, for Bids of all values ensure that you have mentioned your PAN allotted under the I.T. Act in the Bid cum Application Form and the ASBA Bid cum Application Form (see “Issue Procedure – Permanent Account Number or PAN” on page 441).
4. Ensure that the Bid cum Application Form is duly completed as per instructions given in this Draft Red Herring Prospectus and in the Bid cum Application Form and the ASBA Bid cum Application Form.
5. Ensure the correctness of your demographic details (as defined in the “*Issue Procedure-Bidders Depository Account Details*” on page 435) given in the Bid cum Application Form and the ASBA Bid cum Application Form, with the details recorded with your Depository Participant.
6. Bids by QIBs (including Anchor Investors) will have to be submitted to the BRLMs.
7. Bids by ASBA Bidders will have to be submitted to the designated branches of the SCSBs. ASBA Bidders should ensure that their bank accounts have adequate credit balance at the time of submission to the SCSB to ensure that the ASBA Bid cum Application Form is not rejected.

The Company, in consultation with the BRLMs, reserves the right not to proceed with the Issue. In such an event the Company would issue a public notice in the newspapers, in which the pre-Issue advertisements were published, within two days of the Bid/ Issue Closing Date, providing reasons for not proceeding with the Issue. The Company shall also inform the same to Stock Exchanges on which the Equity Shares are proposed to be listed.

If such Bids are not uploaded, the Company, the BRLMs, and the Syndicate Members shall not be responsible. Bids will be accepted only on Business Days, i.e. Monday to Friday (excluding any public holiday).

Any revision in the Price Band and the revised Bidding Period, if applicable, will be widely disseminated by notification to the Stock Exchanges, by issuing a press release, and also by indicating the change on the web site of the BRLMs, and at the terminals of the members of the Syndicate.

The Indian Economy

India is the world's largest democracy in terms of population (approximately 1.16 billion people) as at July 2009 with a GDP of approximately US\$3,267 billion in 2008. This makes it the fourth largest economy in the world in terms of GDP after the United States of America, China and Japan. (Source: CIA World Factbook)

The following table sets forth the key indicators of the Indian economy for the past five Fiscal years.

<i>(Annual percentage change, except for foreign exchange reserves)</i>					
As at and for the year ended March 31					
	2005	2006	2007	2008	2009

As of March 31, 2009					

(Source: Economic Survey 2008-2009, RBI, Central Statistical Organization, Ministry of Statistics and Programme Implementation)

As shown in the above table, India has experienced rapid economic growth over the past five Fiscal years. However, economic activity in India slowed down in the first two quarters of Fiscal 2009 as compared with over 9% growth in the previous three years. Growth decelerated sharply in third quarter following the failure of Lehman Brothers in mid-September 2008 and adverse effects of the global financial crisis on the Indian economy. Consequently, the growth rate during the first three quarters (April – December) of 2008-09 slowed down to 6.9% from 9% in the corresponding period of the previous year (see table below). The advance estimates of the Central Statistical Organization released in February 2009 have placed the real GDP growth for 2008-09 at 7.1%. (Source: RBI Annual Policy Statement 2009-10).

(Source: Reserve Bank of India Annual Policy Statement 2009-10)

Since 1991, successive Governments have pushed through comprehensive reforms across the policy spectrum in the areas of fiscal and industrial policy, trade and finance. Some of the key reform measures are:

- **Industrial Policy Reforms:** Removal of capacity licensing and opening up most sectors to Foreign Direct Investment ("FDI");
- **Trade Policy Reforms:** Lowering of import tariffs across industries, minimal restrictions on imports; and
- **Monetary Policy and Financial Sector Reforms:** Lowering interest rates, relaxation of restrictions on fund movement and the introduction of private participation in insurance sector.

An important factor in the growth of the services sector has been the strong growth of the information technology ("IT") and information technology enabled services ("ITeS") sectors. These sectors benefited from the growing international trend towards off-shoring and the resultant demand for skilled, low cost, English speaking workers. Indian competitiveness in this area has been aided by substantial investment in telecommunications and infrastructure and the phased liberalisation of the Indian economy.

In addition, FDI has been recognised as one of the important drivers of economic growth in the country. The Government of India has taken a number of steps to encourage and facilitate FDI, and FDI is allowed in many key sectors of the economy, such as manufacturing, services and infrastructure. For many sub-sectors, 100% FDI is allowed on an automatic basis, without prior approval from the Government of India. FDI and Foreign Institutional Investment ("FII") inflows have increased significantly over the recent past with total net foreign capital inflows increasing to US\$ 23.4 billion in Fiscal 2006 from US\$ 8.3 billion in Fiscal 2001. However, investment flow through the FII route in the first three months of the Fiscal 2010 has been US\$ 6,269 million. FII investments for the first six months of 2009 was US\$ 5,026 million, including a record single day net purchase of US\$ 1,062 million on May 20, 2009. *(Source: SEBI Database, Reserve Bank of India - Macroeconomic and Monetary Developments - Third Quarter Review 2008-09)*

The Real Estate Sector in India

The real estate business involves the purchase, development and sale of land, including both residential and non-residential buildings. Real estate sector activities also encompass activities in the housing and construction sectors.

Historically, the real estate sector in India was unorganised and characterized by various factors that impeded organised dealing, such as the absence of a centralised title registry providing title guarantee, a lack of uniformity in local laws and their application, the non-availability of bank financing, high interest rates and

transfer taxes and the lack of transparency in transaction values. In recent years however, the real estate sector in India has exhibited a trend towards greater organisation and transparency through various regulatory reforms.

The above trend has contributed to the development of reliable indicators of value and organised investment in the real estate sector by domestic and international financial institutions and has resulted in a greater availability of financing for real estate developers.

These trends have been reinforced by the substantial growth in the Indian economy, which stimulated demand for land and developed real estate. Demand for residential, commercial and retail real estate increased throughout India until the first half of 2008, accompanied by increased demand for hotel accommodation and improved infrastructure. Additionally, the tax and other benefits applicable to Special Economic Zones ("SEZs") are expected to result in a new source of demand.

Almost 80% of real estate developed in India is residential space. The remainder comprise offices, shopping malls, hotels and hospitals. According to the Tenth Five Year Plan of India, there is a shortage of 22.4 million dwelling units. (Source: India Brand Equity Foundation, www.ibef.org)

The real estate market in India had witnessed significant growth over the past few years, with average residential capital values more than doubling between 2005 and the first half of 2008. However, demand for houses plummeted during the second half of 2008, as the global economic deceleration compelled investors to pull out of the market due to wealth erosion as well as the rising risk of negative returns. Home buyers also have had to put their purchasing plans on hold due to a fall in affordability levels and job-related uncertainties. Tightening of lending standards by banks and the slowing business environment also led to a liquidity crunch among real estate developers, who have been forced to offer discounts in order to attract buyers. Average residential capital values declined by 18-20% in March 2009 from the highs witnessed during the first half of 2008. (Source: CRISIL Research: City Real(i)ty, 2009) CRISIL Research expects investors to maintain a cautionary approach until capital values potentially stabilize in 2010.

Key Characteristics of the Real Estate Sector

The Indian real estate sector has traditionally been dominated by a number of small regional or local players with low levels of expertise. The sector has seen limited inflow of institutional capital and has used high net-worth individuals and other informal sources of financing as the major source of funding, leading to low levels of transparency. This is rapidly changing as the sector is experiencing higher growth rates and significantly improved quality expectations as India becomes more integrated with the global economy.

The growth witnessed by the Indian real estate sector is mainly influenced by the high GDP growth of India, increased urbanization, improving demographics, as well as growth across various sectors such as IT / ITeS, retail, consumer durables, automobiles, telecommunications, banking, insurance, tourism, hospitality and logistics.

Some of the key characteristics of the Indian real estate sector are:

- ***Highly fragmented market dominated by regional players*** – Rapid growth in the last decade has seen the emergence of larger players that have differentiated themselves through superior execution and branding. Further, these players are now able to capitalize on their "early mover" advantage with higher market share, but remain confined to local or regional markets. While the larger regional players are now initiating efforts to develop a broader geographic presence, their home markets continue to generate the majority of their profitability;
- ***Local know-how is a critical success factor in the development phase*** – One of the key reasons for the emergence of local developers is the critical importance of local knowledge and relationships in ensuring

successful and timely development of real estate projects. Property is a State-governed subject in India and the rules and regulations that affect, among other things, approval processes and transaction costs, vary from State to State;

- **High transaction costs** – The real estate sector has traditionally been burdened with high transaction costs as a result of stamp duty on transfers of title to property, which varies from State to State. Though efforts are being made at the State-level to reduce the stamp duties, they continue to be as high as 11% in certain states; and
- **Enhanced role of mortgage financing** – Over the last five years, a significant portion of new acquisitions, particularly in the larger cities in India, have been financed through banks and financial institutions. This has been aided by a sharp decline in interest rates and broad availability of financing products, due to aggressive marketing and product development by financial institutions.

Reforms in the Real Estate Sector

In recent years various reforms have been initiated at the National- and State-level which have led to greater organization and transparency in the real estate sector. These include:

- support from the Government of India for the repeal of the Urban Land Ceiling Act (introduced in 1976), with nine State Governments having already repealed the Act. The law was repealed by the Central Government in 1999. However, as land is principally subject to State law, the law is still in force in some large Indian states like Andhra Pradesh, Assam, Bihar and West Bengal;
- modifications in the rent control statutes to provide greater protection to homeowners wishing to rent out their properties;
- the rationalisation of property taxes in a number of States;
- the proposed conversion of land records into electronic form; and
- FDI being permitted in the real estate sector, subject to certain conditions.

Key Segments in Real Estate Industry

The Residential Segment

The growth in the residential real estate market in India up to the first half of 2008 had been largely driven by increased urbanization (see diagram below) and nuclearization, rising disposable incomes, a rapidly growing middle class and youth population (see diagram below), low interest rates, fiscal incentives on both interest and principal payments for housing loans and heightened customer expectations. The residential sector accounts for approximately 80% of the total real estate sector in the country. (Source: India Brand Equity Foundation, www.ibef.org)

A large proportion of the demand for residential developments, especially in urban centres such as Mumbai, Bangalore, Delhi (Gurgaon and Noida) and Pune, is likely to be for high-rise residential buildings. Since this is a fairly new segment, we expect the growth of the high-rise segment to be faster than the growth of more traditional urban housing segments.

Cushman & Wakefield Research estimates that pan-Indian demand for residential housing will be over approximately 7.5 million units by 2013, across all categories including Economically Weaker Sections ("EWS"), affordable, mid- and luxury segments. They further estimate that residential demand for the top seven Indian cities will be approximately 4.5 million units by 2013. Of the total expected demand across India, 43% is likely to be generated by in Tier I cities such as Bangalore, Mumbai and NCR. Whilst it is estimated that Mumbai will have the highest cumulative demand, Cushman & Wakefield Research believe that Hyderabad and Bangalore are likely to have the highest compounded annual growth of 14% in the next five years. The affordable and mid-segments of the market are likely to constitute 85% of the total residential demand, and will be the primary focus of most developers. (*Source: Cushman & Wakefield: Survival to Revival, 2009*)

The Commercial Segment

The commercial real estate market in India has evolved in response to a number of changes in the business environment. The IT / ITeS and Business Process Outsourcing sectors have been the principal drivers of commercial real estate demand in the country. The large space requirements of the IT/ ITeS sector have led to real estate growth spreading beyond the central business district to the suburban and peripheral locations of major cities. Further, a strong domestic economy together with aggressive corporate expansion plans have led to healthy demand from sectors such as banking, financial services and insurance, as well as media and entertainment.

Over the past five years, locations such as Bangalore, Gurgaon, Hyderabad, Chennai, Kolkata and Pune have evolved and have established themselves as emerging business destinations, which are increasingly competing for commercial real estate occupancy with the traditional business destinations of Mumbai and Delhi. The key to the growth of these locations has been the ability of these cities to provide the necessary human resource base with the required skill sets, competitive business environment, operating cost advantages and urban infrastructure.

Commercial real estate demand is essentially driven by the performance of the economy, infrastructure developments and State-level policies to encourage investment.

Cushman & Wakefield Research estimates that demand for commercial office space will reach 196 million sq. ft. by 2013, with seven major cities, including Bangalore, Chennai, Hyderabad, Kolkata, Mumbai, NCR and Pune accounting for approximately 80% of the demand. Whilst Hyderabad, Pune and Kolkata is expected to witness the highest compounded annual growth rate of approximately 28%, Bangalore is likely to have the highest cumulative demand of 34 million sq. ft. between 2009 and 2013, followed by Chennai. This is seen as being due to renewed interest in these cities from the corporate sector following the economic crisis. (Source: Cushman & Wakefield: *Survival to Revival*, 2009)

The following diagrams illustrate the estimated demand for commercial office space across India, for the years 2009 – 2013:

CRISIL Research expects average lease rentals to decrease by about 38 per cent by the end of 2009 from the peaks which occurred during the first six months of 2008 due to a weak demand scenario. Demand deteriorated due to the slowdown in both the global and domestic economies, with most corporate enterprises looking to cut costs and improve efficiencies. For instance, CRISIL Research expects the IT / ITeS sectors to increase utilisation rates of existing commercial space by increasing the number of shifts.

(Source: CRISIL Research: City Real(i)ty, 2009)

The following diagram illustrates the rental growth index for Tier I cities since 2009:

Source: Cushman & Wakefield Research

Over the medium term, the further liberalization of the economy is expected to lead to a broader occupier base. The supply of commercial office space is expected to remain concentrated in the suburban areas in the form of IT Parks and integrated campuses. A large supply of commercial space is also expected from SEZs over the next few years. (Source: India Brand Equity Foundation, www.ibef.org)

Retail Segment

The increase in disposable incomes, demographic changes (such as the increasing number of working women, the rising number of nuclear families and higher income levels within the urban population), the change in the perception of branded products, the growth in retail malls, the entry of international players and the availability of relatively cheaper finance are expected drive the growth in "organized retail" (which refers to retail operations undertaken by licensed retail outlets such as chain stores and large retail outlets, as opposed to "unorganized retail", which refers to more traditional forms of retailing such as *kirana*, *paan / beedi* shops and informal outlets prevalent in market places, and owner-operated general stores and convenience stores). The demand drivers for retail space in a city typically include demographics, such as resident consumer age profile, dominant consumer occupation and spending capacity, in addition to macro-policy decisions, such as allowing FDI in single brand retailing and cash-and-carry formats.

Cushman & Wakefield Research estimates that cumulative demand for retail space across India will reach 43 million sq. ft. by 2013, of which the top seven cities in India are likely to account for nearly 34.6 million sq. ft. This demand is expected to be concentrated in Tier I cities, which will constitute approximately 46% of the total estimated pan-Indian demand between 2009 and 2013. Pune is expected to record the highest compound annual growth (due to the current limited stock of operational malls and favourable demographic profile within Pune), whilst Bangalore, Mumbai and NCR are expected to experience the highest demand, together comprising approximately 20 million sq. ft. of retail space. According to the Investment Commission of India, as cited by Cushman & Wakefield Research, the share of organised retail is expected to grow from 5% to 15.5% by 2016,

which highlights the potential for pan Indian expansion amongst retailers. (Source: Cushman & Wakefield: *Survival to Revival*, 2009)

In addition to the demand factors above and estimates of Cushman & Wakefield Research, several policy initiatives (such as 51% FDI in single brand retailing) and the on-going policy debate to allow 100% FDI in organized retailing (in both single and multiple brands) also hold promise for the Indian retail industry. IBEF believes that the organised retail sector can attain a higher annual growth rate and it is expected to contribute 10% of total sales by 2010. Several national and international corporates have either made a foray into the retail segment or have firm plans to enter the retail segment. (Source: India Brand Equity Foundation, www.ibef.org)

The Hospitality Segment

The increase of disposable income in the hands of an upwardly mobile Indian middle class has led to a growing propensity to spend a larger portion of income on tours and travel. This factor, coupled with the changing lifestyle of the Indian population, has created a demand for quality hotels across India. In addition, India is also emerging as a major destination for global tourism and business travel, which in turn is increasing the demand for hotels across India. This increasing demand for hotels across India is offering another opportunity for real estate development.

According to the *Travel and Tourism Competitiveness Report 2009* by the World Economic Forum, the contribution of travel and tourism to GDP is expected to be approximately 6% in 2009 and the real GDP growth for the travel and tourism sector is expected to be at 0.2% in 2009 with the potential of an increase to an average of 7.7% per annum over the next 10 years. (Source: Cushman & Wakefield: *Survival to Revival*, 2009).

