One of the Promoter Group Companies, namely SRS Real Infrastructure Limited (earlier known as Manu Finlease Limited) came with an IPO in the year 1995. After the public issue, Securities and Exchange Board of India (SEBI), on the grounds of alleged malpractices in the public issue ordered investigations to be conducted to ascertain the truth of allegations. Kapoor and Mrs. Ritu Garg were debarred from accessing and being associated with the capital market for a period of 5 years (i.e., upto November 28, 2007). In this regard, an appeal was filed against the said order before the Securities Appellate Tribunal (SAT) in 2003. The appeal was dismissed by the SAT vide order dated October 27, 2003. Further, an appeal was filed before the Supreme Court. The Supreme Court vide its order dated April 18, 2006 reduced the period of debarment by approximately one year and one month (i.e. upto October 31, 2006). Manu Finlease Limited, Anil Kumar Jindal, J.K. Garg and P.K. Kapoor and Ritu Garg will not access or be associated with the capital market upto 31st October, 2006. The civil appeals are disposed of accordingly. No order as to costs.”

Presently, none of the Promoters or the Promoter group entities is debarred from accessing and being associated with the capital markets. For further details please refer “Other Regulatory and Statutory Disclosures” page 377 of this Draft Red Herring Prospectus.

3. In case of proposed public issue of one of the erstwhile Group Companies, the SEBI has withdrawn its acknowledgement card in 1996.

However, SEBI subsequently withdrew the said acknowledgement card stating that the Draft Prospectus filed by Bansla Finlease Limited did not clearly bring out the irregularities in the public issue of Manu Finlease Limited (now SRS Real Infrastructure Limited), a group company. Bansla Finlease Limited did not proceed with the public issue subsequent to filing of Draft Prospectus with the Registrar of Companies, NCT of Delhi & Haryana.

6. The Company is yet to receive approval for setting up of its jewellery manufacturing facility at Noida Special Economic Zone. Any delay or failure to obtain the requisite approval may adversely affect the business strategy of the Company.

The Company is yet to receive approval for setting up of its jewellery manufacturing facility at Noida Special Economic Zone. The Company has filed an application dated June 1, 2010, with the Development Commissioner, Noida Special Economic Zone, Noida, for setting up a jewellery manufacturing facility. The Company requires 1,800 sq. mt. area for setting up of said facility whereas, presently the Company has applied for 600 sq. mt. area. Any delay or failure in obtaining the requisite approval or not obtaining the approval for the required area, may adversely affect the business strategy of the Company. For further details please refer the sections titled “Objects of the Issue” and “Government and Other Approvals” beginning on page 37 and 332 of the Draft Red Herring Prospectus.

7. The Company may require a number of approvals, licenses, registrations and permits for its business(s) and the failure to obtain or renew them in a timely manner may adversely affect its operations.

The Company requires a number of approvals, licenses, registrations and permits for its business(s). Additionally, it may need to apply for renewal of approvals which expire, from time to time, as and when required in the ordinary course. For more information, see *“Government and Other Approvals”* on page 332.

Further, the Company has applied for certain approvals and not received the same. Also, the Company has not applied for certain registrations. These include approvals in relation to its Cinemas, Food Courts / Restaurants Retail business and Jewellery business. For details in relation to the same, see *“Government and Other Approvals”* on page 332.

Furthermore, the government approvals and licenses are subject to various conditions. If it fails to comply, or a regulator claims that the Company has not complied with these conditions, its business, financial position and operations would be materially adversely affected. For more information, see the section titled *“Government and Other Approvals”* on page 332.

8. The Statutory Auditors of the Company have qualified their Report for the financial year ended March 31, 2010, stating that there has been a slight delay in few cases in depositing undisputed statutory dues with the appropriate authorities.

As per the Report of Statutory Auditors of the Company in their financials for the year ended March 31, 2010, there is a qualification that there has been a delay in few cases in depositing undisputed statutory dues and also in respect of Fringe Benefit Tax (Rs.0.39 mn.) as on March 31, 2009 and Advance Tax (Rs. 1.45 mn.) as on March 31, 2008 with the appropriate authorities. However, the Auditors in their Report have also stated that the Company has been generally regular in depositing with appropriate authorities undisputed statutory dues and delay in only for few cases.

- 9. The Company may face difficulties in executing strategy including its expansion plans for setting up of new cinemas, food courts / restaurants, retail stores and jewellery manufacturing facility and there can be no assurance that its planned capital expenditures will result in growth and / or additional profitability for the Company.**

The proposed expansion in operations requires significant capital expenditures. For instance, the Company is proposing to set up 15 new cinemas with 51 screens, 29 new retail stores, 33 new food courts / restaurants and an export oriented jewellery manufacturing facility out of the proceeds of this issue.

Delays in execution / implementation of any of the projects could result in loss or delayed receipt of earnings, increase in financing costs and the failure to meet profit and earnings budgets may require the Company to reschedule or reconsider its planned capacity expansions and accordingly would have an adverse effect on the Company's financial position and its operations. Further, in case the Company is unable to utilize fully its expanded project capacities, its operations could be adversely affected. There is no assurance that the present and planned initiatives will yield the expected or desired benefits, in terms of process efficiencies or an expansion in the business.

- 10. The operations of the Company are subject to risks, including disruptions in or lack of infrastructure such as electricity, water supply and IT Systems, which could increase the operating costs or interrupt its operations.**

The Company currently owns and operate 9 cinemas with 23 screens, 27 retail stores, 13 food courts / restaurants and 2 jewellery retail showrooms and 1 banquet in northern India. As the Company's operations are exposed to disruptions in infrastructural facilities such as electricity and water supply to such units, which could require it to incur additional costs.

The Company relies extensively on its information technology systems to provide connectivity across its business functions through its software, hardware and connectivity systems. Any disruptions in the functioning of the IT system could affect its ability to track, record and analyze the merchandise / products that the Company sells. Further, this may affect its operations, including, among others, its ability to process shipments of goods, process financial information or credit card transactions, deliver products or engage in similar activities.

- 11. The Company operates in a competitive business environment. Competition from existing players and new entrants and consequent pricing pressures may adversely affect its business, financial condition and operations.**

The Company faces competition in all the segments it operates including cinema exhibition, food and beverages, retail stores and jewellery business. Some of its competitors may have greater financial resources than the Company and may be in a better position to invest in new projects or to sustain losses from such projects. The Company may also face competition from global enterprises.

In cinema exhibition segment, the Company faces competition from alternative entertainment channels including, television, film DVDs, radio, internet and theatre, hand-held equipments etc. These other forms of entertainment compete with cinemas for the discretionary spending of patrons and for the ad-spend of advertisers. The retail jewellery industry is highly fragmented and controlled by the unorganized sector which may offer their products at highly competitive rates.

In the event that the Company is unable to compete effectively, it may lose some of its revenue and this may affect its financial performance.

- 12. The Company has not registered some of the brands / trade marks. As a result, the Company may have lesser recourse to initiate legal proceedings to protect the brands.**

The Company presently holds five registered trademarks. The trademarks named SRS WORLD (Class 41); SRS world (Class 42); and SRS CINEMAS (Class 41) are registered in the name of SRS Commercial Company Limited (erstwhile name of the Company). The application for change of name of the Company to SRS Limited has been filed with the Registrar of Trademark on December 15, 2009. Further, the registered trademark named SRS Value Bazaar (Class 35) and SRS club (Class 41) are

registered in the name of SRS Entertainment Limited (erstwhile name of the Company). The application for change of name of the Company to SRS Limited, for said registered trademark has been filed with the Registrar of Trademark on May 12, 2010.

The Company has applied for registration of 36 trademarks, which are pending for registration. Further, the Company is not the sole & exclusive owner of the aforesaid trademarks, as the Company has issued a “No Objection Certificate” in favour of the other group companies, who have also applied for / registered for some of the similar trademarks, though under different classes. Therefore, the group appears to have conflicts to the extent of similar / over-lapping registration of trademarks.

The Company may have a lesser recourse to initiate legal proceedings to protect the brands / trademarks. For further details, please refer section titled “**Goverment and Other Approvals**” on page 332 of the Draft Red Herring Prospectus.

The Company’s success with its brands depends, partly on its ability to protect and defend its current and future intellectual property rights relating to such brands / trademarks. The Company is also in the business of building retail and entertainment brands and the failure to obtain the registration may have an adverse impact on its business.

13. The operating results of Company’s business depend on the effectiveness of the Company’s marketing and advertising programs.

Revenues in the business segment, where the Company operates, are influenced by brand marketing and advertising. The Company’s marketing and advertising campaign may not be successful and the Company may, therefore, fail to attract new customers or expand its customer base, which may materially affect its financial performance.

14. Any inability to manage the rapid growth could disrupt the business of the Company.

The Company’s business has experienced high growth in recent periods. The total sales of the Company have grown at a CAGR of 171.04% from FY 2008 to FY 2010. However, the future growth plans of the Company can place significant demands on its management and other resources. There can be no assurance that the Company will be able to execute its business strategy on time and within the stipulated budget or that it will meet the expectations of the customers and sustain the high growth rates in future.

15. The business of the Company depends on its ability to attract customers and maintain consistency in customer service.

There is huge demand for personnel having relevant experience in the food and beverages and retail industry. The Company’s ability to maintain high standards of customer service in its stores is critical to its success. This will depend on its ability to hire the right personnel and also train the new personnel in the implementation of its processes effectively. In addition, the attrition rate of employees is high in the food and beverages and retail industry and in the event the Company loses employees at a higher rate or it cannot recruit fresh talent, this may adversely affect its financial performance.

16. Any adverse impact on the title / ownership rights / development rights of the landlords (including the Promoters / Promoter Group) from whose real estate premises the Company would carry out its operations may impede the Company’s effective operations of its cinemas/ bazaars / restaurants in the future.

With a view to expand the Company’s presence into several cities, the Company may acquire a few properties for some of the proposed projects, by entering into transactions in the nature of long-term lease or sub-lease or leave and license or conducting basis and / or other contractual arrangements basis with third parties and / or its Promoters or the Promoter Group Companies. Any adverse impact on the title / ownership rights / development rights of its landlords (including its Promoters or the Group Companies) from whose real estate premises the Company proposes to operate its Cinemas / Food Courts / Restaurants / Retail Stores may impede the Company’s operations.

17. The Company is dependent on a number of key personnel and the loss of such persons or its inability to attract or retain key personnel in the future, could adversely affect the business operations of the Company.

The success of the Company depends on the continued services and performance of its team members, including the Chairman, Managing Director, other key employees and its other Promoters. Demand for senior management personnel in its various business segments, is intense and it may not be able to retain the existing senior management personnel, attract senior management personnel of similar capabilities / skill-sets or retain new senior management personnel in the future. The loss of the services of the senior management team or other key personnel could adversely affect the business and operations and financial position of the Company.

18. The Company is promoted by first generation entrepreneurs.

The Promoters of the Company are first generation entrepreneurs and in spite of having a key executive team to support, the Company's business may suffer if they are not able to manage the operations of the Company and the challenges which it may face on account of the growth and competition in different segments of business.

19. The insurance coverage taken by the Company may not be adequate to protect against certain business risks and this may have an affect on the business operations.

The Company's insurance coverage is likely to cover all normal risks associated with the operations of the business but there can be no assurance that any claim under the insurance policies maintained by it will be honored fully, in part or on time. To the extent that the Company suffers loss or damage that is not covered by insurance or exceeds its insurance coverage, the Company's financial performance and cash flow may be adversely affected.

20. The Company has acquired a commercial property situated at DLF Tower, Jasola, New Delhi, under an Agreement to Sell. The Seller has not executed any Sale Deed for the same. Further, the Company has not registered the property documents with competent authorities or stamped the same in accordance with the applicable Stamp Act.

The Owner of the commercial property situated at DLF Tower, Jasola, New Delhi has entered into an Agreement to Sell dated December 14, 2007 with the Company for the sale of the said property. The Seller has not executed any Sale Deed with the Company. The Company has not registered the property documents with competent authorities nor has the same been stamped in accordance with the applicable Stamp Act. Consequently, the said Agreement to Sell may not be admissible as evidence in a court of law, unless the defects are rectified. The Company has presently not undertaken any steps to rectify the defects in the said Agreement to Sell. For details please refer "**Business Overview**" on page 82.

21. The lease agreements pertaining to certain immovable properties are not adequately stamped and registered in accordance with the applicable Stamp Act and Registration Act, 1908.

The lease documents pertaining to the various properties have not been registered under the provisions of the Registration Act, 1908 and have not been stamped in accordance with the applicable Stamp Act. Consequently, the said lease deeds may not be admissible as evidence in a court of law, unless the defects are rectified. The Company has presently not undertaken any steps to rectify the defects in the lease deeds. For details please refer to "**Business Overview**" on page 82.

22. The Company has had negative cash flows in the past three years, as stated in the table below:
(in Rs. millions)

Particulars	Year Ended March 31, 2010	Year Ended March 31, 2009	Year Ended March 31, 2008
Net cash from operating activities	(955.85)	(240.71)	144.65
Net cash used in investing activities	919.79	(507.49)	(1,674.83)
Net cash used in financing activities	194.27	672.42	1,543.83

The Company's cash flows from operating activities have been negative in the financial years ended March 31, 2009 and 2010 mainly because of increase in the Company's operations which have resulted in substantial increase in working capital required by it.

23. The Company is subject to restrictive covenants under financing arrangements provided to Company by the lending Banks.

The Company has entered into a financing arrangement with State Bank of India and other consortium Banks. Pursuant to the financing arrangement, the consortium banks have imposed on the Company certain restrictive covenants such as, to obtain prior permission, for change in capital structure, formulate any scheme of amalgamation or reconstructions, implement any scheme of expansion / diversification / modernization other than incurring routine capital expenditure; to make any corporate investments or investment by way of share capital or debenture or lend or advance funds to or place deposits with any other concern; enter into borrowing arrangement either secured or unsecured with any other bank, financial institutions and firm or otherwise; undertake guarantee obligations on behalf of any other firm; declare dividend for any year out of the profits relating to that year or of the previous years, withdraw loans / deposits secured from Directors and Promoters of the firm; give guarantee on behalf of any third party and dispose-off whole or substantially the whole of the undertaking. The above conditions imposed by State Bank of India and other Consortium Banks for financing arrangement could adversely affect the Company's ability to conduct its business and operations. The Company has obtained consent from State Bank of India, State Bank of Bikaner and Jaipur, Bank of India, Canara Bank and Oriental Bank of Commerce for the proposed IPO. The Company is yet to receive consents from few of the banks.

For further details see "*Financial Indebtedness*" on page 263. Failure to meet any of the conditions may have an adverse effect on the business and operations of the Company.

24. State Bank of India has appraised (in consortium arrangement) an enhancement in working capital limit by Rs. 1,000 mn. (Rs. 800 mn. for non-fund based and Rs. 200 mn. for fund based), out of which it has sanctioned Rs. 500 mn. As on date of filing of this Draft Red Herring Prospectus, the remaining amount of Rs. 500 mn. is not tied up with any Bank. If the Company is not able to tie-up the remaining portion of funds, then it may have an adverse impact on the business operations of the Company.

Earlier, the Company has been availing working capital limits (including fund based and non-fund based) of Rs. 950 mn., from consortium banks. State Bank of India, South Extension, Part I, New Delhi, has appraised an enhancement in working capital limit by Rs. 1,000 mn. (Rs. 800 mn. for non-fund based and Rs. 200 mn. for fund based). Out of which, SBI has sanctioned a working capital limit of Rs. 500 mn. (Rs. 300 mn. for non-fund based and Rs. 200 mn. for fund based), vide letter dated May 22, 2010. The Company has already started using funds from the sanctioned limit. However, the Company is yet to tie-up Rs. 500 mn. (non-fund based) being the balance portion of the appraised amount. The amount of the future dividend payments, if any, will depend upon the future earnings, financial condition, cash flows, working capital requirements and capital expenditures of the Company. There can be no assurance that the Company will be able to pay dividends.

28. The Promoters of the Company may have the ability to determine the outcome of any shareholder resolution.

The Promoters and Promoters Group will continue to be the largest shareholders' group, holding 74.04% (approx.) of post-issue equity capital of the Company. 29. The Company's funding requirements and the deployment of the proceeds of the Issue are based on current business plan and management estimates and have not been independently appraised.

The Company's funding requirements and the deployment of the proceeds of the Issue are based on current business plan and management estimates and have not been appraised by any bank or financial institution. The estimates of the Company in respect of requirement of funds may change.

30. The Company has not entered into any lease / purchase agreement for premises and have not placed orders for the machinery and equipments required for the proposed projects Any delay in finalization of premises or placement of order for plant and machinery may have an adverse impact on the Company's operations.

The Company has not entered into lease / purchase agreement for the proposed projects, which the Company proposes to fund from the proceeds of the Issue. Non-availability of premises at the desired locations / areas and delay in placement of orders for plant and machinery for proposed projects may adversely affect the operations of the Company. Out of the total cost of the project, the management's estimates to the extent of Rs. 126.60 mn. (comprising 5.99% of the total project cost) are not based on quotations from vendors. For details please refer to "*Objects of the Issue*" on page 37 of this Draft Red Herring Prospectus.

31. The deployment of the Issue proceeds is entirely at the discretion of the Issuer and is not subject to any monitoring by an independent agency.

The Company has not appointed any independent monitoring agency to monitor the utilization of the proceeds raised from this Issue. The Issue proceeds will be utilized at the sole discretion of the Board of Directors of the Company. Pursuant to Clause 49 of the listing agreement, the Board has empowered the Audit Committee to monitor the utilization of the proceeds of the Issue. For further details please refer to "*Objects of the Issue*" on page 37 of this Draft Red Herring Prospectus.

32. Some of the Promoter Group Companies have objects conflicting with the business of the Company.

Some of the Promoter Group companies have objects similar to the Company and are of conflicting in nature. The Company may face competition in case these Promoter Group Companies decide to operate in the same line of business.

33. Any future issuance of Equity Shares may dilute prospective investors' shareholding and sales of Equity Shares by Promoters or other major shareholders may adversely affect the trading price of the Equity Shares.

Any future equity issuances by the Company may lead to the dilution of Investors' shareholdings in the Company. Any future equity issuances by the Company or sales of Equity Shares by the Promoters or other major shareholders may adversely affect the trading price of the Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares of the Company.

34. There is no guarantee that the Equity Shares of the Company will be listed on the Stock Exchanges in a timely manner or at all.

In accordance with Indian law and practice, permission for listing of the Equity Shares will not be granted until after those Equity Shares have been issued and allotted. Such approval will require all other relevant documents authorizing the issue of the Equity Shares to be submitted. Any failure or delay in obtaining the approval would restrict the ability of investors to dispose of the Equity Shares.

SEGMENT SPECIFIC RISKS

A. CINEMA EXHIBITION

35. The business of the Company is seasonal and its results of operations may fluctuate from quarter-to-quarter.

Historically, the revenues of the Company have been higher during the first half of the fiscal year due to summer vacations and release of big budget Indian movies during this period. As a result of this, the quarter-to-quarter financial performance of the Company may not be comparable or a meaningful indicator of its future performance.