According to Cushman & Wakefield Research, the pan-Indian accommodated demand for the hospitality sector is estimated to be over 690,000 room nights by 2013. Tier I cities are likely to drive the demand in the hospitality segment, led by the NCR, which is estimated to constitute 15% of the total demand by 2013, followed by Mumbai at 14%. The upcoming Commonwealth Games in 2010 is one of the main demand drivers for room nights in the NCR. However, Bangalore is expected to register the highest CAGR of demand at

approximately 26%, followed by the NCR at 24% and Pune at 23%. (Source: Cushman & Wakefield: *Survival to Revival*, 2009)

The following diagrams illustrate the estimated demand for room nights across India, and in the seven major cities, for the years 2009 – 2013:

Source: Cushman & Wakefield Research

Source: Cushman & Wakefield Research

Tier II and III cities are also likely to generate demand for approximately 242,000 room nights by 2013 owing to various initiatives taken by the Indian government to promote commercial and tourism activity in those locations. (Source: Cushman & Wakefield: *Survival to Revival*, 2009)

As per the World Travel and Tourism Council ("**WTTC**"), India's travel and tourism industry is estimated to grow from \$91.74 billion in 2009 to \$153.41 billion in 2013. (Source: www.wttc.org)

SEZs

SEZs are specifically delineated duty free enclaves deemed to be foreign territories for the purposes of Indian custom controls, duties and tariffs. There are three main types of SEZs: integrated SEZs, which may consist of a number of industries; services SEZs, which may operate across a range of defined services; and sector specific SEZs, which focus on one particular industry. SEZs, by virtue of their size, are expected to be a significant new source of real estate demand.

As of November 18, 2008, there were 531 SEZs approved and 270 SEZs notified that cover a total area of 31,405 ha across India. 270 notified SEZs have already invested Rs. 834.5 billion on infrastructural facilities and directly employed approximately 110,000 people as of September 2008. (Source: *Ministry of Commerce and Industry - Department of Commerce*)

The majority of investments in SEZs are expected to come from the private sector.

Challenges Facing the Indian Real Estate Sector

Lack of national reach of existing players

There are currently very few real estate companies in India who can claim to have operations throughout the country. Most real estate developers in India are regionally based and active in areas where the conditions are most familiar to them. This is due to factors such as:

- the differing tastes of customers in different regions;
- difficulties with respect to large scale land acquisition in unfamiliar locations;
- an absence of business infrastructure to market projects in new locations;
- large number of approvals which must be obtained from different authorities at various stages of construction under local laws; and
- long development period of projects.

Fragmented land holding

Land ownership in India is usually fragmented between multiple owners and therefore there is a low availability of large contiguous land parcels with a single owner. This leads to reduced availability of land with clear title.

Majority of market belonging to unorganised segment

The Indian real estate sector is highly fragmented with many small builders and contractors, who account for a majority of the housing units constructed. As a result, there is less transparency in dealings or sharing of data between developers.

Legal and regulatory issues

The legal and regulatory framework in India for land acquisition is complex, and inconsistent and overlapping state and national government laws lead to further complications and delays.

Demand dependent on many factors

Real estate developers face challenges in generating demand for projects. The factors that influence a customer's choice of property is not restricted to quality alone, but is dependent on a number of other external factors, including proximity to urban areas and amenities such as schools, roads and water supply, each of which is often beyond the developer's control. Demand for housing units is also influenced by policy decisions relating to housing incentives, such as the government's income tax policies.

Increasing raw material prices

Construction activities are often funded by the purchaser, who makes cash advances at different stages of construction. In other words, the final amount of revenue from a project is pre-determined and the realization of this revenue is scattered across the period of construction. A significant challenge that real estate developers face is dealing with adverse movements in cost. The real estate sector is dependent on a number of components such as cement, steel, bricks, wood, sand, gravel and paints. As the revenues from sale of units are predetermined, adverse changes in the price of any raw material directly affect the profitability of the developers.

Interest rates

One of the main drivers of the growth in demand for housing units is the availability of finance for consumers and real estate developers at low rates of interest. Interest rates increased between 2004 and 2008, however, interest rates have reduced recently and most leading financial institutions have recently reduced the rates which they charge on housing loans.

Valuation

Valuation of land is one of the key areas of concern in India. Currently India has no independent appraiser body that can meet international standards in the same way as those set by other international appraisers.

Tax incentives

The existing tax incentives available for housing loans are one of the major factors influencing demand. However, these tax incentives are likely to be withdrawn based on the recommendations of various committees and panels. The Kelkar Panel has recommended phasing out the income tax deduction available on the interest payable on housing loans for owner-occupied houses.

The Bangalore Real Estate Market

Bangalore is the capital city of the state of Karnataka in south India, and is India's third most populous city and the fifth most populous urban area. Its current population is estimated to be approximately 6.1 million people. The Bangalore Metropolitan Area ("BMA") is an urban area covering approximately 439 square kilometres, with a green belt of approximately 839 square kilometres. The BMA is covered by the Comprehensive Development Plan ("CDP") of the Bangalore Development Authority, and covers a local planning area of approximately 1,307 square kilometres, consisting of the Bangalore Mahanagara Palike ("BMP"), seven municipal councils ("CMCs"), one town municipal council and 387 villages.

The following table sets out basic facts about the BMA:

<i>Basic facts</i>	
Particulars	Details
Population (2001)	6.1 million
Area (2001)	1,307 sq. kms

Population density	4,667 persons per sq. km
Literacy rates (2001)	87.0%
Length of metro line	33 kms
Floor space index (residential)	1.75-3.25
Floor space index (commercial)	1.5-3.25
Stamp duty on property cost	6.7% + Registration fee of 1%

Area and population

Bangalore spreads out in all directions and along all major roads in the absence of natural boundaries. Major roads such as Mysore Road, Old Madras Road, Bellary Road, Hosur Road and Tumkur Road are the axes of a radial road system which converges on the city centre. Five other secondary roads, Magadi Road, Kanakpura Road, Bannerghatta Road, Varthur Road and Whitefield Road also form part of this system. Commercial and industrial development occurs along all of these major roads, with residential and retail development taking place in the intermediate areas.

Areas such as Whitefield (in the north east), Hosur Road (in the south east) and Electronic City (south) are highly urbanised. The rapid pace of urbanisation in these areas is driven by the following industrial factors:

- the services sector in the south and east;
- the Peenya Industrial Estate in the west; and
- Bengaluru International Airport in the north.

This is evidenced by the population density of CMC KR Puram, located in the vicinity of Whitefield, which is 9,342 people per square kilometre, and is the highest population density amongst all seven CMCs. Furthermore, and owing to the high rates of land utilisation, the population density of the BMP at 19,023 people per square kilometre is higher compared to the average population density at CMC level, at 4,667 people per square kilometre.

According to the census conducted in 2001, the population of the non-BMP areas had risen at a CAGR of 8.5% between 1991 and 2001, compared to the CAGR of 4.1% for the entire city. (*Source: CRISIL Research: City Real(i)ty, 2009*)

Industries in the BMA

Bangalore is the sixth largest city in India, with numerous public sector industries, software companies, aerospace companies, textile industries and IT / ITeS and biotechnology companies based in the city. Various public sector manufacturing companies are headquartered in Bangalore, including Hindustan Aeronautics Limited, National Aerospace Laboratories, Bharat Heavy Electricals Limited, Bharat Electronics Limited, Bharat Earth Movers Limited and Hindustan Machine Tools Limited. In addition, the Indian Research Space Organisation was established by the Department of Science in June 1972, and is based in Bangalore.

CRISIL Research has concluded that the creation of employment has led to a significant increase in the migrant population of Bangalore.

Known as the "Silicon Valley" of India, Bangalore's IT / ITeS industry makes a prominent contribution to the Indian economy. The IT / ITeS industry in Bangalore is found in three main clusters, namely

- Software Technology Parks of India;

- International Technology Park, Bangalore; and
- Electronic City (where Infosys and Wipro are based, together with many global SEI-CMM Level-5 companies).

Another sector which is exhibiting repaid growth in Bangalore is biotechnology, with Biocon (according to CRISIL Research, India's leading biotechnology company) based in Bangalore.

Aside from the IT / ITeS and biotechnology industries, Bangalore also houses many other small-scale industries. However, and according to CRISIL Research, the manufacturing and services sectors are the largest contributors to economic growth in the city. We believe this is as a result of the Karnataka State's Industrial Policy (2006-2011), which has focussed on strengthening the manufacturing sector, increasing national exports from Karnataka and promoting a diversified industrial base in Karnataka, and specifically in Bangalore.

As such, CRISIL Research views the significant concentration of small and medium enterprises in diversified sectors across the city as being an important feature of economic activity in Bangalore. Wholesale and retail activities (such as silk, garment and jewellery manufacturing) are mainly conducted in areas such as Chickpet, Cubbonpet, Binnypet, Cottonpet and Srirampur in the north west of the city. The main commercial hub for banks, corporate head offices and hotels is the area around MG Road, in the city centre. The industrial profile of the BMA is dominated by basic metal and alloy industries, metal products and parts, machinery and machine tools, rubber and plastic industries, jute textiles, cotton textiles and leather and leather products. (*Source: CRISIL Research: City Real(i)ty, 2009*)

Infrastructure

Planned and ongoing infrastructure development is also growing in the BMA, alongside the population and industrial growth trends discussed above. Some examples of ongoing infrastructure development are as follows –

- *Metro rail project:* the first phase of the Bangalore Metro, consisting of two corridors of electrified double lines, will be 33 km long (an east-west corridor of 18.10 km, and a north-south corridor of 14.90 km). Of the 33 km, 6.76 km will be underground. There will be 32 stations in Phase I, with more to be added in Phase II. The corridors are expected to provide proper interchange facilities for areas such as Old Madras Road, CMH Road, Ulsoor Road, MG Road, Magadi Road, KR Road, Lalbagh and Jayangar. In addition, a Commuter Railway System has been proposed, which would integrate the Metro mass rapid transit system with the existing commuter railway system.
- *New international airport:* the new Bengaluru International Airport commenced operations on May 23, 2008, and is expected to serve approximately 11.4 million passengers per annum, as compared to the five million passengers per annum that the former airport at Indirangar did. CRISIL Research indicates that it is already the fourth busiest airport in India. Ongoing improvements include planning for a high-speed rail link between the city and the airport, as well as additional flyovers, elevated roads and bridges at intersections and bottlenecks in the road infrastructure (the NH7).
- *Road transportation:* CRISIL Research indicates that road traffic in Bangalore has increased by 600% in the last 25 years. As such, and in order to manage this increase in road traffic, the BMP proposes to develop and upgrade the existing road transportation infrastructure, include an elevated core ring road of 29.5 km, and outer ring road of 62 km, an intermediate ring road of 188 km, a peripheral ring road of 114 km and a satellite township ring road connecting the outlying areas of Bangalore.
- *Water supply and sanitation:* The Bangalore Water Supply and Sewage Board ("BWSSB"), initially only responsible for the BMP area, has now assumed responsibility for water and sanitation for the

entire BMA area. The BWSSB is planning projects to upgrade access and quality of water supply and sanitation services in the BMA area.

Analysis of Bangalore's Key Residential and Commercial Micro-Markets

Cushman & Wakefield Research have identified the following key micro-markets in the Bangalore real estate market, being North and North East Bangalore (the key micro-market for residential developments) and Outer Ring Road – Hebbal to Sarjapur (the key micro-market for commercial developments) (Source: Cushman & Wakefield: Survival to Revival, 2009).

Residential – North and North East Bangalore

Cushman & Wakefield Research considers locations in this micro-market (including Hebbal, Yelahanka, Sahakarnagar, Jakkur, Coffee Board Layout, Banaswadi, Off Kempapura Road, Amruthahalli, Hennur Road and Thanisandra Road) to be favourable investment opportunities. With growing commercial development in the Outer Ring Road stretch, we believe there is increasing demand for residential development in the above-mentioned locations. The total stock of residential development in this micro-market is estimated at approximately 6,500 units, the majority of which have been purchased, and 7,000 to 8,000 units is expected to be added to this stock in the next three to four years (and in the mid-segment of the market). The demand for residential units in Bangalore is expected to be approximately 500,000 units over the next few years, and a significant share thereof is expected to be provided for in this micro-market.

(Source: Cushman & Wakefield: Survival to Revival, 2009)

The physical infrastructure in this micro-market is considered to be favourable, and include close proximity to the new Bengaluru International Airport. In addition to the close proximity to educational institutions and hospitals in the area, approximately 1.5 million sq. ft. of retail space is planned in this micro-market over the next three to five years. (Source: Cushman & Wakefield: Survival to Revival, 2009)

The average current capital values for the mid-segment is Rs. 2,800 to Rs. 4,000 per sq. ft., while the higher end of the market is in the range of Rs. 5,500 to 7,000 per sq. ft. (Source: Cushman & Wakefield: Survival to Revival, 2009)

The following diagram illustrates the capital value growth index for residential developments in key micro-markets across India:

Source: Cushman & Wakefield Research
Commercial – Outer Ring Road – Hebbal Sarjapur

The Outer Ring Road stretch from Hebbal to Sarjapur is an established commercial destination with key IT/ITeS companies such as IBM, Intel, Accenture and Cisco located there, and which micro-market has witnessed significant growth in the last three to four years. (Source: Cushman & Wakefield: *Survival to Revival*, 2009)

The current amount of leased stock in this micro-market is approximately 15 million sq. ft. There has also been an increasing amount of absorption in this micro-market since 2006, with an average annual growth rate of 12%. As indicated above, demand for office space in Bangalore in the next five years is expected to reach approximately 34 million sq. ft. in spite of weak demand in 2009-10, and Bangalore as a whole is likely to see increased activity thereafter. In 2008, this micro-market was responsible for approximately 48% of Bangalore's total absorption and it is expected to continue to attract interest from corporate entities. Most of the prominent real estate developers in Bangalore have a their land banks in this area, and approximately 8-10 million sq. ft. of commercial office space has been planned for the next three to five years.

The land along the Marathalli-Hebbal stretch of the Outer Ring Road has undergone a price correction of approximately 10-15% over the last year, and is currently valued at approximately Rs. 120-180 million per acre, which enhances the affordability of this micro-market. (of which the Leasable Area is 0.61 million sq. ft.). At present we have no Forthcoming Projects for our hospitality business.

As part of our business model, we have access to a land bank, which consists of lands upon which there is no present development. As of October 31, 2009, our Land Bank aggregated approximately 250.61 acres. We believe that continuing to build our Land Bank is critical to our growth strategy and we intend to continue acquiring land in strategic locations across Bangalore and south India in order to maximise opportunities for projects in the future.

In our retail business, we have entered into a joint venture with CRIDF, an associate of CapitaMalls Asia. CapitaMalls Asia is one of the largest listed “pure-play” shopping mall owners, developers and managers in Asia by total property value of assets and by geographic reach, in terms of number of malls and cities. The joint venture is aimed at developing six retail projects (principally mall developments) with a total Developable Area of 5.61 million sq. ft. (of which the Leasable Area is 1.83 million sq. ft.) in south India, and pursuant to a framework agreement between our Company and CRIDF for the joint development of these projects. We have also entered into a joint venture with CapitaMalls Asia for the purpose of managing the retail malls developed by the joint venture with CRIDF.

While our real estate development business continues to be our primary focus, we also offer a variety of services through our real estate services business. This includes the provision of property management services for our commercial and residential developments, sub-leasing and fit-out services, project and construction management services, interior solutions services, mall management services (which includes the retail real estate projects that we complete pursuant to our joint ventures with CRIDF) and the operation of our hospitality projects.

Our consolidated total income for the five months ended August 31, 2009, Fiscal 2009, 2008 and 2007 was Rs. 4,378.49 million, Rs. 9,161.51 million, Rs. 9,892.65 million and Rs. 4,271.42 million, respectively.

The following map illustrates our geographic presence in cities across south India:

Our Competitive Strengths

A strong execution track record and capability

We have a proven execution track record across a diversified portfolio of real estate projects. As of September 30, 2009, we completed construction of 27.09 million sq. ft. of Developable Area across the residential, commercial, hospitality and retail segments of the real estate market in Bangalore. We believe that we have developed some of the most identifiable landmarks in Bangalore, including *Prestige Shantiniketan*, one of the largest integrated township development in Bangalore; *UB City*, one of the largest mixed-use development in Bangalore's Central Business District; *The Forum Mall* in Bangalore, which was named as *Most Admired Shopping Centre Of The Year: Retailer's Choice*, at the 2008 *India Retail Forum Awards*; *Cessna Business Park*, a dedicated IT / ITes SEZ development; and *Angsana Spa & Resort*, an exclusive 79-room resort in Bangalore. Our operations span different aspects of real estate development, including the identification of potential projects and the acquisition of land, project planning, design, construction management and project management. We have approximately 180 technically qualified personnel who oversee and execute many of the key aspects of real estate development, such as architecture, engineering, procurement and contracts and project management. We also leverage the expertise of external professionals such as architects, construction contractors, interior designers, landscape experts, building services consultants and advertising agencies. We place emphasis on cost management and rigorously monitor our projects to ensure that costs remain within the

budgeted amounts. To mitigate the risks related to cost and time overruns, we typically award different aspects of the construction of our projects to different contractors. In recognition of our process for the development of our projects, we received an ISO 9001:2000 certification for management processes in 2003, and were awarded the CRISIL DA1 rating in the years from 2003 to 2008, in recognition of the quality of our projects and for delivering Completed Projects to our customers on time. We currently have a DA2 rating.