36. The business of the Company is dependent on the popularity of the films it exhibits.

The Company's ability to attract patrons to its cinemas is dependent on the popularity of the films it displays on its screens. The film industry may not be in a position to produce and release blockbuster films or films with widespread audience appeal on continuous basis. If the films, the Company exhibits are not popular, the number of its patrons will decline, which would adversely affect the business and financial performance of the Company.

37. The Company has no control over distributors of the films and this business may be adversely affected if its access to motion pictures is limited or delayed.

The Company relies on distributors of motion pictures. Major motion picture distributors normally offer and license films to exhibitors, including the Company, on a film-by-film and Cinema-by-Cinema basis. Consequently, the Company cannot assure itself for a supply of motion pictures by entering into long-term arrangements with major distributors, but must compete for its licenses on a film-by-film and Cinema-by-Cinema basis. Further, the risk of formation of a cartel amongst the distributors or in a scenario of a strike may make the procurement of films from distributors difficult or unduly expensive and thereby affecting its business and financial performance adversely.

38. The cost of exhibition of a film varies across films and cinemas and if the Company is unable to procure films on competitive terms the results of operations may be adversely affected.

For hiring a film, the distributor's share is normally a percentage of ticket receipts (net of entertainment taxes) and the applicable percentage is negotiated on a film to film basis in respect of films produced in India and periodically for film releases by international studios. Distributors work on a non-exclusive basis and there is a competition between exhibitors to acquire in-demand films. Competitive pressures may result in increasing the cost at which the Company acquires the rights to exhibit the films. If the Company is unable to recover such increased costs through higher box office collections or other forms of revenue generation, its results of operations would be adversely affected.

39. Digital projection technologies may render the traditional film projection equipment obsolete, requiring the Company to incur significant capital expenditure.

Traditionally, motion pictures were filmed using 35 milli-meter (mm) celluloid film cameras and screened using traditional projectors. Today, the technology has shifted towards using Digital Projectors. In order to keep up with the latest available technology, the Company would need to use projectors (Digital) that cost more than the cost of celluloid film projectors. In order to remain competitive, the Company may be required to make incremental capital investments in digital projectors, failing which its business and operations may be adversely affected.

40. The Company's existing cinema business may not be able to generate additional ancillary revenues.

The Company intends to continue to pursue ancillary revenue opportunities such as advertising, promotions and alternative uses of the cinemas during non-peak hours. Some of the Company's competitors may make significant investments in new forms of advertising delivery like, digital advertising or co-branding and the success of any such new delivery system could make it more difficult for the Company to compete for advertising revenue.

41. Piracy and home-viewing may reduce the number of cinema patrons.

On account of increasing piracy and home-viewing options, the number of cinema patrons may reduce in the future, which may have a material adverse effect on the revenues and operations of the Company.

42. The withdrawal of or refusal to grant entertainment tax incentives or the grant of entertainment tax incentives on commercially unviable terms for the Company's existing and proposed Cinemas would have a material adverse effect on its results of operation and financial position.

One of the considerations influencing the decision of the Company to open new cinemas is availability of entertainment tax holidays and incentives announced by various state governments. Entertainment tax rates vary from state to state where the Company currently operates. The withdrawal of the announced tax holidays and incentives or the refusal by relevant authorities to grant entertainment tax exemptions for the existing or proposed Cinemas would have a material adverse effect on its operations and financial position and may also affect its decision to proceed with such Cinemas, thus hampering the expansion plans of the Company. For details of the entertainment tax exemptions / incentives available in the states where it operates, please refer section titled "**Regulations and Policies**" on page 106.

43. The Company is required to bear the onus for gaps in levels of customer service provided by the developers of the multiplexes / cinemas which could lead to unforeseen claims by patrons.

Certain common infrastructure / services such as air conditioning, lift, general cleanliness etc. are typically provided by the developers of multiplexes / cinema where the Company operates. Gaps in any such services will affect the customer's decision to revisit the cinemas and also unforeseen compensation claims made by patrons on account of accidents and damages suffered, if any, during their visits to the Company's cinemas could adversely affect the Company's goodwill / brand image and results of operation.

B. FOOD & BEVERAGES

44. Increasing cost of raw materials and other costs could adversely affect the profitability.

An increase in any of the Company's operating costs will affect its profitability. Certain factors such as increased cost of raw materials and inflation may adversely affect the operating costs. Most of the factors affecting costs are beyond the control of the Company and the Company may not be able to pass on such costs to its customers. Most ingredients used in food products and dishes, including cooking oil, flour, milk and milk products, meat products and vegetables etc., are commodities and therefore subject to price fluctuations as a result of seasonality, weather, demand in local and

international markets. The Company has no control over fluctuations in the prices and availability of these ingredients or variations in products caused by these factors. Furthermore, any shortage of raw materials in the market generally could impact the prices imposed by its suppliers, making the cost of raw materials dearer.

45. The Company is dependent upon the adequate and timely delivery of quality ingredients by its suppliers and distributors, the failure of which could have an adverse effect on its business, operations and financial position.

The operations of the Company are dependent on adequate and timely deliveries of quality ingredients, including fresh produce. The Company depends substantially on suppliers for such deliveries and vendors may be unable to provide the Company with a sufficient quantity of quality ingredients for it to meet customer demand for its products. If the quality of suppliers' ingredients declines, the Company may not be able to obtain replacement for quality ingredients on commercially agreeable terms in the open market. If, food quality of the Company declines due to the inferior quality of ingredients or due to interruptions in the flow of ingredients and similar factors, customer base may decline and negatively affect its results. In addition, the Company does not have exclusive supply arrangements with its suppliers and these suppliers may choose to work with the competitors. In the event of a major disruption to the timely supply of quality ingredients, alternative suppliers of food and / or distribution services (as the case may be) may only be available at higher prices.

46. The Company may be unable to accurately forecast demand for its food products.

The supply of raw materials for the Company's food products is based primarily on forecasts and requirements prepared by its food courts / restaurants managers in consultation with its business heads. These forecasts are based on past sales as well as anticipated demand, which is based to a certain extent on the subjective assessment of the food courts / restaurants managers. Inability to accurately forecast demand for the Company's food products would lead to excess supply (i.e., leading to expiry of perishable items) or a shortage in the supply of raw materials, which would have a material adverse impact on Company's brand, profit margins and operations.

47. The food service market is affected by consumer preferences and perceptions. Changes in these preferences and perceptions may lessen the demand for products of the Company.

Food service businesses are affected by changes in consumer tastes, national, regional and local economic conditions and demographic trends. Market perception of the home delivery and convenience food industry may change which could impact on the Company's continued business success and future profitability. In particular, an increasing number of government and media initiatives to create increased awareness of healthy eating could impact on the public's perception of the home delivered and convenience food industry, which could adversely affect its business, financial condition or prospects, through resulting decreased sales. For example, the Ministry of Health and Family Welfare, Government of India, may issue reports, publications or notices advising citizens against food products prepared by the quick service restaurant industry. Customers may turn to the Company's competitors offering healthier convenience food options such as lower-calorie ready meals. If the Company is unable to adapt its products to successfully meet changes in consumer tastes and trends, its business and financial condition may be materially adversely affected.

C. RETAIL

48. The business depends on the Company's ability to obtain and retain quality retail spaces.

Success of this business depends upon the ability of the Company to identify and acquire quality retail space at appropriate terms and conditions. The Company competes with other large retailers for acquiring quality real estate properties. If the Company fails to acquire properties at appropriate locations, it may result in cost overruns or otherwise adversely affect its business, operations and profitability.

In addition, most of the Company's retail stores are taken on lease or license, which may or may not be renewed. The termination of the leases or licenses or disputes that may arise with store owners may result in closure of stores, thus affecting the Company's business and profitability.

49. The success of this business is also dependent on supply chain management.

The Company strives to keep optimum inventory at its stores and distribution centre to control its working capital requirements. Ensuring shelf availability for its products warrants quick turnaround time and high level of coordination with suppliers. Food and grocery items require efficient supply chain management as this involves items which are perishable or have limited shelf life. Inefficient supply chain management may lead to unavailability of merchandise.

The Company relies on its supply chain and adopts operational processes to optimize its inventory position and reduce cost. The Company strives to keep optimum inventory at its stores and distribution centers to control its working capital requirements. For instance, on back of its supply chain management, the Company does not provide for dedicated storage spaces in most of its stores. In addition, the Company does not have any long-term arrangements with its suppliers and vendors. Inefficient supply chain management could adversely affect the operations and profitability of the Company.

50. Presently, all the stores are located in Northern India. The growth strategy of the Company's Retail Business, to expand into new geographic areas poses risks.

Part of the Company's growth strategy has been to expand its business into new geographic areas. The Company proposes to continue with this strategy of entering new geographic areas. The Company may face additional risks if it undertakes projects in geographic areas in which it does not possess the same level of familiarity with the development, ownership and management of retail business and the customer preferences. In the event the Company is unable to successfully manage the risks of such an expansion, it could have a material adverse effect on its financial position.

51. The growth in retail sector requires additional capital, which may not be available on terms acceptable to the Company.

The retail industry is capital intensive and requires significant expenditures for store establishment, sourcing of products and raw materials. The Company intends to pursue a strategy of continued investment in additional retail stores. The Company anticipates that it will need to obtain additional financing as it expands its operations. The Company may not be successful in obtaining additional funds in a timely manner, on favorable terms or at all. In addition, restrictions on the foreign direct investment in the retail sector for multi-brand format or retail chain in India is likely to impact its funding options.

52. Certain products like apparels may go out of style / fashion on account of changing customer preferences. This may lead to dead stock or increased cost of carrying that stock and as well as witnessing a downgrade in the realizable value of the same.

Stock that may go out of style / fashion may require to be held in godowns. Such a scenario will lead to increased cost of carrying that stock and reducing their realizable value. This could adversely impact the results of operations of the Company.

53. In the cash & carry business, the Company buys and stocks goods in bulk and further sells to the retailers on a sales or returns basis. In the event of any unsold perishable products or any sales return, the Company's profitability will be adversely affected.

In the cash & carry business, the Company buys and stocks goods in bulk. The perishable goods which are not sold within time would become dead-stock (spoil) and does not have any realizable value. Further, the goods are sold on credit basis to the retailers and the Company is under obligation to accept the returned goods from the retailers, even if the goods are expired. In such events, the financial performance of the Company could be adversely affected.

- 54. In the cash & carry business, the whole-sale goods purchased by the Company are subject to commodity price fluctuations. Any significant negative variation in such prices will adversely impact the results of operation of the Company.**

In the cash & carry business, the whole-sale goods purchased by the Company are subject to global commodity price fluctuations. However, the Company does not have any hedging policy to mitigate the effect of unfavorable price movements. Any such significant movements / volatility in prices could adversely impact the results of operations of the Company.

D. JEWELLERY

- 55. The Company has limited operating and financial history in undertaking jewellery business.**

The Company entered in Jewellery business in the year 2008 and presently operates two retail outlets, one each in Faridabad and Palwal, Haryana and two wholesale outlets in Delhi. The growth of its retail jewellery operations will be dependent principally upon the opening of new stores and capitalizing on its existing marketing and distribution network, increased sales volume and profitability from the existing and new stores. The ability to operate its existing and new stores successfully is subject to various contingencies, many of which are beyond its control. These contingencies include the ability to secure suitable locations for the outlets on a timely basis and on favourable terms, the ability to hire, train and retain qualified personnel and the successful integration of the new outlets with the existing marketing and distribution network. There can be no assurance that suitable locations will be available for the proposed outlets as per the Company's requirement or that the Company's proposed expansion in retail operations will be successfully implemented or integrated with its existing operations. The costs associated with acquiring, assimilating and opening new stores may adversely affect the profitability of the Company.

- 56. The Company's inability to keep pace with technology, process and designs can adversely affect its sales and the demand for its products.**

The gems and jewellery industry is characterized by continuous up-gradation in terms of technology, manufacturing process and design capability. The Company has to, on a regular basis, meet with the aforesaid demands and invest continuously to upgrade the technology and process and keep abreast with the latest innovations in the gems and jewellery industry.

The Company's jewellery offerings must reflect the tastes and preferences of a wide range of consumers whose preferences may change regularly. Its strategy has been to offer a wide variety of styles of fine Jewellery, but there can be no assurance that these styles will continue to be popular with consumers in the future. If the styles, the Company offers, become less popular with consumers and the Company is not able to adjust the inventory in a timely manner, the sales of the Company may decline or fail to meet expected levels.

- 57. Any fluctuations in the cost of raw materials for manufacturing processes may affect the Company's profitability.**

Gold typically constitute major component of raw material cost and any adverse price fluctuations in gold would substantially increase cost of materials and adversely affect Company's profit margins. Further, if there is a significant upward variation in the prices of gold, the consumers may hold back / reduce their purchases. This may adversely affect the Company's results of operation.

II. EXTERNAL RISK FACTORS

- 58. A slowdown in economic growth in India could adversely affect the business operations of the Company.**

The performance and the growth of the Company's business are necessarily dependent on the health of the overall Indian economy. As a result, a slowdown in the Indian economy could adversely affect the business operations of the Company. India's economy could be adversely affected by a general rise in interest rates, inflation, increases in commodity and energy prices and protectionist efforts in other

countries or various other factors. It is difficult to gauge the impact of these fundamental economic changes on the business of the Company. Any slowdown in the Indian economy or adverse Global factors could adversely affect the business operations of the Company.

59. Risk of force majeure

Certain events that are beyond control such as, earthquakes, fire, floods and drought and similar natural calamities may cause interruption in the business of the Company that could adversely affect its results of operation.

60. Political instability or changes in the Government could adversely affect economic conditions in India and consequently the business operations of the Company.

The performance and the market price and liquidity of the Equity Shares of the Company may be affected by changes in exchange rates and controls, interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India. The Government has traditionally exercised and continues to exercise a significant influence over many aspects of the economy. The business of the Company and the market price and liquidity of its Equity Shares may be affected by changes in Government policies, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Since 1991, successive Indian governments have pursued policies of economic liberalization, including significantly relaxing restrictions on the private sector. Governments have usually been multi-party coalitions with differing agendas. Any political instability could affect the process of economic liberalization and the specific laws and policies affecting foreign investment and the industry in particular. A significant change in India's economic liberalization and de-regulation policies could adversely affect business and economic conditions and its business, if new restrictions on the private sector are introduced or if existing restrictions are increased.

61. Instability in Indian financial markets could adversely affect the results of operations and financial condition of the Company.

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in Asian emerging market countries. Financial turmoil in Asia, the United States of America, Europe and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other markets may increase volatility in Indian financial markets and indirectly, in the Indian economy in general.

62. Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect financial markets and the business operations of the Company.

Terrorist attacks and other acts of violence or war may negatively affect the Indian markets on which the Equity Shares of the Company trade and also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, making travel and other services more difficult and ultimately adversely affecting the business.

India has also witnessed civil disturbances in certain parts of the country in recent years and it is possible that future civil unrest as well as other adverse social, economic and political events in India could have a negative impact on the business operations of the Company. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on the business and the price of its Equity Shares.

Other acts of violence or war outside India, including those involving the United States, the United Kingdom or other countries, may adversely affect worldwide financial markets and could adversely affect the world economic environment, which could adversely affect the business, results of operations, financial condition and cash flows of the Company and more generally, any of these events could lower confidence in India.

- 63. Significant differences exist between Indian GAAP and other accounting principles, such as IFRS, which may be material to investors' assessments of the Company's financial condition. The failure to successfully adopt IFRS, which is effective from April 1, 2011, could have a material adverse effect on the stock price of the Company.**

The financial statements, including the financial information provided in this Draft Red Herring Prospectus, are prepared in accordance with Indian GAAP and restated in accordance with the ICDR Regulations. The Institute of Chartered Accountants of India, the body that regulates the accounting firms in India, has announced a road map for the adoption of and convergence with, the International Financial Reporting Standards or IFRS, pursuant to which it is proposed that Indian GAAP would be IFRS compliant by April 1, 2011.

Accordingly, the Company may be required to adopt IFRS by 2011. Because there is significant lack of clarity on the adoption of and convergence with IFRS and there is not yet a significant body of established practice on which to draw in forming judgments regarding its implementation and application, the Company has not determined with any degree of certainty the impact that such adoption will have on its financial reporting. There can be no assurance that the financial condition, results of operations, cash flows or changes in shareholders' equity of the Company will not appear materially worse under IFRS than under Indian GAAP. There can be no assurance that the adoption of IFRS will not adversely affect the reported results of operations or financial condition of the Company and any failure to successfully adopt IFRS by April 1, 2011 could have a material adverse effect on its Equity Share price.

- 64. After this Issue, the price of the Equity Shares of the Company may be highly volatile or an active trading market for the Equity Shares may not develop.**

The price of the Equity Shares of the Company on the Stock Exchanges may fluctuate after this Issue as a result of several factors, including: volatility in the Indian and global securities market; its operations and performance; performance of its competitors; the perception of the market with respect to its investments in its business operations; changes in the estimates of its performance or recommendations by financial analysts; significant developments in India's economic liberalization and de-regulation policies; and significant developments in India's fiscal regulations. There has been no public market for the Equity Shares and the prices of the Equity Shares may fluctuate after this Issue. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Issue or that the prices at which the Equity Shares are initially traded will correspond to the prices at which the Equity Shares will trade in the market subsequent to this Issue.

- 65. There are restrictions on daily movements in the price of the Equity Shares of the Company, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.**

Following the Issue, the Company will be subject to a daily 'circuit breaker' imposed by the Stock Exchanges, which does not allow transactions beyond specified increases or decreases in the price of its Equity Shares. This circuit breaker operates independently of the index-based, market-wide circuit breakers generally imposed by stock exchanges. The percentage limit on the circuit breakers will be set by the Stock Exchanges based on the historical volatility in the price and trading volume of its Equity Shares.

The Stock Exchanges do not inform the Company about the percentage limit of the circuit breaker from time to time and change it without its knowledge. This circuit breaker will limit the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding the investors' ability to buy or sell the Equity Shares or the price at which the investor may be able to buy or sell the Equity Shares at any particular time.

- 66. Conditions in the Indian securities market may affect the price and liquidity of the Equity Shares of the Company.**

Indian stock exchanges have in the past experienced substantial fluctuations in the prices of listed securities. These exchanges have also experienced difficulties that have affected the market price and liquidity of the securities of Indian companies, such as temporary exchange closures, broker defaults,

settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading, limited price movements and restricted margin requirements. Further, disputes have occurred on various occasions between listed companies and the Indian stock exchanges and other regulatory bodies that, in some cases, have had a negative effect on market sentiment. If similar problems occur in the future, the market price and liquidity of the Equity Shares could be adversely affected. Further, a closure of or trading stoppage on, either of BSE or NSE could adversely affect the trading price of the Equity Shares of the Company.

67. The Investor will not be able to sell immediately on an Indian stock exchange any of the Equity Shares that they purchase in the Issue until the Issue receives the required trading approvals.

The Equity Shares of the Company will be listed on BSE and NSE. Pursuant to Indian regulations, certain activities must be completed before the Equity Shares can be listed and dealt-in. Upon receipt of final approval from the Designated Stock Exchange, trading in the Equity Shares is expected to commence within 12 working days from the Bid / Issue Close Date. The Company cannot assure that the Equity Shares will be credited to investors' demat accounts or that trading in the Equity Shares will commence, within the time periods specified above. Any delay in obtaining the approvals would restrict the investors' ability to dispose of its Equity Shares.

SECTION III - INTRODUCTION

SUMMARY OF INDUSTRY

Segmentation of film exhibition

The film exhibition sector can be divided into two segments – single screen cinemas and multiplex cinemas (a cinema theatre with two or more screens). Most of the 13,000 odd cinema screens spread over the country are single screen, owned by individual entrepreneurs, operating in an unorganised environment. However, the scenario is fast changing with the ushering in of multiplexes and a number of organised players entering the sector. As of June 2009, there were around 900 multiplex screens, constituting just around 7 per cent of the total screens.

Key growth drivers for multiplexes

a) Higher disposable income and purchasing power

Disposable incomes of Indian consumers have increased significantly between 2001 and 2008. Households falling under the ‘rich class’ (income exceeding Rs 1 million per annum) have grown at a CAGR of around 35 per cent, and that falling under the ‘major consuming class’ (income ranging between Rs 90,000 and Rs 1 million per annum) have grown at a CAGR of 11 per cent during the same period. Going forward, CRISIL expect favourable demographics to drive consumption.

b) Sufficient scope for increase in screen density

As per an industry survey, the screen density in India is less than 12 screens per million population compared to 117 screens per million in the US and more than 40 screens per million for most European countries. Of the 13,000 odd screens in India, 97.5 per cent are single-screens, with poor infrastructure, low levels of maintenance, low capacity utilization and high entertainment taxes. This, consequently, offers sufficient scope for growth of organised players in the industry.

c) Multiplex are the preferred choice in Tier I cities; steady growth expected in Tier II and III cities

Over the last few years, multiplexes have increased and have become the preferred choice to watch films, at least in bigger cities. This represents a growing trend in the metro cities.

Multiplex cinemas score over single-screen cinemas in terms of both occupancy and realisations. The average occupancy of multiplexes is estimated to be between 30-35 per cent, while that of single-screen cinemas ranges from 15-35 per cent. Ticket prices are also much higher in multiplexes than in single-screen cinemas. The occupancy rates have been lower on account of lack of good releases and also the wide spread unorganised market for DVDs.

The film industry has grown from Rs. 60 billion in 2004-05 to Rs. 122 billion in 2009-10, at a CAGR of 15.3 per cent. Within the Indian film industry, the film exhibition segment has grown at an even higher rate, from Rs. 35 billion in 2004-05 to approx. Rs. 75 billion in 2009-10 at a CAGR of 16 per cent.

Foods & Beverages

The Indian food industry has grown significantly on the back of increasing expenditure on food items over the years. The mix of food items has changed with an increased spending on fruits and vegetables, beverages and processed foods. Industry sources forecast the Indian foods industry to reach US\$ 300-350 billion by 2015 from an estimated US\$ 150-200 billion (in 2006-07).

The food service industry segment refers to the sale of foods and beverages for immediate consumption from designated eating joints or areas. This can be further divided into organised and unorganised sub-segments each with distinct business dynamics.

The food service industry growth is also closely linked with the growth of retail destinations – malls in India. Favourable demographics such as rising disposable incomes, expanding population of working women and increase in migrants have influenced the growth of mall culture in India. The setting up of different retail verticals such as apparel, consumer electronics, home furnishings, food and beverage and F&B joints under one roof has translated into considerable footfalls at malls. This is expected to expand the share of the organised foods segment (currently approximately 10 %) in the total industry.

Retail Sector

Over the last five years (2004-05 to 2008-09), the retail sector in India has grown at a CAGR of 10-12 per cent driven by favourable demographics, rising disposable income and increasing urbanisation. The retail sector has evolved dramatically over the last two decades mainly with the growing urbanisation and development of the mall culture.

During 2004-05 to 2009-10, organised retail grew rapidly at 28 per cent due to under penetration (i.e., the share of organised retail as a proportion of total retail), ambitious expansion plans by existing retailers and entry of several new players. Over the past 2 years, even though the pace of growth of the sector was impacted by the economic slowdown, the impact was not too severe. In the long-term, the industry is expected to revive with an anticipated recovery in consumer sentiments.

Gems & Jewellery Sector

The gems and jewellery market is one of the leading contributors to India's export revenues. According to the World Gold Council (WGC), the Indian jewellery market was estimated to be about Rs. 700 billion (US\$ 14.6 billion) in 2008-09. Of this, the urban jewellery market is valued at Rs. 280 billion (US\$ 5.8 billion) and the rural and semi-rural market is valued at Rs. 420 billion (US\$ 8.8 billion).

Based on its characteristics, processing techniques, preciousness (in terms of price range and marketability), the gems and jewellery sector can be categorised into the following sub-sectors:

- Gemstones - Diamonds and coloured stones (precious, semi-precious and synthetic)
- Jewellery - Plain gold, studded, silver, costume
- Pearls

Gold and diamond jewellery are the two major segments in the Indian gems and jewellery market. While gold jewellery accounts for around 80 per cent of the Indian jewellery market, the balance comprises of fabricated studded jewellery (including diamond jewellery). A sizeable quantity of gold jewellery manufactured in India is consumed in the domestic market.

Book Building Process

The Book Building Process, with reference to the Issue, refers to the process of collection of Bids on the basis of the Red Herring Prospectus. The Issue Price is finalized after the Bid / Issue Closing Date. The principal parties involved in the Book Building Process are:

- The Company;
- The BRLMs;
- Syndicate Members who are intermediaries registered with SEBI or registered as brokers with BSE / NSE and eligible to act in their capacity as Underwriters. The Syndicate Members are appointed by the BRLMs;

- Registrars to the Issue;
- Escrow Collection Banks / Bankers to the Issue; and
- SCSBs.

The ICDR Regulations permits issue of securities to the public through the 100% Book Building Process, wherein not more than 50% of the Issue shall be allotted on a proportionate basis to QIBs out of which 5%, excluding Anchor Investor portion, shall be available for allotment on a proportionate basis to Mutual Funds and the balance to all QIBs including Mutual Funds. Further, not less than 15% of the Issue shall be available for allotment on a proportionate basis to Non-Institutional Bidders and not less than 35% of the Issue shall be available for allotment on a proportionate basis to Retail Individual Bidders, subject to valid Bids being received at or above the Issue Price.

The Company may consider allocation upto 30% of the QIB portion to Anchor Investors, out of which at least one-third will be available for allocation to Domestic Mutual Funds, as per the provisions of the ICDR Regulations. In the event of under subscription in Anchor Investors portion, the balance equity will be added to the QIB portion.

QIBs are not allowed to withdraw their Bid after the Bid / Issue Closing Date. For further details, please refer “**Issue Procedure**” on page 397 of this Draft Red Herring Prospectus.

All Bidders will have the option to submit their Bids under the “ASBA Process”, which would entail blocking of funds in the investor’s bank account rather than transfer of funds to the respective Escrow Accounts. For details, see “**Issue Procedure**” on page 397 of this Draft Red Herring Prospectus.

In accordance with the ICDR Regulations, QIBs bidding in the Net QIB Portion are not allowed to withdraw their Bids after the Bid / Issue Closing Date. In addition, QIBs (including the Anchor Investors) bidding in the Net QIB Portion are required to pay the Bid Amount upon submission of their Bid and allocation to QIBs will be on a proportionate basis (except the Anchor Investors, if any). For further details, see the sections titled “**Terms of the Issue**” and “**Issue Procedure**” on pages 394 and 397, respectively.

The Company will comply with the ICDR Regulations and any other ancillary directions issued by SEBI for this Issue. In this regard, the Company has appointed the BRLMs to manage the Issue and procure subscriptions to the Issue.

The process of Book Building under the ICDR Regulations is subject to change from time to time and the investors are advised to make their own judgment about investment through this process prior to submitting a Bid in the Issue.

Illustration of Book Building and Price Discovery Process (Investors should note that this example is solely for illustrative purposes and is not specific to the Issue)

The Bidders can bid at any price within the price band. For instance, assume a price band of Rs. 20/- to Rs. 24/- per Equity Share, issue size of 3,000 equity shares and receipt of five bids from bidders, details of which are shown in the table below. A graphical representation of the consolidated demand and price would be made available at the website of the BSE (www.bseindia.com), the NSE (www.nseindia.com), and at the bidding centers during the bidding period. The illustrative book as set forth below shows the demand for the Equity Shares of the Issuer Company at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Price (Rs.)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to issue the desired quantity of equity shares is the price at which the book cuts off, i.e. Rs. 22/- in the above example. The Issuer, in consultation with the BRLMs will finalize the Issue Price at or below such

cut-off price, i.e. at or below Rs. 22/- per Equity Share. All bids at or above this Issue Price and cut-off bids are valid bids and are considered for allocation in the respective categories.

The ASBA process has been notified *vide* SEBI Circular dated August 29, 2008 and is a new process. Accordingly, investors are advised to make their own judgment about investment through this process of Book Building (including through ASBA process) prior to making a Bid.

Steps to be taken by the Bidders for Bidding

1. Check eligibility for making a Bid (see section titled “Issue Procedure - Who Can Bid?” on page 398 of this Draft Red Herring Prospectus);

Withdrawal of the Issue

The Company, in consultation with the BRLMs, reserves the right not to proceed with the Issue anytime after the Bid / Issue Opening Date but before the Allotment of Equity Shares. In such an event, a public notice would be issued in the newspapers, in which the pre-Issue advertisements were published, within two working days of the Bid / Issue Closing Date, providing reasons for not proceeding with the Issue. The BRLMs, through the Registrar to the Issue, shall notify the SCSBs to unblock the bank accounts of the ASBA Bidders within one working day from the day of receipt of such notification. The Company shall also inform the same to Stock Exchanges on which the Equity Shares are proposed to be listed. Notwithstanding the foregoing, the Issue is also subject to obtaining (i) the final listing and trading approvals of the Stock Exchanges, which the Company shall apply for only after Allotment, and (ii) the final RoC approval of the Prospectus after it is filed with the RoC.

In the event the Company in consultation with the BRLMs withdraws the Issue after the Bid / Issue Closing Date, a fresh offer document will be filed with SEBI in the event the Company subsequently decides to proceed with the initial public offering.

The Indian Economy

India is the world's largest democracy by population size and one of the fastest growing economies in the world. The overall growth of GDP at factor cost at constant prices, as per Revised Estimates of the Central Statistical Organisation, was 7.4 % in 2009-10 representing an increase from a level of growth of 6.7 % during 2008 -09. At disaggregated level, (Revised Estimate 2009-10) the level of growth comprises of 0.2 % in agricultural and allied activities, 9.3% in industry and 8.5% in services as compared to growth rates of 1.6%, 3.9% and 9.8% respectively, during FY 2008 - 09.

Cinema industry value chain comprises of three main components - producer, distributor, and exhibitor.

Chart 1: Film industry value chain (illustrative)

Source: CRISIL Research Report, May 2010

The value chains starts with the producer who makes a film (shooting, editing and dubbing etc.) and arranges for its delivery to the audience. Under the current business model, producers get a minimum guarantee fee from distributors for a film release in return for rights for its distribution. Once the distributor has recovered his investments, the additional income is usually shared with the producer based on a pre-defined arrangement. Film exhibitors form the link between film distributors and audience. They control the last mile of the box office value chain i.e., the theatre.

The theatre hire model was once most commonly followed, wherein the distributors paid a fixed rental to the theatre. The trend has changed over time.

At present, theatre owners and distributors share the revenues collected at the box office, especially in the case of multiplexes. Though in some smaller cities, where revenue-recording mechanisms are not transparent, distributors continue to enter into fixed hire or minimum-guarantee-plus-royalty contracts with exhibitors. This change in business dynamics has propelled corporates to enter this exhibition business.

Corporates or organised players offer the benefits of scale and usually, set up theatres with multiple offering a higher of choice to the audience and spreading the risk over multiple film releases.

The film industry has grown from Rs 60 bn. in 2004-05 to Rs 122 bn. in 2009-10, at a CAGR of 15.3 per cent. Within the Indian film industry, the film exhibition segment has grown at an even higher rate, from Rs. 35 bn. in 2004-05 to approx Rs 75 bn. in 2009-10 at a CAGR of 16 per cent.

Segmentation of film exhibition

The film exhibition sector can be divided into two segments – single screen cinemas and multiplex cinemas (a cinema theatre with two or more screens). Most of the 13,000 odd cinema screens spread over the country are single screen, owned by individual entrepreneurs, operating in an unorganised environment. However, the scenario is fast changing with the ushering in of multiplexes and a number of organised players entering the sector. As of June 2009, there were around 900 multiplex screens, constituting just around 7 per cent of the total screens.

Entry of several organised players due to strong consumer demand and supporting government policies

Several state governments have announced policies offering entertainment tax benefits to multiplexes. These exemptions, along with consumer demand for multiplexes, have led to increased investments in multiplexes and have encouraged single-screen owners to convert to multiplexes.

Major players operating / managing multiplexes in the multiplex space include Big Cinemas, PVR Cinemas, Inox Leisure, Fame India Ltd, Cinemax, E-City Entertainment, Wave Cinemas and DT Cinemas.

Multiplex cinemas gaining ground

Although cinemas have grown over the last few years, multiplex cinemas are fast changing the way movies are viewed, particularly in big cities (Tier I). This growth has also reached Tier II and III cities and is expected to grow over the next few years.

Multiplex cinemas have changed the scenario drastically. Multiplexes offer significant economic advantages over traditional single screen theatres and provide an enhanced movie-viewing experience to the consumer.

Characteristics of multiplexes:

- Limited seating capacity per screen (around 250 seats)
- Good ambience
- Quality viewing with high-end sound systems

- Comfortable seating
- Excellent service
- Good quality food and beverages

Multiplexes have succeeded in attracting family audiences back to the theatres; consequently, watching movies in cinemas has become a highly preferred source of family entertainment again.

Operating models for multiplexes

A multiplex operator can choose any of the following models to set up and operate a multiplex theatre in India, taking into account strategic, legal, tax and other regulatory considerations.

Ownership model

In this model, the multiplex operator either purchases the land and constructs the multiplex, or purchases a building and then converts it into a multiplex. This model is suitable where the lease rentals are very high and where capital is available at a reasonable cost. However, this model usually requires larger capital investments. Furthermore, since development of the property may not be the core competence of the multiplex operator, this model could have a longer gestation period.

Leasing model

This model is most commonly used by multiplexes. In this model, the property is acquired on lease. There are three ways of entering into a lease:

- Fixed rental model
- Fixed rental plus variable as a percentage of sales
- Lease of existing theatre and conversion into a multiplex
- Revenue sharing model –Theatre management model

The last model is the least risky model for a multiplex operator. In this model, a developer constructs the necessary infrastructure of the multiplex, and outsources the management and operations to a multiplex operator for a fixed period of time. In return, the multiplex operator charges a fixed fee or a share of the revenue / profits from the multiplex.

1.2 Multiplex movement in Tier I, II and III cities

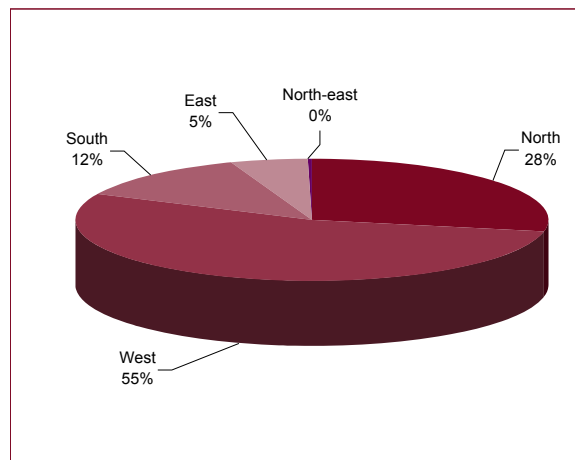

Of the 900 multiplex screens within the country, around 39 per cent are present in Tier I cities, around 38 per cent in Tier II cities and the balance 23 per cent in Tier III cities.

The northern region has the second-highest share with over one fourth of the total multiplex screens in the country. Within the northern region, Tier II cities have the highest number of multiplex screens. Amongst Tier II and III cities, Big Cinemas (erstwhile Adlabs) enjoy 32 per cent market share, followed by PVR at 21 per cent. Fame has a small share of 2 per cent in the Tier II and III cities in the northern region. SRS Cinemas have also captured a sizeable share at 12 per cent. According to CRISIL Research the number of multiplex screens will cross 1,600 by 2013.

Digitalisation of film prints enabling wider release of films and reduce piracy

In the last two years, digital technology has been increasingly adopted by the Indian cinemas, especially in small towns. The primary reason for the rising popularity of digital film prints is that due to lower costs, it enables wider reach for the film release.

The high costs of producing celluloid film prints (Rs 50,000-60,000 per copy) and low ticket prices means that it is not feasible for film distributors to release a large number of physical prints at the same time. Due to digitalization, film distributors are able to increase the number of prints in the market on the day of the movie release, thereby enhancing the revenue generating ability of distributors as well as exhibitors.

As of March 2009, it is estimated that there were 1,900-2,000 digital screens in India. At cinemas, the digitalized motion pictures are screened using a digital projector, server, and scheduling software, the combined capital expenditure of which varies from Rs. 1.5-1.7 mn. To address the high capex concern, various infrastructure providers are doing away with demand for upfront investments. They are instead asking for an initial deposit, which is a very small proportion of the capital cost and collect a content delivery charge from the distributor and the exhibitor on a 'per show' basis. They also get advertisements revenues earned during movie screening.

However, despite its advantages, digital technology is unlikely to expand significantly into the hinterland because of the unreliable power supply that could affect the functioning of the digital equipment and limited scope of investment recovery from these theatres. This is due to limited earnings of the theatres 'per show' due to low ticket prices. Meanwhile, CRISIL Research projects the number of digital screens in India to increase to 2,500-3,000 over the next 3-4 years.

1.4 Key growth drivers for multiplexes

a) Higher disposable income and purchasing power

Disposable incomes of Indian consumers have increased significantly between 2001 and 2008. Households falling under the 'rich class' (income exceeding Rs 1 million per annum) have grown at a CAGR of around 35 per cent, and that falling under the 'major consuming class' (income ranging between Rs 90,000 and Rs 1 million per annum) have grown at a CAGR of 11 per cent during the same period. Going forward, CRISIL expects favourable demographics to drive consumption.

b) Sufficient scope for increase in screen density

As per an industry survey, the screen density in India is less than 12 screens per million population compared to 117 screens per million in the US and more than 40 screens per million for most European countries. Of the 13,000 odd screens in India, 97.5 per cent are single-screens, with poor infrastructure, low levels of maintenance, low capacity utilization and high entertainment taxes. This, consequently, offers sufficient scope for growth of organised players in the industry.

c) Multiplex are the preferred choice in Tier I cities; steady growth expected in Tier II and III cities

Over the last few years, multiplexes have increased and have become the preferred choice to watch films, at least in bigger cities. This represents a growing trend in the metro cities.

Multiplex cinemas score over single-screen cinemas in terms of both occupancy and realisations. The average occupancy of multiplexes is estimated to be between 30-35 per cent, while that of single-screen cinemas ranges from 15-35 per cent. Ticket prices are also much higher in multiplexes than in single-screen cinemas. The occupancy rates have been lower on account of lack of good releases and also the wide spread unorganised market for DVDs.