A diversified portfolio of real estate projects

Our portfolio of Ongoing Projects, Projects Under Development and Forthcoming Projects is widely spread across the Bangalore area, and targets diverse categories (within the residential, commercial, hospitality and retail segments) and customer groups. We are also expanding our operations to include various cities across south India. We believe that the range of locations and product offerings that comprise our portfolio of Ongoing Projects, Projects Under Development and Forthcoming Projects will help provide us with stable cash flows over the near to medium term. Our projects are carefully planned and we conduct comprehensive market research and analysis of proposed projects to analyse absorption trends, competitive factors, market prices and product gaps. As a result, we are able to customize our product offerings to cater to customer and market demand in the particular location of the project.

The following table sets out our Ongoing Projects, Projects Under Development and Forthcoming Projects as a proportion of total Developable Area under Ongoing Projects, total Developable Area under Projects under Development and the total Developable Area under Forthcoming Projects, respectively, and total Saleable Area across our various real estate businesses as at September 30, 2009:

Strong brand name

We believe that we have established a reputable brand name in the real estate market in south India due to the distinctive design, planning, high quality execution and prompt delivery of our projects, in conjunction with a customer-focused sales and marketing capability. We believe that our strong and recognizable brand increases customer confidence in our projects and influences our customers' buying decisions.

Our attention to quality and commitment to timely delivery of our projects has resulted in us receiving various awards, which have served to enhance our brand and reputation. In addition to our CRISIL DA2 rating, we were awarded the *Best Real Estate Developer in India* award in 2005 by Euromoney, and our real estate projects have also won numerous awards and prizes (See: "Our Operations – Our Real Estate Development Business", below).

We believe that our strong brand name and reputation is evidenced by the fact that several of our residential projects have been pre-sold prior to the commencement of construction, such as *Prestige St. John's Wood*, *Prestige Ozone*, *Prestige Palms* and *Prestige Shantiniketan*.

Our partnership with CRIDF

In our retail business, we have entered into a joint venture with CRIDF, an associate of CapitaMalls Asia. CapitaMalls Asia is one of the largest listed "pure-play" shopping mall owners, developers and managers in Asia by total property value of assets and by geographic reach, in terms of number of malls and cities. Our joint ventures with CRIDF are aimed at developing retail projects in south India in cities such as Bangalore, Mysore, Mangalore, Hyderabad and Cochin. We estimate that the total Developable Area and Leasable Area under these joint venture projects will be approximately 5.61 sq. ft. and 1.83 million sq. ft., respectively. We have also entered into a joint venture with CapitaMalls Asia for the purpose of managing the retail malls developed by the joint venture with CRIDF.

We believe that these arrangements will blend CRIDF's and CapitaMalls Asia's expertise and experience in developing leading retail developments with our local knowledge and expertise. For more information on these joint venture agreements, see "History and Corporate Structure" on page 147.

Experienced management team

Our management team has three decades of experience in the Bangalore and south Indian real estate development market. Our staff of professionals cover a variety of disciplines, including finance, engineering, project management, architecture, accounting, marketing and sales. Our key management personnel have been employed by our Company for an average of 10 years. Our management has experience in identifying market trends, identifying strategic locations for land acquisition and new markets and potential sites for development and acquiring land and development rights, as well as in the design, engineering, construction management, supervision and marketing of projects. We believe that these strengths make us a preferred partner for joint ventures and joint developments in the real estate market in south India, and with leading international developers and investors such as CRIDF.

Strong client base

We have been able to successfully establish and nurture relationships with reputable commercial clients, for whom we have undertaken numerous developments. These include Cisco Systems (seven developments between 2000 and 2009, with a total Leasable Area of 1.85 million sq. ft.) and Reliance Industries (two developments between 2003 and 2007 with a total Leasable Area of 0.19 million sq. ft.). In addition, in the IT/ITeS market segment, we have completed projects for a leading technology company (five developments

between 2001 and 2005 with a total Leasable Area of 0.72 million sq. ft.), and a leading enterprise software company (five developments between 2002 and 2007 with a total Leasable Area of 0.87 million sq. ft.) We believe that our strong relationships with our clients provides with opportunities to undertake additional developments for those clients. In addition, we believe our significant client base minimises our dependence on any one client or group of clients.

Our Strategy

The key elements of our business strategy are:

Continue to expand and develop our Land Reserves

We believe that continuing to expand and develop our Land Reserves is critical to increasing our market penetration across the various market segments in which we operate. The time it takes to develop a project varies depending on a variety of factors, including the size of a project, and we aim to develop and sell our Land Reserves within a development time of 12 to 48 months from the time the acquisition of land is complete. Increasing our market share in the residential, commercial, hospitality and retail segments is central to our growth strategy and we intend to continue acquiring land at strategic locations in Bangalore and across south India. We believe that we have enhanced our Land Reserves by acquiring large and contiguous parcels of land at competitive costs, thereby allowing us to undertake large scale residential, commercial, hospitality and retail projects. We focus on geographic areas where we see capital appreciation opportunities by developing such projects for sale or lease in our market segments.

Diversify our revenue streams

We intend to diversify our revenues in two ways: first, we intend to develop a wide price range of apartments, corporate office space, integrated townships and mixed-use developments, hotels, malls, multiplexes and shopping complexes. We believe that by diversifying our project portfolio in this manner, we will be able to diversify the revenue sources from our real estate development business through both the sale of projects (primarily for residential and commercial developments) and the lease of projects (primarily for commercial and retail developments). Secondly, we intend to expand and grow the service offerings of our real estate services business by offering property management services, sub-leasing and fit-out services, project and construction management services, interior design services and mall management and facilities management services. Through diversifying our revenue sources, we intend to capitalize on the development opportunities generated by various sectors of the Indian economy. For instance, we believe that our joint ventures with CRIDF for the development of six malls across south India will not only enhance our revenue from Leasable Area in those mall developments, but will also increase the revenue from our mall management and facilities management services.

Expand our geographical presence in south India

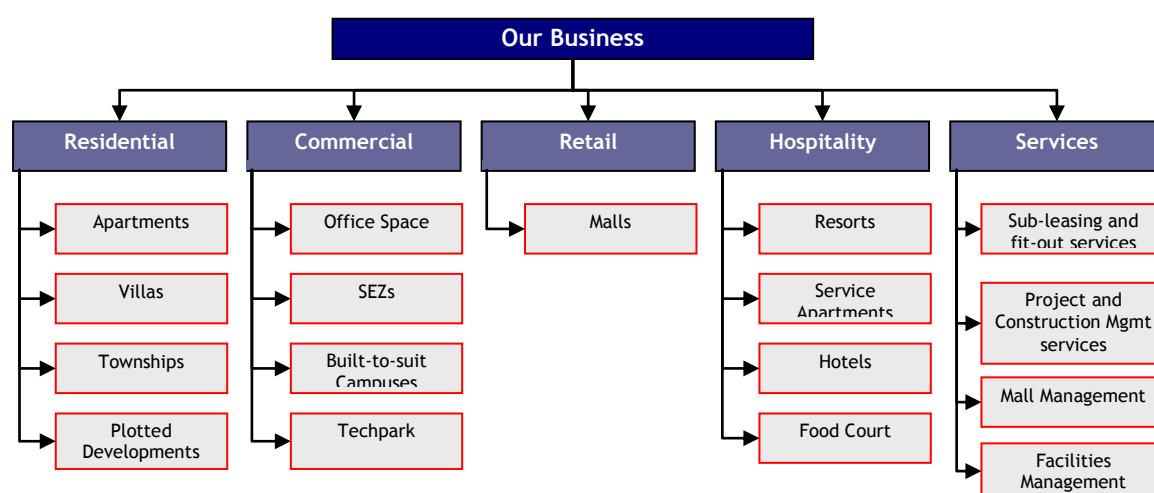

Our real estate development activities have been focused in Bangalore, where we believe we are a leading real estate developer. We are in the process of geographically diversifying and expanding our real estate development business into the south Indian cities of Chennai, Cochin, Hyderabad, Mangalore and Mysore. Whilst we have Ongoing Projects, Projects Under Development, Forthcoming Projects and / or Land Bank in these cities, we intend to further develop apartments, corporate office space, townships, and malls and also undertake plotted developments.

Pursue our integration strategy

We intend to integrate our business and operations by further developing our in-house construction management, property management and interior design capabilities. We have recently acquired 75% of the share

capital of Team United, a construction company in south India, with the aim of developing an in-house capability to construct our own projects. Team United has already been integrated into our Company, and provides construction management services for our developments. Prestige Property Management and Services, our in-house property management division was established in 1996, and presently has approximately 1,400 employees which deal with all aspects of property management for our projects, including safety and security, cleaning, maintenance, landscaping and general facilities management. We believe that having a dedicated in-house property management team differentiates us from our competitors, who traditionally outsource the property management function, in that we are able to maintain stronger control over the quality and maintenance of our projects. Our in-house interior design division provides both customized and standardised interior design and construction services for our residential and commercial projects, and liaises with our clients, architects, consultants and suppliers to ensure that the interior design and fit-out of premises is in accordance with our clients' specifications, and remains within budget and timelines for those projects. Through this integration, we hope to set more efficient budgets and better control the timing of completion and quality standards of our various projects.

Our Operations

Our business is divided into two main segments, namely –

- Our Real Estate Development Business, which is our principal business and focuses on real estate development projects in the residential (including plotted developments), commercial (including built-to-suit developments), hospitality and retail segments of the real estate industry. In addition, we generate revenues from leasing commercial, hospitality and retail space; and
- Our Real Estate Services Business, which focuses on property management services for our real estate developments, sub-leasing and fit-out services, project and construction management services and mall management and facilities management (including the operation of our hospitality business) services.

Our Real Estate Development Business

Our real estate activities focus on the development of four principal types of real estate projects under the registered brand name, *Prestige*, namely –

- *Residential Projects:* such as apartments, villas, townships and plotted developments;

- *Commercial Projects:* such as corporate office blocks, SEZs, technology parks, and built-to-suit facilities;
- *Hospitality Projects:* such as hotels, resorts, spas and serviced apartments; and
- *Retail Projects:* such as malls.

The following table represents the aggregate Developable Area, Saleable Area and Leasable Area of our Completed Projects, Ongoing Projects, Projects Under Development and Forthcoming Projects in each of our four types of real estate projects, as of September 30, 2009:

Our Residential Business

We develop a wide range of residential projects, from luxury apartments and villas to townships, focussing on the middle and upper income segments of the residential property market in south India. We make concerted efforts to ensure that our residential projects reflect what we believe to be innovative designs and modern architectural styles. As such, each of our residential projects differ from each other according to aesthetic features, location, design and specification, and are in some instances, such as *Prestige Exotica*, incorporated into a larger development (such as townships) that may include additional amenities such as gymnasiums, gardens, pools and recreational facilities. We generate revenue from our residential projects through the sale of residential units. In addition, we also supervise the construction of and sell plotted developments, which comprises building amenities such as internal roads, electricity supply, sanitation facilities and water supply for residential projects.

Our residential business projects comprised approximately 43% of all Developable Area of our real estate developments as of September 30, 2009. We have developed 15 Completed Projects in the residential sector in south India in the last five years, and have 10 Ongoing Projects, six Projects Under Development and two Forthcoming Projects for our residential business.

Set forth below is a brief description of two notable Completed Projects of our residential business in the last five years:

- *Prestige Ozone* – is an exclusive 281 unit gated-community located in Whitefield, Bangalore, and was completed in March 2006. A distinctive feature of this development is its master planning, which has focussed on open spaces (which includes one large park and open spaces distributed throughout the project area), landscaped areas and a common design theme for all units in the project. The project benefits from a clubhouse with recreational facilities, a restaurant and an Angsana Spa. In addition, the project includes a play area, party area, swimming pool, amphitheatre and central leisure facilities which house a gym, billiards room, tennis courts, health club, card room, library, coffee shop and lounge. The project is targeted at customers in the upper income segment of the residential market, with a client profile comprised of senior executives of companies and the business community. All units in this project were sold by launch.
- *Prestige Exotica* – is a luxury 46-unit condominium development situated on Cunningham Road, in the Central Business District of Bangalore, and was completed in August 2004. This exclusive development has been extensively landscaped according to detailed specifications. The 46 units are housed in two towers, with two units on each floor of each tower. In addition to the provision of exclusive visitors lobbies, we believe that this enhances the privacy for residents of the project. A distinctive feature of the project is that each of the towers are positioned in such a manner that each apartment has an unobstructed view of the surroundings. In addition, the apartments benefit from large living and dining rooms. The size of the apartments range from 3,025 sq. ft to 4,500 sq. ft. The facilities and amenities provided include a clubhouse (managed by our hospitality business – see "-Our Real Estate Services Business – Hospitality Operations", below), pool and party area. The client profile of this project is the high income segment of the market.

We have won numerous awards for the Completed Projects of our residential business, including the following

- *Best High Rise Development* – awarded to us at the 2008 *CNBC Asia Pacific Property Awards* for *Prestige Exotica*;
- *Best Architecture (Multiple Units)* – awarded to us at the 2008 *CNBC Asia Pacific Property Awards* for *Prestige Acropolis*, a residential development consisting of 286 luxury apartments completed in January 2000.

The following map illustrates the locations of our residential Ongoing Projects in Bangalore:

Set forth below is a description of two of the notable Ongoing Projects of our residential business:

- Prestige Neptune's Courtyard* –is a marina condominium development situated on Marine Drive, Cochin. The development consists of 366 apartments housed in seven towers of 17-floors each. The apartments have views of the Backwaters, the Arabian Sea and Kochi. The project has been designed utilising what we believe to be modern architectural techniques, and we have retained CPG, Singapore, as the architects for the development. We have sought to add features which we believe to be novel to the Cochin residential market, and by reference to the location of the project. The project benefits from a waterfront promenade and observation deck, a club house, swimming pools, ponds, an amphitheatre and a barbeque area. Other features of the development include reception areas for each tower and a 'Sky Club' on the 13th floor of each tower which houses a lounge, party hall and small theatre. The project consists of three- and four-bedroom apartments (from 2,099 sq. ft. three-bedroom apartments and 2,895 sq. ft. four-bedroom apartments), duplexes and triplexes (ranging from 2,744 sq. ft. to 4,706 sq. ft. four-bedroom duplexes and 9,543 sq. ft. to 11,877 sq. ft. five-bedroom triplexes). The triplex units will benefit from individual facilities such as private pools, Jacuzzi's and decks. 63% of the development has been pre-sold and construction is at an advance stage. The project is targeted at the upper income segment of the market.
- Prestige South Ridge* –will be a condominium development situated in Banashankari, which we believe to be a preferred location in South Bangalore. The property is situated in close proximity to the Ring Road, the Bangalore-Mysore Highway and the NICE expressway, which provides easy access to other parts of the city. The development consists of 264 of apartments housed in five towers: two towers of 16-floors each, two towers of 15-floors each and one tower of four floors, each with views of Bangalore. Only 18% of the site has been utilized for construction, with the remainder being set aside for landscaping. Each of the five towers has been placed on the periphery of the development, in order to maximise the views from the apartments and the daylight which they receive, and have been positioned so that none of the views are obstructed from the living rooms, dining rooms and balconies. The project will benefit from amenities such as a club house, health club, party hall, landscaped spaces and swimming pools. The project consists of two-, three- and four-bedroom apartments, ranging from 1,365 sq. ft. for a two-bedroom apartment to 2,981 sq. ft. for a four-bedroom apartment. 74% of the development has been pre-sold.

⁵ We have entered into a joint development agreement for the development of this project with the leaseholder of the underlying land. However, the land owner of the underlying land is yet to execute a sale agreement in terms of which the land is sold to the leaseholder. Only after this takes place will we be entitled to transact with and / or develop our interest in the land under and in terms of the joint development agreement.

⁶ We have recently increased our shareholding from 15% to 35% in this project. We have been appointed as exclusive project managers for the project and provide project management and consultancy services.