Diversified revenue stream

Multiplexes have a diversified revenue model; they earn around 75 per cent of their revenues from sale of tickets, 20 per cent from food and beverages and the rest from advertising, sponsorship and renting out retail space. On the other hand, single-screen cinemas lack such diversification and earn almost their entire revenue from the sale of movie tickets.

With the increasing number of multiplexes across various cities (Tier I, II or III), margins of players have started coming down significantly. Average operating margins of the top 4 to 5 players have come down from 27 per cent in 2005-06 to 12.5 per cent in 2008-09, indicating the increasing growth of multiplexes. Also lack of good new releases and wide-spread unorganised market of DVDs have resulted in the lower margin levels of players.

Net margins of players have seen a similar trend as operating margins. Average net margins have come down from 12 per cent in 2006-07 to 3 per cent in 2008-09.

The cinema business works on a negative working capital cycle. This is because while the cinemas / multiplexes get upfront payment for the movie tickets and food and beverages, the raw materials for food and beverages etc are obtained on credit basis. However, being a capital intensive industry, its return on capital employed (RoCE) often remains in single digits.

FOOD & BEVERAGES BUSINESS

The Indian foods industry has grown significantly on the back of increasing expenditure on food items over the years. The mix of food items has changed with an increased spending on fruits and vegetables, beverages and processed foods. Industry sources forecast the Indian foods industry to reach US\$300-350 billion by 2015 from an estimated US\$150-200 billion (in 2006-07).

The food service industry segment refers to the sale of foods and beverages for immediate consumption from designated eating joints or areas. This can be further divided into organised and unorganised sub-segments each with distinct business dynamics.

The food service industry growth is also closely linked with the growth of retail destinations – malls in India. Favourable demographics such as rising disposable incomes, expanding population of working women and increase in migrants have influenced the growth of mall culture in India. The setting up of different retail verticals such as apparel, consumer electronics, home furnishings, food and beverage (F&B), and F&B joints (FBJs¹) under one roof has translated into considerable footfalls at malls. This is expected to expand the share of the organised foods segment (currently approximately 10 %) in the total industry.

Growth drivers for the industry

The F&B industry in India is expected to witness considerable growth over the next few years on the back of large demographic shifts.

Burgeoning urbanisation

Increasing urbanisation is likely to have a positive impact on the F&B industry, as average spends on eating or ordering out is relatively higher in urban centres. The proportion of urban populace, as a per cent of the total population, is expected to expand to 32 % in 2015 from 27 % (as per the last Census).

Growing nuclearisation

In India, nuclear families have greater propensity to spend at F&B outlets than joint families.

Increase in the number of working women

An average working women typically spends higher at F&B outlets than a home maker. According to a report by Technopak, 'India consumer trends 2007', working women, which currently comprise 15 % of the total urban female population, is expected to increase to over 20 % by 2020. This has an important bearing on F&B spending, in turn driving the industry.

Higher incomes

There is an increase in the penetration of quick service restaurants (QSRs) in India due to the rise in consumer spending, enabled by the growth in income levels. Disposable incomes of Indian consumers have risen significantly during 2001-2008. Households forming the 'upper economic strata' (income > Rs 1 million per annum) have grown by around 35 % CAGR, whereas that of the 'major consuming class' (income in the range of Rs 90,000 and Rs 1 million per annum) have registered a CAGR of 11 % during the same period. Going forward, CRISIL expects favourable demographics to drive consumption.

In India, FBJs operate as:

- Unorganised FBJs - Are single unit eating places, mainly located on streets, highways, and bus and railway stations.
- Organised FBJs - Can be defined as outlets that are present across locations under the same association / company name, e.g. McDonald's, Café Coffee Day, Naturals and Has Juice Bar.

Within organised FBJs, players operate via a number of formats, namely QSRs, coffee chains, etc. These formats differ on the basis of product offering, time to serve, area of operation, price points, amongst others. Further, these formats operate through malls or/and standalone stores.

FBJs formats in India

The organised FBJs operate in the following categories / formats:

- Quick Service Restaurants
- Coffee chains
- Dining restaurants
- Kiosks (ice cream parlours and juice centres)

QSRs or fast food restaurants

In India, QSRs are known as fast food restaurants. This category is characterised by fast food cuisine and quick turnaround time per table. The time to service an order ranges from 5-10 minutes. This is because the food is pre-cooked, heated on the spot and ready to serve to ensure quick service. A crucial factor aiding quick service is the limited menu offerings.

While local QSR players such as Nirula's, Haldiram's, Nathu's and Sukh Sagar have been present in certain regions of India, the entry of international brands such as McDonald's, KFC, Subway, Pizza Hut and Dominos during the mid 1990s has been the key growth driver of the Indian QSR market. These international brands have gradually expanded their presence from metros and mini metros to tier II and tier III cities.

The success of international brands has led to domestic players such as Dabur (Lite Bite Foods), Red Ginger Hospitality, Moods Hospitality (Yo China!) and Franchise Management India (Club City), amongst others entering the Indian QSR market.

Dining restaurants

These are the full service restaurants with dedicated meal courses. These restaurants can either be located in malls, high streets or even within the premises of premium hotel chains. Some examples of fine dine would be Mainland China, Bombay Blues, Aroma's of China and Saffron Spice. Dining can be further classified into fine dining and casual dining.

QSRs dominate F&B operations in malls

While QSRs account for 55 per cent of the total area of the FBJ in a mall, higher revenue per sq ft enables QSRs to generate almost 65 per cent of the total revenues of a FBJ operating within the mall. As against this, the dining format occupies around 30 per cent of the total area of FBJ in a mall, while its contribution to the total FBJ revenues in a mall is around 27 per cent.

Segment-wise break up of FBJs in malls (Rs 51.8 billion)

The popularity of QSRs as compared with other dining formats is due to:

- Variety in cuisines
- Affordability in ticket size:
- Shorter Time to serve:

Key success factors in QSR:

As the Indian consumer is price-sensitive, the principle 'value for money' influences purchase decisions. This has been evident in the retail business since 2008, wherein same-store sales (SSS) of most lifestyle retailers have declined vis-à-vis value retailers, highlighting the consumer's caution over discretionary spending. The same is the case in the foods business. It is crucial for a restaurant chain to price its menu appropriately in order to attract footfalls. Thus, product pricing, scale of operation and branding are the keys to operate a successful FBJ business across the variants of an organised FBJ outlet.

Correct product pricing drives footfalls

McDonald's introduced Extra Value Meals (EVMs) in September 2009, wherein prices of 'McVeggie meal combo' as well as 'McChicken meal combo' were reduced by around 15 per cent. The re-pricing has boosted sales volumes of the food retailer.

Another example where product pricing has played a key role in building scale is the rapid expansion of the Café Coffee Day chain in comparison to Barista. The distinguishing factor here is that with the similar set of offerings, the former was effective in its product pricing vis-à-vis the latter, and hence has benefited from economies of scale.

Branding drives revenues

In the foods business, it is important to achieve scale in operations to achieve economies of scale. This facilitates in brand building, which is another key revenue driver.

Right pricing and branding once achieved will propel volumes, translating into revenues for the food chain.

Booming economy propelling the snack food industry growth

India's over Rs 100 billion snack food market is set to grow thanks to rising incomes and a booming economy. The organised snack sector accounts for almost half the market share and is expanding at a rate of up to 20 per cent per annum. Imports, though growing quickly, are still marginal due to high import duties, a complex distribution network and availability of cheaper domestic products.

The market in India is diverse and large with over 1,000 different snack products and some 300 types of savouries. Potato-based snacks, and in particular potato chips, are the largest product segment, holding an 85%-share of the salty snack market, followed by snack nuts, chickpeas and other pulse-based savoury snacks.

Organised retail chains have high demand for popcorn, diet snacks (soy nuts, bread sticks), breakfast cereals, baked & roasted snacks (biscuits, specialty breads, chocolate coated snacks, cookies etc.) and cheese snacks. Health foods, health food supplements and convenient foods are also rapidly growing segments. The branded and organised snack food sector is forecast annual growth of 15- 20%. Major players in this segment include Frito Lay, Con Agra, Kellogg's, Marico, Dabur, HLL, ITC, Parle, Haldiram's, Nestle, Britannia, Cadbury, Bikano and Balaji.

Growth in the non-branded snack food sector, which currently has a slightly larger market share, is much smaller at 8% per year. Higher overheads mean branded products cost around 15-20% more than their non-branded rivals. Packaging in the sector is important with the smaller sizes being most popular.

Beverage industry presents a huge untapped potential

Indian consumers drink 120 billion litres of beverages out of which only 5 per cent is contributed by ready-to-drink packaged beverages. The majority of Indian consumers (75%) still consume non-alcoholic beverages (less than once a day), highlighting a large untapped market opportunity, particularly in the carbonated (soft) drinks and juice or juice-based markets.

According to industry estimates, the domestic beverage industry size stands at approximately Rs 75 - 80 billion, with soft drinks segment having the dominant share followed by fruit juice industry.

According to industry sources the growth in the fruit juice industry is seeing a regular double digit growth. Although the soft drink industry is the major portion of the beverage industry pie, the share of fruit juice industry is steadily increasing.

RETAIL MARKET IN INDIA

Industry overview

The Indian retail industry is the fifth largest in the world. Comprising of organized and unorganized sectors, India retail industry is one of the fastest growing industries in India, especially over the last few years. Though initially, the retail industry in India was mostly unorganized, however with the change of tastes and preferences of the consumers, the industry is getting more popular these days and getting organized as well. With growing market demand, the industry is expected to grow at a pace of 25-30% annually.

According to Government of India estimate the retail sector is likely to grow to a value of Rs. 2,00,000 crores (US\$45 billion) and could yield 10 to 15 million retail jobs in the coming five years; currently this industry employs 8% of the working population. India continues to be among the most attractive countries for global retailers. According to the Department of Industrial Policy and Promotion, approximately US\$ 47.43 million was the amount of Foreign Direct Investment (FDI) inflow as on September 2009, in single-brand retail trading.

More than 80% of the retail sector in the country is concentrated in the large cities. A study reveals that amongst 20 locations, for organized retail in India, Mumbai was found to be the most preferred location followed closely by Bengaluru in the second position.

Industry experts predict that the next phase of growth in the retail sector will emerge from the rural markets. By 2012 the rural retail market is projected to have a total of more than 50 % market share. The total number of shopping malls is expected to expand at a compound annual growth rate of over 18.9 % by 2015. According to market research report by RNCOS the Indian organized retail market is estimated to reach US\$ 50 billion by 2011. (Source: www.business.mapsofindia.com)

Over the last 5 years (2004-05 to 2009-10), the retail sector in India has grown at a CAGR of 10-12 per cent driven by favourable demographics, rising disposable income and increasing urbanisation. The retail sector has evolved dramatically over the last 2 decades mainly with the growing urbanisation and development of the mall culture. The earlier retail market was dotted with *kirana* shops in the food and grocery segment and high street retail in the apparel segment. The early 1990's witnessed the emergence of department stores and organised apparel market sprung up in the later part of 1990.

During 2004-05 to 2009-10, organised retail grew rapidly at 28 per cent due to under penetration, ambitious expansion plans by existing retailers and entry of several new players. Over the past 2 years, even though the pace of growth of the sector was impacted by the economic slowdown, the impact was not too severe. In the long-term, the industry is expected to revive with an anticipated recovery in consumer sentiments.

The government currently permits 51 per cent FDI in the case of single brand stores and 100 per cent in cash and carry wholesale formats. Meanwhile, multi-brand retail has been kept completely out of the FDI purview. Nevertheless, even though India is yet to open up its retail market to foreign investors, the current format acts as a boon to new domestic entrants who can establish themselves in the market.

'Retail' refers to 'the sale of goods and commodities in small quantities to the final consumer'. Thus, retailing is the last leg in the channel through which goods travel from the producer to the consumer. A retailer delivers value proposition to the end consumer by creating the desired time, place and utility of the product being offered. Further, organised retailing can be defined as a form of retailing whereby consumers can buy goods from a similar purchase environment across several physical locations.

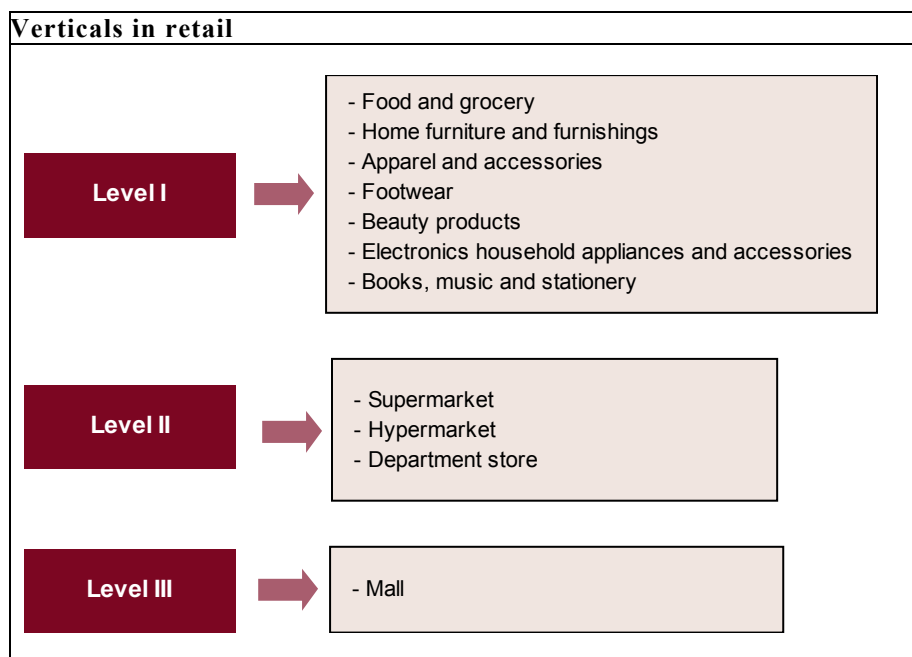

Organised retail operates on the following three levels:

Level I: Speciality stores catering to a particular category of products.

Level II: Departmental store / supermarket / hypermarket catering to 2-3 categories of retail.

Level III: Mall, which is an agglomeration of departmental stores, hypermarkets and speciality stores.

A “high street” is another widely popular venue for shopping. They are set up at prominent locations within a city and attract high footfalls due to the presence of organised retailers. On account of its prime location and the intense competition for retail dominance, these areas command steep rentals. Popular high streets in India include Linking Road, Kemps Corner and Colaba Causeway within Mumbai and Khan Market, Karol Bagh and Greater Kailash in New Delhi.

Source: CRISIL Research Report, May 2010

The market size of retailing is based on the private final consumption expenditure for various categories of products. These categories are termed as verticals in organised retailing. The Indian retail market was estimated at Rs 15.5 trillion in 2007-08, growing at a CAGR of 28 per cent in the last 5 years.

Modern retail store formats

Indian retailers are increasingly experimenting with various retail formats to suit each market. The type of a retail store depends upon the kind of products it plans to market – lifestyle products or value-based products. Following are the various formats of retail shops:

Value retailing

Value retailing is a concept targeted towards masses comprising mostly of middle income households. Consumer spends in this segment is mostly concentrated on necessities. In organised retail, value retailers provide goods to consumers at low prices, while maintaining a modernized shopping format. Primary formats focused on value retail include supermarkets, hypermarkets and convenience stores.

Supermarkets

Supermarkets provide the consumer with a wide range of general merchandise. They are generally 3,000-10,000 sq ft stores, primarily catering to a cluster of residential units. Super markets follow a ‘self service’ format and are a one-stop-shop for various household needs. Their offerings focus mainly on the food and grocery segment. In a country like India, apart from being standalone stores, supermarkets are also located in malls as they tend to be crowd pullers. Corporates like Aditya Birla’s ‘More’, Future group’s ‘Food Bazaar’ can afford to offer lower prices on account of bulk sourcing.

Hypermarkets

These are large supermarkets with space ranging from 75,000 sq ft to 1,00,000 sq ft or more. These stores offer an extension of products available at supermarkets. While supermarkets are focused on food and grocery, a hypermarket houses a range of food and grocery, FMCG goods, apparel, electronics, household items and furniture. They stand at a better advantage in terms of their pricing on account of bulk sourcing across various suppliers in the value chain. Apart from wide product offerings, value for money is another feature offered by this format. Due to diversity in product offerings, the margins derived are better than that of a supermarket.

Convenience stores

Convenience stores are smaller than supermarkets and hypermarkets and deals in a limited range of product categories (grocery and other items). The price of goods in these stores are typically higher as compared to supermarkets with the exception of day to day items such as milk, eggs etc wherein they do volume based business. They are operational for longer business hours than supermarkets. Convenience stores emerged in the early part of 1990s but have witnessed a gradual slowdown in the last few years.

Lifestyle retailing

Lifestyle retailing is generally done through departmental stores and branded outlets primarily retailing apparel and accessories. Among the organised players, Shopper's Stop has been the pioneer in this segment. Subsequently departmental stores and branded outlets like Lifestyle, Provogue, Wills Lifestyle, and Biba joined the band wagon.

Departmental stores

Departmental stores have a wide variety of products across categories under one roof. These categories are organised into different departments such as clothing, home-ware, furniture, appliances, toys, accessories and cosmetics to facilitate easy visual display. With their target audience primarily being the high income households (where the ticket size is larger), their presence is gradually gaining popularity, as they offer novelty, variety, international ambience, entertainment and convenience, all at the same place.

Retailers occupying shelf space in these departmental stores generally operate through three different models which are the decisive factors for gross margins:

- **Outright:** They buy merchandise and sell it to customers. There is inventory risk involved like in case of private labels.
- **Consignment:** They order and buy goods from a vendor. But in case they do not sell, the vendor takes the inventory risk. Many departmental stores have this arrangement with brands in apparel.
- **Concessionaire:** Retailers operating this model rent out space to particular vendors. This model works in the same way as renting space to someone else in your store. Generally the concessionaire model is prevalent in departmental store formats wherein perfume and cosmetic brands are retailed. However, 'Central', The Future Group's mall format also operates on this model wherein space is let out to various apparel and accessory brands.

Apparel and accessories stores

These stores focus primarily on apparels with small percentages comprising trinkets and fashion accessories. Stores are located on an average space of 10,000-12,000 sq ft. and target primarily the upper-middle and high-end consumers e.g. - United Colours of Benetton (UCB), Wills Lifestyle, Biba, etc.

Apparels are high margin business due to the flexibility of high private label penetration. Being fairly organised, a lot of manufacturers have entered this space in the last few years. These manufacturer retailers initiated coverage with the setting up of exclusive men's wear showrooms. Moving beyond this segment, retailers like Koutons have diversified by entering into the women and kids' segment.

Luxury retailing

Luxury retailing refers to the provision of high-end luxury brands and services targeted at the affluent. These brands carry a unique appeal and are a status symbol to the buyers more than anything else, given their high prices.

Considering the constant rise in affluence evidenced by the Gross Domestic Product (GDP) growth and boom in capital markets in the last few years, retailers have shown growing interest in tapping this segment. However, high import duty, restrictive foreign direct investment (FDI) rules and lack of quality retail space have held back premium brands from entering and expanding their business in India.

In the past, luxury retailers have confined their presence to five-star hotels, where footfalls are limited. Of late, they have begun bridging this gap by partnering with real estate companies. For instance DLF has set up the 'Emporio Mall' at Delhi which is spread over a retail space of 320,000 sq ft. Luxury brands retailers such as Louis Vuitton, Christian Dior, Fendi, Armani, Dolce & Gabbana, Cartier, Alfred Dunhill, Versace, Hugo Boss, Escada, Tod's, Paul Smith have set up stores in this mall. Also present are watch brands such as Piquet, Chopard and IWC.

Cash and carry (wholesale clubs)

Cash and carry units are wholesale formats operating on a trading space spread across 85,000-1, 25,000 sq ft. Their chief target audience are retailers (mom and pop stores), but also include hotels, restaurants, caterers and institutions (HoReCa). These wholesalers stock a wide array of brands and private labels across verticals like food and grocery, apparel, household appliances, household items etc. SRS has ventured into the wholesale cash and carry format and intends to expand its presence in the domain in the long term.

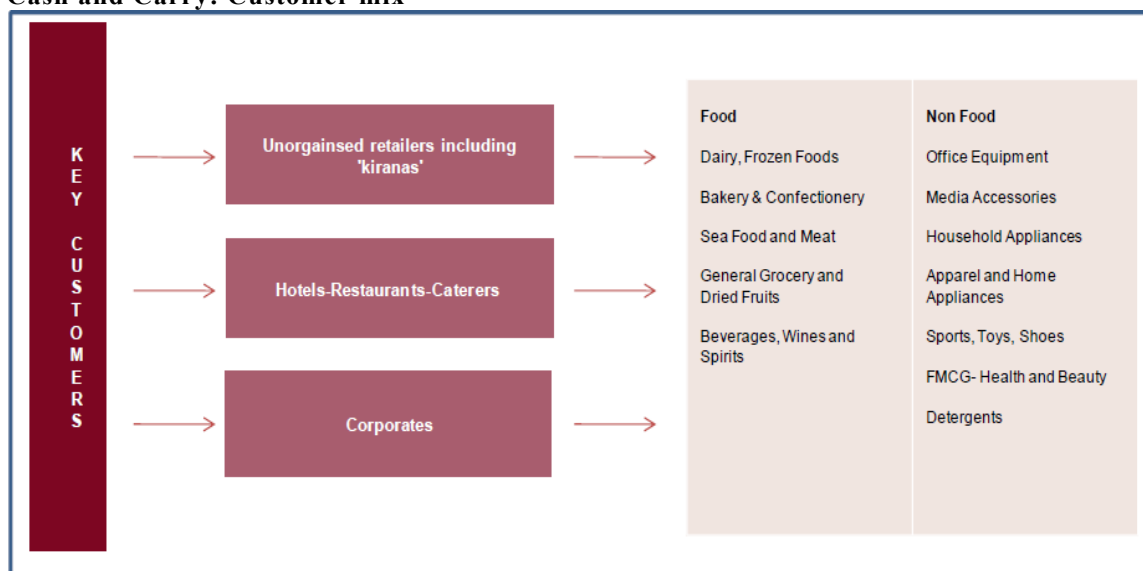

The cash and carry concept is fairly popular in the US and UK. On the other hand, in India, 'Metro' (Germany based wholesaler) and Bharti- Walmart Pvt Ltd are the only cash and carry format wholesale clubs operational. The FDI policy in India permits investment in this vertical via the 100 per cent automatic route. Rationalization of this policy in 2006 witnessed announcements by international big-names like Wal-Mart who have entered the country through a JV with Bharati Group. The group plans to name its Cash and Carry outlets as 'Best Price Modern Wholesale Club'. The British retailer, Tesco has also signed an alliance with Tata's Trent Ltd to open similar stores.

Cash & Carry is wholesaling concept

Cash and carry is defined as a self service, business to business (B2B) wholesale format from which wholesalers/retailers purchase goods on 'cash' basis. Cash and carry operators source goods in bulk from the manufacturer and then sell them to their retail customers at prices similar to those charged by the distributor. Thus they operate on the business model of high sales volumes and rapid inventory turnover.

Other formats

Apart from the above mentioned formats, organised retailers have also ventured into specialized retail formats catering to a particular vertical. These stores are smaller in size compared to lifestyle and value stores. This includes speciality stores, dollar stores, discount stores / factory outlets, airport retailing, online, telephone and catalogue buying.

SRS is primarily focused on value retailing through its operational hypermarkets (Value Bazaar). Presently, the company deals in retailing FMCG products in the cash and carry stores.

GROWTH DRIVERS FOR THE ORGANISED RETAIL INDUSTRY

Growing urban population - Key to future spending

As organised retail penetration reaches its peak in metros, Tier-I and Tier-II cities will not be too far behind. Over the next few years, growth in organised retailing is likely to be concentrated in the urban and semi-urban areas. Therefore, going forward, the market for organised players is expected to be among the urban masses.

Urbanisation has been increasing at the rate of 2.7 per cent over the last 10 years. According to the Census 2001, urban population as a per cent of total population stood at 27.7 per cent. This is expected to increase to 32.2 per cent by 2015, indicating a growth of 2.4 per cent between 2000 and 2015.

Shift in the preference for branded products

With the advent of organised retailing and growing disposable income available to people, there has been a gradual increase in the preference for branded products. Demand for better quality, increased convenience and higher value for money has increased the demand for branded goods from Indian consumers. Moreover, changing lifestyles on account of demographic changes and exposure to international consumerism are also bound to have a positive effect on branded goods. This, in turn, would provide organised retail with a platform for growth.

Major consuming class' (34 per cent of the population) to drive retail sector growth

Source: CRISIL Research Report, May 2010

Increasing role of working women in consumer spends

According to a report by Technopak 'India consumer trends 2007', working women form 15 per cent of the total urban female population. By 2020, this number is set to surpass 20 per cent. Thus, retail spends are expected to increase, as the buying behavior of a working woman differs from that of a housewife.

Widening working force to influence consumer spending

The purchasing power of population largely lies within the age bracket of 18-45 years. According to 'Indian Consumer Trends 2007', 66 per cent of India's population is below 35 years of age while about 50 per cent are below the age of 25. This indicates that going forward this section of population will largely influence consumer spending. According to the Ministry of Human Resource Development, the literacy rate in India has risen to 64.8 per cent in 2001 from 52.2 in 1991. It is estimated that the literacy rate in India is likely to touch 75 per cent by 2020. India's rising young population along with the increasing literacy rate has set the stage for a qualified workforce for the future. This indicates an increase in the average disposable household income going forward.

Rejuvenated retiree spending

According to the last census in 2001, retired people (60 years and above) constitute 8 per cent of the population. According to 'India consumer trends 2007', personal spends of retired people have been on the rise with the highest spending concentrated in the apparel section at around 23 per cent, whereas spends towards financial products and eating outside constitute around 21 per cent and 15 per cent, respectively.

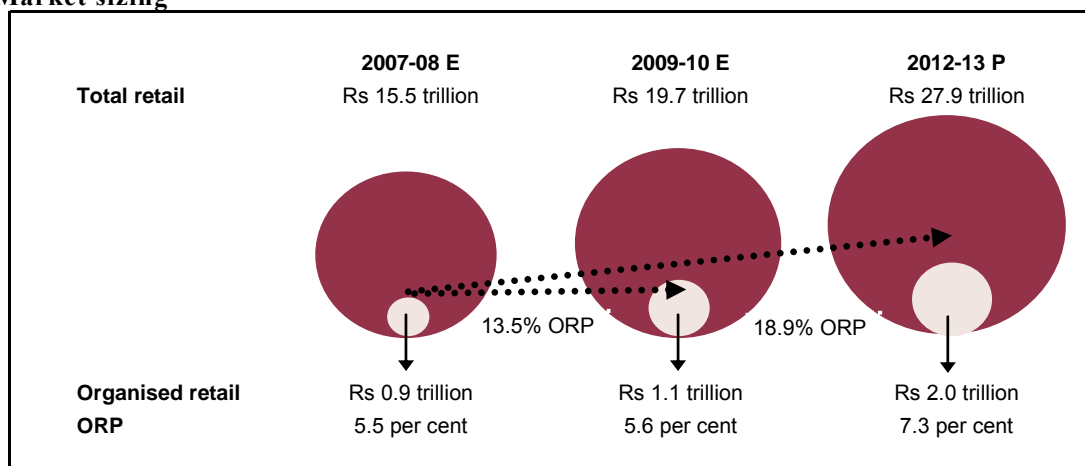

The other reasons for the growth of retail industry are as follows:

- Increase in the nuclear families as a percentage of total household population who have a greater propensity to spend more.
- Another factor contributing to the increase in total spending is the increase in use of credit and debit card.

Buoyancy to continue in the long term

CRISIL Research expects the Indian organised retail sector to grow at a CAGR of close to 19 per cent from Rs 852 billion in 2007-08 to Rs 2,024 billion in 2012-13. Thus, organised retail penetration is expected to move upwards from 5.5 per cent in 2007-08 to 7.3 per cent in 2012-13. On the other hand, following weakening consumer spending on account of slower economic growth, organised retail is expected to expand at a modest pace of 14 per cent in the short term from Rs 852 billion in 2007-08 to Rs 1,097 billion in 2009-10.

Market sizing

Note: ORP - Organised Retail Penetration

Source: CRISIL Research Report, May 2010

Organised retail penetration to continue to increase in metros and mini-metros over next 2 years albeit at a slow pace

Due to relative under penetration in Tier-I and II cities, CRISIL Research expects Organised Retail Penetration (ORP) to grow by over 50 per cent over the next 5 years whereas metros and mini metros which will continue to grow even in the short-term, though at a lower pace. Over the medium term, in the Tier-I and II cities, CRISIL have not considered any increase in ORPs as many retailers are shutting stores, relocating and in some cases even resizing.

Based on these estimates, penetration levels of organised retail, from the current levels of 5.5 per cent are expected to touch 7.3 per cent by 2012-13, thereby taking the organised retail sector size to around Rs 2,024 billion.

Revenues – Long term prospects remain attractive

A large part of the growth in revenues for retailers in the last 3 years was driven by aggressive store expansions as well as entry of new players in the industry. However, in the backdrop of the global meltdown, revenues witnessed a substantial decline in 2008-09 on account of the slowing economy, which has a direct bearing on discretionary consumer spending. Same store sales growth also declined due to a huge proliferation of malls and retail space, causing shrinkage of catchments and leading to deferment of expansion plans by retailers. Consequently, revenue growth is expected to be moderate in the medium term. However, with the ongoing revival in consumer spending owing to the expected recovery in economic growth; the long term prospects will remain attractive.

Operating margins – Improving on the back of cost rationalisation by retail players

Despite a robust growth in operating income in the last 3-4 years, EBITDA margins have been in the range of 8-8.5 per cent as operating costs have moved in tandem with growth in operating income. In 2009-10, operating margins have improved significantly (10-11 per cent) primarily on the back of cost rationalisation by players.

GEMS AND JEWELLERY

India is one of the largest bullion markets in the world. It has been until now, the undisputed single-largest Gold bullion consumer. Gold imports in the period of January-April 2010 were pegged at 126 tonnes, up 74 per cent from 72.3 tonnes in the previous year. Gold imports stood at 739 tonnes during the period April 2009-March 2010. India is the largest consumer of gold jewellery in the world, accounting for about 20 per cent of global gold consumption. Gems and jewellery form an integral part of Indian tradition. With consumer consciousness increasing, the future of organised retail in India is very bright. The organised sector of the gems and jewellery industry in India is estimated to grow at 40 per cent per annum to US\$ 2.2 billion by 2010.

(Source: www.ibef.org)

The gems and jewellery market is one of the leading contributors to India's export revenues. According to the World Gold Council (WGC), the Indian jewellery market was estimated to be about Rs 700 billion (\$14.6 billion) in 2008-09. Of this, the urban jewellery market is valued at Rs 280 billion (\$5.8 billion) and the rural and semi-rural market is valued at Rs 420 billion (\$8.8 billion).

Based on its characteristics, processing techniques, preciousness (in terms of price range and marketability), the gems and jewellery sector can be categorised into the following sub-sectors:

- Gemstones - Diamonds and coloured stones (precious, semi-precious and synthetic)
- Jewellery - Plain gold, studded, silver, costume
- Pearls

Gold and diamond jewellery are the two major segments in the Indian gems and jewellery market. While gold jewellery accounts for around 80 per cent of the Indian jewellery market, the balance comprises of fabricated studded jewellery (including diamond jewellery). A sizeable quantity of gold jewellery manufactured in India is consumed in the domestic market. In diamonds, however, a major portion of rough, uncut diamonds processed in India is exported, either in the form of polished diamonds or finished diamond jewellery. Besides being the largest consumer of gold in the world, India also leads in diamond cutting.

Cut and polished diamond exports accounted for 68 per cent of total gems and jewellery exports in 2008-09. While the domestic consumption for diamonds is forecast to increase, foreign exchange earnings arising from diamond exports will continue to drive industry earnings, in spite of a declining trend over the years.

The Indian gems and jewellery industry is competitive in the world market owing to the following factors:

- Low cost of production
- Availability of skilled labour
- Distribution network (export-related)

With branded jewellery gaining popularity, the retail branded jewellery market is expected to witness strong growth in the long term. Players such as Gitanjali Gems, TBZ, Shri Ganesh Jewellery, SRS Jewels, Goenka Diamond & Jewels, are therefore well-placed to seize a greater share of this growing market.

Significant contributor to economy

The gems and jewellery industry has an important role in the Indian economy. It is a leading foreign exchange earner for the Indian economy. The industry contributed around 13.4 per cent of India's exports during 2008-09. For 2008-09, Indian gems and jewellery exports witnessed a moderate growth of 1.4 per cent (in US\$ terms) with total gems and jewellery exports reaching US\$21.2 billion as compared to US\$20.9 billion during the corresponding period of the previous year.

India is the largest consumer of gold in the world. Apart from its historical religious significance, gold is valued as an important savings and investment vehicle. Gold jewellery exports, which primarily drove growth in the gems and jewellery sector, witnessed an impressive surge of 23.6 per cent (in US\$ terms) from US\$5.6 billion to US\$6.9 billion in 2008-09.

Government policies

The government identified the gems and jewellery segment as a focus area for exports in the Foreign Trade Policy (2004-09). There is no import duty and excise duty on rough and coloured stones.

Gems and jewellery exports had seen a modest growth and expanded to US\$ 21.2 billion (April 2008 - March 2009) from US\$ 20.9 billion (April 2007 - March 2008). In the current economic scenario, growth is negative in volume terms in spite of the industry witnessing some revival in demand. The industry is expected to be impacted due to low demand over the next 1 year. Companies may face liquidity problems as some buyers in developed countries are delaying payments.

Key characteristics of gems and jewellery market

a) Largely unorganised in nature

There are over 100,000 jewellery manufacturing units throughout India and about 6,000 players in the domestic diamond processing industry. There are about 450,000 goldsmiths spread throughout the country. Family-owned jewellery stores constitute nearly 96 per cent of the market. Organised players have been growing steadily and now have a 4 per cent market share. As India's jewellery market matures, it is expected to get a higher share of the more organised and developed industry.

b) Regional in character

Traditionally, some of the regions in India have specialised in different sub-segments of either jewellery or diamond processing and is tabulated as under:

Regional mix in gems and jewellery market

Name of the city	Area of specialisation
Jaipur	Polishing precious and semi-precious gemstones
NCR	Manufacturing silver jewellery and articles
Calcutta	Lightweight plain gold jewelry
Hyderabad	Precious and semi-precious studded jewellery
Nellore	Hand-made jewellery
Coimbatore	Casting jewellery
Trichur	Light-weight gold jewellery and diamond cutting
Mumbai	Machine-made jewellery

c) High dependence on imports

The main raw materials for the gems and jewellery industry are rough diamonds, recycled gold and gold bars. The industry is highly dependent on imports for its requirement. Rough diamonds and gold bars are imported, while recycled gold is obtained from the domestic market. The total imports in the gems and jewellery industry, have grown by 23 per cent in 2008-09, with rough diamonds forming around 35 per cent of total imports. Higher dependence on imports impacts the bargaining power of buyers in the Indian market and also subjects them to fluctuations in foreign exchange rates.

The heavy dependence on imports has also enabled the emergence of a chain of wholesalers (suppliers of imported raw materials) who act as intermediaries between the domestic manufacturers of diamond jewellery and the related suppliers in the exporting country.

Demand drivers for gems and Jewellery industry

a) Stability ensured through traditional demand

Indians have an inherent culture of buying gold during festivals like Diwali, Akshaya Tritiya, Dussehra etc. and on the occasion of weddings. Even in modern times, gold is the Indian bride's "Sthreedhan" (considered as her personal wealth) which she receives from her parents during marriage and remains with her. Gold is mainly bought as an investment option and not merely as a fashion accessory.

b) Increasing affordability of modern India

The increase in income-earning populace in the middle and upper-middle class categories is anticipated to have a positive domino impact on the demand for luxury items, including gems and jewellery. Data from the National Council for Applied Economic Research (NCAER) indicates that India's income-earning population will expand by 8 per cent from 26 per cent in 2005-06 to 34 per cent in 2009-10. Even the upper-middle class population is expected to rise from 7 per cent to 10 per cent during the same period. These two segments are expected to fuel growth in consumption of luxurious items and this bodes well for the jewellery industry.

Another important factor impacting the affordability of households to purchase gems and jewellery is the price of gold and diamonds which has witnessed sharp fluctuations in the last few years. Though there is a negative correlation between precious metal prices and demand, Indian market largely remains insulated from sharp rise/decline in gold prices. This is guided by the fact that Indian jewellery purchases are directly linked with tradition (festivities, marriages etc). Although demand witnessed a subvention during the last 1-2 years when gold prices reached its peak, it was not substantial. On the other hand, consumers also shifted to diamonds as it was relatively stable vis à vis gold prices.

c) Growing market for luxury items

There is an expected surge in the gems and jewellery demand owing to the changing lifestyles especially in urban India. So the tendency to buy luxury items, including gems and jewellery, on impulse is increasing. The neo-rich, who have an inclination to buy high-end gadgets like mobile phones, ipods, watches etc, are purchasing jewellery in modern and aesthetic designs as a fashion statement. As per data from the National Sample Survey, in urban India, the share of essential items like food, clothing, electricity, fuels and footwear has reduced in the total average annual per capita consumption expenditure. On the other hand, the share of durable goods has increased, which reflects the changing preferences of consumers.

d) Enhancement in technology to aid future growth

The Indian gems and jewellery industry has made rapid strides in design, powered by a new generation of young, professionally-trained, technology-driven designers. Many of India's jewellery manufacturing facilities are equipped with the latest CAD/CAM and other advanced design systems. Technology solutions are also available for production control, supply chain and inventory management in the jewellery industry. The gems and jewellery industry in India is a good blend of modern manufacturing and design techniques with traditional skills of the Indian artisans. The Indian industry is also compliant with international norms such as the Kimberly Process and the Patriot Act.

The gold jewellery market is extremely fragmented with the organised sector accounting for a small share. India's exports of gold jewellery were worth \$6.9 billion for 2008-09. Gold jewellery exports from India have grown at a CAGR of over 26.5 per cent for the past 5 years. Major export destinations include the UAE, US and Singapore, which together account for nearly 86 per cent of total gold exports.