Set forth below is a brief description of two notable Completed Projects of our commercial business in the last five years:

- *UB City* - is a mixed-use development located at the corner of Vittal Mallya Road and Kasturba Road, in Bangalore's Central Business District. Comprised of four medium and high rise towers, we believe that it was one of the first developments in Bangalore to combine commercial office space, a luxury mall, serviced residences, restaurants, food courts and cafes in one location. *Concorde*, *Canberra* and *UB Tower* comprise the office blocks. The *Concorde* and *Canberra* towers house corporate entities such as 3M India Limited, Toyota Kirloskar Motor Private Limited, Tata Motors Limited and CDC Software India Private Limited. All commercial units in *UB City* have been sold or leased. The ground, first and second floors of the *Concorde* and *Canberra* towers have been designed as a luxury retail zone and branded as *UB City – The Collection*, and houses a number of international retail brands. The podium level of the towers offers an array of dining options, including specialty restaurants and lounge bars. The 12-floor *Comet Tower* houses the *Oakwood Premier Prestige Bangalore*, a 177-room premium serviced residence facility (See "Our Hospitality Business – Our Completed Projects", below).
- *Prestige Technology Park* – is a commercial office space and technology park development located on the Sarjapur - Marathalli Outer Ring Road, located in close proximity to a number of prominent software companies, businesses, retail and entertainment centres and residential developments. The project houses a number of domestic and international corporate entities, such as Nokia India Private Limited, Pharmarc Analytic Solutions Private Limited, Altair Engineering India Private Limited, Magma Design Automation India Private Limited, Madura Coats Private Limited and Yodlee Infotech Private Limited. The project was developed in two phases. The first phase was the built-to-suit corporate office space and technology park development comprised of two blocks. These blocks were built-to-suit according to the requirements and specifications of JP Morgan Chase. The second phase was comprised of three office blocks, interconnected through sky bridges at various levels of the blocks. These buildings have been designed to optimise efficient use, with a services core located on one side of each floor. A key design feature of the blocks are their façades, which are comprised of a structurally glazed system using a combination of glass and aluminium composite panel which maximizes the reception of daylight into the building. The project benefits from infrastructure facilities such as centralized air-conditioning system, 100% power back-up and approximately 1,900 car parks, including a multi-level car park. The buildings are serviced by a four lane driveway around the project, and has a two lane service road leading to the Sarjapur – Marathalli Outer Ring Road. The project also benefits from amenities such as a club house, which will house a food court, health club and swimming pool. A dedicated property management team provides a 24-hour support services for this development. All units have been sold or leased.

We have won numerous awards for the Completed Projects of our commercial business, including the following –

- *Best Developer – Retail Award (mixed-use category)* – awarded to us at the 2007 *Cityscape Real Estate Excellence Awards* for *UB City*;
- *Outstanding Concrete Structure of Karnataka* – awarded to us at the 2008 *Indian Concrete Institute Birla Super Endowment Awards* for *UB City*; and

Our Real Estate Services Business

Property Management Services

Our property management services are provided through our subsidiary, Prestige Property Management Service Private Limited. The key focus of our property management services is to maintain the quality of our developments after their completion.

Our property management services have a workforce of approximately 1,400 full-time employees who are assigned to specific developments that we maintain. We believe that having a dedicated property management and services team on site for each of the projects we maintain allows us to deliver a higher standard of service to our clients.

Our property management services teams are responsible for the provision of maintenance and management services such as safety and security, cleaning, general maintenance, civil and electrical maintenance, landscaping and gardening, swimming pool and health club maintenance and general facilities management, which includes the operation and maintenance of facilities such as power distribution, back-up power generation, central air-conditioning, water supply, drainage pumping, janitorial services, parking management, pest control, fire detection and solid waste disposal and management. We have also recently begun offering rental and re-sale services to our clients, and which is aimed at assisting buyers of our real estate developments

in renting out their apartments or villas. We are expanding our capacity to be able to provide this service on a larger scale.

We offer a range of flexible billing options to our client, from fixed-rate billing to cost-plus billing alternatives. In addition, we also offer pre-agreed service levels on a range of the property management services that we provided, and our clients have the option of choosing either a 'bundle' of services, as above, or individual services on a stand-alone basis.

We currently provide property management services to 45 commercial properties (which includes retail space), with a total of 5.98 million sq. ft. of built up space under management. In the residential sector, we provide property management services to 55 properties, with a total of 6.03 million sq. ft. of built up space under management. We also undertake park management services for the *Cessna Business Park SEZ*.

With the completion of a number of major developments including *Prestige Shantiniketan*, *Prestige Dynasty*, *Prestige Notting Hill*, *Prestige South Ridge* and *Prestige Exora*, we expect to add a total of 32.02 million sq. ft. of built space to our property management portfolio by 2014. We also hope to begin offering our property management services to clients outside of our real estate development business in future.

Sub-Leasing and Fit-Out Services

Our typical model for the provision of sub-leasing and fit-out services is as follows:

- Our real estate business develops a commercial project, which is then sold to investors in commercial property projects;
- In a sub-lease and fit-out transaction, these investors will lease the acquired commercial project back to us, on arm's-length commercial terms after we identify a tenant for the property which will utilise it as the ultimate user;
- Our interior solutions team (See " – *Interior Solutions Services – Commercial Interiors*", below) conducts a fit-out, which is typically comprised of the installation of all fixtures and fittings required by the ultimate user of the commercial property; and
- Once the fit-out is complete, the project is then sub-leased to a commercial end-user who takes occupation of the property accordingly.

We generate revenues from our sub-leasing and fit-out services through the charging of fees for the fit-out (See " – *Interior Solutions Services*", below) as well as a profit on the difference in rentals between the sub-lease to the commercial end-user and lease-back transaction from the investor.

Project and Construction Management Services

Our project and construction management services business specialises in providing project management and construction execution services to corporate and commercial clients who seek to construct built-to-suit projects (being developments that are customized to the specifications of the client) or interiors on a contractual basis, and which we do not retain ownership of, for sale or lease (as is the case for projects in our commercial real estate development business).

Our project and construction management team provides the following services:

- project managing the development by acting as the single point of contact for the client in completing the project, with an emphasis on ensuring completion of the project on time and within budget;
- procuring all requisite statutory approvals for the project; and

- managing the entire construction process, including consulting with the client on the design and specifications of the project, sourcing, negotiating and awarding supply and construction contracts, ensuring compliance by construction contractors with pre-agreed standards of construction and ultimately ensuring hand-over of the project to the client.

In conducting such a 'contractual' project for a client, we typically enter into an agreement with the client with sets out our responsibilities and the fee structure. We generate revenues from our project and construction services through these professional fees.

We are also able to sell available parcels of land from our Land Reserves to clients, on the condition that we retain the right to develop the land on their behalf on a "cost-plus" basis. For each of these contractual projects we have a senior business development executive and project head that negotiate and finalize such transactions. The delivery team consists of the engineers, and an administrative support team deals with procurement and contractor- and government-liaison.

A number of the projects completed by our project and construction management services business in the last five years are set out in the table under "*Our Real Estate Development Business – Our Commercial Business – Our Completed Projects-Commercial*", above.

Interior Solutions Services

Our interior solutions services business provides customized interior design and construction solutions for the customers of our commercial and residential development business. We have a dedicated interior solutions team which is responsible for project managing any interior design and construction, with an emphasis on ensuring completion of the interiors on time (ordinarily by the time the project is handed-over to the client) and within the budget stipulated by the client. As at September 30, 2009, we had conducted interior design and construction for approximately 2.07 million sq. ft. of residential space and 670 apartments.

Our interior solutions team provides the following services in conducting the interior solutions services business:

- consulting with the client, and in conjunction with our sales team or leasing team, as the case may be (See "*Sales and Marketing*", below), ascertaining the interior design requirements and specifications of the client;
- coordinating with the client, architects, consultants and interior vendors to ensure that the interior design and construction is on time and within budget; and
- remaining in continued contact with the client to ensure that any required modifications or repairs are dealt with.

Residential Interiors

We have provided this service in a number of our residential developments to date, including *Prestige Shantiniketan*, *Prestige Wellington Park* and *Prestige Kensington Gardens*, and we intend to provide interior solutions for our future residential developments. Our interior solutions service for residential developments comprises providing clients with a number of standardised options for the interior design and fittings of their apartment or villa. In turn, we have numerous vendor relationships which supply our interior solutions business with the fixtures, fittings and materials required to implement the interior option that our client has chosen. We co-ordinate with our residential real estate development business to ensure that the interior is completed and in place at the time that the residential unit is handed over to the clients.

Commercial Interiors

We typically develop and lease commercial space on a "bare shell" basis, and where a client for such development requires a commercial fit-out (i.e.: customization of the interior of the premises for the specific commercial operations and requirements of that client), we will provide such services through our interior solutions services. Ordinarily, our commercial leasing team (See "*Sales and Marketing – Our Leasing Team*", below) will liaise with a commercial client where a fit-out is required, and our interior solutions team will then implement the fit-out on the basis of agreed designs and specifications which are prepared by our interior solutions team, in conjunction with our leasing team, and in accordance with the requirements of the client. We ensure that any costs incurred for such a fit-out undertaken for a commercial lessor is secured by way of lock-in leases for a minimum period of two to five years so as to ensure minimum cash flows from the project. We also provide this service to purchasers of our commercial real estate developments, and similarly in conjunction with our sales team (See "*Sales and Marketing – Our Sales Team*", below).

We generate revenues from our interior solutions services business through the charging of professional fees for the services performed.

Mall Management Services

Our mall management management services were initially established to provide mall management services to *The Forum* in Koramangala, our first retail development. Our mall management services are now undertaken as part of our joint venture with CapitaMalls Asia (See "*Our Joint Venture with CapitaMalls Asia*", below). Whilst we offer property management services (See "*Property Management Services*", above), we also believe that managing public spaces, such as a mall, have distinct and specialised property management requirements.

Our mall management business provides the following services:

- general maintenance of our mall;
- creating footfalls by initiating and conducting special events, festivals and promotions in our malls;
- managing relations with our mall tenants and conducting studies of retail market trends and customer preferences;
- designing and reviewing tenant and trade mixes for current and upcoming retail developments of our retail real estate development business;
- managing and monitoring revenue sharing arrangements with our tenants (See "*Our Operations – Our Real Estate Development Business – Our Retail Business*", above);
- identifying potential tenants, and negotiating and finalising the commercial terms of the retail leases with our tenants;
- ensuring compliance with applicable laws, renewals of required permits and insurance; and
- providing reports on footfalls, buying patterns and general retail trends to our Promoters.

We generate revenues from our mall management business through the charging of fees for the maintenance and services provided to our tenants, as above.

Hospitality Operations

We develop our hospitality projects in the cities where we are carry out our real estate development operations. Our hospitality business comprises managing and operating serviced accommodation, hotels, convention centres, resorts and spas, food courts (in our retail developments) and club houses (in our residential developments). We outsource the management and technical direction of our hospitality projects to leading international chains. This outsourcing is done pursuant to an operating, marketing and technical services

agreement pursuant to which the operator is paid a management fee (which is typically an escalating percentage of gross revenue from the business) for the operation of the hospitality development.

Our current hospitality operations are as follows:

- *Prestige Oasis Angsana Spa & Resort* – a 79-room spa and resort in north Bangalore; and
- *Oakwood Premier Prestige* – a 177-room serviced accommodation operation in *UB City* in the Bangalore Central Business District, which is managed by Oakwood International pursuant to an operating, marketing and technical services agreement;
- *Transit Food Courts* - Our subsidiary company, Prestige Leisure Resorts Private Limited., owns the *Transit* brand, which operates and manages food courts in the malls developed as part of our retail development business. *Transit* has a presence in *The Forum Mall*, Koramangala, and *The Forum Value Mall*, Whitefield. We intend to have *Transit* food courts in our future retail developments, and we are also actively seeking out opportunities in other large commercial developments and developments (whether developed by us or third parties);
- *Club House* - we manage and operate *The Oasis Club* in our *Prestige Ozone* development. We are also seeking to further opportunities to operate similar club houses in our other residential developments; and
- *Hilton* – a 285-room hotel to be situated in Kensington Road, Ulsoor, Bangalore which is managed by Hilton International Co. pursuant to an operating, marketing and technical services agreement.

In addition to our current operations, we intend to expand our hospitality business as follows:

- *aloft Bengaluru Cessna Business Park* – a 202-room hotel to be situated in the *Cessna Business Park* development; and
- *Marriott Hotel* – a 307 room hotel to be situated in the *Prestige Golfshire* development.

We are also planning to expand our hospitality operations by establishing serviced accommodation at *The Forum Value Mall*, and we are in the process of identifying a suitable operator for this business. We generate revenues from our hospitality operations through the operating income of the hotels and resorts themselves.

Our Flagship Real Estate Development - Prestige Shantiniketan

Prestige Shantiniketan is one of our Ongoing Projects. It will be a mixed-use township development with a total Developable Area of 14.62 million sq. ft. located in Whitefield, Bangalore, and will be comprise of projects across our residential, commercial and retail real estate businesses, as follows:

- *Residential* - The residential component of *Prestige Shantiniketan*, known as the 'Residential Precinct', commenced construction in May 2005, and has an estimated completion date of March 2010. It will comprise 3,023 apartments in 24 residential apartment blocks, with a Saleable Area of approximately 6.07 million sq. ft. developed in configurations of two-, three- and four-bedroom apartments and penthouses. The residential precinct will have the benefit of a clubhouse and a 10-acre landscaped park that is being developed by us as part of the residential component of the development. The residential precinct will target the middle income segment of the market.
- *Commercial* – The commercial component of *Prestige Shantiniketan*, known as the 'Commercial Crescent', commenced construction in May 2005, and has an estimated completion date of March 2010. The Commercial Crescent will comprise two twelve floor towers and one 16 floor Signature Tower, housing commercial office space. It will have a Saleable Area of approximately 4.42 million sq. ft. The project will benefit from the facilities offered by both the residential and retail components of the development.

- *Retail* - The retail component of *Prestige Shantiniketan* will be one of our signature *Forum* malls, *Forum Shantiniketan Mall*, which we estimate will commence construction in June 2010. The mall has an estimated completion date of November 2012. The *Prestige Shantiniketan* mall will have a Leasable Area of approximately 0.68 million sq. ft., and includes a five screen multiplex cinema.

In addition to our real estate developments, *Prestige Shantiniketan* will have the benefit of a hotel and convention centre, which is currently being independently developed by Chaitanya Properties Private Limited, our joint development partner.

Our Joint Venture with CRIDF

In our retail business, we have entered into a joint venture with CRIDF, an associate of CapitaMalls Asia. CapitaMalls Asia is one of the largest listed “pure-play” shopping mall owners, developers and managers in Asia by total property value of assets and by geographic reach, in terms of number of malls and cities. Our joint ventures with CRIDF are aimed at developing retail projects in south India in cities such as Bangalore, Mysore, Mangalore, Hyderabad and Cochin. We estimate that the total Developable Area and Leasable Area under these joint venture projects will be approximately 5.61 sq. ft. and 1.83 million sq. ft., respectively. We have also entered into a joint venture with CapitaMalls Asia for the purpose of managing the retail malls developed by the joint venture with CRIDF. Our master framework agreement regulates all of six of our joint ventures according to the following parameters:

- In cases where there is a third party as a joint venture partner, such as in the *Forum Thomsun Mall*, *Forum Sujana Mall* and *Forum Value Mall* developments, we have an equal share in the capital of the joint venture company, irrespective of the size of the holding by the third party;
- In cases where the only partners in the joint venture are CRIDF and our Company, such as in *The Forum Mangalore Mall*, *Forum Mysore Mall* and the Graphite property developments, we hold 51% of the economic interest in the joint venture company and CRIDF holds 49% of the economic interest. Voting control is share equally between us;
- In addition, and in terms of the master framework agreement, CRIDF has the first right of refusal over any future retail developments that we may undertake.

We believe that these arrangements will create opportunities to exploit new sources of revenue. For more information on these joint venture agreements, see “History and Corporate Structure” on page 147.

Real Estate Project Development and Execution Methodology

We have adopted a systematic methodology for the process of our real estate developments, and which can be divided into the following distinct activities:

Identification of Potential Projects and Land

One of the key factors in the real estate development sector is the ability to assess the potential of a location after evaluating its demographic trends. We rely on our experience and ability of our senior management to identify and evaluate potential locations. We also use our experience to evaluate locations where we can gain an “early-to-market” advantage, such as in the *Forum Vijaya Mall* and *Forum Sujana* malls in Chennai and Hyderabad respectively.

The process of land identification starts from the stage of selecting an appropriate land parcel which has growth potential. This is done by our projects research team which gathers market data on possible prospects while selecting a land parcel for development which is verified with the information that we have already collated. We also obtain a title opinion of the proposed lands, and consult with local real estate marketing professionals.

Thereafter, a survey is conducted at the proposed site and a preliminary feasibility report is prepared. The report is based on an analysis of specific criteria, including, among other things (a) the financial viability of the project, (b) the available or planned infrastructure surrounding the land that we have identified for our project, (c) the standard of living and disposable income of the population of the location, and (d) the growth prospects of the cities and towns in terms of trade and industry. The next step, after area identification, involves identifying the type of project to be undertaken in that particular area and deciding on the scale of the project. Typically, decisions at this stage involve examining the viability of developing residential, commercial, hospitality or retail projects on the identified project site. The final decision on the location, nature, financial feasibility and scale of each project is taken by our senior management.

Legal Analysis and Regulatory Approvals

While evaluating the feasibility of a location for the implementation of a project, it is imperative to understand the legal regime governing land acquisition and development in that location, which varies according to state and intra-state locations. We also evaluate the factors which affect the obtaining of the approvals required for the development and implementation of the project. The approvals which are typically required for a real estate development project include approvals for building plans, the conversion of agricultural lands to non-agricultural lands (where applicable), the approval of lay-outs and approvals relating to certain infrastructure facilities such as power and water. Similarly, approvals from various government authorities, including from the relevant environmental authorities, airport authorities and fire authorities are required for buildings above a certain stipulated height. Building completion certificates are obtained in accordance with applicable law from the appropriate authorities after the projects have been completed. For salient features of the legal requirements applicable to us, see "Legal and Other Information" on page 355.