Another major development being witnessed is the growing share of organised players in the export of gold jewellery. This is evident from the fact that the share of SEZ (*Special Economic Zones*) and EPZ (*Export Promotion Zones*) gold exports in total gold exports has risen from 47.9 per cent in 2007-08 to 69.5 per cent in 2008-09.

Branded jewellery in India

Branded jewellery has been a relatively recent phenomenon in India. Most of branded jewellery is retailed in the unorganised sector. Majority of traditional jewellers cater to the local population and most purchases are made on trust and on the basis of the local jeweller's reputation. There is a gradual shift being witnessed in consumer behaviour towards greater preference for machine-made jewellery; thus moving away from the traditional hand-crafted jewellery.

In India, branded jewellery is positioned as a lifestyle and personality statement. This concept is similar to international trends, where jewellery is sold as a fashion accessory or for daily wear and not as an investment option. Some of the prominent players in the Indian branded jewellery market are Tanishq, Gili etc. There has also been a shift in consumer preference towards diamonds due to the extensive positioning of diamonds as both affordable and contemporary jewellery.

The introduction of value-added services such as the certification of gold and diamonds, and life-time return and buy-back schemes are other key developments in branded jewellery. These trade practices have resulted in the perception of superior quality associated with branded jewellery. The new generation of Jewellery purchasers does not remain solely associated with their local jewellers and prefer to buy branded jewellery.

Retailing formats for branded jewellery in India

Branded jewellers typically adopt the following retail formats in branded jewellery:

- Exclusive outlets at malls and other key shopping centres in major cities showcasing various models of the brand;
- Kiosks/displays in department stores and malls; and
- Display of branded jewellery in shops of local jewellers

The branded jewellery market is expected to witness strong growth in the long term on account of the following factors:

Shift in consumer preferences towards branded items

Over the last decade, there has been a radical shift in the behavioural pattern of Indian consumers with greater exposure to western lifestyles and easy availability of foreign branded items. This has resulted in an increased preference for products and brands that are popular abroad. On these lines, the demand for machine made jewellery has seen a surge in the last few years. Likewise, the traditional mindset of jewellery purchase as an investment option is gradually fading away from the Indian market. Thus there is a renewed demand for branded jewellery and is anticipated to witness robust growth in the next few years. Moreover, factors such as jewellery certification and related schemes enhance the demand for branded jewellery.

Increasing affordability of individuals with growing disposable incomes

The branded gems and jewellery market has received a major fillip owing to the increasing affordability of Indian consumers. Although the 'rich class' (income exceeding Rs 1 million per annum) forms currently a smaller proportion of the total populace, it is expected to witness a higher growth than the 'major consuming class' (income ranging between Rs 90,000 and Rs 1 million per annum). During the period 2001 and 2008, the rich class has grown at a CAGR of 35 per cent and the consuming class registered an 11 per cent CAGR growth. Thus these emerging trends in demographics are likely to have a positive impact on the demand for lifestyle/ branded products; gems and jewellery forming a sizeable share in the basket of lifestyle products.

Subsequent to the construction / renovation being completed as per rules and regulations of respective states, the relevant authorities issue the license to operate the cinema.

Business Model

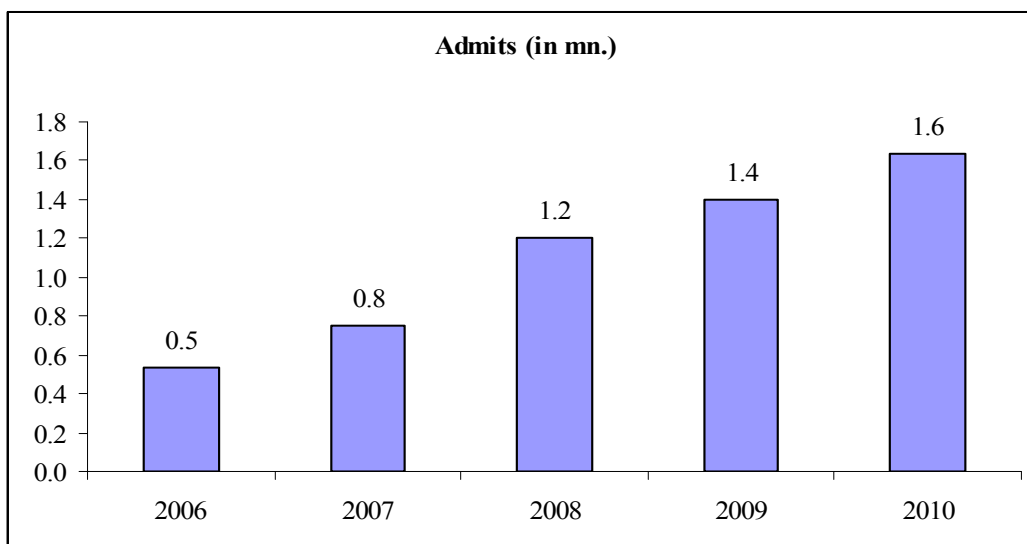

Every cinema that the Company sets up has / will have the same key heads of Revenues and Costs, which have been depicted above. The actual performance numbers at each location will vary, depending upon the location, the quality of the property, its operating efficiency, etc.

A. REVENUE

The film exhibition business / cinema earns revenue from three main sources: Box office collection, food & beverages (concessions) and advertisement, among others.

Box Office Collection: Nearly 68% of the revenues from the cinemas are generated from the box office collection while the balance from other sources which include foods & beverages, Advertisements, etc. Box office collection depends on total admits and the occupancy rate. The Company has seen a consistent increase in the footfalls in the past few years.

Occupancy levels have been as follows:

Box office collection is measured by ATP (Average Ticket Price) which is calculated by *dividing* Gross Ticket Sales with Total Tickets Sold. The comparative details of ATP in the past five years are depicted in the following chart.

The Company operates nine cinema properties in two states. The Company has been granted exemption from payment of entertainment tax for four cinema properties situated in the state of Uttar Pradesh.

Foods & Beverages (Concession Sale): Revenue from food & beverages is the second largest source of income after box office revenue and as sale of food & beverages has a higher margin. Food & beverages items include popcorn, soft drinks, confectionary, sandwiches and other snack items. Different food & beverage varieties are offered at the Company's cinemas based on preferences in that particular geographic region. The Company's food & beverages strategy emphasizes prominent and appealing food and beverage counters designed for prompt service and efficiency. The Company designs its cinemas to provide for a larger counter space to accommodate more food and beverages stands to make it easier to serve larger numbers of customers. This enhances product display, facilitates catering to more customers and simultaneously allows flexibility to introduce new concepts and improves movement around the food and beverages stands.

At most of locations the food & beverages items are mainly procured from the Company's food court division at competitive prices as against purchase from third party suppliers thereby increasing profit margins. "Combo-deals" for patrons are also being offered which increases the sales.

ADVERTISEMENT: A cinema offers an opportunity to advertisers as it directly captures the attention of the movie viewers. Advertisement revenue comes from on-screen advertisements, off-screen advertisements and cinema association activities. Advertisements includes film commercials and slides shows, foyer displays, light box displays, advertisements on ticket backs, ticket jackets, popcorn boxes, wash room advertisements, exterior of cinema branding and advertisement spots on video walls that feature film trailers, standard advertisements, concessions advertisements, music videos etc.

Other income: Other sources of income include convenience fees and shop-in-shop alliances. The Company's strategies for increasing its advertisement revenue are:

- Focus on on-screen advertisement presentation sequence prior to the screening of a feature film and during intervals;
- Develop and exploit off-screen media spaces; and
- Develop and exploit cinema experience association opportunities.

B. COST:

The primary cost heads in the film exhibition industry include distributor's share, entertainment tax and personnel expenses.

Distributor's Share: Distributors are the suppliers of films. Distributors are paid out of the box office collections. Various revenue sharing patterns exists in the industry. The Company generally has a revenue sharing agreement or a minimum guarantee agreement with distributors.

Entertainment Tax: Entertainment tax is the tax payable on the box office collection. Entertainment tax is different for every state in the country. Certain states have exempted cinema exhibitors from such tax to promote investments.

Food & Beverage raw materials: This is the cost of raw materials for food and beverages which is generally sold in the cinema premises. Most of the locations procure food & beverages items from the food & beverage division and so the costs are lower against procurement from third party suppliers.

Personnel Cost: Personnel cost includes salaries, training cost, recruitment and other costs related to employees.

Operating Costs: Operating cost includes rent, utilities, electricity etc. It also includes water and maintenance expenses.

Marketing & Promotion Expenses: This includes spends on media advertising, hoardings, posters etc.

Business Process

The operations of a cinema business can be divided in three key activities:

Programming & Development

Programming is one of the most important function in any film exhibition business. The programming department is responsible for the regular supply of films to all the screens. The main objective of the programming department is to source the right films for the right market (based on the thorough analysis of the profile of the market), at the most competitive terms and screen the films in a manner and at the show that enables maximization of revenues from each film.

Programming, or sourcing of content for its screens, is a centralized function done under direct guidance from the Head – Programming & Development. However, decisions on programming are taken based on inputs from heads of respective theatres, in respect of local factors including tastes and preferences of the patrons in the areas where the cinemas are based. Programming is usually done every Tuesday after a careful assessment of the collections during the weekend of the current and past week's releases. This involves sourcing the right films for the right markets and screening them with a methodology which enables maximization of shows and efficient utilization of screens. Based on capacity available, a programming mix of Hindi, English and Regional films is finalized.

The development team is involved with planning the expansion and growth of the business. The team consists of key persons from each function area of the organization namely programming, legal, finance, marketing, Project execution team and the Managing Director. The team is responsible for carrying out

feasibility studies, identifying best cities and locations for growth and expansion of the business and negotiating the terms for the target project to ensure optimal terms are decided.

Operations & Maintenance

The operations department is responsible for the day to day operations at every location. It ensures smooth and efficient flow of operations while maintaining high standards of service, comfort and safety.

The Concessions sale is supported by the food & beverage division which maintains regular and constant supply of food & beverages which also maintains quality and timely delivery.

Ushering unit coordinates the movement of patrons in the lobby and auditorium in an efficient and friendly manner.

A team of engineers take care of the projection and provides uninterrupted viewing experience by ensuring preventive breakdown maintenance of all equipments.

Housekeeping and security team takes care of the hygiene, sanitation, upkeep, maintenance and safety measures within the premises. The Company has maintained a standard management practice across all their cinemas to ensure smooth and efficient operations.

Marketing & Brand Promotion

The marketing team is primarily responsible for brand positioning of SRS cinemas. The Company undertakes intensive marketing and promotional activities for its cinemas and it organizes special marketing programmes for specific films. The Company has an in-house team that develops and implements the events and promotions for its customers focused around films or operations. The Company uses print media advertisements, pamphlets for local area distribution, radio advertising, Movie schedules published in newspapers, the Company’s website (www.srsparivar.com) and Short Message Service (SMS) over the mobile phones informing the patrons of film selections and show times. Newspaper advertisements are used on regular basis in leading publications with a view to maintain a high level of visibility as well as intimate people about films which are about to be released.

The Company organizes promotions, events, campaigns and contests to attract patrons to its cinemas. Other marketing initiatives includes discount for certain concession items and co-ordinating the theme in cinema by using displays and dressing staff in film merchandise. The premium ambience of the cinema properties is leveraged to position them as a venue of choice for kitty parties, birthdays and other celebratory events. The Company also targets schools and corporates for such group events.

To ensure that the Company delivers to its customers, it regularly undertakes consumer audits to measure their satisfaction levels of patrons, identify gaps as well as new opportunities to exploit. Findings of the audits provide crucial inputs to bring about changes in programming service and facilities.

The new cinema launches, provides an opportunity for the Company to make its presence felt. On account of all round marketing during launch of properties, these occasions provide a good platform for repositioning and infusing vibrancy into the brand. The launches typically use an integrated marketing approach that includes several initiatives such as pre and post launch consumer studies as well as a multimedia campaign. The latter is an intensive program that includes impactful press campaigns, radio spots, contest launch events and outdoor advertising through hoardings, kiosks banners, mobile vans and etc.

Further the Company follows umbrella branding strategy wherein, all the divisions of SRS are promoted collectively to get high attention of their customers. This helps the Company to build strong brand equity.

COMPETITION

Any cinema attracts patrons within a short radius, called its “catchment” area. The size of the catchment area could be different, depending on city, population density, traffic flows, etc. This could be 2-3 km in a densely populated city like Mumbai, or could be over 5 km in a tier-II town. The Company faces competition from cinemas and single screen theatres located in the same catchments area.

The cinema exhibition industry is highly competitive. Cinema exhibitors generally compete on the basis of the following competitive factors:

- Ability to secure films with favorable licensing terms
- Location and reputation of their cinemas
- Quality of projection and sound systems at their cinemas
- Ability and willingness to promote the films they are showing

Focus on film marketing

One of the factors contributing to the Company’s success has been its use of innovative techniques in the film exhibition context to market films shown at its cinemas. The Company organizes movie screenings with film stars, conduct preview screenings for film critics, conduct movie-based promotions, distribute movie memorabilia and information.

As per the restated financial statements, the total revenue of the cinema exhibition division for the financial years ended March 31st, 2010, 2009 and 2008 was Rs. 218.79 mn., Rs. 182.37 mn. and Rs. 137.56 mn. respectively. BUSINESS DYNAMICS

1) Footfalls

Footfall is an important Key Performance Indicator for any retail outlet. The Company, in the recent past has managed to generate higher footfalls by building its brand image through efficient marketing and attractive promotional schemes along with a focus on customer care at its strategically positioned locations.

Location

The Company takes into consideration the following factors while deciding upon the locations of its retail stores:

Segmentation of Target Audience

The Company targets the middle and upper middle income segments of the society across its various formats. This segmentation in turn has a direct bearing on the selection of the location.

Store Layout and Ambience

The Company believes that all the stores need to provide a consistent look and feel, as well as a uniform shopping experience to its consumers. For this, it takes into consideration factors like standardized store layouts, color schemes, value offers, visual merchandise as well as things such as stock-mix, pricing and accounting methods.

Marketing

The Company undertakes regular promotion of the stores through print media and local radio channels to promote the Company. Outdoor advertising such as banners, posters and hoardings are employed to advertise and to increase visibility.

The Company also focuses on effective promotional activities such as:

- Below The Line (BTL) activities at respective stores;
- Tie up with the local societies for distribution of leaflets & other promotional materials; and
- Value added services like home delivery etc.

Brand Image

The Company believes that on account of its quality service offering, it has positioned itself as a brand which delivers quality products at affordable prices to effectively meet and satisfy the requirements of its customers.

Customers' Shopping Experience

The retailing business offers **customer-focused shopping environment**. A trained workforce aims to pamper the customers to give them a complete shopping satisfaction. Such experience makes the customers visit the stores again and again.

2) Conversion

Conversion of footfalls is the second Key Performance Indicator in organized retailing. The conversion strategy at SRS rests on 3 pillars:

- Right Category Mix
- Right Brand Mix
- Right Product Mix with right price point

A merchandising plan is prepared for each outlet. It takes into consideration factors such as past sales data, regional customer tastes and preferences, likely fashion trends, vendor management and price. The Company lays emphasis on its private labels such as 'S Touch', 'Sure-shine', 'Metro Art' etc. The Company also focuses on selling additional / newer product to customers through limited period offers.

Category Mix

Size of each outlet is the key factor which determines the category mix. The Company plans the product categories that are to be placed at each store with respect to the space available. Larger the size of the store, greater is the category mix. The focus here is centered on the effects of the turnover of the total category, not just the sales on the individual products therein.

Various categories that the Company offers at its retail outlets include apparels, FMCG, grocery, fruits & vegetables, home appliances, accessories, jewellery, food & beverages, electronics, toiletries, crockery and stationery.

Under category management, for example, apparels, the Company has created and caters to products across length and breadth of a category at different price points, fabrics, designs, shapes, seasons, colors and sizes.

Brand Mix

Once the categories are defined for each retail outlet the brand mix is decided. The decision of brand mix takes into consideration the demography, literacy levels, taste & preferences, nature of occupation and income levels of the consumers.

Consumers never buy everything of one brand. There are various factors that go into the buying decision of the consumer like, type of the product, opportunity, available budget, etc. The Company mix and match multiple brands which help the customers in decision making. It also develops brand strategies for its own brands. Further, the Company sells both national and private level brands. The Company also creates necessary shelf space for its private level brands.

Product Mix & Price Points

The focus then shifts to the product mix which takes into account both the variety and the quantity of goods. The product mix is used to attract a certain demographic of shoppers to the store as well. This depends on the location, demographics and target consumers.

The Company offers wide choice of quality with mixed product range as they are closely linked to competitive strategy. During the holidays, the retail store increases its merchandise mix so that the customers can find additional products.

The Company also lays focus on multiple price point products to give wider buying option to its customers. This price mix primarily depends on the target consumers for every outlet.

3) Basket Size

The ability to convert footfalls into customers and to increase the basket size is a key challenge that the retailers face. To generate sales with higher basket size the Company focuses on:

Plano-gramming

Plano-gramming is the art of displaying merchandise in a manner that is appealing to the eyes of the customer.

The products on the retail stores are displayed on the store shelf in a fashion so as to increase customer purchases. The concept of Plano-gramming helps the Company to create an optimal visual product placement and optimal commercial product placement.

At all the retail stores the Company places the products in a manner to offer a convenient shopping experience. A good theme will catch the attention of the customer with a shopping mood into the store. The product display strategy takes into account both essentials and non-essentials.

Fill Rates

The Company maintains adequate Fill Rates of each product which increases the visibility of products enabling higher sales.

An efficient fill rate is achieved through efficient buying, warehousing and logistics. Its strong relationship with distributors helps to get preference in getting stock. Further, the Company enjoys the benefits of modern trade schemes from their distributors.

Inventory is managed in real time basis through an automated system known as ARS (Automated Replenishment System). ARS helps smooth flow of inventory at every store.

The Company has a strong MIS (Management Information System) set up to generate valuable insights for itself and help in improving its operations and enhance its response time to the customers' need.

Cash & Carry Business Process

The Company purchases grocery in bulk during the year and after due quality checks, the goods are sorted. Once the sorting is done, the goods are packed for the consumers in retail packing units. The consumer packing of the goods ranges from 100 Grams to 5 Kilo Grams under the brand name of SRS Value Bazaar. These packed goods are sold to the local retailers, societies, resident welfare associations etc. The main objective of selling SRS Branded consumer goods in the local market is to spread the awareness of SRS

Brand in the open market as well as leverage the brand's equity. The goods are sold on credit, depending upon the customer track record. Another advantage of conducting this business is to achieve cost efficiency in the Retail business and as such, both the businesses complement each other.

Purchasing

Purchasing and vendor management is of critical importance in retail business that sells multiple products. The Company has established network of over 500 vendors all over the country. The Company's in-house team seeks to develop alliances and arrangements with them. It has been a conscious decision to procure goods from small and medium sized vendors and manufacturers, which have led to reduction in the cost of goods procured and increases profitability.

Inventory Management

The Company has implemented the 'Automatic Replenishment System' (ARS) to control its inventory position at all the retail stores. Each Stock Keeping Unit (SKU) is identified by creation of an Item Master in a software and tagging various attributes like description of product, brand, OEM barcode, Size of the product, Minimum and Maximum quantity on the shelves.