Acquisition of title

As discussed under "Legal Analysis and Regulatory Approvals", above, the right to purchase land is primarily dependent upon the laws and regulations governing the location of the proposed real estate development project. The properties in our existing land bank have been acquired by us and are held directly by us (either directly or through long leases), or through Joint Development Agreements or Joint Ventures. (See "Our Business – Our Land Bank")

Project Planning, Design, Construction and Management

The planning of our projects is completed by our in-house planning department, and design is undertaken by external architects and structural consultants appointed by us for that purpose. The majority of the architects and structural consultants engaged by us are specific to a particular project and are drawn from a pool of designers and architects. The architect we appoint provides us with the architectural design of the project and the structural design is provided by an external structural consultant. A tender process is conducted with an approved panel of contractors who are pre-qualified at the time they are placed on the panel. Our in-house project and planning department conducts the estimates of the requirements for manpower, materials and machinery. The external consultants may continue to advise us during the course of the project.

Once the design and the estimates for the project have been finalized, we set up a project team under the supervision of a senior engineer (who is a vice president in our Company) which is dedicated to that particular project, and who is responsible for centralized coordination and reports to our senior management.

The purchase of materials is centralized and is based on the estimates given by the planning department or the architect, as the case may be. We are not dependent on any single contractor, builder or supplier for our construction activities. The orders are placed by us on the basis of arms-length negotiations and we conduct tender and bidding processes accordingly.

We have recently acquired 75% of the share capital of Team United, a construction company in south India, with the aim of developing an in-house construction capability. Team United has already been integrated into our Company, and provides construction management services for our developments.

We ensure that raw materials and other goods and services sourced from third party vendors are delivered in a timely and cost effective manner, that payment is made to suppliers promptly, and that any scrap or waste from project sites is effectively disposed of.

We have developed a system of internal reporting in order to monitor the status and progress of all the projects being developed by us on a weekly basis. The system helps us to reduce time and cost overruns.

We deploy representatives of our head office at the sites of our projects to deal with issues related to manpower planning, including the welfare of the workers, as well as security and administration of the site. These representatives travel from site to site in order to oversee such issues. As we do not employ site labor, we insist on our contractors ensuring compliance with relevant regulatory and statutory obligations in relation to their labor force.

Pricing

The prices of our properties are determined principally by market forces of supply and demand. We price our sales and rental properties by reference to market rates for similar types of properties in their locality. The sales and rental prices of our properties will therefore depend on the location, number, square footage and mix of properties we sell or rent during each fiscal period, and on prevailing market supply and demand conditions at the time we complete development of our real estate projects. Supply and demand conditions in the real estate market in the areas in which we operate, and hence the prices we may charge for our properties, are affected by various factors outside our control, including prevailing local economic, income and demographic conditions, interest rates available to purchasers requiring financing, the availability of comparable properties completed or under development, changes in governmental policies relating to zoning and land use, changes in applicable regulatory schemes, and competition from other real estate development firms.

In light of the above market forces, we price our projects for sale by taking the following factors into account:

- Cost of the land and final estimated construction costs;
- A premium, depending on the location of the project (e.g.: we typically include a higher premium where a project is situated in a suburban area or a central business district) and by referenced to our targeted internal rates of return;
- The prevailing market for similar developments in that segment; and
- The maximum premiums on a project which we believe to be achievable in the segment of the particular project.

We ordinarily conduct this pricing exercise prior to pre-launch marketing of a project, and review the prices reached by considering the above factors on a periodic basis.

Project Completion and Hand-Over

We transfer the title or lease hold rights, as the case may be, to the customer. We ensure that the entire consideration is paid to us prior to the transfer of title or before possession is handed over, whichever is earlier.

Sales and Marketing

We have a dedicated sales team which focuses on the sales of residential and commercial projects, and a dedicated leasing team which focuses on the leasing of commercial (including sub-lease and fit-out services) and retail projects. In our hospitality projects, marketing is undertaken by the hotel operator, in terms of the operating, marketing and technical services agreements that we enter into with them. We sell projects both on a pre-sale basis as well as during and after construction.

Our Sales Team

We undertake direct sales efforts, either through our sales team, which is comprised of 20 professionals, or through our external network of accredited marketing associates.

We maintain a detailed database of our existing clients for purposes of marketing new residential and commercial projects to them. In addition, all enquiries, whether from existing or new clients, are captured by a separate “enquiries” database. Both databases are used to target existing and potential clients for any new real estate offering, and typically constitutes the first reference list that our sales team uses in marketing any new project.

Our marketing activities typically begin immediately following the finalization of the pricing of a real estate development, at which stage our sales team targets potential purchasers. Our sales team conducts an extensive marketing launch where they brief our marketing associates on the development in question, and provide them with all associated information and materials necessary for the marketing of the development.

Our sales team also utilises a mix of traditional marketing methods such as advertising and publicity in the leading newspapers and magazines of the region. In addition we also publish two in-house newsletters Falcon News and UB Collection, which enable us to maintain contact with our clients periodically. We also utilise the internet to market our developments by advertising on property portals and search engines in order to reach potential clients outside of India and in parts of India outside of the south Indian region.

Finally, we typically build, furnish and landscape show units for residential projects and maintain an on-site sales office for each development. These show units are intended to provide potential clients with a virtual experience of our residential projects, and provides us with an opportunity to address and focus on the unique requirements of each potential client.

Our Leasing Team

Our leasing team has established relationships with local and international property consultants such as *Jones Lang Lasalle Meghraj*, *Cushman & Wakefield*, *Colliers International*, *C B Richard Ellis*, *Knight Frank* and *Equis India*, through whom we source a number of our commercial lease clients. Our leasing team maintains contacts with these consultants, and regularly updates them on the availability of commercial space in our developments. In addition, our leasing team also conducts independent marketing activities aimed at procuring new lease clients, such as exhibiting at commercial trade fairs and events.

Our leasing team also recommends the terms of leases to management based on prevailing market conditions, and provides input to the project design process in order to ensure that our projects meet the prevailing demands of the market.

The leasing team retains responsibility for legal documentation, the collection of lease deposits and the timely collection of rentals. (*See – “Collections”, below*).

Collection

As part of our sales process we typically ensure that we collect 15%-20% of the purchase price at the time of booking the sale, with structured instalment payments to follow in terms of our agreement with the client. In instances where our clients default on the payment of the balance of a purchase price, our agreements include appropriate provisions which allow for the forfeiture of the pre-booking payment, though these amounts can be refunded in the event that the property is subsequently sold to another client.

All receivables of our real estate development business are managed using integrated ERP and accounting software (see "*Information Technology*", below) to monitor the performance of our clients' purchase and rental instalment obligations. This integrated software also generates both statements for our clients, as well as the appropriate data for our management information systems.

We send statements to our clients on a periodic basis (dependant on the agreed schedule of payments for purchase price instalments or rental payments) and any outstanding payment obligations are promptly followed up on by our finance department, which has a dedicated collections team, with the client in question. Our collections team draws any significant arrears to the attention of our senior management, and where necessary, we meet with our clients who are in arrears to restructure, and otherwise facilitate, payments. We charge interest on payment obligations that are in arrears, and the amount is determined on a transaction-by-transaction basis, and agreed prior to the conclusion of a property transaction with our client.

Competition

We operate in highly competitive markets, and competition in these markets is based primarily on the availability and cost of land. To remain competitive, we strive to reduce procurement costs and improve operating efficiencies. We also face competition from both domestic and foreign companies in bidding for new property development projects.

The real estate development sector is still largely fragmented in India. Among the few organized entities in this sector, our chief competitors in south India are large developers such as Brigade Enterprises, Embassy Group, Puravankara Projects, RMZ Corp and Sobha Developers.

Competition in the market for commercial real estate space to let is driven principally by the location of the development and the pricing of rentals. In central business districts, competition in this segment comes from both new developments and existing developments which subsequently become vacant.

Employees

As at September 30, 2009, our Company had 314 employees consisting of finance, technical (engineering and architecture), marketing, legal and administrative and non-technical staff. We do not take into count any manpower employed by our sub-contractors in calculating our personnel members. We expect that human resources and employee recruitment activities will increase as our business grows.

We believe that our employees are key contributors to our business success. We make a concerted effort to provide training and development to newly hired professionals in order to maximize the performance of our employees. Our work force consists of (i) our permanent employees, (ii) consultants who we engage on a contractual basis to assist in the architectural and structural design of our projects, and (iii) contractors who are engaged by us on a contractual basis and who employ labourers to work at project sites. Insurance

In relation to our real estate development business, we maintain construction and development risk coverage and industrial all-risk insurance for each real estate development project we undertake. We may also be subject to claims resulting from defects arising from engineering, procurement or construction services. We obtain specialised insurance for construction risks and third-party liabilities for most projects for the duration of the project and the defect liability period. We generally maintain insurance covering our assets and operations at levels that we believe to be appropriate. We have insurance policies to cover risks relating to physical loss or damage to materials and property, including contract works are generally covered by contractors' all-risks insurance policies. Under the all-risks insurance policy, we are also provided with coverage for price escalation, debris removal and for damage to surrounding properties. Our general public liability insurance policy also indemnifies us against legal liability to pay damages for third-party civil claims arising out of bodily injury or property damage caused by an accident occurring in the ordinary course of business.

In addition to standard software systems for word processing, providing secure access to applications and content from clients and other systems used by our employees, we have recently implemented an ERP package based on Oracle software to integrate and effectively manage our financial and procurement systems.

Corporate Social Responsibility

We place emphasis on social and community service. We have undertaken various non-profit initiatives and believe that mobilizing our resources will benefit the Bangalore community. REGULATIONS AND POLICIES

The Government of India, the Government of Karnataka, the Government of Andhra Pradesh, the Government of Tamil Nadu, the Government of Kerala and other State Governments and the respective local bodies have framed various regulations and policies all of which apply to us. A summary of these regulations and policies is detailed below. The following information has been obtained from the various local legislations and the bye laws of the respective local authorities that are available in the public domain. The regulations set forth below may not be exhaustive and are only intended to provide general information to the investors and are neither designed nor intended to substitute for professional legal advice.

The real estate and construction sector in India is governed by central and State legislations that regulate the substantive and procedural aspects of the acquisition and transfer of land and the construction of housing and commercial establishments.

The real estate and construction industry in India operates in a largely fragmented manner, with each State prescribing its own regulations. We are limiting the discussion herein to laws and regulations, which are currently applicable to us for carrying on our business in the State of Karnataka, Andhra Pradesh, Tamil Nadu and Kerala. Investors are advised to undertake their independent study in relation to the regulations applicable to us, for carrying out our business in various States in India and also outside India. We are broadly subject to laws which provide for the acquisition of land, its transfer and related aspects like payments of stamp duty, registration and local legislation providing for the regulation and supervision of building and residential premises and certain other State specific laws.

Given below is a brief description of the various legislations, including central and State legislations that are currently applicable to the business carried on by us.

Constitution of India

The Constitution of India, in Schedule VII provides the list of the various fields of legislation in which the union government and the State government are entitled to make laws. The fields of legislation as specified in the union list allow the Union of India to make laws, while the entries in the State list allow the respective States to make laws in relation to the same. The entries in the Concurrent list are where the centre and the States can both make laws. Provided below are certain important entries in relation to land which appear both in the Union as well as the State list.

Union List

Entry 86 of the Union list is in relation to ‘*Taxes on the capital value of the assets, exclusive of agricultural land, of individuals and companies; taxes on the capital of companies*’. Further entry 87 deals with ‘*Estate duty in respect of property other than agricultural land*’.

State List

Entry 18 of the State List deals with ‘*land that is to say right in or over the land, land tenures including the relation of landlord and tenant, and the collection of rents, transfer and alienation of agricultural lands; land improvement and agricultural loans; colonisation*’. Further entry 49 empowers the State in relation to ‘*taxes on land and buildings*’.

Therefore, as provided for in the Constitution of India, as regards lands in specific and real estate in general, the same are governed both by the laws enacted by the States as well as by the Union of India.

Laws enacted by the Union of India

Transfer of Property Act, 1882 (“T.P. Act”)

The T.P. Act deals with the various methods in which transfer of property including transfer of immovable property or any interest in relation to that property, between individuals, firms and companies takes place. This mode of transfer between individuals, firms etc is governed by the provisions of the T.P. Act, as opposed to the transfer of property or interest by the operation of law. The transfer of property as provided under the T.P. Act, can be through the mode of sale, gift and exchange while an interest in the property can be transferred by way of a ‘lease’ or ‘mortgage’.

The T.P. Act stipulates the general principles relating to the transfer of property including among other things identifying the categories of property that are capable of being transferred, the persons competent to transfer property, the validity of restrictions and conditions imposed on the transfer and the creation of contingent and vested interest in the property.

Indian Easements Act, 1882 (“Easements Act”)

The right of easements is derived from the ownership of property and is governed by the Easements Act. An easement is a right which the owner or occupier of land possesses for the beneficial enjoyment of that land and which permits the owner to do or to prevent something being done, in or upon, other land not his own. Under the Easements Act, a license is defined as a right to use property without any interest created in favour of the licensee, as opposed to a lease, which creates an interest in favour of the lessee. The period and incident upon which a license may be revoked may be provided in the license agreement entered into between the licensor and the licensee.

Registration Act, 1908 (“Registration Act”)

The Registration Act has been enacted with the object of providing public notice of the execution of documents affecting a transfer of any interest in an immovable property. The purpose of the Registration Act is the conservation of evidence, assurances, title, publication of documents and prevention of fraud. It lays down in detail, the formalities for registering an instrument. Section 17 of the Registration Act identifies documents for which registration is compulsory and includes among other things, any non-testamentary instrument which purports or operates to create, declare, assign, limit or extinguish, whether in present or in future, any right, title or interest, whether vested or contingent, in immovable property of the value of one hundred rupees or more, and a lease of immovable property for any term exceeding eleven months or reserving a yearly rent.

An unregistered document (which compulsorily requires registration) will not affect the property comprised in it, nor be treated as evidence of any transaction affecting such property (except as evidence of a contract in a suit for specific performance or as evidence of part performance under the T.P. Act or as collateral), unless it has been registered. The amount of the fees under the Registration Act for the purpose of registration, vary from State to State.

The Indian Stamp Act, 1899 (“Stamp Act”)

Stamp duty in relation to certain specified categories of instruments as specified under Entry 91 of the Union list, is governed by the provisions of the Stamp Act which is enacted by the Central Government. The applicable rates for stamp duty on the instruments chargeable with duty are prescribed in the schedules to the Indian Stamp Act, 1899 and the relevant stamp legislations enacted by each State. Instruments chargeable to duty under the Stamp Act which are not duly stamped are incapable of being admitted in a court of law as evidence of the

transaction contained therein. The stamp enactments also provide for impounding of instruments that are not sufficiently stamped or not stamped at all.

The Urban Land (Ceiling & Regulation) Act, 1976 (“Urban Land Ceiling Act”)

The Urban Land Ceiling Act prescribes the limit for urban areas that can be acquired by an entity. It has been repealed in some States and union territories under the Urban Land (Ceiling and Regulation) Repeal Act, 1999 including Karnataka, Andhra Pradesh and Tamil Nadu.

The Land Acquisition Act, 1894 (“The Land Acquisition Act”)

Land holdings are subject to the Land Acquisition Act which provides for the compulsory acquisition of land by the Central Government or appropriate State Government for public purposes, including planned development and town and rural planning. However, any person having an interest in such land has the right to object to such compulsory acquisition and has the right to compensation. In addition, certain states have amended the central statute and framed their own rules for compulsory land acquisition. The Company has to abide by the State legislations in those states in which it conducts its business, in addition to the Central legislation.

Classification of Lands

Usually, land is broadly classified as agricultural and non-agricultural. Further non-agricultural land has different categories such as residential, commercial, industrial etc, based on the specified land usage. Land classified under a specified category is permitted to be used only for such purpose. In order to use land for any other purpose, prior permission from the relevant revenue, municipal or planning authorities would be required. Where the land is originally classified as agricultural land, in order to use the land for any other purpose, the land is required to be converted or alienated for non-agricultural purposes. In addition, some State governments in India have imposed various restrictions, which vary from State to State, on the transfer of property within such States.

Development of Agricultural Land

The acquisition of agricultural land is regulated by state land reform laws, which prescribe limits up to which an entity may acquire agricultural land. Any transfer of land which results in the aggregate land holdings of the acquirer in the state to exceed this ceiling is void, and the surplus land is deemed, from the date of the transfer, to have been vested in the State government free of all encumbrances. Certain States also prohibit the acquisition of agricultural land by non-agriculturists.

When a local or planning authority earmarks certain areas for non-agricultural use such as, townships and commercial complexes, agricultural lands may be acquired for such specified development. After obtaining a conversion certificate from the appropriate authority with respect to a change in use of the land from agricultural to non-agricultural, the ceiling limits in relation to agricultural lands will not be applicable. Appropriate licenses would need to be obtained for development of land. While granting licenses for development, the authorities generally levy proportional development charges for the provision of services such as laying down of main lines, drainage, sewerage, water supply and electricity.