The minimum and maximum value and re-order levels for the SKUs are defined at both, store and warehouse level. When a SKU falls below the minimum level a report is generated. A requisition for stock refilling is sent to the warehouse department. A similar report is generated at the warehouse in case any SKU falls below the minimum level. The purchase department gets the requisition and the goods are then procured from external vendors. A strong MIS set up generates valuable insights for detailed monitoring and helps in improving the Company's operations and efficiency.

The various reports generated are studied on periodical basis to keep the stock position under control and have control on the pilferage. As a result of ARS, the Company has been able to maintain adequate Fill Rates of each product which increases the visibility of products enabling higher sales.

Competitive Advantage

Strong understanding of the 'Retail' Segment

The Company's business plan involves implementation of the concept of the two different formats targeting the general public. The Company intends to provide quality products at competitive prices. It sells a vast range of merchandise across apparels and accessories, FMCG, food products and consumer durables with over 40,000 SKUs. The emphasis has been to maximize the value that the customers derive in spending on goods bought in their stores. The Company endeavors to continuously reduce their costs through a variety of measures, such as, procurement of goods directly from the small and medium size vendors and manufacturers, efficient logistics and distribution systems along with customized product mix at the stores depending on the regional customer behavior and preferences. Collective purchase for wholesale and retail division provides the leverage to get higher discounts.

As per the restated financial statements, the total revenue of retail and cash & carry division for the financial years ended March 31, 2010, 2009 and 2008 was Rs. 4,439.25 mn., Rs. 4,479.64 mn. and Rs. 1,291.01 mn. respectively. Retail Business

The Company trades in hallmarked Gold Jewellery and certified Diamond Jewels under the brand name of 'SRS Jewells'. The Company sells jewellery through two stand alone stores located at Faridabad and Palwal in Haryana. Apart from the above, the Company also carries out sale through 'shop in shop' outlets in some of its retail stores.

Wholesale Business

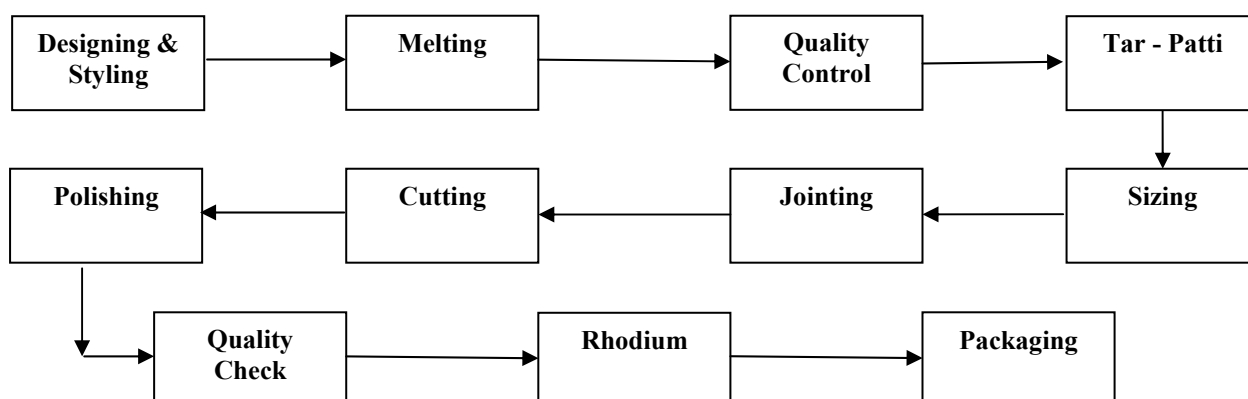

The Company manufactures in its manufacturing facility of its Subsidiary and from third parties and supplies to a host of jewelers in the NCR region. The Company deals in fast moving items like rings, bangles, chains etc. which generates large volumes. In addition to this, the Company also deals in gold coins and medallions. The Company currently operates through two stores at Chandni Chowk and Karol Bagh in New Delhi.

Manufacturing Facility

The Company procures Jewellery from its 100% subsidiary "SRS Jewells Limited" at Patparganj, New Delhi and through third parties. As on May 31, 2010 the Jewellery manufacturing capacity of this facility is 4.5 tonnes per annum. Further, the Company also outsources the manufacturing of jewellery to third party manufacturers / smiths. This is done locally by identifying the experienced manufacturers / smiths in the area. The manufacturing facility at Patparganj has been recently started in May 2010.

Manufacturing Process

The Company's subsidiary started its commercial production in May 2010. The manufacturing process is given below:

- **Designing and Styling-** It is the process under which designing, size and weight (style) is decided which is done on the basis of customers preferences. This is the foundation of each type of gold jewellery.
- **Melting-** Under this process gold is melted with other metal(s) to form the required alloys as per the decided design and style. Once the gold is melted, it is poured from the carbon crucibles into special moulds to cool and harden into strips of desired size.
- **Quality Control-** Quality control is done by a dedicated team to check for accuracy of the purity of the alloy required in the desired jewellery.
- **Tar- Patti-** In this process, the input received from the melting process is put into the manufacturing machine from which the sheets are prepared of particular shape and size. The output is generally known as *Tar – Patti*.
- **Sizing-** In this process, the rings are prepared from *tar-patti*. The output is given a shape as contemplated in the design.

- **Jointing-** In this process the rings are jointed through soldering to provide them shape and strength.
- **Cutting-** In this process, unfinished rings are put on machines to give them the final shape, size and weight as per the intended design.
- **Polishing-** Polishing starts with the process of buffing. The jewellery is further put in an Ultrasonic Machine for polishing the rear-side and other non-reachable corners of the jewellery which gives it a better look. Finally after the application of the above two techniques the jewellery is washed with chemicals for the glitter and shine.
- **Quality Check-** Quality check is done for design, finish, polishing and purity. The key step under this process is to examine the jewellery to check whether proper quantity of gold and its alloys are used as per norms prescribed by the Gold Council.
- **Rhodium-** In this process, the product undergoes electro-plating process of 'rhodium' to give the look of a diamond or in other words, gold jewellery is given a look of white gold. Finally the product gets a better look and is ready for sale and dispatch.
- **Packaging-** Ready stock is packed in boxes.

Sourcing of Raw Material

Gold is a key commodity of the jewellery business and accounts for a bulk of the overall cost. This makes sourcing gold at the best possible prices as a key business requirement. Since gold is an internationally traded commodity, the Company is able to analyze the prices on a transparent and real time basis. Keeping this as a base, the Company invites proposals from leading banks and international dealers of repute. Post negotiations and finalization of their respective supply commissions, the Company enters into supply agreements ranging from six months to one year. Currently, the Company sources bulk of the requirements from Bank of Nova Scotia.

HTML has issued a ‘No Objection Certificate’ on February 16, 2010 confirming they have no objection to the proposed IPO, to be made by the Company by means of fresh issue of the equity shares.

- 2) The Company and Promoters to take reasonable endeavors to come out with an Initial Public Offer within 60 months from the date of this agreement.
- 3) If the Company makes a right issue or any further issue of Equity Shares after conversion of the Debentures; it shall issue a notice to HTML and provide an opportunity to HTML to subscribe pro-rata to such new Equity Shares (by paying cash to the company) so as to enable HTML to maintain its then existing percentage interest in the Company.
- 4) In the event the Company issues any further Equity Shares to any third party prior to the completion of IPO at a price lower than the cost of the acquisition of HTML’s Equity Shares arising out of conversion of Debentures, then the Promoters shall, jointly and severally within 45 days of the allotment to any other person at such lower price or within a period of 45 days of conversion of the Debentures, as the case may be, transfer such number of shares held by the Promoters to HTML at zero consideration as may be required to render the average price of the HTML’s holding in the Company, equal to the price at which the Equity Shares are issued and allotted to any third party.

- 5) HTML has Tag Along Rights in the event the Promoters intend to transfer all or part of their shareholding in the Company to third party who is not an affiliate of the Promoters, the Promoters shall provide notice of such proposed sale to HTML 30 days prior to the proposed conclusion of such sale. In the event that any such sale or disposal by the Promoters results in the Promoter's shareholding remaining above 80% of issued and paid-up capital of the Company, the Tag Along Right would not be applicable. But in the event that any such sale or disposal by the Promoters results in the Promoter's Shareholding falling below 51% of issued and paid-up capital of the Company, the Promoters shall not be permitted to carry out such sale or otherwise dispose of the Shares held by them, unless simultaneously with the sale, the Third Party offer or makes an offer in writing to HTML to purchase all the HTML shares held by HTML in the Company at such time, on the same terms and conditions as the Third Party Offeror's proposed acquisition of shares from the Promoters, including at the same price.
- 6) In the event there is no IPO on or before 31st December 2013 or no trade sale of shares held by HTML occurs to a strategic investor or financial investor, HTML shall be entitled to put its equity shares and cause the promoter to purchase such equity shares either directly or through any of their nominees at a price equivalent to the subscription amount plus an IRR of 12%.
- 7) The agreement shall cease to be in force upon listing of the equity shares of the Company after the IPO.

FACTORS AFFECTING THE FINANCIAL RESULTS

The business of the Company is subject to various risks and uncertainties, including those discussed in the section titled “**Risk Factors**”. Some of the important factors that have affected and the Company expects will to continue to affect, the results of operations, financial information and cash flows are discussed below:-

Cinema Exhibition Business

Box Office Revenue

The Box office revenue depends on the number of patrons that visit cinemas and the average ticket price that is charged to them. Both these factors are critical for optimizing the profitability of the cinema exhibition business.

The number of patrons that visit cinemas is one of the key parameters that help to evaluate the Company’s performance. The growth in the number of patrons has been primarily due to the opening of new cinemas. The Company has been able to maintain relatively stable occupancy levels in existing cinemas despite increased competition. Use of flexible ticket pricing can attract patrons at various points of time of the day and the week. Movie focused marketing and promotional activities also attract patrons to cinemas.

Food & Beverages Revenue

Food and beverages contributes approx. 19% of the revenues in cinema division. The Company generally tries to maximize the revenues from the sale of food & beverages by increasing the number of transactions and average transaction size within the limited time prior to the start of a film or during the interval of a film. The Company attempts to increase the number of transactions by installing adequate number of points of sale counters, suggestive selling to patrons and service on seats. The Company also attempts to increase the average transaction size by selling a combination of two or more products at a price cheaper than the total of each of those items purchased separately, thereby attracting patrons’ desire to obtain better value for money.

Distributors’ Share (Film Hire Costs)

The Company generally pays film distributors a percentage of net sales of tickets of films (*sale of tickets of films net of state entertainment taxes and local body levies*) for each film. The Company generally has a revenue sharing or a minimum guarantee agreement with distributors. The distributor’s share is generally 50% in the first week, 42.5% in the second week, 37.5% in the third week and 30% in the fourth week and the following weeks. However, the revenue sharing agreement may be altered from time to time and can be negotiated from film to film with the film distributors.

Entertainment Tax Benefits and Exemptions

In order to encourage investment in cinemas, some of the state governments have granted reductions in the applicable rate of entertainment tax or provide exemption in entertainment tax. Entertainment tax in India has historically been high which had till recently restricted the growth of the film exhibition industry. However, over the years, there has been a gradual rationalization of the state entertainment taxes in many states where entertainment tax rates were exorbitant.

Seasonality of Film Exhibition Business

Historically, revenues in cinema division have been higher during the first half of the fiscal year due to summer vacations and release of big budget Indian movies during this period. As a result of this, quarter-to-quarter results may not be comparable or provide a meaningful indicator of future performance.

Food & Beverages***Price fluctuations and seasonality***

Most food ingredients used in the preparations are commodities and therefore subject to price fluctuations as a result of seasonality, weather, demand and other factors. In case of significant increase in price of raw materials the financial performance of the Company will adversely affect. In order to overcome such significant increases the Company regularly reviews the prices of raw materials and accordingly change the price on the menu.

Effectiveness of marketing strategies

The Company devotes significant attention to brand-building efforts. The Company has plans on continuing to build its brand and retail sales by satisfying customers with offerings and by continuing to invest in the advertising and marketing of “SRS 7dayz” brand. Effective marketing strategy is expected to benefit the business.

Retail Division***Same store sales***

Same store sales growth refers to year-on-year growth in sales for stores in operation for whole year in both the financial years. As new stores open around other existing stores, thereby reducing the delivery area for the existing stores, this results in reduction of sales of the existing store and overall same store sales growth. However, the Company believes that over time the existing stores would try to offset this initial reduction in sales by using aggressive marketing strategies in the area of their operations.

Trends and fashion preference of the target customers

The Company is into retailing of fast moving consumer goods and lifestyle products where introduction of new products, design is a regular phenomenon. Also, fashion preference and taste keep on varying depending upon the region. Hence, any failure to identify changing fashion trends could have an adverse impact on the business of the Company.

Strategizing location of the new stores

Revenues from this division is dependent upon opening of new stores at strategic location and customizing the store as per regional taste preference, which is very significant for drawing customers to a particular store. This may require the Company to invest higher amounts in rentals as well as working capital.

Jewellery Division***Seasonal fluctuation in the sales***

The Company has experienced and expects to continue to experience seasonal fluctuations in sales primarily in jewellery division. In particular, the Company has historically experienced higher sales at jewellery retail stores, during the second half of fiscal, as a result of various festive seasons. In anticipation of increased sales activity during the second half of the fiscal year, the Company may incur significant additional expenses, including higher inventory and additional staffing in customer support and operations. In future, seasonal sales patterns may become more pronounced, strain personnel activities and cause a shortfall in sales as compared to the expenses incurred in a given period, which could adversely affect the business and results of operations.

Demand for the jewellery products

Jewellery forms a part of the discretionary purchases for consumers and results of operations are significantly dependent on various factors such as economic growth, employment levels, income levels, tax rates and credit availability, all of which affects consumer spending and disposable income. Any reduction in consumer spending or disposable income may affect the Company significantly. The Company believes that jewellery offerings must reflect the tastes and preferences of a wide range of consumers whose preferences may change regularly. If the styles and designs offered by the Company become less popular with consumers and the Company is not able to adjust the inventory levels in a timely manner, the sales may decline or fail to meet expected levels.

Success of the brand

The business is significantly dependent on continued establishment and promotion of the Company's brand. Promoting and positioning this brand depend largely on the success of marketing and merchandising efforts and the ability to provide a consistent, high-quality customer experience. The failure of brand promotion activities could adversely affect the Company's ability to attract new customers and maintain customer relationships and as a result, adversely affect the business and results of operations.

Fluctuations in Gold prices

The price fluctuation of gold, which accounts majority of the raw material costs, can affect the Company's performance.

Growth of new customers and increased sales to existing customers

The revenues are dependent on growth of new customers and increase in sales to existing customers. The Company seeks to leverage long-term relationships with existing customers to acquire new customers.

Government Incentives

The Company can benefit from a number of government incentives that are available by setting up a manufacturing facilities located in a SEZ. This benefit will entitle the Company to direct and indirect taxation benefits and enable them to price their products competitively. To avail such benefits the Company has made application for setting up of a manufacturing facility at Noida SEZ in the state of Uttar Pradesh.

General Factors affecting the results of operations

Time overrun on Expansion of new projects

The Company is into diversified business and is into the phase of expansion across all divisions. Though, the projects are independent of each other, there is a possibility that the projects get delayed on account of any unavoidable circumstances such as, regulatory changes, unavailability of plant & machinery, etc. The Company might face time over-run on its projects. Such time overrun can also increase the expenditure during the construction period.

Operating expenses

The primary operating expenses include the cost of raw materials (such as FMCG, grocery, apparels, jewellery, food and beverages), distributor's share, staff costs, rentals and other operating costs which include packaging costs, fuel costs etc. As the Company does more business, open more cinemas / food courts / restaurants / retail stores and hire more people, operating costs will increase. As the Company continues to grow, other expenses will also increase, but may decline as a percentage of revenue.

Competition

The Company is into varied business verticals and so it faces competition in each business vertical independently. In retail division, ease on FDI policy, if any, by the government will intensify competition in future. Unprecedented downturn in the economy will adversely impact consumer spending. Multiple existing players and new entrants in the value adding wholesale FMCG business will increase competition. In case the government permits or relaxes entry norms for global players having a significant advantage of scale and capital can pose a stiff competition to the Company.

The Company faces competition from multiplexes and single screen theatres located in the same catchment area. As the business matures, the Company, is likely to face competition from other exhibition companies. Piracy of films and early release of DVD prints affect the overall footfalls for cinemas / multiplexes. Multiplexes, especially those in Tier II and III cities, face pricing competition from single screen cinemas.

Within the food & beverage service industry and the quick service restaurants sector, competitors include international and domestic chains operating in India. The competition is on the basis of product and service quality and price, location, brand image and supply costs. As the number of dine-in stores increases, the Company may face increasing competition from established fine dining restaurants. The industry is often also affected by changes in consumer tastes, economic conditions, demographic trends and consumers' disposable income.

Jewellery is a highly competitive industry. The locations at which the Company has presence, has well established players who already have a strong foot hold in the market. In addition to the 4-5 large organized players, the market is also fragmented with large section of small and unorganized players. The Company faces stiff competition from organised as well as small and unorganized players in view of the prevailing status of the established players in the locations, where the company operates.

Consumer spending and general economic and market conditions

The business of the Company to a significant extent depends on consumer confidence and spending, which is influenced by general economic conditions and discretionary spending of income. The consumer confidence and their discretionary spending are also related to general economic and market conditions. In case of recessionary trends, the discretionary spending is significantly reduced, whereas during the buoyant market conditions the discretionary spending goes up.

Borrowing Costs

The Company borrows loans from banks for its capital expenditure including acquiring of fixed assets as well as for the working capital requirements. The Company capitalizes the interest cost during the construction period or the setting up period and is included as part of the project cost. Interest rates vary from time to time and if there is substantial increase in the interest cost, the overall cost of setting up of the units / projects could go up and the same could become un-viable.

Inventories

The Company's businesses, specifically the retail, cash & carry business, jewellery retail & whole-sale business require maintaining of high levels of inventory of FMCG, grocery, apparels and high value item like gold. Hence, Proper management and control of inventory is an essential requirement. In case the inventory levels are not managed properly, the cost of maintaining the inventory could increase and could adversely affect the financial performance of the Company.

One of the Promoter Group Companies, namely SRS Real Infrastructure Limited (earlier known as Manu Finlease Limited) came with an IPO in the year 1995. After the public issue, Securities and Exchange Board of India (SEBI), on the grounds of alleged malpractices in the public issue ordered investigations to be conducted to ascertain the truth of allegations. The Chairman of SEBI passed an order dated November 29, 2002, whereby M/s. Manu Finlease Limited, Mr. Anil Kumar Jindal, Mr. J.K. Garg, Mr. P.K. Kapoor and Mrs. Ritu Garg were debarred from accessing and being associated with the capital market for a period of 5 years (i.e., upto November 28, 2007). In this regard, an appeal was filed against the said order before the Securities Appellate Tribunal (SAT) in 2003. The appeal was dismissed by the SAT vide order dated October 27, 2003. Further, an appeal was filed before the Supreme Court. The Supreme Court vide its order dated April 18, 2006 reduced the period of debarment by approximately one year and one month (i.e. upto October 31, 2006). The relevant extracts of the said Supreme Court order are as follows:

“Without expressing any view regarding the merits of the respective contentions of the respective parties as to the correctness of the order and leaving the questions of law open, the Court directs that in the facts and circumstances of this case M/s. Manu Finlease Limited, Anil Kumar Jindal, J.K. Garg and P.K. Kapoor and Ritu Garg will not access or be associated with the capital market upto 31st October, 2006. The civil appeals are disposed of accordingly. No order as to costs.”