Land Use Planning

Land use planning and its regulation, including the formulation of regulations for building construction, form a vital part of the urban planning and development process. Various enactments, rules and regulations have been made by the Government, concerned State Governments, planning authorities, municipal corporations and municipalities, village panchayats etc which deal with the acquisition, ownership, possession, development,

zoning and usage of land. All relevant applicable laws, rules and regulations have to be taken into consideration by any person or entity proposing to enter into any real estate development or construction activity in this sector in India.

Building Consents

Each state and city has its own set of laws for construction, which govern planned development (such as floor area ratio or floor space index limits, set backs, height restrictions etc). The various authorities that govern building activities in states include the town and country planning department, municipal corporations. Any application for undertaking any construction or development activity has to be made to the town planning authority, municipality, municipal corporation, village panchayat etc as the case may be, who has jurisdiction to sanction such construction.

The Urban Arts Commission advises the relevant State Government in the matter of preserving, developing and maintaining the aesthetic quality of urban and environmental design in some states and also provides advice and guidance to any local body with respect to building or engineering operations or any development proposal which affects or is likely to affect the skyline or the aesthetic quality of the surroundings or any public amenity provided therein. Under certain State laws, the local body, before it accords its approval for building operations, engineering operations or development proposals, is obliged to refer all such operations to the Urban Arts Commission and seek its approval for the project. Additionally, certain approvals and consents may also be required from various other departments, such as the Pollution Control Board, Fire Services Department, the Airports Authority of India, the Archaeological Survey of India etc.

Environmental Regulations

The real estate sector is also subject to central, state and local regulations which are designed to protect the environment. Among other things, these laws regulate the environmental impact of construction and development activities, emission of air pollutants and discharge of chemicals into surrounding water bodies. These various environmental laws give primary environmental oversight authority to the Ministry of Environment and Forest (the “**MoEF**”), the Central Pollution Control Board (the “**CPCB**”) and the respective State Pollution Control Boards. The MoEF is the key national regulatory agency responsible for policy formulation, planning and co-ordination of all issues related to environmental protection. The CPCB is the law enforcing body at the national level. It enforces environmental legislation, coordinates the activities of State Pollution Control Committees, establishes environmental standards and plans and executes a nationwide programme for the prevention, control and abatement of pollution.

State specific laws

State legislations provide for the planned development of urban areas and the establishment of regional and local development authorities charged with the responsibility of planning and development of urban areas within their jurisdiction. Real estate projects have to be planned and developed in conformity with the norms established in these laws and regulations made thereunder and require sanctions from the government departments and developmental authorities at various stages.

Karnataka

Some of the important legislations enacted by the State of Karnataka in this regard are provided below.

Karnataka Town and Country Planning Act, 1961 (“KTCP Act”)

The main objective of the KTCP Act is to regulate planned growth of land use and to develop and execute town planning schemes in the State of Karnataka. The KTCP Act operates through planning authorities constituted under the KTCP Act for every local planning area and such areas are to be governed by its own local bye laws, rules and/or regulations. Every local planning authority is required to create a master plan and to ensure that all activities carried out are done in accordance with the master plan.

Bangalore Development Authority Act, 1976 (“BDA Act”)

The BDA Act was enacted for the establishment of a development authority to provide for the development of the city of Bangalore (as defined in the BDA Act) and areas adjacent to it. The BDA is established as the local planning authority for the local planning area for the city of Bangalore.

Bangalore Metropolitan Region Development Authority Act, 1985 (“BMRDA Act”)

The BMRDA Act was enacted for the purpose of establishing the BMRDA to plan, co-ordinate and supervise the proper and orderly development of the Bangalore metropolitan region (as defined in the BMRDA Act). Any development in the jurisdiction of BMRDA requires the prior permission of the BMRDA.

Bangalore Mysore Infrastructure Corridor Area Planning Authority (“BMICAPA”) and Bangalore International Airport Area Planning Authority (“BIAAPA”)

The Bangalore Mysore Infrastructure Corridor Project consists of tolled four lane express highways (including their peripheral and link roads) and the five new townships, along this corridor. The Bangalore International Airport Planning Authority regulates the lands coming within its jurisdiction. Pursuant to the objectives of the KTCP Act, the BMICAPA and the BIAAPA have been constituted as local planning Authorities and are authorized under the provisions of the KTCP Act to frame their own rules and regulations, to govern the areas within its jurisdiction. In the event that any of our lands are situated in their jurisdiction, the BMICAPA and the BIAAPA constitute independent planning authorities and pursuant to the authority vested in them under the KTCP Act, have the powers to govern such areas. Any person undertaking any construction activity within the jurisdiction of these bodies is required to make an application and obtain a license for construction. The plans and specifications for construction must comply with the regulations prescribed by these authorities including in relation to FAR, set back etc.

Karnataka Municipal Corporation Act, 1976 (“KMC Act”)

The KMC Act was established to consolidate and amend the laws, relating to the establishment of municipal corporations in the State of Karnataka. Under the KMC Act a corporation is established based on certain criteria, which include the population of the area and the density of the population. Under the KMC Act, the construction industry is regulated by the Municipal Corporations which impose mandatory requirements such as approvals, building bye-laws, regulation of future constructions, etc. The KMC Act empowers municipal corporations to make bye laws for the use of sites and buildings and for all matters that are required or allowed to be carried on under the KMC Act.

Comprehensive Development Plan (“CDP”)

Under the KTCP Act, the BDA is the Planning Authority for the metropolitan area of Bangalore. A CDP that divides the city into a number of use zones, such as residential, commercial, industrial, public and semi-public is issued every 10 years by the BDA.

The latest CDP (“**Revised Master Plan 2015**”) was notified by the Government of Karnataka on June 25, 2007 and covers a total planning area of 1,307 square kilometres. The Revised Master Plan 2015 contains a master plan vision document, existing and proposed land use maps, land use zoning regulations and planning district reports. Under the Revised Master Plan 2015, there has been an enhancement of the FAR to a maximum of three and depending on the width of the road, up to four and an enhancement of FAR to a maximum of four around proposed metro stations. The land requirement for different uses like residential, commercial, industrial, public and semi-public, traffic and transportation, parks and open spaces have been also been set out in the plan. The Revised Master Plan 2015 lays down the policies and programmes for the overall development of the area taking into consideration the long term requirements of the city. In each use / zone, certain uses are normally permitted and certain other uses may be permitted by the BDA under special circumstances.

Karnataka Land Revenue Act, 1964 (“KLR Act”)

Though the KLR Act was enacted in order to consolidate and amend the laws relating to land and the revenue administration in the State of Karnataka, the KLR Act regulates the use of agricultural land for non agricultural purposes. Under the KLR Act, permission of the relevant Deputy Commissioner should be obtained by the owner of any agricultural land in order to convert the use of such land for any other purpose. In areas earmarked as “green belt areas”, there are greater restrictions placed on usage and prior consent of the relevant authority is needed if the activity sought to be carried out is other than certain permitted activities such as construction of places of worship, hospitals, libraries, sports clubs and cultural buildings.

Bangalore Mahanagara Palike Building Bye Laws - 2003 (“BMP Bye Laws”)

All land use and real estate development within the jurisdiction of the Bruhat Bangalore Mahanagara Palike (“**Authority**”) requires compliance with the BMP Bye Laws. There are about 100 wards in Bangalore to which the BMP Bye Laws are applicable at present. The BMP Bye Laws classify land use as (i) residential (ii) commercial (retail and wholesale business) (iii) industrial (iv) public and semi public use (v) parks, open spaces and playgrounds (vi) transport and communication (vii) utilities and services (viii) agricultural zone. The construction of residential buildings is permitted in the commercial (retail business) zone.

Every person who intends to construct, erect, re-erect a building or make material alterations to a building is required to obtain a license from the commissioner of the Authority under Part II of the BMP Bye Laws by submitting the prescribed documents. The specifications mentioned in the BMP Bye Laws must be complied with in respect of the building proposed to be constructed. In relation to the construction of any building, *inter alia*, the conditions regarding the FAR, (i.e. ‘quotient obtained by dividing the total covered area of all the floors by the area of the plot’) and the “set back line” (i.e. a line prescribed beyond which nothing can be constructed towards the plot boundary except those not included under the definition of coverage) set out in the BMP Bye Laws have to be complied with and will be considered by the Authority before it grants a license for construction. Upon grant of a license by the Authority the construction of the building must commence within a period of two years from the date of grant of the license. Upon completion of construction, the Authority will issue a completion or occupancy certificate for the building after the physical inspection of the building to verify that the construction is in compliance with the approved plans and specifications.

Bhoomi Program

Pursuant to the computerisation of land records (“**CoLR**”) scheme initiated by the Government of India, the State of Karnataka implemented the Bhoomi Program. The objectives of the Bhoomi program are to computerise the ownership and plot wise details of the land records, facilitate the easy maintenance and updation of changes occurring in land holdings. Computerisation has been done to ensure long term preservation

of land records that are tamper proof and which can be maintained, reproduced and retrieved efficiently at low cost.

By March 2002, the computerisation of the land records in the entire State of Karnataka was completed, which involved digitisation of nearly 20 million land records and further validation by 10,000 village accountants who were traditionally entrusted with custody and maintenance of the land records. After the implementation of the Scheme, farmers were issued printed copies of computerized records of Rights, Tenancy and Crop Inspection certificate (RTC) for a modest fee of Rs. 15 and issue of manual certificates has been banned. These computer-generated documents have statutory authority, and can be used for judicial and financial purposes. The Bhoomi program has been provided with fingerprint biometrics to ensure foolproof authentication. The Bhoomi databases at the taluk offices have been consolidated at the state data centre. Therefore the replication and consolidation of databases takes place on a daily basis which enables delivery of land records through the internet. Further, the offices of the registration department have been electronically linked to Bhoomi offices in the taluka thus transferring electronic data to the Bhoomi database.

Computerisation has also led to other benefits such as laying down standard processes like First in First out (FIFO) for disposal of mutation applications and reducing the discretionary power of government officials.

Foreign Ownership

The Industrial Policy, 1991 prescribed the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy. The Government of India has since amended the Industrial Policy, 1991 from time to time in order to enable FDI in various sectors in a phased manner gradually allowing higher levels of foreign participation in Indian companies. The FEMA regulates the precise manner in which such investment may be made.

The Government of India has permitted FDI of up to 100% under the automatic route in townships, housing, built-up infrastructure and construction-development projects (which would include, but not be restricted to, housing, commercial premises, hotels, resorts, hospitals, educational institutions, recreational facilities, city and regional level infrastructure), subject to certain conditions contained in Press Note 2 and Press Note 4 (2006 series).

A short summary of the conditions of Press Note 2 is as follows:

- (a) Minimum area to be developed is 10.0 hectares in case of serviced housing plots and 50,000 sq. mts. in case of construction development projects. Where the development is a combination project, the minimum area can be either 10.0 hectares or 50,000 sq. mts.
- (b) Minimum capitalization of US\$10.0 million for wholly-owned subsidiary and US\$5.0 million for a joint venture has been specified and it is required to be brought in within six months of commencement of business of the company.

- (c) Further, the investment is not permitted to be repatriated before three years from completion of minimum capitalization except with prior approval from FIPB.
- (d) At least 50% of the project is required to be developed within five years of obtaining all statutory clearances and the responsibility for obtaining it is cast on the foreign investor. Further, the sale of undeveloped plots is prohibited.
- (e) Compliance with rules, regulations and bye-laws of state government, municipal and local body has been mandated and the investor is given the responsibility for obtaining all necessary approvals.

However, Press Note 2 and Press Note 4 (2006 series) are not applicable to foreign investment under the Portfolio Investment Scheme by FIIs under Schedule II of the Foreign Exchange Management (Transfer or Issue of Security by a Person Resident outside India) Regulations, 2000, as amended from time to time. The Company is eligible to issue Shares to FIIs under the Portfolio Investment Scheme, covered under notification FEMA No. 20/2000-RB dated May 3, 2000 and subsequent amendments thereto.

Investment by FIIs and Sub-accounts

As per the Portfolio Investment Scheme, FIIs registered with the SEBI may buy or sell securities of Indian companies on stock exchanges in India through registered stock brokers. FIIs are also permitted to purchase shares and convertible debentures of an Indian company, subject to the percentage limits specified either through:

- a public offer, where the price of the shares to be issued is not less than the price at which the shares are issued to Indian residents; or
- a private placement, where the price of the shares to be issued is not less than the price according to the terms of the relevant SEBI guidelines or the guidelines issued by the former Controller of Capital Issues as applicable.

Further, in respect of an FII investing in equity shares on behalf of its sub-accounts, the investment on behalf of each sub-account shall not exceed 10% of the total issued capital of the company or 5% of the total issued capital of the company in case such sub-account is a foreign corporate or an individual.

The above regulations and policies are in summary form only and is not a complete analysis or description of all regulation and policies applicable to the business of the Company.

Foreign Exchange Remittances from India

The FEMA regulates transactions involving foreign exchange and provides that certain transactions cannot be carried out without the general or special permission of the RBI. The FEMA has eased restrictions on current account transactions. However, the RBI continues to exercise control over capital account transactions (i.e., those which alter the assets or liabilities, including contingent liabilities, of persons) and has issued regulations to regulate the various kinds of capital account transactions, including certain aspects of the purchase and issuance of shares of Indian companies.

Dividends

Dividends on the equity shares received by foreign investors may be freely repatriated in foreign currency.

Restrictions on Sale of the Equity Shares and Repatriation of Sale Proceeds

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain conditions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. An FII holding equity shares is permitted to sell them on a recognised Indian Stock Exchange through a registered broker and the sale proceeds may be credited to a special non-resident Rupee account that it holds.

1 The ratios have been computed as below:

Earnings Per Share (Rs.)	Net Profit attributable to equity shareholders as restated
	Weighted average number of equity shares outstanding during the year
Return on net worth (%)	Net profit after tax as restated
	Net Worth excluding revaluation reserve at the end of the year
Net Asset Value per equity shares(Rs.)	Net worth excluding revaluation reserve and preference share capital at the end of the year
	Number of equity shares outstanding at the end of the year.

2 Profit and loss as restated has been considered for the purpose of computing the above ratios.

3 Earnings per share is calculated in accordance with Accounting Standard 20 'Earning Per Share'.

4 The above ratios for the period ended August 31, 2009 are not annualised.

5 In the Annual General Meeting held on September 22, 2009 the shareholders have consented for issuance of 20 equity shares of face value of Rs 10/- each as bonus shares for every one share held by the equity shareholders of the Company whose name appear in the register of members as on the record date, by capitalisation of Surplus in Profit and Loss account. Subsequently, the Board of Directors vide their resolution on September 23, 2009 have allotted the said bonus shares. Consequently, the calculation of basic and diluted earnings per share has been adjusted for the increase in number of equity shares outstanding as a result of the issuance of bonus equity shares, for all the periods presented.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

You should read the following discussion of our financial condition and results of operations together with the Financial Statements, the notes and significant accounting policies thereto and the reports thereon, in "Financial Statements". The Financial Statements are based on Indian GAAP, which differ in certain significant respects from U.S. GAAP and IFRS.

Our financial year ends on March 31 of each year, so all references to a particular Fiscal year are to the twelve-month period ended March 31 of that year.

This discussion contains forward-looking statements and reflects our current views with respect to future events and financial performance. Actual results may differ materially from those anticipated in these forward-looking statements. Given these uncertainties, prospective investors are cautioned not to place undue reliance on such forward-looking statements. Factors that could cause or contribute to such differences include, but are not limited to, those discussed in "Risk Factors" and "Business".

Overview

We have over 23 years of experience in real estate development, and are one of the leading real estate development companies in south India. We have completed 142 real estate projects of approximately 27.09 million sq. ft. We have developed a diversified portfolio of real estate development projects focusing on projects in the residential (including apartments, villas, plotted developments and integrated townships), commercial (including corporate office blocks, built-to-suit facilities, technology parks and campuses and SEZs), hospitality (including hotels, resorts and serviced accommodation) and retail (including shopping malls) segments of the real estate industry. We currently own or hold development rights for 52.57 million sq. ft. of Developable Area, which includes 24.49 million sq. ft. of Saleable Area and 9.64 million sq. ft. of Leasable Area.

Our Promoters have been associated with the real estate business since 1981. We were established as Prestige Estates and Properties, a partnership firm, in 1986. We are experienced in all aspects of the real estate development business, including land identification and acquisition, development, design, project management, sales and marketing, interiors and the provision of property services in relation to real estate developments.

We believe that we have established a strong brand image, have a successful track record of execution and a diversified portfolio of real estate projects. In the past five years, we have completed:

- 15 residential projects with a Developable Area of 4.90 million sq. ft. (of which the Saleable Area is 3.94 million sq. ft.). This includes developments such as *Prestige Ozone*, *Prestige St. John's Wood* and *Prestige Exotica*;
- 23 commercial projects with a Developable Area of 7.50 million sq. ft. (of which the Saleable Area is 2.92 million sq. ft., and the Leasable Area is 0.79 million sq. ft.). This includes projects such as *UB City* and *Prestige Technology Park*;
- two hospitality projects with a Developable Area of 0.35 million sq. ft. (which is equivalent to approximately 177 keys, and of which the Leasable Area is 0.32 million sq. ft.). This includes projects such as *Oakwood Premier Prestige Serviced Apartments*; and
- three retail projects with a Developable Area of 1.38 million sq. ft. (of which the Leasable Area is 0.73 million sq. ft.). This includes projects such as *The Forum Mall* and *Forum Value Mall*.

We currently have 33 Ongoing Projects which comprise 10 residential projects with a Developable Area of 13.80 million sq. ft. (of which the Saleable Area is 11.22 million sq. ft.), 16 commercial projects with a Developable Area of 16.80 million sq. ft. (of which the Saleable Area is 6.14 million sq. ft. and the Leasable Area is 3.75 million sq. ft.), four hospitality projects with a Developable Area of 1.26 million sq. ft. (which is equivalent to approximately 655 keys, and of which the Leasable Area is 0.84 million sq. ft.) and three retail projects with a Developable Area of 3.39 million sq. ft. (of which the Leasable Area is 1.20 million sq. ft.).

Our Ongoing Projects include our flagship real estate development, *Prestige Shantiniketan*, a mixed-use township located in Whitefield, Bangalore. *Prestige Shantiniketan* is comprised of 14.62 million

sq. ft. of Developable Area, across the residential (including 6.07 million sq. ft. of Saleable Area), commercial (including 4.42 million sq. ft. of Saleable Area) and retail (including 0.67 million sq. ft. of Leasable Area) real estate segments (the retail component of the project is classified as a Project Under Development, below).

We currently have twelve Projects Under Development, which comprise six residential projects with a Developable Area of 7.94 million sq. ft. (of which the Saleable Area is 6.01 million sq. ft.), two commercial projects with a Developable Area of 1.99 million sq. ft. (of which the Leasable Area is 1.12 million sq. ft.), two hospitality projects with a Developable Area of 1.13 million sq. ft. (which is equivalent to approximately 507 keys, and of which the Leasable Area is 1.13 million sq. ft.) and two retail projects with a Developable Area of 1.97 million sq. ft. (of which the Leasable Area is 0.90 million sq. ft.).

We currently have six Forthcoming Projects, which comprise two residential projects with a Developable Area of 0.74 million sq. ft. (of which the Saleable Area is 0.70 million sq. ft.), two commercial projects with a Developable Area of 2.35 million sq. ft. (of which the Saleable Area is 0.42 million sq. ft. and the Leasable Area is 0.51 million sq. ft.) and two retail projects with a Developable Area of 1.20 million sq. ft. (of which the Leasable Area is 0.61 million sq. ft.). At present we have no Forthcoming Projects for our hospitality business.

As part of our business model, we have access to a land bank, which consists of lands upon which there is no present development. As of October 31, 2009, our Land Bank aggregated approximately 250.61 acres. We believe that continuing to build our Land Bank is critical to our growth strategy and we intend to continue acquiring land in strategic locations across Bangalore and south India in order to maximise opportunities for projects in the future.

In our retail business, we have entered into a joint venture with CRIDF, an associate of CapitaMalls Asia. CapitaMalls Asia is one of the largest listed “pure-play” shopping mall owners, developers and managers in Asia by total property value of assets and by geographic reach, in terms of number of malls and cities. The joint venture is aimed at developing six retail projects (principally mall developments) with a total Developable Area of 5.61 million sq. ft. (of which the Leasable Area is 1.83 million sq. ft.) in south India, and pursuant to a framework agreement between our Company and CRIDF for the joint development of these projects. We have also entered into a joint venture with CapitaMalls Asia for the purpose of managing the retail malls developed by the joint venture with CRIDF.

While our real estate development business continues to be our primary focus, we also offer a variety of services through our real estate services business. This includes the provision of property management services for our commercial and residential developments, sub-leasing and fit-out services, project and construction management services, interior solutions services, mall management services (which includes the retail real estate projects that we complete pursuant to our joint ventures with CRIDF) and the operation of our hospitality projects.

Our consolidated total income for the five months ended August 31, 2009, Fiscal 2009, 2008 and 2007 was Rs. 4,378.49 million, Rs. 9,161.51 million, Rs. 9,892.65 million and Rs. 4,271.42 million, respectively.

The following map illustrates our geographic presence in cities across south India:

Note Regarding Presentation

The Financial Statements have been prepared in accordance with Indian GAAP and standards issued by the Institute of Chartered Accountants of India (“ICAI”). The discussion below covers our audited consolidated results for the five months ended August 31, 2009, Fiscal 2009, Fiscal 2008 and Fiscal 2007.

Lack of Comparability of Periods under Review

Our revenue recognition is based on the number of projects that are under execution during a particular period and qualify for revenue recognition. The time it takes to develop a project varies depending on a variety of factors, including the size of a project, and we aim to develop and sell our Land Reserves within 12 to 48 months from the time the acquisition of land is complete. This may lead to significant fluctuations in our revenues from period to period.

Factors Affecting Our Financial Results

A number of general factors have affected and we expect will continue to affect our financial condition and performance. The factors affecting us are discussed below.

Market Variations in Prices for our Properties

The prices of our properties are determined principally by market forces of supply and demand. We price our sales and rental properties by reference to market rates for similar types of properties in their locality. The sales and rental prices of our properties will therefore depend on the location, number, square footage and mix of properties we sell or rent during each fiscal period, and on prevailing market supply and demand conditions at the time we complete development of our real estate projects. Supply

and demand conditions in the real estate market in the areas in which we operate, and hence the prices we may charge for our properties, are affected by various factors outside our control, including prevailing local economic, income and demographic conditions, interest rates available to purchasers requiring financing, the availability of comparable properties completed or under development, changes in governmental policies relating to zoning and land use, changes in applicable regulatory schemes, and competition from other real estate development firms.

Sales Volume and Rate of Progress of Construction and Development

For the properties we intend to sell, we follow the percentage of completion method of revenue recognition. Under this method, our revenue from sales depends upon the volume of bookings we are able to obtain for our developments as well as the rate of progress of construction of our projects. Our bookings depend upon our ability to identify suitable types of developments that will meet customer preferences and market trends, and to market and pre-sell our projects. Construction progress depends on various factors, including the availability of labor and raw materials, the prompt receipt of regulatory clearances, access to utilities such as electricity and water, and the absence of contingencies such as litigation and adverse weather conditions. This revenue recognition policy is applicable to developments that we intend to sell and for which we have entered into a sale agreement prior to completion of construction; it is not applicable to developments that we intend to lease. In terms of our cash flows, pre-sale of a property generates positive cash flow for us in the period in which it is made. Generally, we receive 15-20% of the purchase price at the time of booking.

We will receive lease income, consisting of income from rental to third parties of our commercial real estate developments and space in our retail developments, upon completion of these projects. Our lease income will depend on the ability of our commercial and retail tenants to pay rent at the levels that we determine as well as the supply of and lease rentals for similar properties in such areas. We will also generate facilities, rental and maintenance income and other income from our hotel properties upon completion. Our revenue from hospitality operations (recognized under facilities, rental and maintenance income) will depend on the occupancy and room rates we are able to obtain for our hotels, the actions of competitors and continued growth in business and leisure tourism in India, among others.

Cost and Availability of Land

The profitability of our business is dependent on our land acquisition costs and the availability of land for our projects. Our growth is linked to the availability of land in areas where we intend to develop projects. Any government regulations that restrict the acquisition of land or increased competition for land may therefore adversely affect our operations. In addition, excess supply of land will lower the cost of the land and therefore potentially lower the market value of our projects.

The cost of acquisition of land, which includes the amounts paid for freehold rights, leasehold rights, cost of registration and stamp duty, represents a substantial part of our project cost. We acquire land from the government and governmental authorities and private parties. The lands we acquire from governmental or development authorities are generally through a tender process, wherein the highest bidder is selected for allotment.

We also acquire the right to develop properties through collaboration with other entities, which own the land. The other party is typically given the option, as consideration, to either share the sale proceeds in a pre-determined proportion depending upon the nature of the project and the location of the land or to receive a pre-determined percentage of the developed area which such party may market at its expense.

Construction Costs

Construction costs include the cost of raw materials such as steel and cement and as well as payments to construction contractors. Raw material prices, particularly those of cement and steel, can be volatile and are subject to factors affecting the Indian and international commodity markets. The timing and quality of construction of the projects we develop depends on the availability and skill of these contractors and consultants, as well as contingencies affecting them, including labor and raw material shortages and industrial action such as strikes and lockouts.

Availability of Financing on Favorable Terms

The sale of residential and commercial properties accounts for a substantial majority of our income. One of the major factors affecting demand for our residential and commercial properties is the availability of financing at reasonable rates for our potential customers. The prime lending rate (PLR) for public sector banks was between 13.75% and 14.75% as of September 30, 2008 (Source: Reserve Bank of India, Macroeconomic and Monetary Developments in 2008-2009, issued with Annual Policy Statement 2009-2010), which we believe affected sales of our properties in Fiscal 2009 as some of our potential customers were unwilling to bear the higher interest burden on home loans. While interest rates have fallen since September 2008, they remain comparatively higher than in previous years. The PLR for public sector banks was between 11.00% and 13.50% as of September 30, 2009 (Source: Reserve Bank of India, Second Quarter Review of Monetary Policy for the Year 2009-10). In addition, the availability of credit has an impact on the growth of businesses, particularly new businesses' expansion plans, and thus has an impact on the demand for new office space.

The number of property developments that a developer can undertake during any particular period is limited due to the substantial amount of capital required to fund land acquisitions and to pay the cost of construction, as well as the limited supply of land. In addition, our business requires a significant amount of working capital and long term funding. We generally finance our capital requirements from the cash flows from our business operations, issuances of equity and borrowings from banks and financial institutions. Accordingly, availability of financing on favorable terms from banks and financial institutions is critical to the development of our projects. However, due to the global economic slowdown in the two years, lending agencies tightened credit for and the interest rate increased significantly.

General Economic and Real Estate Conditions in India

All our operations are located in India and the economic condition of India, particularly south India, has a significant impact on our revenues and results of operations. Although the global economic downturn during Fiscal 2009 did not have a significant impact on our revenues, as a result of the economic environment our management deferred the launch of new projects. As a result of the deferral of launching projects during Fiscal 2009, our results of operations may be affected in future Fiscal Years if new projects do not meet the percentage completion required to recognize revenue.

Going forward, we believe that the success of our projects depends on the general economic growth and demographic conditions in India. In addition, the condition of the real estate sector in India, particularly market prices for developable land and finished units/projects, has a significant impact on our revenues and results of operations. We focus on real estate projects in the residential (including apartments, villas, mansions and integrated townships), commercial (including corporate office blocks, built-to-suit facilities, technology parks and campuses and Special Economic Zones ("SEZs")), hospitality (including hotels, resorts and serviced accommodation) and retail (including shopping malls) segments of the real estate industry.

Government Policies including Taxes and Duties

Section 80-IB of the I.T. Act provides for deduction for income tax purposes of 100% of the profits from residential projects approved before the March 31, 2007 provided the area of each dwelling unit is not more than 1,000 sq. ft. in Delhi and Mumbai or within 25 kilometers of the municipal limits of these cities and 1,500 sq. ft. in rest of India. Our projects are customized, wherever feasible, to take advantage of the benefits provided by the said provisions of the I.T. Act. The total amount of benefit we derived under Section 80-IB of the I.T. Act was Rs 286.10 million, Rs. 94.00 million, Rs. 215.00 million and Rs. 35.88 million for the five months ended August 31, 2009, Fiscal 2009, Fiscal 2008 and Fiscal 2007, respectively, which constituted 33.47%, 9.12%, 27.20% and 5.91% of our profit before tax and extraordinary items.

Section 80IAB of the I.T. Act provides for deductions in respect of profits and gains by an undertaking or enterprise engaged in development of SEZs provided that the project is notified under the Special Economic Zones Act, 2005, after April 1, 2005. A deduction of 100% of the profits and gains derived from the notified projects for a period of 10 consecutive years. The total amount of deductions we

claimed under Section 80IAB from our project Cessna Business Park was Rs. 1.72 million in Fiscal 2008. These special and other tax benefits are described in "Statement of Tax Benefits" on page 49.

In addition, a major contributing factor to support the growth of residential housing property is income tax benefits on housing loans for our customers. Currently, income tax deduction is available on the interest component (up to Rs. 0.15 million) of housing loans and a rebate of Rs. 0.10 million on the principal repayment is also available.

Securitization of Rental Receipts

Our cash flows are impacted by our practice of securitizing our rental receipts. With respect to revenue we generate from the lease of commercial, retail and hospitality projects, we enter into arrangements with banks to securitize our future rental receipts. Pursuant to these arrangements, the bank pays us a lump sum at the time we rent out the property. This lump sum payment is reflected in our cash flow statements as cash generated from financing activities. If our tenants fail to make any rental payments, we remain obligated to make the payment owed to the bank.

Significant Accounting Policies

The Financial Statements are prepared under the historical cost convention on the accrual basis of accounting and in accordance with the Indian GAAP and comply with the Accounting Standards prescribed by the Companies (Accounting Standards) Rules, 2006 to the extent applicable as adopted consistently by the Company. For a full description of our significant accounting policies adopted in the preparation of the Financial Statements, see "Financial Statements – Audited Consolidated Summary Statements – Schedule T".

Principles of Consolidation

The consolidated financial statements relate to the Company, its subsidiaries and associates. The financial statements of our subsidiaries and associates used in the consolidation are prepared up to the same reporting date as the Company. The consolidated financial statements have been prepared on the following basis:

- The financial statements of the Company and its Subsidiaries are combined line-by-line basis by adding together the book values of like items of assets, liabilities, income and expenses, after fully eliminating intra-group balances and intra-group transactions resulting in unrealized profits or losses in accordance with Accounting Standard (AS) 21 – "Consolidated Financial Statements" issued by the Institute of Chartered Accountants of India.
- In case of associates where we directly or indirectly through Subsidiaries hold more than 20% of equity, investments in associates are accounted for using equity method in accordance with AS – 23 "Accounting for Investments in Associates in Consolidated Financial Statements" issued by the Institute of Chartered Accountants of India.
- If an associate, in which we have more than a 20% stake, owns a Completed Project, an Ongoing Project, a Project Under Development or a Forthcoming Project, we recognize dividends from such associate as "other income". Changes in the intrinsic value of our investment in such associate are reflected under "share of profit from associates".
- The consolidated financial statements are prepared using uniform accounting policies for like transactions and other events in similar circumstances and are presented in the same manner as the Company's unconsolidated financial statements.
- Investments other than in Subsidiaries and associates have been accounted as per AS – 13 "Accounting for Investments" issued by the Institute of Chartered Accountants of India.
- The excess of cost to the Company of its investments in Subsidiaries over its share of the equity of Subsidiaries, at the dates on which the investment in the Subsidiaries were made, is recognized as 'Goodwill', being an asset in our consolidated financial statements. Where the share of the equity in the Subsidiaries as on the date of investment is in excess of cost of investment of the Company, it is recognized as a capital reserve and shown under the head Reserves & Surplus.

Revenue Recognition

We recognize revenue relating to the sale of residential or commercial projects based on the percentage completion method. The percentage completion method is applied on a capital basis in each accounting period to the current estimates of contract revenue and contract costs, when the stage of completion of each project reaches a significant level, which is estimated to be at least 30% of the total estimated costs of the project. We periodically review and revise estimates of saleable area and costs. The effect of such changes to estimates is recognized in the period such changes are determined. In case of joint development projects revenue recognition is restricted to our percentage share of the underlying real estate development projects.

Revenue from contractual projects undertaken is recognized on the basis of independent certification obtained in terms of the contract.

Facility charges, management charges, rental and maintenance income are recognized on accrual basis.

Inventories

Stock of units in Completed Projects and work-in-progress are valued at lower of cost or net realizable value. Cost is the aggregate of land cost, materials, contract works, direct expenses, provisions and apportioned borrowing costs and net of material scrap receipts.

Inventory also comprises stock of operating supplies and is carried at the lower of cost and net realizable value. Cost includes all expenses incurred in bringing the goods to their present location and condition and is determined on a weighted average basis. Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and to make the sale.

Fixed Assets

Fixed assets are stated at cost, including expenses incurred to bring the asset to its present condition. Cost includes all costs relating to the acquisition and installation of the fixed assets including interest on borrowings for the project/fixed asset incurred up to the date the asset is put to use. Any cost incurred relating to settlement of claims regarding titles to the properties is accounted for and capitalized as incurred, wherever the asset is held. Assets identified as impaired are carried at net realizable value.

An asset is treated as impaired when the carrying cost of the assets exceeds its recoverable value. An impairment loss is charged to our profit and loss account in the year in which an asset is identified as impaired. The impairment loss recognized in prior accounting periods is reversed if there has been a change in the estimate of recoverable amount.