Bansla Finlease Limited did not proceed with the public issue subsequent to filing of Draft Prospectus with the Registrar of Companies, NCT of Delhi & Haryana.

If the Price Band is revised, the revised Price Band and the Bidding Period will be published in national daily newspapers (one each in English and Hindi), each with wide circulation together with an indication of such change on the websites of the BRLMs and SCSBs and at the terminals of the Syndicate Members.
- (e) Each Bid cum Application Form will give the Bidder the choice to Bid for up to three optional prices (for details see “**Bids at Different Price Levels**” below) within the Price Band and specify the demand (*i.e.*, the number of Equity Shares Bid for) in each option. The price and demand options submitted by the Bidder in the Bid cum Application Form will be treated as optional demands from the Bidder and will not be cumulated. After determination of the Issue Price, the maximum number of Equity Shares Bid for by a Bidder at or above the Issue Price will be considered for allocation/Allotment and the rest of the Bid(s), irrespective of the Bid Amount, will become automatically invalid.
- (f) Except in relation to the Bids received from the Anchor Investors, the Syndicate or the SCSBs will enter each Bid option into the electronic Bidding system as a separate Bid and generate a Transaction Registration Slip (“**TRS**”), for each price and demand option and shall, on demand, give the same to the Bidder. Therefore, a Bidder can receive up to three TRSs for each Bid cum Application Form.
- (g) With respect to ASBA Bidders, on receipt of the ASBA Bid cum Application Form, submitted whether in physical or electronic mode, the Designated Branch of the SCSB shall verify if sufficient funds equal to the Bid Amount are available in the ASBA Account, as mentioned in the ASBA Bid cum Application Form, prior to uploading such Bids with the Stock Exchanges. If sufficient funds are not available in the ASBA Account, the Designated Branch of the SCSB shall reject such Bids and shall not upload such Bids with the Stock Exchanges. If sufficient funds are available in the ASBA Account, the SCSB shall block an amount equivalent to the Bid Amount mentioned in the ASBA Bid cum Application Form and will enter each Bid option into the electronic bidding system as a separate Bid.
- (h) Along with the Bid cum Application Form, all Bidders will make payment in the manner described under the paragraph titled “**Payment Instructions**” on page 406.

- (c) In case of revision in the Price Band, the Bidding Period will be extended for at least three additional Working Days after revision of Price Band subject to a maximum of 10 Working Days. Any revision in the Price Band and the revised Bidding Period, if applicable, will be widely disseminated by notification to the Stock Exchanges, by issuing a public notice in national daily newspapers (one each in English and Hindi), each with wide circulation and also by indicating the change on the websites of the BRLMs, the SCSBs and at the terminals of the Syndicate Members.
- (d) The Company in consultation with the BRLMs can finalize the Issue Price and Anchor Investor Issue Price within the Price Band in accordance with this section, without the prior approval of or intimation to the Bidders.
- (e) The Bidder can Bid at any price within the Price Band. The Bidder has to Bid for the desired number of Equity Shares at a specific price. Retail Individual Bidders may Bid at Cut-off Price. However, Bidding at Cut-off Price is prohibited for QIB or Non-Institutional Bidders and such Bids from QIBs and Non-Institutional Bidders shall be rejected.
- (f) Retail Individual Bidders who Bid at the Cut-off Price agree that they shall purchase the Equity Shares at any price within the Price Band. Retail Individual Bidders bidding at Cut-off Price shall deposit the Bid Amount based on the Cap Price with the members of the Syndicate. In case of ASBA Bidders Bidding at Cut-off Price (other than QIBs and Non-Institutional Bidders), the ASBA Bidders shall instruct the SCSBs to block an amount based on the Cap Price. In the event the Bid Amount is higher than the subscription amount payable by the Retail Individual Bidders who Bid at Cut-off Price (*i.e.*, the total number of Equity Shares allocated in the Issue multiplied by the Issue Price), the Retail Individual Bidders who Bid at Cut-off Price shall receive the refund of the excess amounts from the Escrow Account(s) or the excess funds shall be unblocked from their ASBA Accounts, as the case may be.
- (g) In case of an upward revision in the Price Band announced as above, Retail Individual Bidders who had Bid at Cut-off Price could either (i) revise their Bid or (ii) make additional payment based on the revised Cap Price (such that the total amount *i.e.*, original Bid Amount plus additional payment does not exceed Rs. 100,000 for Retail Individual Bidders, if the Bidder wants to continue to Bid at Cut-off Price), with the member of the Syndicate to whom the original Bid was submitted. In case the total amount (*i.e.*, original Bid Amount plus additional payment) exceeds Rs. 100,000 for Retail Individual Bidders Bidding at the Cut-off Price the Bid will be considered for allocation under the Non-Institutional Portion in terms of this Draft Red Herring Prospectus. If, however, the Bidder does not either revise the Bid or make additional payment and the Issue Price is higher than the Cap Price prior to revision, the number of Equity Shares Bid for shall be adjusted downwards for the purpose of Allotment, such that no additional payment would be required from the Bidder and the Bidder is deemed to have approved such revised Bid at Cut-off Price.
- (i) In case of a downward revision in the Price Band, announced as above, Retail Individual Bidders who have Bid at Cut-off Price could either revise their Bid or the excess amount paid at the time of Bidding would be refunded from the Escrow Account(s) or the excess funds shall be unblocked from their ASBA Accounts, as the case may be.

Bidders should note that on the basis of Bidder's PAN, Depository Participant's name, DP ID number and beneficiary account number provided by them in the Bid cum Application Form and entered into the electronic bidding system of the Stock Exchanges by the Syndicate and the SCSBs, as the case may be, the Registrar to the Issue will obtain from the Depository the demographic details including the Bidder's address, occupation and bank account details including the nine-digit Magnetic Ink Character Recognition ("MICR") code as appearing on a cheque leaf ('**Demographic Details**'). These Demographic Details would be used for giving refunds (including through physical refund warrants, direct credit, ECS, NEFT and RTGS) to the Bidders, CANs and allocation advice. Hence, Bidders are advised to immediately update their bank account details and Demographic Details as appearing on the records of the Depository Participant and ensure that they are true and correct. dispatch/credit of refunds to Bidders at the Bidders sole risk and neither the Syndicate nor the Registrar to the Issue or the Escrow Collection Banks or the SCSBs nor the Company shall have any responsibility and undertake any liability for the same.

IT IS MANDATORY FOR ALL THE BIDDERS TO RECEIVE THEIR EQUITY SHARES IN DEMATERIALISED FORM. ALL BIDDERS SHOULD MENTION THEIR PAN, DP ID NUMBER AND BENEFICIARY ACCOUNT NUMBER IN THE BID CUM APPLICATION FORM. By signing the Bid cum Application Form, the Bidder would be deemed to have authorised the Depositories to provide, on request, to the Registrar to the Issue, the required Demographic Details as available on its records.

Refund Orders (where refunds are not being made electronically)/Allocation Advice/CANs would be mailed at the address of the Bidder as per the Demographic Details received from the Depositories. Bidders may note that delivery of refund orders/allocation advice/CANs may get delayed if the same once sent to the address obtained from the Depositories are returned undelivered. Any such delay shall be at the Bidders sole risk and neither the Company nor Escrow Collection Banks nor the Syndicate shall be liable to compensate the Bidder for any losses caused to the Bidder due to any such delay or liable to pay any interest for such delay. In case of refunds through electronic modes as detailed in this Draft Red Herring Prospectus, Bidders may note that refunds may be delayed if bank particulars obtained from the Depository Participant are incorrect.

In case no corresponding record is available with the Depositories, which matches the three parameters, namely, Bidders PAN (in case of joint Bids, PAN of first applicant), the DP ID and the beneficiary's identity, such Bids are liable to be rejected.

Other Instructions

Joint Bids in case of Individuals

Bids may be made in single or joint names (not more than three). In the case of joint Bids, all payments will be made out in favour of the Bidder whose name appears first in the Bid cum Application Form or Revision Form. All communications will be addressed to the First Bidder and will be dispatched to his or her address as per the Demographic Details received from the Depository.

Multiple Bids

A Bidder should submit only one Bid cum Application Form (and not more than one) for the total number of Equity Shares required. Two or more Bid cum Application Forms will be deemed to be multiple Bids if the sole or first Bidder is one and the same. It is clarified, however, that Bidders shall have the option to make a maximum of three Bids in the Bid cum Application Form and such options shall not be considered multiple Bids.

In case of a Mutual Fund, a separate Bid can be made in respect of each scheme of the Mutual Fund registered with SEBI and such Bids in respect of more than one scheme of the Mutual Fund will not be treated as multiple Bids provided that the Bids clearly indicate the scheme concerned for which the Bid has been made. Bids by QIBs under the Anchor Investor Portion and QIB Portion (excluding Anchor Investor Portion) will not be considered as multiple Bids.

After Bidding on an ASBA Bid cum Application Form either in physical or electronic mode, where such ASBA Bid has been submitted to the Designated Branches of SCSBs and uploaded with the Stock Exchanges, an ASBA Bidder cannot Bid, either in physical or electronic mode, on another ASBA Bid cum Application Form or a non-ASBA Bid cum Application Form. Submission of a second Bid cum Application Form, whether an ASBA Bid cum Application Form, to either the same or to another Designated Branch of the SCSB, or a Non-ASBA Bid cum Application Form, will be treated as multiple Bids and will be liable to be rejected either before entering the Bid into the electronic bidding system, or at any point of time prior to the allocation or Allotment of Equity Shares in this Issue. However, the ASBA Bidder can revise the Bid through the Revision Form, the procedure for which is detailed in “—**Build up of the Book and Revision of Bids**” above.

More than one ASBA Bidder may Bid for Equity Shares using the same ASBA Account, provided that the SCSBs shall not accept a total of more than five ASBA Bid cum Application Forms from such ASBA Bidders with respect to any single ASBA Account.

The Company reserves the right to reject, in their absolute discretion, all or any multiple Bids in any or all categories. In this regard, the procedures which would be followed by the Registrar to the Issue to detect multiple Bids are provided below:

1. A check will be carried out for the same PAN. In cases where the PAN is same, such Bids will be treated as multiple Bids.
2. Further, in the case of Mutual Fund Bidders, Bids which use the same PAN, the Bid cum

Application Forms will be scrutinised for DP ID and Beneficiary Account Numbers. In case such Bid cum Application Forms bear the same DP ID and Beneficiary Account Numbers, these will be treated as multiple applications.

‘PAN’ or ‘GIR’ Number

Except for Bids on behalf of the Central or State Government, residents of Sikkim and the officials appointed by the courts, the Bidders, or in the case of a Bid in joint names, each of the Bidders, should mention his/her PAN allotted under the I.T. Act. In accordance with the ICDR Regulations, the PAN would be the sole identification number for participants transacting in the securities market, irrespective of the amount of transaction.

Any Bid cum Application Form without the PAN is liable to be rejected. It is to be specifically noted that Bidders should not submit the GIR number instead of the PAN as the Bid is liable to be rejected on this ground.

Right to Reject Bids

In case of Non-Institutional Bidders and Retail Individual Bidders, the Company has the right to reject Bids based only on technical grounds and/or as specified in this Draft Red Herring Prospectus. In case of QIB Bidders Bidding in the QIB Portion, the Company, in consultation with the members of the Syndicate, may reject Bids provided that such rejection shall be made at the time of acceptance of the Bid and the reasons for rejecting the same shall be provided to such Bidder in writing. However, the Company, in consultation with the BRLMs, reserves the right to reject any Bid received from Anchor Investors without assigning any reasons. Consequent refunds shall be made through any of the modes described in this Draft Red Herring Prospectus and will be sent to the Bidder's address at the Bidder's risk.

With respect to ASBA Bids, the Designated Branches of the SCSBs shall have the right to reject ASBA Bids if at the time of blocking the Bid Amount in the Bidder's bank account, the respective Designated Branch of the SCSB ascertains that sufficient funds are not available in the Bidder's bank account maintained with the SCSB. Subsequent to the acceptance of the ASBA Bid by the SCSB, the Company would have a right to reject the ASBA Bids only on technical grounds and/or as specified in this Draft Red Herring Prospectus.

The Bidders may note that in case the DP ID, Beneficiary Account Number and PAN mentioned in the Bid cum Application Form and entered into the electronic Bidding system of the Stock Exchanges by the Syndicate and the SCSBs, as the case may be, do not match with the DP ID, Beneficiary Account Number and PAN available in the depository database, the Bid is liable to be rejected.

- (d) Revisions can be made in both the desired number of Equity Shares and the Bid Amount by using the Revision Form. Apart from mentioning the revised options in the Revision Form, the Bidder must also mention the details of all the options in his or her Bid cum Application Form or earlier Revision Form. - (f) Any revision of the Bid shall be accompanied by payment in the form of cheque or demand draft for the incremental amount, if any, to be paid on account of the upward revision of the Bid. The excess amount, if any, resulting from downward revision of the Bid would be returned to the Bidder at the time of refund in accordance with the terms of this Draft Red Herring Prospectus. With respect to ASBA Bids, if revision of the Bids results in an incremental amount, the relevant SCSB shall block the additional Bid amount. In case of Bids other than ASBA Bids, the members of the Syndicate shall collect the payment in the form of cheque or demand draft if any, to be paid on account of the upward revision of the Bid at the time of one or more revisions. In such cases the members of the Syndicate will revise the earlier Bid details with the revised Bid and provide the cheque or demand draft number of the new payment instrument in the electronic book. The Registrar to the Issue will reconcile the Bid data and consider the revised Bid data for preparing the basis of Allotment.

When a Bidder revises his or her Bid, he or she shall surrender the earlier TRS and will, on demand, receive revised TRS from the Syndicate or SCSBs, as applicable. It is the responsibility of the Bidder to request for and obtain the revised TRS, which will act as proof of his or her having revised the previous Bid.

Method of Proportionate Basis of Allotment in the Issue (for other than Anchor Investors)

Except in relation to Anchor Investors, in the event of the Issue being over-subscribed, the Company shall finalise the basis of Allotment in consultation with the Designated Stock Exchange. The Executive Director (or any other senior official nominated by them) of the Designated Stock Exchange along with the BRLMs and the Registrar to the Issue shall be responsible for ensuring that the basis of Allotment is finalised in a fair and proper manner.

Except in relation to Anchor Investors, the Allotment shall be made in marketable lots, on a proportionate basis as explained below:

- a) Bidders will be categorized according to the number of Equity Shares applied for.
- b) The total number of Equity Shares to be allotted to each category as a whole shall be arrived at on a proportionate basis, which is the total number of Equity Shares applied for in that category (number of Bidders in the category multiplied by the number of Equity Shares applied for) multiplied by the inverse of the over-subscription ratio.
- c) Number of Equity Shares to be allotted to the successful Bidders will be arrived at on a proportionate basis, which is total number of Equity Shares applied for by each Bidder in that category multiplied by the inverse of the over-subscription ratio.
- d) In all Bids where the proportionate Allotment is less than [●] Equity Shares per Bidder, the allotment shall be made as follows:

- The successful Bidders out of the total Bidders for a category shall be determined by draw of lots in a manner such that the total number of Equity Shares Allotted in that category is equal to the number of Equity Shares calculated in accordance with (b) above; and
 - Each successful Bidder shall be Allotted a minimum of [●] Equity Shares.
- e) If the proportionate Allotment to a Bidder is a number that is more than [●] but is not a multiple of one (which is the marketable lot), the decimal would be rounded off to the higher whole number if that number is 0.50 or higher. If that number is lower than 0.50, it would be rounded off to the lower whole number. Allotment to all in such categories would be arrived at after such rounding off.
- f) If the Equity Shares allocated on a proportionate basis to any category are more than the Equity Shares allotted to the Bidders in that category, the remaining Equity Shares available for Allotment shall be first adjusted against any other category, where the allotted shares are not sufficient for proportionate Allotment to the successful Bidders in that category. The balance Equity Shares, if any, remaining after such adjustment will be added to the category comprising Bidders applying for minimum number of Equity Shares.

Subject to valid Bids being received, Allotment of Equity Shares to Anchor Investors will be at the discretion of the Company, in consultation with the BRLMs.

Bidders other than ASBA Bidders must note that on the basis of the names of the Bidders, PAN, DP ID, Beneficiary Account number provided by them in the Bid cum Application Form, the Registrar to the Issue will obtain, from the Depositories, the Bidders’ bank account details, including the MICR code. Hence Bidders are advised to immediately update their bank account details as appearing on the records of the Depository Participant. Failure to do so could result in delays in dispatch of refund order or refunds through electronic transfer of funds, as applicable, and any such delay shall be at the Bidders’ sole risk and neither the Company, the Registrar to the Issue, Escrow Collection Bank(s), Bankers to the Issue nor the BRLMs shall be liable to compensate the Bidders for any losses caused to the Bidder due to any such delay or liable to pay any interest for such delay.

Mode of making Refunds for Bidders other than ASBA Bidders

The payment of refund, if any, for Bidders other than ASBA Bidders would be done through various modes in the following order of preference:

1. ECS – Payment of refund would be done through ECS for Bidders having an account at any of the centres specified by the RBI. This mode of payment of refunds would be subject to availability of complete bank account details including the MICR code from the Depositories. The payment of refunds is mandatory for Bidders having a bank account at any of the abovementioned centres, except where the Bidder, being eligible, opts to receive refund through direct credit or RTGS.

Such eligible Bidders who indicate their preference to receive refund through RTGS are required to provide the Indian Financial System Code (“**IFSC**”) code in the Bid cum Application Form. In the event the same is not provided, refund shall be made through ECS. Charges, if any, levied by the Refund Bank(s) for the same would be borne by the Company. Charges, if any, levied by the Bidder’s bank receiving the credit would be borne by the Bidder.
4. National Electronic Fund Transfer (“**NEFT**”) – Payment of refund shall be undertaken through NEFT wherever the Bidders’ bank branch is NEFT enabled and has been assigned the IFSC, which can be linked to an MICR code of that particular bank branch. IFSC Code will be obtained from the website of RBI as on a date prior to the date of payment of refund, duly mapped with an MICR code. Wherever the Bidders have registered their MICR number and their bank account number while

opening and operating the demat account, the same will be duly mapped with the IFSC Code of that particular bank branch and the payment of refund will be made to the Bidders through this method. The process flow in respect of refunds by way of NEFT is at an evolving stage and hence use of NEFT is subject to operational feasibility, cost and process efficiency and the past experience of the Registrars to the Issue. In the event NEFT is not operationally feasible, the payment of refunds would be made through any one of the other modes as discussed in this section.

5. For all other Bidders, including those who have not updated their bank particulars with the MICR code, the refund orders will be dispatched under certificate of posting for value up to Rs. 1,500 and through Speed Post/Registered Post for refund orders of Rs. 1,500 and above.