Depreciation and Amortization

Depreciation on fixed assets is provided on the written down value method in accordance with the rates specified in Schedule XIV to the Companies Act, 1956, except for assets the value of which are less than Rs. 5,000, which are fully depreciated in the year of purchase.

The cost of leasehold land is amortized over the period of lease.

Borrowing Cost

Borrowing cost attributable to the acquisition or construction of a qualifying asset is capitalized/inventorised as part of the cost of that asset. Other borrowing costs are recognized as an expense in the period in which they are incurred. Income earned on temporary deployment of funds are credited to the borrowing costs.

Income

Income from operations

We report our income from operations under the following segments: (i) income from residential and commercial projects; (ii) income from contractual projects; (iii) facilities, rental and maintenance income; and (iv) property rental income.

Income from residential and commercial projects

We generate income from the sale of residential projects (including plotted developments), commercial projects (including corporate office blocks, facilities, technology parks and campuses and the delivery of project and construction management services.

Income from contractual projects

Income from contractual projects consists of revenue from the development of commercial projects (including SEZs and built to suit office space). The revenue we generate from this segment varies significantly across Fiscal years because it depends on particular customers' requests.

Facilities, rental and maintenance income

Facilities, rental and maintenance income consists of revenue from the operation of malls and other retail space and the operation of hospitality establishments, lease of malls, hospitality establishments and retail projects. We expect our facilities, rental and maintenance income to become increasingly significant.

Property rental income

We receive property rental income for the lease of commercial projects and fit out for office projects. We expect our property rental income to become increasingly significant.

Other income

Our other income primarily consists of income from the delivery of property maintenance services, for residential, commercial, retail and hospitality projects, profits from the sale of fixed assets, sub-lease rental income, share of profit from firms in which we have a minority interest, commission income for the lease of office space, interest income and dividend income.

Gain on derivative transaction

Gain on derivative transaction consists of income we earned as a result of entering into certain foreign currency derivative transactions. Although we are not exposed to risks of foreign currency fluctuations, we entered into certain foreign currency derivative contracts in order to potentially generate income which could be used to offset our interest expenses. Losses on these contracts are recognized as finance charges. We do not have any existing foreign currency derivative transactions and do not intend to enter into such transactions in the future.

Expenditure

Cost of residential and commercial projects: Cost of residential and commercial projects consists of expenses relating to the sale of units/projects, including, among other things, the cost of acquisition of land and the cost of acquisition of development rights, cost of materials (primarily steel and cement), cost of services such as architects, contract labor and finance charges incurred for our projects.

Cost of contractual projects: Cost of contractual projects includes costs incurred for developing built to suit projects.

Facilities operating expenses: Facilities operating expenses include costs incurred for operation of malls, hospitality establishments and retail space, including labor costs, mall management systems and maintenance expenses.

Employee cost: Employee cost includes salaries, benefits such as provident fund payments, gratuity payments and other payments to our employees.

General and administrative expenses: General and administrative expenses include costs incurred for general office administration, directors' remuneration, audit fees, repair and maintenance charges and other administrative costs.

Selling expenses: Selling expenses include costs incurred for advertising expenses including retainer fees for advertising agencies, travel expenses, and other sales and marketing expenses.

Other expenses: Other expenses primarily include lease expenses for property which we sub-lease and commission expenses for agents.

Finance charges: Finance charges include interest charges payable by us for short term and long term loans including working capital loans, interest charges on loans for purchase of certain equipment and vehicles, interest on loans for which we have securitized our rental receipts, and financial charges such as processing fees for loans and bank guarantees. In addition, finance charges include losses on foreign currency derivative transactions. Although we are not exposed to risks of foreign currency fluctuations, we entered into certain foreign currency derivative contracts in order to potentially generate income which could be used to offset our interest expenses. Losses on these contracts are recognized as "loss on derivative transaction" under finance charges and gains are recognized as "gain on derivative transaction". We do not have any existing foreign currency derivative transactions and do not intend to enter into such transactions in the future.

Depreciation: Depreciation including depreciation of building, plant and machinery, furniture, fixtures, motor vehicles, computers and certain other items used in construction such as shuttering and scaffolding and amortization of leasehold rights.

Taxation

Income taxes are accounted for in accordance with AS-22 issued by the ICAI on "Accounting for Taxes on Income". Taxes comprise current tax, deferred tax and fringe benefit tax.

Provision for current taxes is made at current tax rates after taking into consideration the benefits admissible under the provisions of the Income Tax Act, 1961. The major benefit we take advantage of is under Section 80-IB of the Income Tax Act, 1961 as some of our residential housing projects meet the criteria including of size prescribed by the statute. However, in cases where our liability for current taxes as calculated is less than 15% of our book profit (as defined by statute), we are liable to pay the Minimum Alternate Tax, in accordance with Section 115JB of the Income Tax Act, 1961.

Deferred taxes arise from timing differences between our book profits and our taxable profits that originate during an accounting period and which can be reversed in subsequent periods. Deferred taxes are measured using the tax rates and laws that have been enacted as of the date of financial statements in which they are recorded. We provide for deferred tax liability/assets on such timing differences subject to prudent considerations. Significant sources of deferred tax liabilities and assets include the timing difference in recording depreciation and admissibility of other expenses under Indian GAAP and under the Income Tax Act, 1961.

Quantitative and qualitative disclosure about market risk

Interest Rate Risk

Our financial results are subject to changes in interest rates, which may affect our debt service obligations. Our long-term Rupee-denominated debts, which bear interest at floating rates linked with prime lending rates of the respective lenders, as determined from time to time was Rs. 9,575.83 million as at August 31, 2009.

Upward fluctuations in interest rates increase the cost of both existing and new debts. An increase in interest rates of 1% on our existing floating rate debts would increase our annual interest charges by approximately Rs. 95.76 million based upon the long-term and short-term loans outstanding as at August 31, 2009.

Commodity Price Risk

We are exposed to market risk with respect to the prices of raw material and components used in our projects, particularly steel and cement. The costs for these raw materials and components are subject to fluctuation based on commodity prices. The cost of components and various small parts sourced from outside manufacturers may also fluctuate based on their availability from suppliers. In the normal course of business, we purchase these raw materials and components either on a purchase order basis or pursuant to supply agreements. We do not enter into fixed price or forward contracts in relation to procurement of raw materials.

Seasonality

Our operations may be adversely affected by difficult working conditions during monsoons that restrict our ability to carry on construction activities and fully utilize our resources. However, we generally do not believe that our business is seasonal.

Inflation

In recent years, although India has experienced minor fluctuation in inflation rates, inflation has not had material impact on our business and results of operations.

SECTION VI – LEGAL AND OTHER INFORMATION

OUTSTANDING LITIGATION AND MATERIAL DEVELOPMENTS

Cases filed against our Company

Civil litigation

1. A civil suit bearing O.S. No. 1958/2007 has been filed by Gaffer Baig seeking permanent injunction against Chaitanya Projects Private Limited before the City Civil Court, Bangalore. Our Company is the second defendant in the suit. The contention of the plaintiff is that the defendants have encroached on the property belonging to the plaintiff, situated in Sy. No. 136 (old 122) of Nagondanahalli Grama, K.R. Puram Hobli, Bangalore to an extent of 2.35 acres while constructing a compound wall and developing layouts of 'Prestige Glen Morgan', developed by our Company. However our Company has maintained, in its written statement, that no encroachment had occurred. Our Company has further alleged that the new survey numbers were allotted based on a sketch prepared by the survey department, which failed to serve notice on the defendants as required under law. An interim order was passed by the Civil Judge (Junior Division), Bangalore Rural District on this matter on February 22, 2008. Accordingly, the interim application filed by the plaintiff seeking interim injunction to restrain the defendants from constructing unauthorised walls on the suit property was dismissed. An interim application filed by our Company seeking exclusion of our Company's name from the list of defendants and interim applications filed by defendant 3, Castlewood Investments seeking restoration of status quo ante and status quo were also dismissed. Our Company has preferred an appeal before the Vacation District and Sessions Judge, Bangalore Rural on the above order, seeking exclusion of our Company's name from the list of defendants in O.S. 1958/2007 and setting aside of the interim order dated February 22, 2008. The matter is pending for further arguments. Appeals (MA 74/2008 and MA 75/2008) have also been preferred by defendant three for restoration of status quo ante and status quo on the matter. The civil suit and the appeals are pending.
2. A civil suit bearing O.S. No. 277/2008 has been filed by Ullas K.G and others against Castlewood Investments and others before the Principal Civil Judge, Bangalore Rural District, Bangalore. Our Company is the second defendant in the suit. The contention of the plaintiff is that they are the joint owners of the property located at site bearing Sy. No. 79, Nagondanahally, Whitefield, which forms part of 'Glen Morgan' and they have erected a fence around the property. The plaintiff has also applied for an interim injunction to restrain the defendants from carrying out any illegal construction of compound walls on the suit property. The matter is posted for filing of written statement by the defendants. The matter is pending.
3. A civil suit bearing O.S. No. 3363/1996 has been filed by Westminster Owners' Association against India Financial Association before the City Civil Court, Bangalore. Our Company is the third defendant in the suit. The suit has been filed for declaration and cancellation of a sale deed executed by India Financial Association in favour of the second defendant Scottsdale Hotels and Resorts Private Limited. The sale deed pertains to sale of property forming part of the open courtyard on the ground floor of Westminster apartments for purposes of constructing a hotel. The plaintiff has objected the construction on the grounds that the open courtyard forms part of the common area made available to the apartment owners. Our Company, being responsible for the construction work, in the written statement, has stated that the open courtyard does not form part of the common area provided to the apartment owners. Earlier, Westminster Owners' Association had also filed a writ petition bearing W.P. No. 27013/1993 before the Karnataka High Court against the City Corporation of Bangalore and others, praying for removal of the unauthorised construction in the courtyard, which was duly dismissed. The matter is pending.
4. Civil suits bearing O.S. No. 967/2006 have been filed by Soumitro Shome and others against our Company before the City Civil Court, Bangalore. The plaintiffs have filed the suits seeking to restrain the defendants from carrying on any construction in the private garden area

of the plaintiff's residential property located at numbers eight and nine on the ground floor of south block, Prestige Langleigh, second phase, Whitefield, Bangalore. Further, the plaintiffs allege that our Company intends to demolish the compound wall to the south of Prestige Langleigh apartments and use the space and the adjoining municipal road as car parks for Prestige Palms, located to the south of Prestige Langleigh. The Plaintiffs have also sought for an interim injunction to restrain our Company from carrying on the above activity. Our Company has filed a written statement on September 16, 2006 denying the allegations made by the plaintiff. On an application made by the plaintiff, the court granted an *ex-parte* temporary injunction on July 22, 2006 restraining our Company from disturbing the peaceful possession of the private garden area and from providing car parking area in the pathway provided on the south of Prestige Langleigh apartments by converting it to a car park.  - (a) A civil suit bearing O.S. No. 1646/2004 has been filed by R. P. Umadevi against R.P. Shivashankar and others before the Civil Judge (Senior Division), Bangalore. Prestige Constructions is the third defendant in the suit. The contention of the plaintiff is that the other defendants, without the

knowledge of the plaintiff, executed a sale deed in favour of our Company for sale of ancestral property belonging to the HUF, situated at Sy. Nos. 58/3, 58/4, 60/2 and 27/27, Vishwanathapura Village, Hesaraghatta Hobli, Bangalore for which no partition was effected. In the written statement filed by Prestige Constructions, it has been affirmed that the plaintiff was fully informed of the execution of the sale deed and that various caveats were served on the plaintiff, which was duly acknowledged. The matter is pending for hearing the defendants. Prestige Constructions has also filed an interim application on the matter, challenging the maintainability of the suit since the plaintiff had failed to pay requisite court fees. The matter is pending.

- (b) A civil suit bearing O.S. No. 264/2005 has been filed by Girijamma and the others against R.C. Basavarajaiah and others for declaration of ownership of suit property and setting aside of sale deed dated October 5, 1994, December 31, 1994 and May 29, 1995 and the conversion certificates dated January 17, 1995 and April 18, 1995 before the First Additional Civil Judge (Senior Division), Bangalore Rural District, Bangalore. Rezwan Razack, Anjum Razack and Prestige Constructions are the seventh, eighth and ninth defendants respectively. The contention of the plaintiff is that defendants one, two and three colluded with each other and sold to defendants six, seven, eight and nine, the joint family property measuring 3 acres situated at Sy. No. 60/2 at Addevishwanathapura, Hesarghatta Hobli, Bangalore North. The plaintiffs have filed an interim application seeking temporary injunction to restrain defendants six to nine from altering the nature of the suit property. Defendants six to nine have opposed the interim application on grounds that the plaintiffs have thrice failed previously to make a prima facie against the defendants and in proving balance of convenience in their favour for grant of an interim injunction. The defendants have also filed an interim application to the effect that the valuation of the suit is inaccurate. The matter is pending.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of GoI and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. As per current foreign investment policies, foreign investment in the real estate sector is permitted under the automatic route in relation to investments by NRIs.

By way of Circular No. 53 dated December 17, 2003, the RBI has permitted FIIs to subscribe to shares of an Indian company in a public offer without the prior approval of the RBI, so long as the price of the equity shares to be issued is not less than the price at which the equity shares are issued to residents. Transfers of equity shares previously required the prior approval of the FIPB. However, vide a RBI circular dated October 4, 2004 issued by the RBI, the transfer of shares between an Indian resident and a non-resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the foreign direct investment (FDI) Policy and transfer does not attract the provisions of the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 1997 (ii) the non-resident shareholding is within the sectoral limits under the FDI policy, and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI.

Foreign Investment in the Real Estate Sector

Foreign investment in the real estate sector is regulated by the relevant provisions of the FDI Manual (“**FDI Manual**”), the Foreign Exchange Management (Transfer of Issue of Security by a person Resident Outside India) Regulations, 2000 (“**FEMA Regulations**”), and the relevant Press Notes issued by the Secretariat for Industrial Assistance, GoI.

FDI Manual

Item No. 9 of Annexure II to the said FDI Manual outlines the sectoral caps in relation to ‘Housing and Real Estate’. The said annexure, specifies the following as activities under the automatic route in which Investment are permitted only by NRI’s:

- a. Development of serviced plots and construction of built up residential premises
- b. Investment in real estate covering construction of residential and commercial premises including business centres and offices
- c. Development of townships
- d. City and regional level urban infrastructure facilities, including both roads and bridges
- e. Investment in manufacture of building materials, which is also open to FDI
- f. Investment in participatory ventures in (a) to (e) above
- g. Investment in housing finance institutions, which is also open to FDI as an NBFC.

FEMA Regulations

The FEMA Regulations, state that the investment cap in the real estate on the activities in the ‘Housing and Real Estate’ is permit investment to the extent of 100% only by NRIs in the following specified areas:

1. Development of serviced plots and construction of built up residential premises
2. Investment in real estate covering construction of residential and commercial premises including business centres and offices
3. Development of townships
4. City and regional level urban infrastructure facilities, including both roads and bridges
5. Investment in manufacture of building materials, which is also open to FDI
6. Investment in participatory ventures in (a) to (c) above
7. Investment in housing finance institutions, which is also open to FDI as an NBFC.

However, all other forms of FDI are prohibited in relation to Housing and Real Estate Business.

Press Note 2 of 2005

The law in relation to investment in the real estate sector has further been modified vide press note 2 of 2005, bearing No. 5(6)/2000-FC dated March 3, 2005. The said press note has also amended certain press notes which have been issued earlier, in the same field.

Under the said press note 2, FDI up to 100% under the automatic route is allowed in ‘townships, housing, built up infrastructure and construction-development projects (which would include, but not be restricted to, housing, commercial premises, hotels, resorts, hospitals, educational institutions, recreational facilities, city and regional level infrastructure)’, subject to the compliance with the following requirements:

- a. Minimum area to be developed under each project is as under
 1. In case of development of serviced housing plots, a minimum land area of 10 hectares.
 2. In case of construction-development projects, a minimum built up area of 50,000 sq. mts.
 3. In case of a combination project, anyone of the above two conditions would suffice
- b. Minimum capitalization of US\$ 10 million for wholly owned subsidiaries and US\$ 5 million for joint ventures with Indian partners. The funds are to be brought in within six months of commencement of business of the Company.
- c. Original investment is not to be repatriated before a period of three years from completion of minimum capitalization. The investor is to be permitted to exit earlier with prior approval of the Government through the FIPB. At least 50% of the project must be developed within a period of five years from the date of obtaining all statutory clearances. The investor would not be permitted to sell undeveloped plots.

Therefore applicable law only permits investment by an NRI under the automatic route in the ‘Housing and Real Estate’ sector up to 100% in relation to townships, housing, built-up infrastructure and construction-development projects (which would include, but not be restricted to, housing, commercial premises, hotels, resorts, hospitals, educational institutions, recreational facilities, city and regional level infrastructure) and additionally permits up to 100% FDI in the ‘Housing and Real Estate’ subject to compliance with the terms provided in press note 2 of 2005.
